The G.W.R., was built in 1910, and was used for transporting timber from Greenock swamp to the Cargill mills, a distance of about nine miles. The equipment consists of a huge engine operated by gasoline power and several flat cars. Wooden rails were first used when the line was built 12 years ago, but these were found to be unsatisfactory and were soon torn up and replaced by steel rails.

This road cost high to build, especially as there are a couple of bridges on the route.

## GIBSON MINING CO.

The assets of the Gibson Mining Company, consisting of seven silver and silver lead properties near Kaslo, B.C., have been sold to Joseph C. Roberts, of Portland, Ore., for $76,000. The company is in liquidation.

## DURANT MOTOR PLANT

A contract has been awarded to Norman McLeod, Limited, by the Durant Motors of Canada, Limited, for the construction of the new buildings at Leaside, Ont. Two buildings, three stories high, and one large shipping building will be erected, costing approximately $1,000,000. Work has already started, and the contract calls for completion by December 1.

The new plant will have a floor space of 500,000 square feet, or five times the present space. It will be modern in every respect and will be used exclusively for the manufacture of the Star car. Production for 1923 calls for 18,000 cars, 10,000 for domestic trade and 8,000 for export.

## DEBENTURES FOR SALE

## TOWN OF WESTON

### Tenders

Tenders will be received by the undersigned up to five o'clock p.m. on Monday the 21st day of August, 1922 for the purchase of $25,000.00 5½% Electric Light Debentures, repayable in twenty equal annual instalments.

The taxable assessment is $2,498,502; tax rate, 46 mills; population, 3,300; debt, (exclusive of local improvements) $357,206.39.

The highest or any tender not necessarily accepted.

J. H. TAYLOR,
Town Clerk,
Weston, Ont.

## CANADIAN PACIFIC RAILWAY COMPANY

### Dividend Notice

At a meeting of the Board of Directors held to-day the following dividends were declared:

On the Preference Stock, two per cent. for the half-year ended 30th June last:

On the Common Stock, two and one-half per cent. for the quarter ended 30th June last, being at the rate of seven per cent. per annum and in addition three per cent. per annum from Special Income Account.

Both dividends are payable 30th September next to shareholders of record at 3 p.m. on 1st Septeember next.

By order of the Board,

ERNEST ALEXANDER,
Secretary.

Montreal, 14th August, 1922.
18

## THE OGILVIE FLOUR MILLS COMPANY, LTD.

### Dividend Notice

Notice is hereby given that a quarterly dividend of one and three quarters per cent has been declared on the Preferred Stock of the Ogilvie Flour Mills Company, Limited, payable Friday the first day of September 1922 to shareholders of record at the close of business Tuesday the twenty-second day of August 1922. Books do not close.

By Order of the Board.

G. A. MORRIS,
Secretary-Treasurer.

Montreal, August 11th, 1922. 15

# *Corporation Finance*

**Brazilian Traction, L. & P. Co.**—At the annual meeting of the shareholders on August 3 the assurance that a second dividend payment of one per cent., might be looked for with confidence by the shareholders on December 1 was given. The report presented, as previously pointed out in these columns, shows that, while earnings in terms of milreis for the 12 months ended December 31 exceeded by a wide margin returns for the previous year, yet, under the handicap of exchange when reduced to Canadian funds, a considerable decline was indicated. The outlook, however, was stated to be considerably better and the optimism which was evident among the directors spread to the shareholders, who appeared to be well satisfied with the condition of the company's affairs.

Sir William Mackenzie presided, and among the other directors present were: E. R. Wood, vice-president; D. B. Hanna, Miller Lash, K.C.; Sir Thomas White, Sir Henry M. Pellatt, and Sir John Aird.

With regard to the outstanding obligations of $7,500,000 notes due November 1, Mr. Wood stated that the directors had already redeemed $2,000,000 of them by buying in the open market and that they had cash in the bank to meet the balance if it was desired to do so. With regard to new power development on the Parahyba River, it was pointed out that the expenditure on this would probably be spread over three or four years, and that it was not ilkely that the cost of the new construction would be found to be a burden on the company.

In discussing the matter of dividends Mr. Wood pointed out that while the directors could give no assurance of the continuity of dividends on account of the exchange situation and the lack of a gold basis in conection therewith, nevertheless the company was getting into a position where it hoped to be able to continue the dividends, and that at any rate the shareholders might expect to get another one per cent. distribution on December 1. The good physical condition of the equipment and the efficiency of the management were emphasized by the vice-president, who pointed out that the future of the company as regards the shareholders' profits depended greatly on the exchange.

**Riordon Co. Ltd.**—Under date of July 31, 1922, R. Montague Davy, chairman of the Creditors' Committee of the Riordon Company, has issued a letter to the creditors of the company, which reads in part: "We are pleased to report that since our letter of March 23 the Riordon Company has shown a steady improvement. Following are the bank loans and the reductions made since our last letter:—

| Bank loans | Imp. B'k | B'k Mont. |
|---|---|---|
| March 23, 1922 | $2,442,103 | $1,167,959 |
| July 31, 1922 | 2,374,797 | 639,707 |
| Total reductions | $ 67,305 | $ 528,252 |
| To which add accounts receivable resulting from current operations, signed to bank, amounting to | $ 465,000 | |
| Net betterment | $ 532,305 | $ 528,252 |

"This is a net improvement of $1,060,557 and a total improvement since November 17, 1921, of $1,863,835.

"This is a particularly good showing, since, during that period, there has been expended $268,153 on harvesting last year's logs in streams.

"The sales outlook is more reassuring than for any time for the past two years. The full output of pulp from both the Kipawa and Hawkesbury mills has been marketed at satisfactory prices up to date and orders are now on hand to cover the production for the summer months—a period which is usually a dull one. Calumet sawmill has been in operation since May, and will be run day and night for the balance of the sawing season.

"The Gatineau Company's timber limits and mill properties, which were bought from W. C. Edwards & Co., Ltd., and from Gilmour & Hughson, Ltd., have been subject to forfeiture and sale, since the Gatineau Company has been in default on its payments. Your committee is glad to announce that arrangements have been consummated with both W. C. Edwards & Co. and Gilmour & Hughson, Ltd., whereby this possibility is averted, and the obligations on these limits and properties have been reduced to a reasonable sum.

"This has been accomplished in the following manner: Outlying limits of the Gatineau Company have been sold for a total of $1,900,000, which is an increase of about 60 per cent. over the average purchase price. The areas of limits are as follows:

| | Edwards sq miles | Gilmour & Hughson sq. miles | Total sq. miles |
|---|---|---|---|
| L'ts purchased | 4,407 | 3,484 | 7,891 |
| Limits sold | 1,312 | ........ | 1,312 |
| L'ts retained | 3,095 | 3,484 | 6,579 |

"The obligation to the Edwards Co. as of April 1, 1922, was approximately $3,500,000. The sale of outlying limits (partly credited in the foregoing figure of April 1) plus the payment of about $500,000, new money, reduces the indebtedness to the Edwards Company to $1,550,000, which is not due until 1925.

"The obligation to Gilmour & Hughson, as of April, 1, 1922, was about $2,240,000. Payment of $240,000 is being made at the present time; the remaining $2,000,000 to be reduced to $1,500,000 by January 1, 1925, and the balance to be paid off by January 1, 1930.

"These payments were made possible by a loan upon the security bonds of the Gatineau Company.

"The consummation of this arrangement puts one of the most serious problems of the company behind it, but your committee wishes to point out that there still remains the question of providing working capital, which will have to be taken up before the logging operations begin in the fall. This will be dealt with later at greater length.

"To sum up the result of operations to date, we would emphasize the fact that large quantities of inventory material have been converted into cash, thereby building up future capital by increasing the existing equity in the inventories over and above the bank loans; and the negotiations explained above have saved to the company an equity in the Gatineau property which, it is estimated, will go far in asset value to offset the bonded indebtedness of the company."

**Barcelona Traction, L. & P. Co.**—The gross earnings of the company for the month of June, which amounted to 3,617,712 pesetas, were slightly lower than in the previous month, but as the operating expenses showed a decline of 165,155 pesetas when compared with the previous month, the net earnings were up 103,577 pesetas, the net increase over the corresponding month a year ago being 313,633 pesetas.

The combined results of the exploitation of the companies which operate independently in Spain in which the Barcelona Traction, Light and Power Co., Limited, is interested, excluding Les Tramways de Barcelone, are:—

| | Pesetas | |
|---|---|---|
| June | 1922 | 1921 |
| Gr. earnings fm. oper. | 3,617,712 | 2,912,556 |
| Oper. exp. | 1,529,538 | 1,138,015 |
| Net earnings | 2,088,174 | 1,774,541 |
| Agg. gr. earn. fm. Jan. 1 | 22,515,219 | 18,100,834 |
| Agg. net earn. fm. Jan. 1 | 13,687,012 | 11,647,132 |

## ROYAL TRUST COMPANY APPEAL

In the judicial committee of the privy council on July 31 their lordships allowed the Alberta appeal of the Royal Trust company, acting as executors against the Canadian Pacific Railway increasing the damages of the widow of the late Dr. W. Chambers, of Calgary, from $25,000 to $42,000. The respondents will pay two-thirds of the cost.

The late Dr. W. Chambers, of Calgary, who was an eye, ear and throat specialist in Calgary, in receipt of a large income from his practice, was killed in a railway accident on the Canadian Pacific railway about two years ago. The widow sued for heavy damages, the Canadian Pacific railway being willing to settle for $40,000, acknowledging responsibility for the accident. The settlement was refused and the case went to trial before Justice Hyndman.

Justice Hyndman assessed the damages to the widow of $65,000 and to the infant son of $15,000. The appellate division reduced the damages to the widow to $25,000, leaving the damages to the son unchanged.

The Royal Trust company, acting as executors of the will, appealed to the privy council in London.

## CREDITORS' DIVIDEND WILL BE SMALL

### Fairbanks, Gosselin and Company Liquidator Reports Large Deficiency

A report to the creditors of the defunct stock brokerage firm of Fairbanks, Gosselin & Co., has been made by Gordon W. Scott, the trustee, in which he reports a deficiency of $447,420. The report says:

"The firm speculated on an extensive scale on their own account, through the medium of various fictitious accounts which they called 'House Accounts', the loss through these fictitious house account tradings being $578,371, the major portion of this loss being accounted for as follows: Loss on Atlantic Sugar, $178,000; on U. S. Steel, $101,000; on Ames-Holden, $83,000.

"In addition thereto trading in U. S. Funds or Exchange a loss of approximately $153,000 was suffered, and smaller losses on numerous other stocks, less profits on some transactions, as well as commission, interest, etc.

### Assets Disposed of

"The progress of liquidation has been slow, due to the many complications. The securities have ben disposed of, and we are now awaiting favorable opportunity to dispose of the stock exchange seat. The question as to what action shall be taken in connection with the Bryant Dunn claim is under consideration by the inspectors, and a decision will be made after obtaining legal advice.

"An arrangement was made with the banks that we would abandon to them all the securities they held as collateral against loan in consideration of their withdrawing all claims against the Estate, and this was considered by the inspectors and trustees as a very satisfactory arrangement, more especially in view of the fact that in our estimation the value of these securities was considerably less than the amount of the debt due to these banks and would no doubt shrink further upon realization. This opinion was borne out and supported in the transaction in connection with the building on Notre Dame street, which was sold by the Bank, who realized some $11,000 in satisfaction of the $27,000 mortgage.

"From the present indications it will be some time towards the end of the year before the estate will be finally wound up, and it would appear as if the creditors could not hope for a greater dividend than three to five cents on the dollar. In the meantime, every effort is being put forward to obtain the best results.

"The Merchants Bank claim ownership of the Stock Exchange seat, which is being contested by the inspectors and trustees. Should the Merchants Bank be successful it will naturally cut down the aforementioned estimated dividend."

## CONSTRUCTION CONTRACTS IN ONTARIO

### July Estimates Higher Than Last Year, But Lower Than in June—Residences Lead in Value

During July, construction contracts awarded in Ontario, according to MacLean Building Reports, Limited, amounted to $15,033,700, compared with $15,984,100 in June and $7,656,000 in July a year ago. The Ontario figures, according to classifications or types are as follows:—

| Type | No. of Projects | Value |
|---|---|---|
| Apartments | 6 | $ 68,000 |
| Churches | 8 | 193,000 |
| Factories | 14 | 1,020,000 |
| Public Garages | 20 | 188,300 |
| Hospitals | 1 | 10,000 |
| Hotels and Clubs | 4 | 25,200 |
| Office Buildings | 4 | 278,800 |
| Public Buildings | 10 | 293,100 |
| Residenecs | 1127 | 5,446,900 |
| Schools | 36 | 1,335,400 |
| Stores | 64 | 848,000 |
| Theatres | 1 | 4,000 |
| Warehouses | 9 | 778,000 |
| Total Buildings | 1304 | 10,488,700 |
| Bridges | 8 | 45,100 |
| Dams and Wharves | 1 | 6,000 |
| Sewers and Water Mains | 17 | 245,400 |
| Roads and Streets | 25 | 876,500 |

**BUILDING YOUR BUSINESS**

In building a life agency business it is a most valuable asset for the underwriter to associate himself with a Company whose name is his "open-sesame" to the life insurance business in his district.

The North American Life is high in the esteem of the insuring public. Why?

Popular policies, liberal dividends and the great enthusiasm of all our agents is the answer.

Some good agency openings are available.

Correspond with
E. J. HARVEY, Supervisor of Agencies.

## A Gift That Can Never Be Lost

Your daughter—or a dearly loved god-child—is going to be married. You would like to give her a gift that will last forever. Jewels or plate may be stolen; real estate may decline in value; bonds may be squandered in a speculative whim. What shall you give her?

There is just one gift that no thief, no carelessness, no momentary embarrassment, no disaster can steal from her; and that is a Trust Fund placed with

**The Canada Permanent Trust Co.**

Year after year the Trust Fund makes her happy with your gift;—over and over again, as long as she may live. Whatever changes the years may bring to her, that gift of your love is always hers.

Such a Trust Fund will be invested in any way you may direct; or you may leave its investment to our discretion. In any case our financial experts will see to it that it brings to her whom you wish to favor the largest return consistent with perfect security.

Remember that a Trust Fund is an everlasting gift when in the hands of

# Life Underwriters Hold Joint Convention at Toronto

### Meeting Held This Week Was Representative of Organizations in Both Countries—Business and Income Insurance and Inheritance Taxes Were Prominent Items on Program—Convention Was Third Event of the Kind

Life Underwriters of the United States and Canada held their third international convention in Toronto this week, August 22 to 24. The former are organized in the National Association of Life Underwriters, and the latter in the Life Underwriters' Association. On two previous occasions, the first time in Toronto, and the second in New York, the two associations held their annual meetings together.

The organization in charge of the meeting was as follows: Presidents, John L. Shuff, National Association of Life Underwriters, and J. G. Stephenson, Life Underwriters' Association of Canada; Council: Edward A. Woods, Pittsburgh; Neil D. Sills, Richmond; Ernest J. Clark, Baltimore; John A. Tory, Toronto; J. T. Wilson, Halifax; W. Lyle Reid, Ottawa; Secretaries: Everitt M. Ensgin, exectuive secretary, N.A.L.U.; J. H. Castle Graham, general secretary, L.U.A.C.

A number of membesr of the executive arrived in Toronto on Sunday, and were entertained by H. C. Cox, president of the Canada Life Insurance Company. On Monday executive meetings of the two associations were hed, preparatory to the convention itself.

Features of the convention were the fact that no read papers were permitted, and the large number of discussions and illustrations of practical value to the field man. On the social side there was a picnic on Tuesday afternoon, and the annual banquet on Wednesday evening. A summary of the business on the program is given below:

**August 22, 1922**

Tuesday Morning

9.50: Welcome to American Delegation—His Worship, Mayor Maguire; J. G. Stephenson, President Life Underwriters' Association of Canada.

10.00: Response—By John L. Shuff, President, The National Association of Life Underwriters.

10.10: I. "Human Element in Salesmanship" —By Dr. John A. Stevenson.

10.45: II. "How Men Are Influenced to Buy" —By W. W. Charters of Bureau of Personnel Research, Carnegie Institute of Technology, Pittsburgh, P.

11.15: III. "The Close."

(a) "Tests for the Close."

(b) "Cultivation of the 'Yes' Attitude on the Part of the Prospect"—By James Elton Bragg, Instructor, School of Life Insurance Salesmanship, New York University.

11.45: Special Announcement—By Dr. John A. Stevenson.

12.00: Report Executive Committee.

Tuesday Afternoon

President Stephenson presiding

2.05: "Life Income Insurance"—By L. N. L'Esperance.

2.15: Case Discussion—Opened by Chas. Jerome Edwards.

**Life Income Cases**

(a) 1. Picture—Sam Wilson, 27 years old; wife, 25; one child two years old. Is a travelling salesman, earning a salary of $3,000 a year. He has bought a house for $8,000, on which he still owes $5,000, that is to be paid on the instalment plan at the rate of $600 a year. Interest on mortgage is 7%. eH carries no life insurance.

(b) 2. Picture—M. H. Black, age 41; wife, 40; son, 6. In General Insurance business—income about $3,500 a year. His mother and an invalid brother are partially dependent on him. Has never saved any money except through his insurance; owns no property. Carries $5,000 insurance on Twenty Payment Life plan, in force about ten years—present net deposits about $140 annually.

3. Picture—J. B. James, age 43; wife, 40; son, 13. Electrical engineer employed by large electrical firm at $5,000 a year. Owns home. Has $3,000 insurance on the Ordinary Life plan and $2,000 on Twenty Payment Life plan. Mr. and Mrs. James have hopes of their son entering business for himself, as he already is very much interested in electricty.

(b) 4. Picture—B. A. Simpson, civil engineer, 50 years old; wife, 47; two daughters, 18 and 16 years of age. Wife has had no experience in business, though she is a practical woman. He earns about $5,000 a year from his profession; owns home worth about $12,000, well located and attractive. House mortgaged for $5,000. Carries $5,000 of insurance on Ordinary Life plan—premiums about $130 annually. He saves a little, but irregularly. Daughters are rather extravagant for his means; both have been temporarily employed as clerks. They have no idea of going to college. Mr. Anderson has a idea of going to college. Mr. Simpson has a well-to-do brother, who does many things for the family, from whom the girls no doubt expect some legacy at his death.

(c) 5. Picture—John A. Alderson, wholesale shoe merchant. Firm rating, $100,000. Personal wealth, $500,000. Age about 50; wife, 47. Has two children—daughter 18, son, 10. Director of the Faithful Trust Company and Round Tube Works. Owns $50,000 house, clear. Member D— Club, Chamber of Commerce, and interested in Salvation Army and School for the Blind. Carries $50,000 insurance, paid up.

3.10 p.m.: Discussion closed—By Chas. Jerome Edawrds.

3.20: "Business Insurance"—By Wm. J. Graham.

3.30: Case Discussion—Opened by Wm. May, Jr.

**Business Insurance Cases**

1. Picture—A partnership consists of two males, ages 60 and 40. Each has invested $5,000 in the business. The elder is an experienced buyer and is thought highly of at the bank. The younger is full of good ideas and is a good salesman, possessing energy and initiative.

2. Picture—The Edge Manufacturing Company is capitalized at $10,000. Its president, John Smith, is 45 yars old and is the important man as to ability and finance. The directors desire to raise $25,000 by means of a bond issue. You want to sell Business Insurance to them. Can you carry out your plan and at the same time help them to sell the bonds?

3. Picture—Three young men ages 27, 29 and 32, respectively, start a grocery business with a capital in cash or bank credit of $5,000, and wholesaler's credit of $10,000. The one aged 29 manages the business. The other two supply most of the capital. How much insurance should they carry? What policy should they use? Should it be joint or individual?

(b) 4. Picture—Mr. Edward Harrison, age 35; married, no children. Has been earning a salary of about $5,000 a year as an electrical engineer, but has given up his position and has bought a small factory for making a certain kind of lens for automobile lights. He was able to start the business by investing $50,000 which he had inherited from his father's estate and because of the fact that a number of his friends were convinced that the enterprise would be profitable and had been willing to invest another $25,000. Carries $10,000 War Risk Insurance and wife has independent income of $800 a year.

5. Picture—This is a private corporation consisting of John Ward, age 50, and four young associates. The capital is $100,000 and is largely owned by Mr. Ward, the founder of the concern. They are bond dealers and have to borrow large sums from the bank. These negotiations are invariably carried out by Mr. Ward. Mr. Ward gave his youthful associates one-fifth of the shares, with the idea of interesting them permanently in the business. He does not desire to have these shares go to the estates of the junior members in the event of their prior death. The junior members naturally desire to carry on the business after Mr. Ward's death. What insurance program would you suggest? Who should be the beneficiaries? Who should pay the premiums?

4.25 pm.: Discussion closed—By W. M. May, Jr.

4.30: Appointment nominating committees.

**Notes**

(a) Case taken from "The Case Method" by Dr. Griffin M. Lovelace, Harper Bros.

(b) Cases taken from "Selling Life Insurance" by John A. Stevenson, Harper Bros.

(c) Case taken from "The Pychology of Selling Life Insurance" by Dr. E. K. Strong, J. Harper Bros.

**August 23, 1922**

Wednesday Morning

President Shuff presiding

9.40: "Human Needs Supplied by Life Insurance"—By Hon. Frederick A. Wallis.

10.10: "Graphic Methods of Opening the Interview"—Led by Earl G. Manning.

Objects used:—

1. Picture or Report of an Orphan Asylum.
2. United States Treasury Thrift Budget.
3. War Risk Insurance Policy.
4. "The House of Protection."
5. A Cigar.
6. A Morning Paper.
7. A Few Pennies.
8. Deposit Slip.
9. Replies to Advertisements.
10. A Cartoon.
11. The Farmer's Chickens.
12. Travel Booklets, etc.

11.15: President's Prize Contest—Open to Canadians only.

Subject: "Most Novel and Effective Method of Presenting Life Insurance by Graphic Methods."

11.50: Discussion closed—By Earl G. Manning.

12.00 M. Report Nominating Committees.

Wednesday Afternoon

(Industrial Section)

2.10: Industrial Insurance Problems in 1923 —Address by James E. Kavanagh.

2.40: General discussion—Led by J. F. Maine.

3.10: Methods of Preventing Lapses—Opened by J. G. Stephenson.

3.30: Discussion—By J. J. McSweeney.

(Insurance for Credit)

2.05: "Standard Credit Forms Inquiring About Business Life Insurance Carried to Protect Credit"—Address by A. R .Spier.

2.25: "Protecting Bank Loans by Life Insurance"—Address by H. W. Manning.

2.45: Discussion—Led by L. J. Lugsden.

2.55: "Using Life Insurance by Businesses, Individuals, Partnerships and Corporations to Build Up and Maintain Credit"—Address by J. tSanley Edwards.

3.15: Discussion—Led by A. H. Kollenberg.

3.30: "Life Insurance to Protect Mortgages" —Address by E. J. Clark.

3.50: Discussion—Led by W. Lyle Reid.

4.00: "Life Insurance to Protect Bond Issues"—Address by A. O. Eliason.

4.15: Discussion—Led by R. E. Campbell.

4.25: Session closed by Chas. Jerome Edwards.

(Insurance for Inheritance Tax)

2.10: "The Present Status of Inheritance Tax Life Insurance"—Address by Franklin W. Ganse.

2.30: "Recent Changes and Developments in Inheritance Tax Legislation"—Address by Courtenay Crocker, Esq., of Boston, Counsel of the Trust Department of the First National Bank of Boston.

3.00: Developments illustrated by Recent Cases—George L. Dyer, St. Louis; Earl G. Manning, Boston.

3.35: Questions and Discussion—Led by Franklin W. Ganse.

(Agency Building)

2.05: The Ideal Metropolitan Agency—Talk by Paul F. Clark.

2.35: Organizing and Handling an Agency of Urban and Rural Territory—Talk by A. E. Lawson.

2.55: Methods of Selecting Agents—Talk by John Marshall Holcombe, Jr.

3.30: The New Agent's First Six Months—Talk by Winslow Russell.

3.50: Methods of Stimulating Production—Talk by E. L. Carson.

4.05: General Discussion—Led by Wm. M. Duff. Closed by A. J. Meiklejohn.

August 24, 1922

Thursday Morning

9.40: "Life Insurance Programs"—By Franklin W. Ganse.

9.50: Case Discussion—Opened by Ernest W. Owen.

10.45 a.m.: Discussion closed—By Franklin W. Ganse.

(b) Case taken from "The Psychology of Selling Life Insurance" by Dr. E. K. Strong, Jr.

(c) Cases taken from "The Case Method" by Dr. Griffin M. Lovelace, Harper Bros.

10.55: "Meeting Objections"—Led by Ed. Morwick.

11.05: Case Discussion Opened by J. T. Wilson.

11.55 a.m.: Discussion closed By J. T. Wilson.

August 24, 1922

Thursday Afternoon

President Stephenson presiding

2.00 p.m.: Singing—Led by W. G. Eisenhauer.

2.05: President's Prize Contest—Open to Americans only.

Subject: "Most Novel and Effective Methods of Presenting Life Insurance by Graphic Methods."

Awarding prizes for Wednesday morning and this afternoon contests.

2.45: Address—By H. C. Cox.

3.20: Address—By Frank H. Davis.

An official welcome was extended to the delegates by Mayor Maguire. "I am only too glad to welcome to Toronto men of the calibre of the Life Underwriters of two countries," said his Worship, who spoke briefly. "If there is anything which you would desire while in this city you have only to ask. The people of Toronto extend to you a hearty welcome and hope that your visit may result in the carrying away of many pleasant recollections of your stay."

A feature of the Tuesday session was the presentation to the convention of a large banner bearing the motto: "Life—the greatest thing in the world," by J. C. Staples, of Philadelphia, which was hung up behind the speakers platform.

President J. C. Stephenson of the Life Underwriters Association of Canada, made a very brief address. He extended the greetings of the Canadian fraternity to the American visitors and hoped that the convention would prove a success in the eyes of every individual who attended.

### Officers Elected

The following officers were elected by the Life Underwriters' Association of Canada for the coming year:—

Honorary president, J. G. Stephenson; president, A. E. Lawson; vice presidents, British Columbia, J. W. Hudson; Alberta, J. T. McCay; Saskatchewan, F. W. Graham; Manitoba, R. H. Wright; Ontario, W. R. Widdes; Quebec, J. T. Lachance; New Brunswick, R. C. Cruickshanks; Nova Scotia, B. W. Cameron; Prince Edward Island, W. G. Hogg; Newfoundland, J. A. McKenzie; Hon. Secretary, W. A. Peace.

JOHN G. STEPHENSON, retiring president of the Life Underwriters' Association, had the honor of presiding along with John L. Shuff, president of the National Association of Life Underwriters, at the largest meeting of life insurance men ever held. About 2,000 were present at the international convention in Toronto this week.

A. E. LAWSON, the new president of the Life Underwriters' Association of Canada, is field manager for the Confederation Life. Mr. Lawson's experience in the life insurance business has been gained over a long period, he having joined the Confederation Life staff as general agent at Halifax in 1902. Previous to this he had had a thorough business and financial training in banking and for a number of years occupied the position of manager of the Commercial Bank of Novt Scotia at Sydney, Cape Breton. After two years' experience as general agent for the association in Halifax he was appointed in November, 1904, manager for the province of Nova Scotia, assuming charge of the production of all the agents in the province. In this position he did valuable field work throughout Nova Scotia and Cape Breton, and in January, 1907, he was promoted to the postion of manager at Montreal, where he applied himself with energy and enthusiasm to the duties of his position, and his long banking and finacial experience stood him in good stead. In March, 1912, the position of field manager for Manitoba was created and Mr. Lawson was chosen.

## HARVEST NOW IN FULL SWING

### Threshing Already Commenced—New Wheat Now Coming Forward—Real Estate Is Improved

(Staff Special)

Winnipeg, Aug. 21.—Harvesting over the whole West in now in full swing, and in some sections threshing has already commenced. The yield in most districts is turning out quite satisfactorily and the rains of early August were of considerable benefit in many districts.

Marked improvement is shown in Southern Alberta in the falling off of the volume of foreclosure proceedings, and it is reported as a result of the operations of the Southern Alberta Relief Act, after a survey of the districts of the south recently known as the "drought area" that the operations of this Act are showing splendid results. The work done in the way of adjusting farmers' accounts and intervening between creditors and debtors is bearing fruit, proof of which is seen when it is stated that last week there was only one foreclosure case in the whole of Southern Alberta. In this whole district the outlook is for the best crop in several years, and on irrigated lands the crops are better than usual. The hay crop and feed situation generally throughout Alberta and other parts of the West has also been very good this year. Central and Northern Alberta are reporting fair yields, and only a few districts will suffer absolute loss from lack of moisture.

In Saskatchewan both cutting and threshing are general, and the weather has been favorable for the past two weeks. Some reports state that there will be an average of twenty bushels of wheat per acre in Sskatchewan and up to the present there has been very little damage from rust, and that the loss on account of pests would be very much smaller than it was last year. Generally speaking the reports from Saskatchewan are quite optimistic and late reports state that the prospects are brighter than they were two or three weeks ago.

Up to date there have been in the neighborhood of thirty-five thousand men come into the West to help garner the crop, and these have been distributed to various sections.

Regarding the Wheat Board idea, which has been dropped for this year, there does not seem to be much disappointment and the feeling is general that on the open market the farmers will be just as well off, and some think they will be better off, than if a price were set for the year's crop.

In Manitoba the crops seem to be the best, generally, of the three prairie provinces, and some splendid yields are being recorded.

Business throughout the West has materially improved during the last few weeks, and with threshing becoming general, and the year's crop getting to the elevators, business is already beginning to feel the benefit of new money getting in circulation. Collections have improved somewhat, and there is a splendid feeling of optimism as the result of the year's farming operations. It is generally expected that business throughout the West will be better than it has been for several years.

## EXCHANGE QUOTATIONS

Closing rates in Toronto Wednesday, compared with the preceding week, were as follows:

| | Aug. 16 | Aug. 23 |
|---|---|---|
| Sterling | 446.75 | 447.75 |
| France | 8.19 | 7.86 |
| British W. I. | .93⅝ | .93¾ |

| Belgium | 7.75 | 7.47 |
| Denmark | 21.56 | 21.60 |
| Germany | .12¼ | .06¾ |
| Greece | 2.95 | 3.25½ |
| Holland | 38.77 | 39.02 |
| Italy | 4.56 | 4.48½ |
| New York | 17/32 | 3/32 |

# Results of Railway Operation Improved

### Canadian National Has Probably Had Its Best Month This Year —Canadian Pacific's Operating Costs in May Increased, Due to Higher Expenditure on Maintenance of Way and Structures

(Special to The Monetary Times)

Ottawa, August 23.—The banking institutions do not take kindly to the Ontario Government's branch savings' scheme, and representations have been made to the authorities here on the ground of its unconstitutionality. Some legal authorities hold strongly to the view that the system is not constitutional, but as there seems to be a strong sentiment among the farmers of Ontario for it, to disallow it might not be considered expedient. Just now the farmers are a power in the land.

In the press summary of the May statement of operating revenue and expenses of Canadian railways, issued by the Bureau of Statistics, there are a few features that have been overlooked. It is true that both the Canadian National and the Grand Trunk made a much better showing than in May, 1921, and that their operating expenses decreased as compared with an increase in those of the C.P.R. In the case of the Canadian National the decrease was $1,162,494, or 10 per cent; in the case of the Grand Trunk it was $461,420 or 8 per cent. This, with an increase in gross earnings of 16 per cent for the former, brought its operating loss down from $2,554,540 in May last year, to $47,055 for May, 1922; the Grand Trunk's operating revenue was $610,572, as against $324,186 last year. The C.P.R's. net operating revenue for the month, however, was $254,104 less than for May, 1921, due chiefly to an increase of $701,191 in operating revenue.

The question naturally arises, why this increase in operating costs on the C.P.R., while those on the Canadian National and Grand Trunk decreased? The explanation is to be found in the fact that the C.P.R. spent more money both on maintenance of way and structures and equipment during the month than it did during May, 1921; while, on the other hand, the other roads spent much less. The C.P.R.'s expenditure on maintenance of way and structures was $587,134 greater and on maintenance of equipment $356,489 greater than in May, 1921. The Canadian National's expenditure for the same purposes was $143,000 less than in May, 1921; while that of the Grand Trunk was $360,000 less. The question naturally arises, to what extent are operating costs being reduced at the expense of maintenance? It is true that the Canadian National had a heavier gain in traffic than did the C.P.R. during the month.

#### Net Earnings The Real Test

These monthly statements of operating revenues and expenditure are of some value; but they do not anything like show the true state of affairs, which can only be disclosed by the net earnings and expenses. A reduction of $2,477,000 in the operating loss on the Canadian National for the month, as compared with that for May, 1921, is good; but against this should be taken into account the growth in fixed charges, which last year increased by over $7,000,000, and which are unlikely to be losses during 1922. As the Canadian National is up against a serious thing in the reduced grain rate, it is quite probable that it has experienced its best month this year. The Grand Trunk, however, should make a better showing than in 1921.

It is an ill wind that does not blow good for some. For example the Canadian Government's Mercantile Marine, should profit greatly through the coal miners' strike, which is creating such a strong demand for Welsh coal. From now until, near the end of the year, these vessels should be able to get pretty nearly all the business they can handle. It is understood that the United States Shipping Board has 45 vessels carrying coal. It is almost unnecessary to say that this unexpected new business is welcomed by both our own and the American government.

#### Improvement in Trade

It is generally known that export trade is recovering very fast; but it is not as generally known that Canada in her exports to the United States, has recovered more than she lost through the "emergency" tariff. That tariff came into effect on May, 28th, 1921, and in spite of the fact that there was a rush of exports to beat out its provisions, the value of these during that month was only 28,136,000;. But during May of this year the exports were actually $29,836,00 in June, 1921, through the effects of the tariff, the exports wropped to $23,574,000; but in June oft his year they wer $0,882,000, or actually 30 per cent. greater. The chief explanation is that what was lost in exports of farm products has ben more than made up through increased exports of lumber, pulp, and paper. July shows an increase of well on to 50 per cent. in exports to the United Stotes as against July, 1921.

There is very little chance of the United Kingdom again becoming permanently Canada's best market. It is true that she was so during the last twelve months, but if nothing else, the demand for Canada's lumber, pulp and paper in the United States will turn the scale heavily in the direction of the Republic. As soon as the increase in paper prices begins to swell the export figures, the growth in the value of exports to the United States will be even more marked than it is now. It is also quite probable that the eagerness to market quite a portion of this year's wheat crop before the close of uavigation will result in larger exports to the United States this year than was the case last.

#### The National Revenue

The revenue returns for July showing notable increases in customs, while the returns from the sales and stamp taxes bear out the impression that Mr. Fielding will probably get a great deal more money this year than he led the public to expect. What he receives from the increase present indications the amount will be a nice nest egg. There is also reason to think that the collections from the income tax will be better than many have thought.

There has been too much of a tendency to think that the collections from this source will fall off to the extent that they have in the United States. This view is not altogether warranted; for while it is true that incomes generally were not as large last year as they were in 1920, still it must be taken into account that in the United States many escaped the income tax to a considerable extent through changing from taxable to non-taxable investments. But the opportunities for doing so in Canada are not as numerous as they are on the other side; moreover the volume of non-taxable securities in Canada is being much reduced in this country, whereas in the United States it is continually growing.

deal more money this year than he led the pub-

## DOLLAR MAY NOT REMAIN AT PAR

### Some New York Bankers Predict A Reaction In Canadian Exchange—Outlook For Trade With Russia

( Special to The Monetary Times)

New York, August 23.—There seems to be murc difference of opinion among Canadian bankers here regarding the immediate future of the Canadian exchange market. For although the Canadian dollar touched par in the United States during the past week there are many bankers who seem to believe that this is not a permanent condition. Some are even predicting a marked reaction in exchange before the close of the year.

According to calculations made by N. H. Lawrie, of the American Gold and Silver Institute, the purchasing by the United States Treasury under the provisions of the Pittman Act, may be expected to continue to affect the silver market for about fifteen months. To replace silver dollars sold to Great Britain during the war, the Treasury still has to buy some 87,000,000 ounces. Purchasing will, therefore, continue at a dollar an ounce until about November 1923.

#### Advise Holding Wheat

Wallace's Farmer, perhaps one of the best informed farm papers in the United States is suggesting to its readers that it would be advisable for graingrowers to hold a larger proportion of their crops over for the higher prices which they predict will be forthcoming after the new year. Farmers, the paper says, should hold as much of their grain as possible until next April or May and not sell at present prices which are below the cost of production. The editors of the paper, brothers of the present Secretary of Agriculture, predict that a shortage of grain in Europe and a marked improvement in the business situation in the United States will bring much higher prices for grain in 1923.

The Commerce and Marine Commission of the American Bankers Association has issued a report on Russia and the business risks business men entertaining the idea of doing business in Russia must face, which should interest Canadians in view of the efforts the Canadian Minister of Trade and Commerce is making to facilitate Canadian trade with Russia.

American business men, the report states, can hope to gain very little by trading with Russia. Even with a trade agreement, trade could not have been large in the recent past with Russia; American manufacturers and capitalists cannot hope to be able to either sell goods in Russia or invest money there until a Government exists which does respect the rights of private property.

#### Buying Canadian Wheat

With the collapse of the plan to establish the Wheat Board, American buying of Canadian wheat has been resumed, according to local grain dealers. Now that the fear of Government control no longer hangs over the market, your correspondent is assured that it will continue.

While it is a little early to tell exactly what proportion of the holders of Dominion Victory Bonds of 1922 will take advantage of the conversion privilege offered by the Minister of Finance, some of the New York agencies of the Canadian banks report that quite a number of bondholders have already applied for longer term bonds. But in spite of this promising reply to the Minister's suggestion, there are a number of the holders of large blocks of the bonds who have preferred to accept payment in cash in December. A number of these have already bought Canadian futures in the Canadian exchange market against the day when the transfer of funds will be made.

## THE MODEL FIRE INSURANCE ACT

### Company Manager Claims Certain Clauses are Impracticable—Question Under Discussion at Vancouver

(Special to The Monetary Times)

Vancouver, Aug. 18.—The Model Fire Insurance Act which was under discussion by the Commission on Uniformity of Legislation at its sessions in Vancouver last week has apparently met with a deal of disapproval on the part of fire insurance managers as well as the provincial superintendents of insurance who attended the session of the legal men. As a result there is much uncertainty amongst local insurance men as to whether the act will be adopted. Nothing will be known in this regard until the commissioners bring down their report. The object in view was to draft an act which could be adopted by every province in Canada with the principal aim of making the statutory conditions of all policies uniform throughout the country.

Those insurance experts who were present claimed that several of the clauses proposed by the commissioners would prove to be impracticable in actual adjustments of losses. Controversy centred particularly upon the commissioners' plan to do away with the present method of arbitration in respect to any differences in the value of property damaged or destroyed by fire. The commissioners' proposal under such circumstances was for the appointment of one or possibly two appraisers instead of arbitrators. The insurance superintendents claimed that this would practically confer powers of a court upon the appraiser, whose word would be final and who would in reality be acting as an adjuster instead of an appraiser.

Amongst those who spoke strongly against this innovation was J. B. Laidlaw, of Toronto, while V. Evan Gray, superintendent of insurance for Ontario, presented the case for the superintendents. Local insurance men state that while the act as a whole is good, that certain features are so impracticable that it would not prove acceptable to all of the provinces and that hence the whole object of gaining uniformity of legislation on this important subject would be defeated. The commissioners on the other hand claim that their chief object in the case of the disputed clauses is to prevent delays in loss adjustments.

## PRELIMINARY CROP ESTIMATES

### Wheat, Oats, Barley, Rye and Flax-seed Are Expected to Be Higher Than Last Year

On August 10, 1922, Dom. Bureau of Statistics issued its monthly crop report containing (1) a preliminary estimate of the yield of fall wheat, hay and clover and alfalfa (first cutting); (2) the condition of other field crops on July 31, expressed numerically as a percentage of the decennial average for the period 1912-21, and (3) a forecast of the total yields of all crops, by provinces, as indicated by their condition on July 31. The report is based on the returns of Crop Correspondents. Conditions throughout Eastern Canada continue to be favorable. In the prairie provinces good rains have fallen throughout most parts of Manitoba, and in this province prospects generally are favorable. In Saskatchewan the crops in the southern districts are generally excellent; but in the central and northern districts the crops have suffered greatly from severe drought in July, and the yields indicated by the condition on August 1 are considerably below average. In Alberta the southern districts, usually the driest, have this year received ample moisture, and the prospects are excellent. But in the central and northern districts of this province the month has been very dry, and the prospects for good crops are poor. For the whole province the indicated yields are considerably below average. British Columbia has also suffered greatly from drought, and the crops will be considerably under average.

### Fall Wheat and Hay and Clover

The average yield per acre of fall wheat is estimated to be 22¼ bushels, as against 21½ bushels last year and 23 bushels, the decennial average. The total yield on the harvested area of 757,700 acres is therefore estimated at 16,932,000 bushels, as against 15,520,200 bushels from 720,635 harvested acres last year. In Ontario the total yield this year is 15,463,000 bushels, and in Alberta 1,221,000 bushels, the average yields per acre being 23 bushels in Ontario and 17¼ bushels in Alberta. The total yield of hay and clover is estimated at 15,545,000 tons, which is the largest on record, except for that of 1916, when the yield was 16,348,000 tons. Last year the total yield was only 11,366,100 tons. The average yield per acre is this year 1.45 ton, as compared with 1.07 ton last year, the lowest on record, and with 1.40 ton, the decennial average. Of alfalfa (first cutting), the total yield is 483,000 tons, as against 662,200 tons last year, the average per acre being 1.80 ton, as compared with 2½ tons last year, and 2.45 tons, the ten-year average.

### Condition of Other Field Crops

For all Canada the condition of the principal field crops in percentage of the decennial average is as follows, the figures for June 30 and for July 31, 1921, being given within brackets: Spring wheat 90 (94, 94); oats 92 (97, 88); barley 95 (96, 88); rye 95 (93, 97); peas 102 (99, 95); beans 102 (95, 95); buckwheat 99 (100, 90); mixed grains 106 (102, 87); flaxseed 92 (99, 97); corn for husking 95 (97, 97); potatoes 98 (101, 89); turnips, etc. 97 (91, 87); fodder corn 96 (96, 101); sugar beets 98 (96, 93). At the end of July this year the condition of the principal crops in the prairie provinces is as follows: Wheat, Manitoba 101, Saskatchewan 91, Alberta 82. Oats: Manitoba 102, Saskatchewan 86, Alberta 79. Barley: Manitoba 102, Saskatchewan 89, Alberta 82. Rye: Manitoba 102, Saskatchewan 100, Alberta 88. Flaxseed: Manitoba 101, Saskatchewan 90, Alberta 88. Potatoes: Manitoba 101, Saskatchewan 93, Alberta 87.

### Forecast of Total Yield

Including the preliminary estimate of fall wheat, the condition at the end of July indicates the following total yields in bushels, last years' final estimates being given within brackets for comparison: Wheat 320,968,000 (300,858,100); oats 509,752,000 (426,232,900); barley 64,881,000 (59,709,100); rye 37,848,000 (21,455,260); flaxseed 4,530,000 (4,111,800); potatoes 102,974,000 (107,346,000). The indicated average yields in bushels per acre for these crops are: Wheat 14¼ (13, 15¾); oats 29¾ (25¼, 32¼); barley 23¾ (21¼, 25); rye 15¼ (11¾, 16); flaxseed 8¾ (7¾, 9½); potatoes 148½ (152¾, 152). The yields placed within brackets are respectively those of 1921 and the ten year average. These forecasts are based upon the areas sown, as estimated from the reports of crop correspondents at the end of June; they are subject to correction by the annual returns of acreage now in process of compilation. From the area estimated as sown to rye in Alberta, viz., 280,000 acres, 25 per cent., or 70,000 acres, have been deducted to allow for areas cut green.

### Prairie Provinces

For the three prairie provinces the forecast in bushels is as follows: Wheat 297,781,000 (280,098,000); oats 304,869,000 (284,147,500); barley 45,473,000 (44,681,600); rye 35,073,000 (19,109.700); flaxseed 4.360,000 (3,945,700). For Manitoba the yields in bushels are: Wheat 53.444,000 (39,054,000); oats 73,028,000 (49,442.500); barley 24,534,000 (19,681,600); rye 4.240,000 (3,564,700); flaxseed 611,000 (544.700). In Saskatchewan they are: Wheat 175,100,000 (188,000,000); oats 154,669,000 (170.513,000); barley 10,209,000 (13,343,000); rye 27,893,000 (13,546,000); flaxseed 3,561,000 (3,230,000). In Alberta they are: Wheat 69,237,000 (53,044,000); oats 77,172,000 (64,192,000); barley 10,730,000 (11,657,000); rye 2,940,000 (1,999,000); flaxseed 188,000 (171,000). The figures within brackets represent the finally estimated yields of 1921.

## WHY BANK PROJECT COLLAPSED

### Great West Bank Shareholders Will Get Money Back, Says Provisional President

In an interview in Regina on August 3, regarding the announcement that the Great West Bank project would be given up, J. K. McInnis, provisional president, said that the subscribers would not lose a dollar . He said:—

"The Great West Bank project ceases for the present for the reason that the promoters were unable to secure sufficient paid-up capital within the period prescribed by law, which lapsed July 31."

Mr. McInnis was most emphatic in regard to security afforded those who had invested money in the project. The interests of these investors, he said, had been thoroughly safeguarded. Every dollar of the money collected by the promoters, the Northern Bond Corporation, had been deposited with the Canada Trust Company, Regina, and would be returned to the subscribers in due course.

### Return Date Indefinite

Asked as to the probable date upon which these moneys would be returned, Mr. McInnis said: "I am not in a position to say definitely."

The failure to secure the $500,000 required for deposit with the Dominion Government before the organization of the bank could be completed, was attributed by Mr. McInnis to prevailing money tightness in the West, arising out of poor crops and low prices.

Mr. McInnis stated that he had been in Winnipeg for the purpose of attending a meeting of the provisional directors. No quorum for this meeting was secured, but in his capacity as president he had taken formal action preliminary to winding up the affairs of the bank by publishing advertisements in prairie newspapers.

"As under the Bank Act, stock is sold on the specific understanding that promoters or vendors of the stock will not receive a commission unless the organization is completed and the bank become operative," said Mr. McInnis, "there will be no expense chargeable against money contributed by subscribers from this direction. In my opinion, the interest on the money paid in will be sufficient to discharge all legal and ordinary expenses contingent upon winding up the project."

## LOAN AND TRUST COMPANY DEPOSITS

The Ontario registrar of loan and trust companies has issued a quarterly statement of deposits and securities of loan and trust corporations as at June 30, 1922. Compared with the preceding quarter the totals are as follows:—

| | June 30 | March 31 |
|---|---|---|
| Total deposits ........ | 35,964,689 | 35,444,854 |
| Cash .................. | 3,551,493 | 4,346,119 |
| Govt. bonds .......... | 8,844,592 | 8,808,446 |
| Ont. Mun. Debs. ...... | 4,266,196 | 4,133,291 |
| Demand loans ........ | 602,130 | 976,970 |
| Total cash securitles and loans ....... | 17,264,411 | 18,264,826 |
| Percentage to deposits ... .... | 48.00 | 51.53 |

## BUILDING PERMITS SHOW DECLINE

### Total During June is $15,799,680 as Compared With $17,765,326 in May—June Total Higher Than Last Year

The value of the permits issued by tthe 56 cities aggregated $15,799,680 as compared with $17,765,326 in May, a decline of $1,965,646. The value for June, 1921, totalled $12,900,124. There was therefore an increase during the month under review of $2,899,556 or 22.5 per cent. in that comparison.

Prince Edward Island, New Brunswick, Manitoba and British Columbia reported some expansion in the volume of building authorized as compared with the preceding month, while in all other provinces less building was anticipated. In Manitoba, where the largest increase occurred, the gain was slightly over $200,000 or 17.5 per cent. Of the decrease indicated in the other districts, that of $571,094 or 44.6 per cent. in Saskatchewan was the nost noteworthy.

Expansion in the amount of building contemplated as compared with June, 1921, was reported in Nova Scotia, New Brunswick, Quebec, Ontario, Manitoba and British Columbia, the gain in Ontario of $1,983,164 or 32.9 per cent. being the most important.

The following is a comparison of the value of building permits issued during June, 1922, June, 1921, and May, 1922:—

| City | May 1922 | June 1922 | June 1921 |

## THE LIFE UNDERWRITERS' CONVENTION

For many years the Life Underwriters' Association of Canada had an uphill climb, encountering jealousies in the field and indifference in the home offices. It has now reached a fairly strong position, however, though the membership question is always at hand. The task has been made easier by more clearly defining the scope of the organization. Its influence has been brought to bear upon the governments in connection with the enactment and the administration of laws, and the meetings of the association and its branches have become of more practical value through concentration of salesmanship topics.

The huge convention in Toronto this week, in which the life underwriters of the United States participate through their own organization, is typical of this attention to the field man and his problems. Instead of having a few set speeches with little intervening discussion, as was the case at some previous conventions, the program is now replete with discussions and illustrations of the actual work of selling.

## PRESIDENT APPEALS TO CONGRESS

The intention of President Harding to go before Congress with a presentation of the rail and coal strike situation, was carried out on August 18. While it was understood that the President had planned to appear before Congress earlier in the week, it was stated on the 16th that he would delay his proposed course in view of the agreement between the railroad executives and railroad labor organization leaders to take up anew on Thursday the question of the adjustment of their differences. President Harding's message to Congress deals largely with the suspension of the coal industry and the efforts of the Government to effect a settlement. Referring to the Government's invitation for "a resumption of production, under the rights of all parties to the controversy, with assurance of Government protection of each and every one in his lawful pursuits," the President says that "but little or no production has followed," and that "the simple and significant truth was revealed that, except for such coal as comes from the districts worked by non-organized miners, the country is at the mercy of the United Mine Workers." "Interrupted transportation, sorely broken employment, the failure to develop storage against enlarged demands and inadequate carrying—all these present problems," he says, "bear on righteous wage adjustment, and demand constructive solution." "Because of the impressions of many cases of unjustifiable profits in the industry," says the President to Congress, "and because public interest demands investigation and demands the finding of facts be given the pubic, I am asking at your hands authority to create a commission to make a searching investigation into the whole coal industry."

Immediate provision for a temporary national coal agency, with needed capital to purchase, sell and distribute coal which is carried in the inter-State shipment is also recommended by the President. In his references to the shopmen's strike, the President states that "the public menace in the coal situation was made more acute and more serious at the beginning of July by the strike of the federated shopcrafts in the railroad service. A strike against a wage decision made by the Railroad Labor Board." Declaring that the law creating the Board is "inadequate," the President says, "contrary to popular impression, it has little or no power to enforce its decisions. It can impose no penalties [illegible] either party disregarding its decisions. It cannot halt a strike and manifestly Congress [illegible] omitted the enactment of compulsory arbitration. The decisions of the Board must be made enforceable and effective against carriers and employees alike."

Stating that sympathetic rairoad strikes have developed seriously impairing inter-State commerce, the President said that trains deserted in the desert regions of the Southwest "have revealed the cruelty and contempt for law on the part of some railway employees who have conspired to paralyze transportation, and lawlessness and violence in a hundred places have revealed the failure of the striking unions to hold their forces to law observance." Enactment of the bill "to provide for the better protection of aliens and for the enforcement of their treaty rights" was likewise recommended by the President, stating that his "renewal of this oft-made recommendation is impelled by a pitiable sense of Federal impotence to deal with the shocking crime at Herrin, Ill., which so recently shamed and horrified the country."

## OUR DOLLAR'S RECOVERY

Canadian exchange in New York is now practically at par. The discount of 1-32 of 1% represents little more than labor and loss of the interest involved in the transfer of funds, and is analogous to the discount or premium on New York drafts in various other centres which often prevailed before the establishment of Federal Reserve system. Canadian exchange is now highest since 1915. Traders account for the recent strength of the Canadian dollar mainly by demand for funds to move the Dominion's crops, which are unusually large this year. As New York is the largest market for Canadian dollars, many European wheat buyers take care of their requirements there.

Owing to the coal strike there is also a demand for Canadian coal. Halifax and other fields are disposing of a fair portion of their output in the United States.

Other causes for strength in exchange are increasing American investments in Canadian corporate, provincial and government securities. The American market absorbed $9,982,470 of a total of $21,199,105 new offerings floated during July. There has also been considerable American buying on the Montreal and Toronto Stock exchanges.

## INCOME TAX SHOULD BE RETAINED

Australia, following the lead of Great Britain plans a £3,000,000 tax reduction as part of its budget for this year. The income tax will be reduced 10 per cent. with the exemption increased to £200. The war surcharge tax on land comes down, the entertainment tax is abolished where the price of admission is less than a shilling. The duty on galvanized iron and similar goods, and also tractors will be lowered and a bounty provided for local manufacturers of such commodities. A subsidy of £150,000 on export beef is also provided.

Treasurer Bruce, of the Commonwealth, in delivering his statement to parliament, said the budget was based on the principles of finance as drawn up at the Brussels conference. The government, he said, aimed at stimulating trade and industry, promoting development, reducing the cost of living, and attracting overseas capital. The estimated expenditure for the coming year is £62,000,000, representing a decrease of £3,000,000. Included therein is £29,465,000 expenditure for war services, nicluding interes, and sinking fund for war pensions and the repatriation of soldiers. The defence department cost nearly £2,000,00 less than last year, mainly owing to the result of the Washington disarmament conference. The debts of the Australian Commonwealth and the states total $784,000,000.

Canada's income tax was introduced during the war period, and in many quarters it is now urged that it should be repealed, at least as regards corporations. The money has been sorely needed up to the present time, however, and it it only since this year's stamp taxes commenced to produce substantial sums that the government's financial position has been relieved. What is wanted for the next few years is a steady revenue which will yield a surplus to be applied for the reduction of the national debt.

Apart from the consideration of necessity, however, the income tax has merits beyond most other sources of revenue. Present day tendencies favor the progressive principle in taxation, by which the burden falls in proportion to ability to pay. The income tax enables this principle to be applied. It is, moreover, a direct tax, falling on income rather than on expenditure, and as such reaches many who would otherwise get off easy. The tariff duties and other indirect taxes are a burden on the poorer classes who are obliged to expend nearly all their income to meet their needs; the income tax reaches those who have a large revenue which they do not need to spend.

## THE TERMS OF THE LOAN

It is significant that since the terms of the new issue of government bonds were announced, the price of the 1934's, the taxable maturity nearest that of the new bonds, has declined slightly. The new ten year bonds may be purchased at par, so that the 1934's at a fraction above par have just about the same attraction, having two years longer to run. As prospects point to a good bond market in the fall, and as most of the money now invested in Victory bonds due next Deecmber will no doubt be converted, there is every reason to expect that the new loan will be a success.

The following suggestion is made by the Toronto "Mail and Empire":—

"We suggest that Mr. Fielding consider the question of extending this privilege so as to cover present holders cash purchases of his new bonds. To the holder of a $1,000 bond coming due in December the option of exchanging it for a new $1,000 bond is held out; there might also be held out to the exchanger the opportunity to buy, say $500, of the new bonds on the same terms. Such an arrangement would probably facilitate the whole financial operation Mr. Fielding is to carry out this autumn. Many holders of the maturity bond issue have saved their interest and are prepared to invest more money in Government issues. The Finance Minister may find it practicable as well as otherwise advisable to adopt this mode of encouraging present bondholders to put new money into his forthcoming issue."

In view of the present prospects, however, it would seem unnecessary to offer any additional attractions. The interest of the taxpayers as well as of the bondholders must be considered, and a heavy over-subscription would not be of any value in view of the limited requirements of the government.

### CANADA AS A WHEAT PRODUCER

One of the important economic changes brought about by the war was the elevation of Canada from the fourth to the second wheat-exporting country in the world. Her only rival is the United States, and it may not be long before Canada exceeds her neighbor. In the five years prior to 1914 the principal wheat-exporting countries were: Russia, 150,000,000 bushels; United States, 97,000,000; Argentina, 95,000,000; Canada, 80,000,000; Austria-Hungary, 56,000,000; Australia, 50,000,000; India, 48,000,000.

The revolution in the wheat situation brought about by the war was responsible for eliminating the European countries as exporting countries. In the past three years the annual exports of wheat have increased in the aggregate, and the countries most benefited have been Canada and the United States. The 1921 exports were mainly as follows: United States, 303,000,000 bushels; Canada, 165,784,000; Australia, 115,571,000; Argentina, 62,317,000. Recent reports show that the United States should have 220,000,000 bushels for export this year; Canada 200,000,000 bushels, and Australia and Argentina 200,000,000 between them. Europe will be 100,000,000 behind its last year's production. Present indications are that Canada will have one of its most notable wheat years. Soon she may lead the other nations and become in truth "the granary of the world," a position long held by Russia.

### ALBERTA BANKERS MEET

Branch managers of the Bank of Montreal to the number of about fifty met in Edmonton on August 12. A. N. Peters, district superintendent of Alberta branches, was one of the speakers.

### COBALT ORE SHIPMENTS

The following are the shipments of ore from Cobalt Station for the week ending August 18th: Nipissing Mines, 600,220; O'Brien Mine, 135,200; Mining Corp. of Canada, 133,288; Coniagas Mines, 73,000; total, 941,708. The total since January 1st is 4,856,915 pounds or 2,428.4 tons.

### ROYAL TRUST COMPANY

To cope with the growing business of the Royal Trust Company at Montreal and branches, the following appointments have been made by the directors:—

Robertson Macculloch and R. P. Jellet to be assistant general managers; G. T. Bogert, superintendent of branches; Ross Clarkson, manager of Montreal branch; C. V. Heward and John McDonald, manager of the estates department at Montreal.

Mr. McDonald has had large experience in trust company work, and is well known in the Montreal financial district. The others concerned have all been for many years in the service of the Royal Trust Company.

## *Personal*

JOHN H. FULTON has been appointed director and president of the National Park Bank of New York, succeeding Mr. Richard Delafield, who becomes chairman of the board.

EDWARD C. KENNING and A. C. PRINCE, both of Windsor, have been added to the board of directors of the Windsor Loew's Theatre.

ALLAN D. LAMONT has been appointed assistant manager of the Candian chief offices of the National Surety Company at Montreal.

F. O. MABER, secretary-treausrer of the Northwestern Life Assurance Company, has just returned from a trip to Australia and New Zealand.

ALBERT MATTHEWS has been elected to the board of directors of the Hanover Cement and Stone Company, Ltd. Mr. Matthews was formerly with Matthews, Blackwell and Company, of Toronto.

WILLIAM STONE, president of Rolph, Clark, Stone, Limited, has been appointed a director of the Canada Permanent Mortgage Corporation, Toronto.

HAROLD AUSTIN TUBBY has resigned from his position as manager of the Northwestern Trust Company, Calgary, to enter into business on his own account.

J. R. WOODLEY, C.A., who for the past four years has been engaged in the Winnipeg office of the Dominion Income Tax department has resigned and associated himself with G. C. Sharpe & Co., chartered accountants, Winnipeg.

HOWARD G. KELLY, president of the Grand Trunk Railway, resigned from the Board of Directors on August 16, automatically ceasing to be the head of the system. Mr. Kelly's resignation, in common with those of other directors of the Grand Trunk and Canadian National boards, has been in the hands of the Government for some time, in view of the impending reorganization. It is understood that the acceptance of Mr. Kelly's resignation at this time arises out of the fact that his contract with the Grand Trunk expires on August 31. It is expected that he will leave shortly on a vacation, long deferred by the difficulties attending Grand Trunk and Grand Trunk Pacific management in recent years. Pending the reorganization of the Canadian National board, the Government has appointed Major Graham Bell, C.M.G., Deputy Minister of Railways to fill the vacancy on the board created by Mr. Kelly's resignation.

W. R. BAWLF has been elected to the Presidency of the Winnipeg Grain Exchange.

W. C. CHISHOLM, K.C., General Solicitor of the Grand Trunk Railway System, has assumed the duties of Head of the Legal Department, a position rendered vacant by the death of W. H. Biggar, K.C., Vice-President and General Counsel.

H. P. MORRISON, A.A.S., has been appointed assistant actuary of the Monarch Life Assurance Company, Winnipeg. Mr. Morrison was associated with the Great West Life Assurance Company for over eight years, part of which time he played an important part in the Imperial Artillery overseas.

R. A. RIGG has been appointed Director of the Employment Service of Canada, to succeed Bryce M. Stewart, who resigned to take charge of the employment office of the Amalgamated Clothing Workers of America, in Chicago.

W. D. ROBB has been appointed vice-president and general manager of the Grand Trunk Railway Company.

HARRY E. SIMONS, of the firm of Simons, Agnew & Co., Montreal, has been elected a member of the Montreal Mining Exchange.

F. L. WANKLYN, Vice-president of the Canadian Pacific Railway and Arthur Picard, president of the Quebec Technical School, have been appointed Fuel Controllers for the Province of Quebec.

## *Obituary*

JOHN J. DALEY, of the firm of Appleby and Daley, of Cobourg, died at his home at Gore's Landing on August 15th, in his 57tn year.

A. E. KILLAM died at his home in Moncton, N. B., on August 20th, at the age of 88 years. The late Mr. Killam represented Westmoreland in the New Brunswick legislature several terms and was well known throughout the province of New Brunswick. At the federal by-election in 1895 he was the Liberal candidate against H. A. Powell but was defeated.

ROBERT CALVIN FEARMAN, president of the Fearman Packing Company, Hamilton, died on August 9th in Hamilton. The late Mr. Fearman was ex-member of the Board of Education and a member of the Library Board. He was president of the Armstrong Cartage Company.

JOHN HENRY FRASSET HAGARTY, managing director of the St. Lawrence and Chicago Steam Navigation Co., and director of the Canada Permanent Mortgage Co., died on July 26th at his home in Toronto. The late Mr. Hagarty was 77 years of age.

ALEXANDER LAWRENCE MACLAURIN died in Montreal on August 3rd. He was born in East Templeton, uQe., 70 years ago, and from his early youth was associated with the lumber business. In due ocurse he became director of the Charlemagne Lumber Company, which became incorporated with the St. Maurice Paper Co., Ltd., of which concern he was vice-president and general manger at the time of his death. He was president of McLaurin Brothers, Lachine; Campbell MacLaurin Lumber Company, Ltd., Montreal; Laval Electric Company, and he was also a director of the following companies: Union Bag and Paper Corporation, New York; Crown Trust Company, Montreal; Yorkshire Insurance Company, Ltd.; Montreal Stocks Yard Company.

JOHN HENRY PETERS, founder and owner of the firm of J. H. Peters, textile smallware company and owner of the Peters Building, 52 Wellington street west, died on board the Atlantic liner Majestic. The late Mr. Peters was born in Germany in 1866. Thirty-eight years ago he came to the United States, where he was in business in New York City until 1900. During that year he came to Toronto, and 22 years ago established the dress trimming company of which he was sole owner. In 1912 he became German consul, which position he held until the commencement of the war.

JOHN DODDS SHARPE, 55 years of age, died at Thetford Mines, uQe., on July 25th. Mr. Sharpe was for several years manager of the

### PRIVY COUNCIL ADJOURNS

The Judicial Committee of the Privy Council adjourned on August 3, so that outstanding Canadian judgments and the reasons for the dismissal of the Grand Trunk Railway shareholders' appeal will not be delivered before October.

Before adjournment the committee, in the Quebec appeal of Swan, since deceased, and others, against the Eastern Townships Bank, restored the judgment of 1896 and granted the appellants costs.

The appeal of the City of Montreal vs. Watt & Scott, Limited, was dismissed with costs, the reasons to be delivered later.

A Sufficient Reason

"I was much more comfortable when I got my Life Insurance than I had been before, for I could feel that even if I were taken away, I should not leave my wife altogether unprovided for. That is a sufficient reason why every man should carry insurance upon his life."—The late Sir Wilfred Laurier.

There are other good reasons for Life Insurance, besides its main element of protection. It is the finest form of investment, yielding good returns, free from care or oversight during its term of life, with no possible loss of capital, no trouble or anxiety about the security of the investment. Let us submit the investment side of Life Insurance to your business judgment.

The Great West Life Assurance Co.

Why a Lawyer Should
Draw Your Will

There is nothing very formidable about drawing a will. But it needs experience, knowledge of the legal requirements, and exact use of language. Many people who attempt to draw their own wills fail in one or more of these respects. The wills they make, written throughout by themselves or with the doubtful aid of a printed form, are subject to dispute or delay in interpretation and in danger of being disallowed by the Court as not being wills at all. So these suffer to whom the will-maker intended the estate to pass.

Everyone should make a will. Make yours, but have your lawyer draw it up.

A will implies an executor. We act as executor.

# Hazards of Motion Picture Machine

By Charles Heath

(An address before the Canadian Fire Marshals' Conference, Vancouver, August 9.)

I appear to have a predeliction for butting in, or being butted in, to subjects about which I know very little. Some few weeks ago I happened to be discussing the dangers of moving picture projection by amateurs in churches, schools, public halls and so forth, and the frequent use of inflamnable films in portable machines; as I had before me a letter from Mr. Heaton relating to this Convention of Fire Marshals, I wrote him suggesting that this hazard be considered by this Convention; I quite expected that Mr. Heaton, who, I understand, has given considerable thought to this question, would take care of the subject himself, but to my surprise he passed it back to me.

Fortunately, several gentlemen in Winnipeg have recently been giving this question considerable thought, and they immediately came to my rescue and placed at my disposal their assistance and advice, and I am indebted to them for the subject matter of this address; I do not in any way desire to pose as an authority on this subject. I am, however, pleased to be able to pass on to you the following facts and suggestions, in the hope that they may in some measure assist in mitigating a very serious and ever present fire hazard.

### Increase in Use

It is apparent to all that we are on the threshold of a very material increase in the use of the deservedly popular motion picture machine through its application to all forms of educative and illustrative work. Not only does this apply to weekday and Sunday schools, colleges and lectures, but it forms a means of illustrating salemens' talks before conventions, demonstrations at exhibitions of factory processes, and is being increasingly used for home entertainment, not forgetting its use in toy form for children.

In order to obtain the true perspective in relation to the movement in its relation to safety to life or property, it is fitting to allude to the characteristics of the product known as motion picture film.

The great bulk of the film in use today is a product known as nitro cellulose. Cellulose with a high degree of nitration forms the well known explosives used in warfare, while the product used for motion picture films has a low degree of nitration. The peculiar inflammability of this type of film is due to the fact that, chemically speaking, sufficient oxygen is present within the structure of the film itself to help support combustion or to continue decomposition without the aid of outside air.

Another point to be considered is the different effect produced by the burning of film under two conditions met with in practice:

First, if there is free access of air to the burning film, it burns very rapidly with a yellow flame and little smoke.

Secondly, if an attempt is made to confine the fire to a comparatively small container, combustion consists mainly in decomposition which forms a very dense yellowish gas having an acrid odor. It is also to be noted that decomposition may generate sufficient heat to cause these gases to ignite, and, in fact, when large quantities of film are concerned, such as in an exchange building, explosive mixtures have been formed with disastrous results.

It is not necessary to allude further to the highly dangerous composition of this product except to state that before these dangers were sufficiently realized, very many serious fires and panics occurred.

### Serious Fires.

The first fire to bring out the dangers of film occurred in Paris, France, when approximately two hundred people lost their lives. This has been followed by numerous other fires that have occurred all over the world.

St. Petersburg, March 1911, ninety persons burned to death, forty injured.

Castellon, Spain, November 1918, twenty children trampled to death and twelve injured.

Velennces—Sur-Phone, France, July 1919, fifty-three children and twenty-one women killed.

These, I think, sufficiently illustrate the tremendous risk which is entailed with the use of this highly dangerous product when not accompanied with all possible safeguards.

The result of these lessons has been that regular moving picture theatres in any well conducted city are provided with all possible safeguards. These consist, in the first place, of a projection room built in absolutely fireproof form with the most adequate ventilation through fireproof ducts to the outside; the provision of automatic shutters closing off the openings or ports leading into the house; equipping doors of projection room with self-closing devices; trained operators are required, and the wiring and connecting up of the machines is closely supervised. Further, a regular theatre is provided with fixed seats, generous aisle and exit accommodation, and in a well-conducted house the ushers are carefully drilled in their duties of looking after the safe exit of the audience in the event of fire or panic; in short, the public is supposedly as well protected as the authorities can possibly devise.

### Outside Theatres

Now, it is a strange thing that once we get away from the confines of a properly equipped theatre, there seems to be a disposition in many quarters to imagine that this highly dangerous material can be handled with impunity by anyone in any place at any time, without its well known attendant risks. Surely it is perfectly obvious that if the use of this product has been attend with such disastrous results in the past in theatres, Divine Providence is not going to safeguard, for instance, its use in a church wherein no attempt has been made to protect the audience. Such a thought is preposterous, and yet this is practically the position.

I am perfectly aware that specious claims are made by manufacturers of so-called suitcase machines, miniature machines, and asbestos lined machines, that these can be used with perfect safety with regular full width nitro collulose film without the use of a fireproof operating room and other safeguards, but be on your guard—such claims cannot be substantiated even though an incandescent lamp is used for illumination purposes—and I am firmly convinced that unless those officials who are supposed to control this situation wake up and exert their authority, we will have a succession of accidents of a most regrettable character. Two accidents of recent occurrence which are well authenticated are as follows:—

July, 1920, Quarterly of the National Fire Prevention Association describes an accident in Seattle in May of that year when the automatic shutter in a well known suitcase type of machine, made up within a sheet metal cabinet lined with asbestos, stuck thereby exposing the stationary film to the rays of the lamp and caused the film to take fire. The minister of a church, who was displaying the film, picked up the machine and carried it with the blazing film and threw them outside the building. An incipient panic among the children started, but fortunately the teachers were able to control them and stopped the rush. Meanwhile, in other rooms of the schools, the screams of the children and the smell of the burning film had reached other pupils and a further panic was with difficulty averted.

### Apartment Destroyed

Another report furnished by the Bureau of Gas & Electricity of the City of New York relates a case which took place in October, 1921, in a large apartment house where a tenant brought into his apartment, to add to an entertainment he was giving, a portable machine of the suitcase type, and owing to the machine stopping, the film in the machine took fire, and the fire spread at once to the other films, completely gutting the apartment. In this case the machine was labelled "For use with slow burning film only," but carried standard sprockets which enabled it to use the regular theatrical film.

The Quarterly before mentioned also reports a fire in New Orleans in May, 1920, in which a toy machine known as the "Keystone Movigraph" and purchased by a boy of fourteen at the price of $5.00, caused the ignition of a considerable amount of film of the regular nitro cellulose type. The boy had picked out from the refuse of the various film exchanges enough scraps to build up about 10,000 feet of assorted film which was stored in the attic of the house and which he used to amuse his playmates. Fortunately, a fire station was located across the street, and this probably saved the house from total destruction, but we can well imagine that there might have been a serious loss of life had the boy been showing the film before a number of children at the time. This incident brings out the necessity of preventing the sale of toy machines that are so built that they can utilize regular full width film, and also manifests the necessity for effectually dealing with the disposal of waste film exchanges.

### Ineffective Efforts

What is the remedy for this position of affairs?

I will first allude to some ineffective efforts of the past. One was that the so-called miniature or suitcase machine should be fitted with a special sprocket so that regular film could not be used in it, but which would allow of full width slow burning film to be used—this film to be furnished with special perforations to fit the special sprockets. This expedient has proven absolutely futile as the user changed the special sprockets to standard type. Then there was the promising development of the narrow width machines such as the Pathescope and the Victor, and while these machines with the narrow width slow burning film have afforded some relief, it is not adequate—there are not sufficient stocks of film subjects printed on narrow width film available, and while we have been promised for several years that large stocks of these would be put in circulation, such have not materialized.

### Suggested Remedies

It seems to me, and I know I am not alone in this view, that we must in every way possible urge churches, educational and governmental bodies to call for the slow burning cellulose acetate film leaving it to the user as to whether full width or narrow width film is to be used. When we are certain that the film is of that type, we can safely relax all precautions—if parties will not demand such film and persist in using the dangerous nitro cellulose variety, we must, without doubt, call for all possible safeguards.

In reference to the point as to how we are to determine the type of film, I offer a suggestion as follows:—Why should not the various censor boards handle the problem in this way: Let these boards demand that all film, of whatever type or for whatever use, theatrical, religious, educational, be submitted to them before being exhibited by anyone; the travel films, religious and educational films so submitted need not be censored, but by simply examining the margin of the film they will find that all slow burning film is so marked at regular intervals.

If the film is so marked or otherwise identified, a perforated "leader" worded as follows, "Slow Burning Film Examined and Approved, Censor Board, Province of . . . . " should be attached to each reel by censor, and he should stamp the film with a similar legend in from 8 to 10 places to the 1000 feet. There should be enacted a law or by-law making it compulsory to have a permit before making use of a motion picture machine. If the application covers a theatre or other building fitted up with a standard, permanent projection room, the applicant receives the usual yearly permit or license, but if it is an exhibition for one or two nights, the official would govern himself by the censor board's report on the film—if it is slow burning, the applicant is under no further restriction and the permit can issue; if, however, the film is nitro cellulose and does not carry the special "leader" and stamp, the official should demand a fireproof projection room or fireproof booth and give whatever directions he sees fit for the carrying out of the by-law.

### System of Fees

These suggested regulations, which are intended to encourage the use of slow burning film for non-theatrical purposes by the letting down of all bars once the character of the film is established, should not be accompanied by an abnoxious system of fees either on the part of the censor board or otherwise, simply a small fee of say twenty-five cents per reel, unless the subject matter is such that calls for regular censoring on moral grounds.

We should also strive by every possible means to secure the support of the Dominion Government, the various Provincial Governments and the railways, all of whom in their various activities circulate a considerable amount of

**When You Remit Money**

For remitting money anywhere, Bank Drafts and Money Orders are without equal for safety, economy and convenience.

If you wish to send money abroad, a draft from this Bank will prove to be the best medium. For remitting sums up to fifty dollars in Canada, Bank Money Orders are the most convenient. Ask at this Bank for any further details.

film for one purpose and another. In this connection, I understand the C.P.R. are now supplying films printed on slow burning stock for advertising purposes, also for lectures—the company has only recently supplied this form of film as it was only accidently learned by head officials that their publicity department was violating the company's own rules by transporting nitro cellulose films for its own use in sleeping cars. The danger of such a practice is best illustrated by a film fire that occurred November 24, 1914, in a passenger train running out of Chicago. A package containing only four reels of film that were being taken out for use in a suburban club became ignited about the middle of the smoking car four minutes after the train left the Chicago depot. Before the train could be stopped, thirty-eight passengers were badly burned, two fatally. While the U.S. Federal, and also Canadian regulations call for such film to be transported only by express in yellow labelled, approved type containers, it is difficult to prevent parties surreptitiously carrying this material as hand baggage.

The Dominion Government Department of Trade and Commerce, also the Water Power and Forestry Depts., issue considerable film for publicity purposes; so far this has been supplied only on regular nitro cellulose stock. Surely it is not too much to expect that the Government should be willing to assist us in this matter by its agreeing to supply slow burning film for other than regular theatres, in fact I suggest that we should memorialize the Government to that effect. The small extra cost of this safe type on this score, nor is there any difficulty developing or printing it, it is simply the lack of a compelling body of public opinion, voiced by officials in charge of such matters, that is hindering the movement.

## *Business Conditions*

Although midsummer quietness prevails in many lines, despatches to Dun's Review from branch offices of R. G. Dun & Co., in the principal cities state that the seasonable slowing down in Canadian business is less pronounced than usual and that prospects for Fall and Winter trade are regarded with steadily increasing optimism. Except in a few sections where the weather has not been wholly favorable, abundant harvests are believed to be practically certain, and this, together with indications that the improvement in many leading industries already established will be further extended, is responsible for a growing feeling of confidence among both country and city merchants that is reflected in the receipt of numerous inquiries by wholesalers and in the placing of comparatively liberal orders for future delivery of dry goods, clothing, footwear, furnishings, hardware, jewelry and other staples. Collections in most districts are causing less complaint, and a further easing in the financial situation can be noted.

Montreal reports that wholesale business in most lines is seasonably quiet, but, with the crops generally turning out well and industrial activity well maintained, there is a growing feeling of confidence in the future, and orders for both prompt and distant delivery are being placed in satisfactory volume for this period. Collections also show moderate improvement.

Although buying is still confined mainly to immediate needs at Toronto, wholesalers are receiving a steady run of orders of a replenishing character, and buying for Fall and Winter delivery is fully up to the average for this period. Merchants derive encouragement from the excellent crop prospects and the recovery in industrial activity, and they regard the outlook with a well defined feeling of confidence. Collections are about fair.

Business conditions in the Far West and Northwest show no material change, but, except in a few sections where the crops are not progressing as well as expected owing to unfavorable weather, confidence that Fall and Winter trade will be active is general. Buying at wholesale is still confined mainly to immediate needs, but Winnipeg, Regina and some other centers report that numerous inquiries are being received and that actual orders are showing a moderate increase. At Saskatoon, Edmonton, and some less important points, merchants are extremely conservative in their operations, and business, in the aggregate, is not up to expectations. Collections continue slow.

# Gross and Net Debt Show Decline

### Decrease in Gross Debt Amounts to $31,000,000 and in Net Debt to $5,000,000—Income Tax Swells Revenue Total—Expenditures are Lower—Four Months Show Substantial Surplus

The outstanding feature of the Dominion Government revenue and expenditure statement for the month of July is the decrease in both gross and net debts from the preceding month. The decrease in the gross debt during the month was about thirty-one million, and in the net debt about five million dollars. The large decrease in the gross debt is due to a decline of forty million in "miscellaneous and banking accounts."

During the month there was a slight increase of three million in revenue as compared with the previous month, although the 1922 total is lower than last year's revenue. The income tax was responsible for the increase during July, being up by about four million from June.

Expenditures during the month show a substantial decrease from June, being lower by nine million dollars. As there was no Victory Loan interest payable during July, the interest on public debt shows a large decline from the preceding month, but to counterbalance this decrease, "other expenditure accounts" show an increase of six million over June.

STATEMENT

OF THE PUBLIC DEBT AND THE REVENUE AND EXPENDITURE of the Dominion of Canada, as by Returns furnished to the Finance Department to the night of the 31st July, 1921 and 1922.

# To Holders of Five Year $5\frac{1}{2}$ per cent Canada's Victory Bonds

### Issued in 1917 and Maturing 1st December, 1922.

---

## CONVERSION PROPOSALS

---

THE MINISTER OF FINANCE offers to holders of these bonds who desire to continue their investment in Dominion of Canada securities the privilege of exchanging the maturing bonds for new bonds bearing $5\frac{1}{2}$ per cent interest, payable half yearly, of either of the following classes:—

(a) Five year bonds, dated 1st November, 1922, to mature 1st November, 1927.

(b) Ten year bonds, dated 1st November, 1922, to mature 1st November, 1932.

While the maturing bonds will carry interest to 1st December, 1922, the new bonds will commence to earn interest from 1st November, 1922, GIVING A BONUS OF A FULL MONTH'S INTEREST TO THOSE AVAILING THEMSELVES OF THE CONVERSION PRIVILEGE.

This offer is made to holders of the maturing bonds and is not open to other investors. The bonds to be issued under this proposal will be substantially of the same character as those which are maturing, except that the exemption from taxation does not apply to the new issue.

Holders of the maturing bonds who wish to avail themselves of this conversion privilege should take their bonds AS EARLY AS POSSIBLE, BUT NOT LATER THAN SEPTEMBER 30th, to a Branch of any Chartered Bank in Canada and receive in exchange an official receipt for the bonds surrendered, containing an undertaking to deliver the corresponding bonds of the new issue.

Holders of maturing fully registered bonds, interest payable by cheque from Ottawa, will receive their December 1 interest cheque as usual. Holders of coupon bonds will detach and retain the last unmatured coupon before surrendering the bond itself for conversion purposes.

The surrendered bonds will be forwarded by banks to the Minister of Finance at Ottawa, where they will be exchanged for bonds of the new issue, in fully registered, or coupon registered or coupon bearer form carrying interest payable 1st May and 1st November of each year of the duration of the loan, the first interest payment accruing and payable 1st May, 1923. Bonds of the new issue will be sent to the banks for delivery immediately after the receipt of the surrendered bonds.

The bonds of the maturing issue which are not converted under this proposal will be paid off in cash on the 1st December, 1922.

W. S. FIELDING,
Minister of Finance.

Dated at Ottawa, 8th August, 1922.

# Loan Shareholders Approve Transfer

## Meeting Held on August 9 Was Unanimously in Favor—Canada Trust Company Appointed Trustee—Assets Are Estimated at Figure Well Above Total Liabilities

The agreement for the sale of the assets of The Dominion Savings & Investment Society was on August 9th confirmed at a largely attended meeting of the shareholders of the society. The president, T. H. Purdom, K.C., presided and briefly outlined the history of the society during the years in which it carried on business. After a discussion of the plan of realization of the assets by The Huron & Erie Mortgage Corporation the agreement for the purchase of the assets by The Huron & Erie was approved by the shareholders. Not a single vote was cast against the agreement, the decision being entirely unanimous. Out of a total paid-up capital of $934,968, shareholders representing $834,165 voted in favor of the ratification of the agreement.

The deposits and debentures of The Dominion Savings & Investment Society have now been transferred to the offices of The Huron & Erie Mortgage Corporation, and The Dominion Savings & Investment Society's office at the corner of King and Richmond Streets, London, will be closed very shortly. The assets of the society have been taken over by The Huron & Erie and will be realized upon in due course. When sufficient funds have been secured to cover the society's liabilities to the public the remaining assets become available for the shareholders. By the unanimous choice of the meeting The Canada Trust Company of London was appointed Trustee for the shareholders, and in that capacity will proceed to realize for them the best possible returns.

### Statement of Affairs

The following statement of liabilities and assets was drawn up for use at the meeting. The statement shows the liabilities to be $909,300. The assets, according to the books of the society are valued at $2,157,711, and are estimated by the Huron & Erie at $1,243,464. In either case there are sufficient assets, so that the depositors and debenture holders are paid in full.

The following is the statement of the estimated liabilities:

| | |
|---|---|
| Debentures payable in Canada .... | $172,005 |
| Debentures payable in Great Britain | 106,090 |
| Interest due and accrued on debentures | 4,647 |
| Savings deposits ........................ | 529,297 |
| Interest accrued on deposits ........ | 6,394 |
| | $818,435 |
| Owing to the Bank of Toronto ...... | 102,857 |
| Owing to the Royal Bank of Canada .... | 18,007 |
| Total liabilities .................. | $939,300 |

### Assets Available

The assets, according to the books of the society, and as estimated by the Huron & Erie (the society's estimate coming first) are as follows:

Office premises (less encumbrance, $66,950), $173,503, $183,050.

Real estate owned by society other than items 1 and 3, $19,857, $9,100.

Real estate in Fort William, Ste. Marie, Winnipeg, Kansas City, Colorado and Brooklyn, $289,153, undetermined.

Loans secured by first mortgage of real estate, $459,804, $305,483.

Loans secured by second mortgage of real estate, $44,125, $31,686.

Debts secured by land agreements, $42,967, $23,052.

Loans secured by stocks, bonds and collateral other than item 8, $330,530, $228,800.

Loans secured by society's own stock, $94,101, undetermined.

Stocks and bonds owned, $518,921, $344,314.

Loans secured by stocks, bonds and collateral 197, $3,248.

Advance secured by agreement and Advertiser stock, $103,212, $70,000.

Unsecured loans (including advances on notes, covenants and legacies), $49,571, $24,964.

Cash in bank and on hand, $19,764, $19,764.

Totals, $2,157,711, $1,243,464.

### Letter to Shareholders

T. H. Purdom, President of the Dominion Savings and Investment Society, and Nathaniel Mills, general manager, have issued a joint letter to the shareholders commenting on the financial statement as set forth by the Huron & Erie and expressing confidence that shareholders will ultimately receive 100 cents on the dollar. The letter is as follows:

London, August 3, 1922.

To the Shareholders of the Dominion Savings
and Investment Society:

"We beg leave to submit the following comments on the temporary report of The Huron & Erie, just mailed you.

"The market price of the stock of the society, for several years past, was around 70 cents on the dollar, at which price it was maintained during the war.

"We believe the stock to be worth more than par. Any losses will be more than met by undervalued securities. We refer to the Dominion Savings building, the Imperial Oil stock, the Winnipeg lands, and the Soo lands, each of which is undervalued. There have been no losses that could not be met in the ordinary course of business.

"We believe the estimate placed on the Dominion Savings building is $100,000 below its value. We have no means yet of knowing why any reductions have been made in any of the other securities. We know the assets and are confident that instead of the market price only being realized that more than par will be the result.

"Taking the findings of the Huron & Erie, which are very conservative, there will be sufficient to pay the liabilities and leave a surplus of $304,164.04. This sum does not include and should be increased by the additions of three amounts. Real estate, $289,153.58; increased value of office premises, $100,000; loans on stocks, $94,101.08; amounting in all to $787,418.70, which more than justifies the market price of the stock. This will be increased by whatever amount is realized in excess of the conservative values placed by The Huron & Erie on the remaining assets.

"The Winnipeg lands and the Soo lands were obtained from The Ontario Investment Association, in the year 1890, and some from the Masonic Temple Company, and have been held and managed by the society ever since. But for the war both would likely have been sold. Winnipeg will revive and the Soo, too. It is probable large profits will be realized. It has been a long, hard, uphill fight, but each year the society was better than the year before. The market price for all shareholders should be realized. Yours faithfully,

"T. H. PURDOM.
"NATHANIEL MILLS."

## MUTUAL HOME CORPORATION

F. W. Stewart, J. P. Anglin, J. W. Gervais, L. J. Bigonesse and K. Stinson were on August 14 elected inspectors of the estate of the Mutual Home Corporation, Limited, which went into liquidation at the end of July last, at a meeting of the creditors held in the offices of Baker, Birnie and Savage, trustees of the firm. The statement was made at the meeting that three directors of the firm, F. W. Stewart, Alfred Lambert and K. Stinson would assume the bank liability of the defunct firm, amounting to $35,000, which would assure full payment to all unit members of 100 cents per dollar. It was further shown that the $62,100 put into the concern had been paid to the building contractors, Anglin-Norcross, Ltd.

About fifty persons were present at the meeting, and several inquiries were made by some, who had an idea that their savings had been lost. But according to F. W. Stewart, president of the Mutual Home Corporation, Ltd., bankruptcy was caused by the stoppage of the work on houses being built by the corporation. A lien had been put on the houses, 33 in number, by the contractors, which held up their completion and a mortgage for $110,000 was applied for, but because the lien was not lifted the mortgage could not go through. The firm then went into bankruptcy.

The financial statement issued showed:—Assets, $200,000, including property; claims, $214,000; liability, $14,000; set off by directors, $35,000; surplus, $20,000.

## REDUCTION IN BANK BRANCHES

### Last Year There Was a Gain of 14, But First Half of 1922 Shows Decrease of 127

In 1921, 207 branches of banks were opened in Canada, and 193 closed, a net increase of 14. In the first six months of 1922 only 35 were opened, while 162 were closed, a net decrease of 127. The details are as follows:—

*Bank Branches.*

| | 1921 | | 1922 | |
|---|---|---|---|---|
| | Opened | Closed | Opened | Closed |
| January ...... | 27 | 15 | 7 | 33 |
| February ..... | 18 | 10 | 4 | 15 |
| March ........ | 24 | 11 | 7 | 11 |
| April ........ | 18 | 7 | 3 | 21 |
| May .......... | 19 | 21 | 8 | 57 |
| June ......... | 27 | 17 | 6 | 25 |
| July ......... | 13 | 18 | | |
| August ....... | 15 | 14 | | |
| September .... | 15 | 10 | | |
| October ...... | 12 | 16 | | |
| November ..... | 7 | 27 | | |
| December ..... | 12 | 27 | | |
| Totals ....... | 207 | 193 | 35 | 162 |

## TRUST COMPANIES' GUARANTEED INVESTMENTS

A statement issued by the Ontario registrar of loan corporations, covering the guaranteed investments of trust companies and securities allocated therefor as of 30th June, 1922, shows the following totals, in comparison with the previous quarter:—

| | June 30 | March 31 |
|---|---|---|
| Trust deposits ......... | $7.138,991 | $5,537.962 |
| Specific guaranteed investments ......... | 17,188,233 | 18,754,602 |
| General guaranteed investments ......... | 8,995,390 | 7,606,521 |
| Total funds ............ | 33,322,614 | 31,899,086 |
| Cash .................. | 825,544 | 778,298 |
| Canadian government bonds ............... | 1,807,345 | 1,597,136 |
| United Kingdom bonds... | 216,166 | 355,006 |
| Canadian municipal bonds ............... | 2,758,195 | 2,015,753 |
| School and rural telephone bonds ..... | 1,803,792 | 1,637,747 |
| First mortgages on real estate .......... | 22,408,560 | 21.758,702 |
| Demand loans on trustee securities .... | 1,320,208 | 1,503,173 |
| Securities not authorized as trustee investments .............. | 2,191,689 | 2,253.266 |
| Total investments ...... | 33,331,502 | 31,899.086 |

## CREDIT MAY BE TOO LIBERAL

### This is Sometimes Cause of Failure, Says Sir James Aikins in Adderssing Credit Men

The advisability of Manitoba enacting legislation to make it obligatory to register the assignment of book debts by retail merchants was discussed at a meeting between bankers and credit men held in Winnipeg on August 8, in connection with the sixth National council meeting of the Canadian Men's Trust Association. The question was discussed at some length, but no definite action was taken, the bankers present not being in a position to take any steps, and it was left over for further discussion by the convention.

Sir James Alkins, lieutenant governor, in addressing the meeting gave, as the reason for many failures, the granting by creditmen of credit to those who were not entitled to it. Failures disorganized trade and were a bad thing for the community. Hence it was desirable that unqualified men should not be allowe dto go into business. Business should ensure itself against failures as they were unfair to the purchasing public. In concluding Sir James advocated closer co-operation between farmers and city people. The former should be broadminded and resourceful; the latter should be sympathetic and remember the prosperity of the country hinged largely on that of the farmer. Canada was too large a country for dissensions such as this, and forces should be joined so that all could be proud to be Canadians, and then Canada would be one of the most prosperous countries on earth.

## MUST WATCH QUESTIONABLE CLAIMS

### Duty of Insurance Compenies, Says H. O. Fishback, Insurance Commissioner of Washington

(Special to The Monetary Times.)

Vancouver, August 12.—At the conference of provincial insurance superintendents which has just closed here, the Washington State Insurance Code was the subject of a comprehensive address by Hon. H. O. Fishback, insurance commissioner for Washington State, and vice-president of the National Association of Insurance Commissioners of the United States. Mr. Fishback's address dealt in a general way with the problems which his department has overcome. He said it was just as necessary for insurance companies to refuse payment of questionable and dishonest claims as to pay bona fide ones. In regard to mutual companies Mr. Fishback stated that the law of his state permitted mutuals to issue non-assessable policies when their reserve reached $200,000.

W. Morley Seller, of Alberta, delivered an address on Mutual Insurance and Legislative Regulation. Mr. Seller advocated the operation of all mutual companies on the assessment plan.

### Uniform Legislation

The model fire insurance act and the model life insurance act were dealt with on Friday in joint session with the Dominion Commissioners on Uniformity of Legislation. Certain recommendations of the insurance superintendents in respect of these proposed acts did not meet with favor by the commission with the result that no decision has been reached for the present. C. C. Ferguson of The Great West Life, Winnipeg, submitted a draft of a life insurance act which he had drawn up.

W. H. Slater, manager of the insurance department of the Canadian Manufacturers' Association appeared before the association with a demand that the superintendents take steps to increase their powers in regard to control of rate-making bureaux. He advocated the right of appeal by the assured to the insurance superintendent against any rate which might be thought excessive.

### The Annual Banquet

The fifth annual conference banquet, held on August 10, in the Hotel Vancouver, proved an outstanding success both from a social and educational standpoint. Nearly 150 were present, including prominent members of the local insurance fraternity, representing all branches of the business, as well as the visiting superintendents and fire marshals, company managers and officials from Eastern Canada and others.

At the head table were seated Charles Heath, superintendent of insurance for Manitoba, Mayor C. E. Tisdale, A. Mac. Creery, J. W. deB. Farris, K.C., Alfred Wright, of Toronto, President of the Canadian Fire Underwriters' Association, V. Evan Gray, Ontario superintendent, and Hon. H. O. Fishback, Washington State Insurance Commissioner.

The program included an exhibition of moving pictures of the whaling industry on the west coast of Vancouver Island.

A. Mac. Creery proposed the toast to the insurance superintendents, and the response was given by V. Evan Gray. John B. Laidlaw, of Toronto, manager of the Norwich Union, gave an interesting and instructive address on "Fire Insurance and its Relation to Commerce." The toast to the province of British Columbia was proposed by Arthur E. Fisher, of Saskatchewan, with response by J. W. deB. Farris, K.C., M.L.A. Chairman Charles Heath, of Manitoba, proposed the toast to the city of Vancouver, to which Mayor Tisdale responded. Mr. Tisdale spoke of the close race which Vancouver was giving Montreal for honors as the leading shipping port of Canada and gave high praise to the Vancouver Fire Department and Chief Carlisle for efficiency in fire fighting. He stated that the water supply system would soon be the best on the continent.

"The Companies and Their Managers" was proposed by Frank W. Rounsefell, of Vancouver, with responses by Thos. L. Morrisey, of Montreal, manager of the Union Assurance Society of London, and by Stanley Henderson, of Vancouver. "Insurance Agents" was the toast proposed by Alfred Wright, of Toronto, and responded to by George L. Schetzy and J. A. Birmingham, of Vancouver.

## EQUIPMENT CO.S RECEIVE ORDERS

### Canadian Car & Foundry Co. Wrking on Order for 150 Street Cars—Railways Having Cars Repaired

The order for 150 street cars which was received a short time ago by the Canadian Car & Foundry Company, Limited, is now being handled hy the company's Montreal plants. The business will occupy some little time in completing.

An official of the car company stated that while the order is not a large one it is nevertheless reassuring that the company is in a position to compete for this kind of business.

According to the company official, confirming the order for street cars for the Toronto Transportation Commission, the new cars will be of the Peter Witt type, being front entrance, one-man motors with centre exit, similar in type to those now being operated on the Yonge street line. Of these there will be manufactured fifty, while the order will also comprise one hundred trailers, making 150 cars for the whole contract.

There is also a certain amount of repair work passing through the plants of the company as well as other equipment companies in Canada.

The Grand Trunk Railway is having 100 refrigerator cars repaired by the National Steel Car, and 500 coal cars and 500 box cars repaired by the Canadian Car & Foundry and Eastern Car. The Canadian Pacific Railway has ordered 250 refrigerator cars from the National Steel Car.

It is also reported that the Canadian equipment companies are also in line to receive some very fine business from the United States, owing to the strike situation there. This will be in the nature of repair business to locomotives and cars, and barring an early settlement of the strikes this business may run into large figures.

## PLAN NEW POWER PLANT

Following prolonged negotiations, the Hull Electric Company has acquired large property holdings in Low Township, along the shores of the Gatineau River, including the riparian rights to the Paugan Falls, about 35 miles from Ottawa and will in the course of the next year establish a Hydro power plant with an ultimate capacity of 150,000 horsepower. The cost of construction, it is said, would approximate $10,000,000.

It is pointed out that the total capacity of the present Hydro plants at the Chaudiere, between the cities of Ottawa and Hull, was slightly less than 50,000. The new plant with its enormous capacity would be a boon to both the cities of Ottawa and Hull as well as to the Gatineau Hinterland, where it is expected the proximity of power would draw industrial enterprise from all over the country.

In addition, it is estimated that it would take about two years to complete the plant, including a huge viaduct and dam and that employment would be found for about one thousand residents of this district.

## KINGSTON WHARVES

The Montreal Transportation wharves in Kingston, Ont., may be taken over by the T. Russell Wrecking and Salvage Company, which wants an eastern location for its plant. It proposes to make these wharves the headquarters also of the Canada Steamships, Limited, and for a public wharf for Kingston.

## NO IMMEDIATE ADVANCE IN NEWSPRINT

Although the International Paper Co., has increased its price for paper, uncontracted for, to $80 per ton, the Canadian paper mills, which are producing to 97 per cent. of capacity, or about 1,200,000 tons per year, will make no advance over the present price of $70 a ton for the remainder of this year, as most of their output is bound by contract.

Many manufacturers are urging a very moderate advance on January 1, to about $75, lest high prices check the present high consumption.

## VOLUME OF EMPLOYMENT ON UPGRADE

"The volume of employment is undoubtedly on the upgrade," was the optimistic view expressed by R. A. Rigg, newly-appointed Director of the Employment Service of the Department of Labor. "Business is recovering unquestionably. We have touched the bottom of the valley and we have begun to climb. The improvement in the labor market, though gradual, is very perceptible." Mr. Rigg does not anticipate as hard a winter as the last two had been.

# Ontario Hydro Attacks Critics

The Hydro-Electric Power Commission of Ontario has issued in booklet form a reply to what is known as the "Murray Report." The booklet is entitled "Repudiation of Unjust Statement contained in a report published by the National Electric Light Association entitled 'Government Owned and Controlled as compared with Privately Owned and Regulated Electric Utilities in Canada and the United States', respecting the Hydro-Electric Power Commission of Ontario." In its 53 pages some of the arguments in the Murray report are discussed and criticized. Sir Adam Beck, chairman, says in a foreword:—

### Chairman's Statement

There has recently been issued a voluminous printed report under the title "Government Owned and Controlled, compared with Privately Owned and Regulated Electric Utilities in Canada and the United States." This report is popularly known as the "Murray Report." Even a cursory examination of its contents reveals the fact that its real purpose is evidently to undermine, if not to destroy, public confidence in public ownership and to this end an attempt is made in it to discredit the success of the municipally-owned, hydro-electric power and light undertaking operating for Ontario municipalities by the Hydro-Electric Power Commission.

From an explanation presented in the report it is learned that it was prepared by a United States firm of consulting engineers—Mr. W. S. Murray and Mr. Henry Flood, Jr.—acting under instructions from the National Electric Light Association through which organization the report has been distributed to the public. The report itself is signed by W. S. Murray, who personally recived instructions from the National Electric Light Association. This Association is antagonistic to public ownership. Of himself, Mr. Murray, in his report says, "I have never subscribed to governmental ownership of electric utilities in the United States."

In the introductory portion of his report Mr. Murray records that he received a commission "from the National Electric Light Association, to investigate and report on the electric utility systems as operating in the United States and by the Hydro-Electric Commission of Ontario." Mr. Murray also states: "that the electric utility officials in the States were very much at sea regarding the facts of the Hydro-Electric Power Commission's policies and operations," and that consequently it is his desire to set forth the facts "so that they would be correctly interpreted beyond peradventure of doubt."

The results of Mr. Murray's efforts have been published and a large and widespread distribution of his report has been made throughout both the United States and the Dominion of Canada.

An examination of Mr. Murray's report shows that some eighty-five per cent of its contents consists of information epitomized, or otherwise arranged by him from data supplied from the records of the Hydro-Electric Power Commission of Ontario.

### No Comparative Data.

The report of Mr. Murray effects comparisons between "privately-owned" electric utilities and the Hydro-Electric Power Commission of Ontario, and purports to do so in an "impartial and exhaustive" manner. Information relating to the Commission was unstintingly supplied to Mr. Murray and, as just intimated, portions of these data have been published by him in great detail. He, however, in his report, makes no attempt correspondingly to supply information respecting the private electric utilities. With regard to the private companies in the United States, Mr. Murray fails to designate adequately even the sources and limitations of many of the data which he has employed; while with respect to the private companies in Canada with which he compares the Hydro-Electric Power Commission, Mr. Murray, in response to a special request from the chairman of the Commission, replied that the data of the private companies were given to him in "confidence" and that in this connection he must preserve the restrictions imposed upon him. He could not even submit the data to the Commission, in order to assist it in going more fully into certain assertions published in his report. It will be appreciated therefore, that although on the one hand, the reader has available the detailed evidence relating to the operations of the Hydro-Electric Power Commission, nevertheless, on the other hand, he must content himself—if able so to do—with unsupported assertions made by Mr. Murray now known to be founded upon "confidential" and unpublished data of private interests.

Although Mr. Murray's report upon the face of it bears 'earmarks' of reliability and no expense has been spared to present it in attractive form, nevertheles, Mr. Murray makes incorrect statements and representations respecting the Hydro-Electric Power Commission of Ontario and its operations, which lead to conclusions at complete variance with the facts. It is desirable, therefore, that an authoritative statement be made which shall disclose the inherent unsoundness of Mr. Murray's report.

The users of electrical energy in the province of Ontario are in no doubt respecting the actual and genuine benefits of the cheap light and power which they have so long enjoyed. It is, however, not for the citizens who understand the subject that the present statement is prepared, but rather for those in Canada or in the United States who are unfamiliar with, but who nevertheless are really concerned to know, the facts. It is believed that both in Canada and in the United the work of developing, distributing and using hydro-electrical en- real facts relating to the subject ergy who would like to know the Mr. Murray discusses but who are unable either to take the time or to make the effort necessary to conduct an independent investigation. Even among the members of the National Electric Light Association there are, no doubt, many who would like to know definitely whether or not Mr. Murray's conclusions could satisfactorily be sustained if criticism were intelligently directed against them. There are, in Canada, some who have been unsettled by similar propaganda plausibly sent forth but devised with the express object of discounting the achievements of Ontario's

municipal hydro-electrical undertaking.

### Title Was Misleading

In commencing this discussion it should clearly be understood that the very title of Mr. Murray's report is misleading. The phrase "Government Owned and Controlled," in its usually accepted meaning—and especially as understood in the United States—conveys a significance radically different from any which can be attached to the operations of the Hydro-Electric Power Commission of Ontario. As commonly understood, "Government ownership" carries with it the conception of political domination in the appointment of officials and other employees and in the purchase of equipment and supplies and, in addition, the view that political manipulation may be impressed upon important phases of the operations in hand. As contrasted with such a political organization it may simply be stated that the Hydro-Electric enterprise of the municipalities in the province of Ontario is not "Government ownership." It is co-operative, municipal ownership working through the agency of independent commission control and administration and is entirely removed from political interference. Mr. Murray has not emphasized as he should have emphasized, nor has he kept to the front, this fundamental distinction between "Government ownership" as generally understood, and Co-operative Municipal ownership as expressed in the constitution and work of the Hydro-Electric Power Commission of Ontario. Had this point alone been clearly brought out by Mr. Murray, he would have required to look elsewhere than to the Hydro-Electrical Power Commission for his only illustration of a "Government Owned" electric utility. It was, however, vital to Mr. Murray's presentation that, by some means, he should identify the undertaking of the Hydro-Electric Power Commission with government ownership, in order that the stigma of government ownership as commonly understood should be transferred to the unique, co-operative, municipal-ownership undertaking of the Commission and thus aid in casting discredit upon the achievements of the people of the province of Ontario who have directly assumed the financial responsibility of obtaining their hydro-electrical energy at cost.

## JAPAN DEMAND FOR LUMBER

That the increasing demand for lumber all through the Japanese Islands as well as in Korea and that part of Siberia which is more or less under stable government will benefit the Canadian market to a large extent, and that the already existing export market from Vancouver is due to receive a great impetus, is the opinion of O. E. Heilman, a lumber broker of Nagasaki, who arrived in Vancouver on August 15 to arrange connections with British Columbia lumber concerns.

"Every ship going to Japan from Vancouver should carry a large cargo of lumber," he said. "The demand there is increasing all the time, and the Japanese businessmen show a very friendly feeling towards Canada."

**"A Burned Building Does Not Pay Rent"**

Every property owner knows that fact. But a consistent canvass of your clients will show that few know you can furnish RENT AND RENTAL VALUE INSURANCE to indemnify such losses.

Rent and Rental Value Insurance sells "at sight" when properly presented. It can be sold to property owners whether their buildings are leased to others or occupied by themselves.

Many new leases and renewals will be made during September. Are you ready to take advantage of these opportunities to sell Rent and Rental Value Insurance.

**Do Not Let Your Client Go Unprotected**

# *Municipal Finance*

**Acton, Ont.**—The tax rate for the present year has been struck at 47 mills on the dollar.

**North Vancouver, B.C.**—During the month of July total collections amounted to $70,506, of which $54,591 was from taxes.

**Perth, Ont.**—The tax rate for the present year has been struck at 43 mills on the dollar, the same rate as prevailed last year.

**Quebec, Que.**—The annual fi,nancial statement of the Protestant Board of School Commissioners for the city of Quebec has juts been issued. The report shows that the receipts of the board were $69.629. while the expenditures were $68, 209, leaving a balance on hand of $1,420.

The principal item of expenditure was $38,-429 for teachers' salaries. Maintenace of schools accounted for $9.298. The sum of $60,669 was realized in school taxes.

**Fort William, Ont.**—During the first six months of 1922 total tax collections amounted to $500,489, out of an annual levy of $1,089,907. For the same period last year, when the annual levy was $1,135,201, there was collected an amount of $496,959.

**Vancouver, B.C.**—Taxes collected by the city during July totalled $404,726, compared with $279,123 for July last year, according to figures fiiven out by the city treasurer. During the period from Aug. 1 to Aug. 5, inclusive, another $368,313 was collected. Collections in the waterworks department for the month of July this year totalled $40,887.

**Melville, Sask.**—The bondholders will be represented on September 10 at a meeting called by the Local Government Board for the purpose of considering the question of the arrears of interest.

**Sutherland, Sask.**—The bondholders will be represented on September 12 at a meeting called by the Local Government Board for the purpose of considering the question of the arrears of interest.

**Ottawa, Ont.**—The assessment commissioner has finally decided to exempt from the assessable income of such portion of the salaries of federal employees as is retained by the government as superannuation or retirement deductions. This decision was reached after consultation with the city solicitor.

The ruling now given settles a contentious point which has annually given rise to much worry both to federal employees and the city assessment office.

The secretary of the Civil Service Assocation interviewed the assessment commissioner, and is in a position to officially inform federal employees that the retirement and superannuation deductions will be exempt from the assessment based on the salary received in 1922 if each employee will make his of her claim for such exemption on the space allotted for appeals, on the assessment notice, if such claim is in the office of the assessment commissioner not later than August 22, 1922. Letters bearing post mark of August 22 will be regarded as in the hands of the assessment commissioner.

**Victoria, B.C.**—According to figures prepared by Alderman D. Leeming and presented to the city council on August 11, more than twenty-three per cent. of the city's improved property, as at present assessed, is exempt from taxation, and more than ten per cent. of the unimproved property is similarly free. Mr. Leeming stated that the per capita valuation of exempted land and improvements in the city was $267.21.

In Victoria the principal exempted property is as follows:—

| Use or Owner | Land | Improvements |
|---|---|---|
| Province .... .... ............ | $ 644,970 | $2,344,000 |
| Dominion .... .... ............ | 292,320 | 577,000 |
| Hospitals .... .... ............ | 178,350 | 242,100 |

| C. P. Railway .... .... | 283,500 | 907,500 |
| Churches .... .... .... | 191,390 | 607,700 |
| Totals .... .... ............ | $3,999,350 | $6 289,670 |

**Weston, Ont.**—The new tax rate for the present year has been struck at 44 mills on the dollar, this being two mills lower than last year. The amount to be raised by taxation is placed at $108,000.

## ANNUAL REPORT OF B. C. MUNICIPALITIES

### Land Assessments Decrease and Improvements Increase—Sinking Funds Show Big Shortage—Tax Arrears Show Decrease

Due to stringent measures of economy brought into effect by the various municipalities during the past few years, there has been a slow but steady improvement in the financial position of sixty-two British Columbia municipalities, according to the annual report of Municipal Inspector Baird for the year ended December 31, 1921.

In presenting the report Mr. Baird says in part: "The assessment figures show a reduction of $16,356,981 in the assessed values of land and an increase of $24,777,541 in the assessed values of improvements. The reduction in the assessed values of land is a continuation of the process which has been necessary for a number of years of reducing assessments in various parts of the different municipalities to bring them down from the inflated values which prevailed some years ago to a normal selling value. Since the year 1915 the assessed value of the land in the municipalities has been reduced from $486,540,635 to $332,789,774, while the assessed value of improvements has been increased from $196,346,306 to $221,418,811. The increase in the value of improvements, of course represents a normal development of the lands, chiefly by way of building construction.

"In connection with the assessment figures it is shown that among the cities there are ten which still exempt improvements entirely from taxation, as compared with eighteen in the year 1915, and among the districts there are now fifteen which exempt improvements,as compared with twenty in 1915.

"The details as submitted show that the tax levy for the year 1922 has not greatly changed from that of 1921."

### Liabilities

With regard to liabilities at the end of the year the report makes the following statement: "The schedule shows that the debenture liabilities on this date amounted to $97,495,983., an increase of $1,388,073 over the previous year. The situation in this respect is quite satisfactory. The year 1914 was the first year with respect to which complete and accurate figures were obtainable, and since that date the increase in debenture liability has been slightly over $9,000,-000. In view of the fact that in the year 1912 alone debentures were issued by the municipalities of the province in excess of $20,000,000, and in the year 1913 to the amount of approximately $23,000,000, the results of the years from 1914 to 1921 may be considered to have been on the whole quite satisfactory, although it must be pointed out that a continuation of the policy of these last years is necessary for some considerable time to come."

### Sinking Funds

A survey of sinking funds shows that there has been a slight decline from the previous year in the shortages. The two largest shortages which occur, are Vancouver and Victoria. In the former case the city is behind $1,603,834, as compared with $1,765,330 in 1920. The city of Victoria shows an increase in its shortage from $2,819,554 in 1920 to $3,147,507 in 1921.

Commenting on the position of the sinking funds at the end of the year Mr. Baird says: "The statistics setting out the conditions of the sinking funds indicate that there are shortages amounting to $5,502,666.61, slightly less than at the close of the year 1920. Good progress has been made in the majority of the municipalities in the way of strengthening their sinking fund assets, and the excellent investments which have been available in recent years have given a great deal of assistance in this respect, but it will be noted that in a few cases the situation shows a tendency in the opposite direction. Unfortunately the figures as given to represent the sinking fund investments are not consistent in their meaning throughout the list, and I have not been able to obtain a uniform report in respect of these investments. In the greater number of cases the figures show the amount actually invested, but in a few instances they indicate only the face value of certain bonds and debentures which have been purchased at a discount."

### Bond Prices

Mr. Baird does not agree that it is a good policy to write up to their face value, bonds which have been purchased at a discount, and in his report he makes the following statement: "I am not able to agree that it is a good policy to write up these bonds at once to their par value and show a sudden increase in assets when in reality there is no greater value than before. It is quite true that if succeeding councils hold these bonds to the date of maturity they will realize their face value, but it is misleading to say, for example, that $70 can be at once converted into $100 by the exchange of one security for another only equally valuable as an asset. I am of opinion that the statute governing the sinking funds might very well be amended so as to ensure uniformity in the valuation of these assets.

"It is to be noted that there are still irregular investments of sinking funds made from time to time, the irregularities consisting chiefly of investments made by some of the municipalities in their own debentures. Under our statutes a municipality is not permitted to invest its sinking funds in its own debentures, except to this extent; that it may redeem debentures from the sinking fund of the particular issue to which the debentures belong, but when they are so redeemed they cannot be held as an investment but must be cancelled. In some cases purchases of debentures for investment have been made, and the result of the purchase has been that debentures still left outstanding have been improperly robbed of a substantial portion of their value. I would suggest that in view of some of the transactions which have taken place a further check should be placed upon the administration of these moneys."

### Tax Arrears

The amount of the arrears of taxes outstanding at the end of the year shows a decrease from $8,433,066 to $6,964,164 in 1921. This amount shows a substantial reduction of outstanding arrears, but at the same time the investment of the municipalities in lands purchased at tax sales have increased from $5,247,788 to $6,507,912.

During the year total expenditures exceed the receipts by about $700,000, or to put it in actual figures the receipts were $21,841,041 and the expenditures were $22,591,159. Mr. Baird makes the following comment upon the receipts and expenditures.

"The schedules of receipts and expenditures represent as nearly as possible the cash transactions of the municipalities during the year. It is not yet possible to prepare a general statement of the administration of the year's actual revenue, but the details of receipts and expenditures now show approximately the same result as would be seen from such a statement.

"The expenditures for the year have increased, however, from $20,686,963 to $22,591,159. the items showing the heaviest proportion of increase being expenditures on roads and streets, on administration of justice, and on schools. It is to be noted that although the taxes actually collected were slightly over $1,000,000 greater than the tax levy for the year, yet the total of the moneys received during the year was approximately $750,000 less than the amounts paid out. I would suggest that the greater portion of this deficit is the result of an unfortunate policy of keeping the tax rate as low as possible regardless of the condition of the balance at the end of the year. The policy which is being followed shows no prospect of getting rid of the burden of current liabilities, which seems as a matter of fact to be increasing from year to year."

The amount of taxes levied during 1921 shows a slight reduction from the previous year, or from $13,802,623 to $13,357,860.

The tax collections for the year show a slight decrease from the preceding year, but the gross amount of the cash receipts is slightly in excess of the previous year. Tax collections during 1921 totalled $14,550,526, as compared with $15,467,662 in 1920.

Money by-laws certified during the year have decreased from $2,149,057 to $1,567,272.

## WINDSOR'S INCOME ASSESSMENT

In the Monetary Times of August 11 it was reported that according to A. Black, assessment commissioner of Windsor, Ont., the municipal income tax would bring approximately $1,000,000 to the city treasury this year. Mr. Black now informs the Monetary Times that the $1,000,000 mentioned is income assessment on which taxes will be levied in 1922, and has no reference to the amount of income tax that the city treasury will receive this year.

Taxation of Federal State and Municipal Bonds

## B.C. LUMBER SHIPMENTS GROWING

### Business for Six Months of Present Year Shows Decided Increase Over Last Year

At a recent meeting of British Columbia lumber and shingle manufacturers at Vancouver, it was stated that short yard stocks and orders were coming in at a faster rate than could be filled. But, it was stated, profits are not high enough to warrant any system but the most economical to be practised and all costs have to be kept down to make it possible to compete in foreign markets.

Statistics compiled by the association covering the first six months of the present year show that British Columbia has held its own in the lumber business. The water-borne shipments, foreign and domestic, as reported to the Pacific Lumber Inspection Bureau for the six months this year, compared with the similar period a year ago, were as follows (,000 feet omitted):

| | 1921 | 1922 |
|---|---|---|
| B. C. ......... | 80,661 | 142,628 |
| Washington ... | 427,240 | 1,041,114 |

## MONTREAL HARBOR

Plans for harbor improvements, that will involve the expenditure of nearly four and a half million dollars, were announced by the harbor commissioners after they had received the official sanction of Hon. Ernest Lapointe, minister of marine and fisheries.

The plans embrace a new grain elevator with an initial capacity of two million bushels, to be ultimately increased to 8,000,000 bushels; preparation of designs for the proposed new bridge across the harbor; extension of the high level quay walls; extension of wharves and piers; improvement of channel approaches, and paving and extension of the harbor railway terminals.

Work will be commenced immediately.

## PRODUCE PRODUCTION

The total quantity of creamery butter produced in Canada in 1921 was 122,776,580 lbs. of the value of :45,893,088, as compared with 111,691,718 lbs. of the value of $63,625,203 in 1920, an increase in quantity of 11,084,862 lbs., or 10 p.c., and a decrease in value of $17,732,111, or 28 p.c. The decrease in value was caused by a lower average price per lb., which dropped from 56c in 1920 to 37c in 1921.

The total quantity of cheese produced in Canada in 1921 amounted to 161,062,626 lbs. as against the previous year's total of 149,201,856 lbs., an increase of 11,860,770 lbs. The value of the product decreased $10,485,687.

# Government and Municipal Bonds

In a recent issue of the Wall Street Journal, the opinion was expressed by leading bond dealers that there seems to be every indication that the September bull bond market has begun before the beginning of the month. On the stock exchange and over the counter there is an active demand for investment issues. With high grade legal railroad bonds and the best public utility bonds becoming scarcer daily, traders predict an upward movement in second grade and the more speculative issues.

Whether the Canadian government and municipal bond market is taking the same trend as New York, it is rather hard to say, although during the past week there was a noticeable improvement, both in activity and prices, over the previous week. Reports from bond men indicate that they do not expect any decisive spurt in the market during the next month, although they expect that the market will continue to show a gradual improvement each week, so that by the time the crops have been harvested, the bond market will be in a position to absorb all the issues which will be offered.

An indication that the market is improving is shown in the list of sales during tthe week. With the exception of the Three Rivers issue, sales were mostly of small denominations, and bidding for these was very keen, most noticeable in the Barton township and Nepean township issues. Competition for both these issues was very strong, in the former issue twenty bids were received and in the latter issue fifteen tenders were received. As municipal bonds have been comparatively scarce it is not to be wondered that dealers are anxious to secure some good bonds, and are willing to bid high, as a glance at the list of sales will show.

### Conversion Proving Successful

Prospects for the successful conversion of the 5-year bonds of the 1917 Dominion of Canada War Loan which falls due in December are regarded as very bright indeed. Returns are already being received by the Department of Finance from the banks which indicate that there is an almost unanimous demand on the part of holders of the bonds in question for the converson thereof at the terms stipulated.

The department reports that so favorable are these terms, 5½ per cent., that several financial firms have inquired whether or not they would be allowed to subscribe. This, however, will not be permitted as the loan is purely a conversion one, designed primarily, to place the patriotic purchasers of the 5-year bonds on a basis of equality with the holders of the 1945 maturities. Later a domestic loan will be floated.

It is regarded as likely that not only the majority of individual holders will convert, but that the great bulk of the bonds held by mercantile firms will be converted also.

### Tenders Invited

The following is a list of debentures reported for sale, particulars of which are given in this or previous issues:—

| Borrower | Amount | Tenders close |
|---|---|---|
| Galt, Ont. | $410,000 | Aug. 28 |
| Guelph, Ont. | 365,000 | Sept. 1 |
| Carleton County, Ont. | 196,000 | Sept. 13 |
| Prince Edward Island | 175,000 | Aug. 25 |
| Peel County, Ont. | 80,000 | Sept. 1 |
| Dartmouth, N.S. | 50,000 | Sept. 5 |
| Crowland Twp., Ont. | 32,000 | Aug. 26 |
| Enderby, B.C. | 23,000 | Sept. 20 |
| Wiarton, Ont. | 18,000 | Sept. 1 |
| Chateauguay Basin, Que. | 10,000 | Sept. 2 |
| Winslow South, Que. | 8,000 | Sept. 1 |

**Guelph, Ont.**—Tenders will be received up to September 1, 1922, for the purchase of $365,000, 5 per cent., 20-year debentures. J. Orr Rose, city treasurer.

**Dartmouth, N.S.**—Tenders will be received up to noon September 5, 1922, for the purchase of $50,000, 5½ per cent., 20-year debentures. Bonds are dated July 3, with principal and interest payable at Dartmouth. Alfred Elliott, treasurer.

**Carleton Co., Ont.**—Tenders will be received up to September 13, 1922, for the purchase of $196,000, 5½ per cent., 20-instalment debentures. H. R Washington, county treasurer, Ottawa.

**Enderby, B.C.**—Tenders will be received up to September 20, 1922, for the purchase of $23,000, 6 per cent., 15-year electric light debentures. Graham Rosoman, city treasurer.

**Crowland Twp., Ont.**—Tenders will be received up to August 26, 1922, for the purchase of $32,000, 5½ per cent., 20-instalment debentures. A. Matthews, treasurer, Welland.

**Chateauguay Basin, Que.**—Tenders will be received up to September 2, 1922, for the purchase of $10,000. 6 per cent., 20-year school bonds. J. G. Wright, secretary-treasurer.

**Galt, Ont.**—Tenders will be received up to August 28, 1922, for the purchase of debentures totalling about $410,000, bearing interest at 5½ and 6 per cent., with various maturities. Jos. McCartney, treasurer.

**Winslow South, Que.**—Tenders will be received up to 1 p.m. September 1, 1922, for the purchase of $8,000, 6 per cent., school debentures. Interest payable at the Provincial Bank at Megantic. George Hornblower, secretary-treasurer.

**Wiarton, Ont.**—Tenders will be received up to September 1, 1922, for the purchase of $12,000, 6 per cent., 5-instalment, and $6,000, 6 per cent., 20-instalment debentures. S. J. Parke, town treasurer.

### Coming Issues

**North Bay, Ont.**—On September 6 the ratepayers will vote on several debenture by-laws totalling $45,000 for local improvements.

**Montreal, Que.**—At a meeting of the city council on August 14, a by-law for the issuing of $1,500,000, 5 per cent., 40-year debentures for the rebuilding of the city hall was passed.

**Alberta.**—Preparations are now being made by the treasury department for a new debenture issue some time this Autumn. The province has $5,000,000. of four per cent. sterling debentures maturing November 1, and a refunding issue is to be put out for the purpose of meeting this obligation when it fall due. No definite decision has yet been reached as to the date and terms of the issue, but it is expected that it will be placed on the market in the latter part of September or early in October.

When the refunding issue has been disposed of, Alberta's financing will be done for the year.

**Port Credit, Ont.**—On August 14 final reading was given the waterworks by-law, including a change in the wording to permit the outlay of $65,000, instead of $60,000, as at first agreed.

**Regina, Sask.**—On August 10 the city council passed a by-law authorizing the issuing of $50,000, 5½ per cent., 10-year debentures for the final payment of the city on the half million dollar loan granted by the Saskatchewan government in 1912 to aid cyclone sufferers.

In connection with the above debenture issue, Commissioner Thornton informed the aldermen that unfavorable marketing conditions for municipal debentures were prevalent at present and that it was the intention of the commissioners to withold the offering of the issue as long as possible in hope of a stronger demand.

**New Toronto, Ont.**—At the next meeting of the council a by-law for the issuing of $50,000. debentures for school purposes will be brought forward.

**Brooklands, Man.**—On September 8 the ratepayers will vote on a by-law authorizing the issuing of $10,000. debentures for school purposes.

**Port Credit, Ont.**—The clerk has been instructed to borrow $10,000 for the purchase of a site for the new waterworks plant.

The school board has requested permission from the council to borrow $48,000 for building a new school.

**Yorkton, Sask.**—At the last meeting of the town council it was decided to make application for authority to issue debentures for repaying advances made upon security of arrears of taxes to end of 1920.

A by-law capitalizing arrears of municipal taxes to the extent of $69,618 was read three times and the by-law authorizing the raising of $50,000 pursuant to provisions of Arrears of Taxes act was also read three times.

**Teck Twp., Ont.**—The ratepayers have voted to issue $40,000 debentures for the construction of a water system at Kirkland Lake and Swastika.

### Bond Sales

**Campbellton, N.B.**—An issue of $60,000, 5½ per cent., 35-year debentures has been sold to Thomas, Armstrong & Bell jointly with the Royal Securities Corp., at a price of 98.06, the money costing the town about 5.62 per cent. The tenders were as follows:—

| | |
|---|---|
| Thomas, Armstrong & Bell and Royal Securities Corp. | 98.06 |
| Gairdner, Clarke & Co. | 95.53 |
| Wood, Gundy & Co. | 94.58 |
| McLeod, Young, Weir & Co. | 94.15 |
| Eastern Securities Co. | 94.11 |

**Weston, Ont.**—R. C. Matthews & Co. were awarded $25,000, 5½ per cent., 20-instalment debentures, paying a price of 97.87, which means that the town will pay about 5.76 per cent. for its money. The following is a list of tenders: R. C. Matthews & Co., 97.87; Dominion Securities Corp., 97.74; C. H. Burgess & Co., 97.57; Wood, Gundy & Co., 97.41; Bell, Gouinlock & Co., 97.27; MacNeill, Graham & Co., 92.27; W. C. Brent & Co., 97.116; Canada Bond Corp., 96.85; A. E. Ames & Co., 96.66, and McLeod, Young, Weir & Co., 96.27.

**Nepean Twp., Ont.**—R. A. Daley & Co., were the successful tenderer for $235,000, 5½ per cent., 20- and 30-instalment debentures, paying a price of 98.69, which means that the township will pay about 5.62 per cent. for its money. Bidding for this issue was keen, no less than fifteen bids being received, with a variation of 1½ points between the highest and lowest tender. The following is a list of tenders:—

| | |
|---|---|
| R. A. Daly & Co. | 98.69 |
| A. E. Ames & Co. | 98.64 |
| Wood, Gundy & Co. | 98.61 |
| W. L. McKinnon & Co. | 98.26 |
| Dyment, Anderson & Co., and Bell, Gouinlock & Co. | 98.10 |
| A. Jarvis & Co. | 98.09 |
| Gairdner, Clarke & Co. | 98.03 |
| Canada Bond Corp. | 97.814 |
| Municipal Bankers' Corp. | 97.63 |
| R. C. Matthews & Co. | 97.595 |
| MacNeill, Graham & Co. | 97.537 |
| C. H. Burgess & Co. | 97.56 |
| United Financial Corp. | 97.33 |
| McLeod, Young, Weir & Co. | 97.27 |
| National City Co. | 97.19 |

**Gloucester Twp., Ont.**—W. L. McKinnon & Co. were awarded $35,000, 5½ per cent., 30-year debentures at a price of 98.83, the money costing the township about 5.58 per cent. The following is a list of tenders: W. L. McKinnon & Co., 98.83; Wood, Gundy & Co., 98.31; R. C. Matthews & Co., 98.25; and C. H. Burgess & Co., 97.66.

**Ingersoll, Ont.**—As bids received from bond houses were considered too low, the town council decided to sell $92,000, 5½ per cent. debentures locally.

**Three Rivers, Que.**—An issue of $850,000, 5½ per cent., 25-year debentures has been sold to a syndicate headed by A. E. Ames & Co., at a price of 97.1496, the money costing the city about 5.71 per cent. The following is a list of tenders:—

| | |
|---|---|
| A. E. Ames & Co.; R. A. Daly & Co.; Hanson Bros.; and Canadian & Foreign Securities Co. | 97.1496 |
| Wood, Gundy & Co. | 96.833 |
| Provincial Securities, Ltd. | 94.90 |
| Rene T. Leclerc & Co. | 94.20 |
| L. G. Beaubien & Co., and Versailles, Vidricaire & Boulais, Ltd. | 92.65 |

**Barton Twp., Ont.**—McLeod, Young Weir & Co., have purchased $120,000, 5½ per cent., 30-year school debentures, paying a price of 100.31, which means that the township will pay about 5.48 per cent. for its money. There was very keen bidding for this issue, no less than twenty bids being received. The tenders were as follows:—

| | |
|---|---|
| McLeod, Young, Weir & Co. | 100.31 |
| Dyment, Anderson & Co. | 99.91 |
| Bell, Gouinlock & Co. | 99.82 |
| Wood, Gundy & Co. | 99.78 |
| A. E. Ames & Co. | 99.70 |
| MacNeill, Graham & Co. | 99.62 |
| Dominion Securities Corp. | 99.555 |
| R. C. Matthews & Co. | 99.54 |
| National City Co. | 99.53 |
| Kerr, Fleming & Co. | 99.341 |
| Gairdner, Clarke & Co. | 99.179 |
| W. L. McKinnon & Co. | 99.12 |
| C. H. Burgess & Co. | 99.04 |
| A. Jarvis & Co. | 99.04 |
| Canada Bond Corp. | 99.03 |
| R. A. Daly & Co. | 98.81 |
| Housser, Wood & Co. | 98.779 |
| Aird, McLeod & Co. | 98.719 |
| Imperial Bank | 98.28 |
| W. C. Brent & Co. | 96.55 |

**Athol Twp., Ont.**—An issue of $4,000, 6 per cent., 20-year school debentures has been sold to W. L. McKinnon & Co., at a price of 101.882, the money costing the township about 5.84 per cent. The following is a list of bids: W. L. McKinnon & Co., 101.882; Canada Bond Corp., 101.12; MacNeill, Graham & Co., 100.575; C. H. Burgess & Co., 100.56; R. C. Matthews & Co., 100.17, and Harris, Forbes & Co., 99.20.

## DEEP WATERWAYS AND COAL

### Welsh Product Could Compete if St. Lawrence Canals Were Deepened, Says Association.

In 1920 the Canadian Deep Waterways and Power Association advocated the deepening of the St. Lawrence canals, to admit 8,000 to 12,000 ton cargoes, when coal from the east would be able to supply the Canadian market far enough west to meet the supply of Canadian coal from the west.

The association in a circular just issued says:—

"Onece the St. Lawrence waterway is improved the competition between tramp steamers will give as good a rate to the lake points as to Montreal. Welsh coal could replace the anthracite coal usually imported from the United States, and coal from the Maritime Provinces could replace the American bituminous coal of which we annually import 13,000,000 tons into Canada.

### Might Reach Lake Erie

"If the canals and locks in the Upper St. Lawrence River were enlarged so as to permit vessels carrying 8,000 tons and upward to enter the Great Lakes, the best Welsh anthracite coal could be laid down on the docks in Lake Ontario, and probably Lake Erie, at $12.60 per ton.

"Coal on the dock at $12.60 per ton means coal in the cellars of the consumers within a reasonable radius at $14.50 per ton. The cost of Welsh coal (best anthracite) on the dock at Montreal, including unloading and dock charge, is $12.60 per ton.

"To bring this coal to Toronto by boat costs $1 per ton, and there is an unloading charge of 75c. per ton, bringing the total cost of delivery to Toronto to $14.35. If brought by rail the freight charge is $3.10 per ton, and the unloading charge about the same as for vessel shipments, bringing the total cost to $16.45 per ton."

## CANADA'S OVERSEAS TRADE

In a report to the Department of Trade and Commerce by Trade Commissioner Gorden B. Johnson, he sums up Canada's overseas trade difficulties in the following words:—"The 'broadcasting apparatus' of Canadian manufacturers is too weak to reach, or retain the attention of customers in the overseas trade; the 'receiving-sets' of the latter being attuned to the shorter wave-lengths of local operators, either as commission agents, or import distributing merchants, and it is to the employment of such local operators, either as commission agents or import distributing merchants that Canadian export trade must look for business."

## STERLING TEXTILE CO.

The Sterling Textile Co., Ltd., one of the leading textile industries of Woodstock, Ont., has assigned, due to lack of capital. The company has been manufacturing under difficulties for some time back, and the assignment is presumed to be an initial step in the plan to restore the industry to financial and working competency.

The company it is stated is not in bad shape financially as to the value of its assets, which will, to all appearances, exceed the total liabilities. The plant is thoroughly modern and well equipped for the manufacture of textile goods.

**Short Term Bonds**

Short term Municipal bonds meet the requirements of those who plan to use a portion of their cash capital within a period of from one to five or six years.

To such investors, bonds of conservative Ontario cities and towns at the prices we quote afford an excellent opportunity. Security is of the highest grade, principal and interest are easy to collect, and interest returns range from 5.60% to 6%.

# Stock Markets

Although the bullish demonstration in the paper stocks was carried through from the previous week, there was a slowing up towards the latter part of the week under review.

This, of course, is to be expected as the advance in this group has continued with unabated energy for the past few weeks and new high levels have been recorded almost every day. It is the general opinion of most of the brokers that the paper stocks are due for a little rest, although whether this will be afforded them or not is a question for the market itself to decide.

In spite of the fact that the paper securities have shown a tendency to react slightly, this is not taken as a general index of the whole market, as one thing that the advance in these stocks has done, has been to increase confidence in regard to the market as a whole. The paper stock advances have also turned public attention to the fact that industry in Canada is by no means lagging, and that if the paper stocks are benefting from a bettered basic position in their industry, there is little reason why this confidence should not be reflected elsewhere.

### Average Gains

In order to bring out the advances made by the paper stocks more clearly, the following table has been prepared showing the advances in these securities on the market during the past wek. These advances bring the average net increases from this year's low point to the high for securities of this nature to 35 points. The movement was general, every issue reflecting strongly to the increase in newsprint prices. The largest advance was made by the Spanish River common, being up 49 points from the 1922 low, with the preferred stock showing a gain of 39⅞ points. Abitibi was third with a 35½ gain, followed by Howard Smith which gained 23¾ points. The following table shows the advances in paper stocks made during the year:

| | Current | 1922 | |
|---|---|---|---|
| | high | low | Adv. |
| Abitibi | 65½ | 30 | 35½ |
| Abitibi Pfd. | 95¾ | 83¾ | 12 |
| Brompton | 38 | 15 | 23 |
| Howard Smith Paper | 83¾ | 60 | 23¾ |
| Laurentide | 96 | 73 | 23 |
| Riordon | 10 | 4 | 6 |
| St. Maurice | 92½ | 70 | 23½ |
| Spanish River Com. | 102½ | 53½ | 49 |
| Spanish River Pfd. | 107 | 67⅛ | 39⅞ |

### Steels Advance

Coming a close second to the paper stocks in the point of activity was the action of the steel stocks, which, during the latter part of the week, more than once assumed the leadership of the market. British Empire Steel, second preferred, occupied the limelight with a large turnover and an advance of several points over last week's price. Steel of Canada was second in the point of activity, showing a slight advance over the previous week.

In view of the coal miners' strike in Nova Scotia, affecting the British Empire Steel Corp., the advances made by that company's stock during the last week, have not been warranted, is the opinion expresed by several brokers. However, the main reason given for these advances is that rumors of important changes in the management, and of progress in the financing plans have outweighed the disturbing news of the labor situation affecting the company's coal operations.

The utility group displayed greater interest than for previous weeks, although towards the end of the week they were somewhat irregular, with Toronto Railway down 3 points in one day. On the whole, however, this group made an improvement over the previous week. The general industrial list showed a steady progress, with few recessions, and all signs point to further activity within the next month or so.

### To Retire Bonds

The Metane Lumber and Development Company that its outstanding first mortgage of 7 per cent. gold bonds will be redeemable as to the principle and interest on and after October 16 at the office of Peabody, Houghteling & Co., Chicago.

## STANDARD STOCK EXCHANGE

A new scale of commission rates adopted by the Standard Stock and Mining Exchange came into effect on August 15. This movement follows similar action by the Toronto Stock Exchange some days ago, and is attributed to the higher cost of conducting business resulting from the additional charges on cheques. The new scale of rates will vary from $1.50 per thousand on shares sold under 5c per share to ½ of 1 per cent. of the amount of money involved on shares sold at $50 and upward. There are fifteen grades of charges, as against ten under the old schedule. The minimum charge of $1 remains the same.

## CLOSE MONTREAL OFFICE

On and after September 1st, next, the New York Stock Exchange firm of Livingston & Company will cease to do business in Montreal. This is the decision which has been made by the heads of the firm in New York. Livingston & Company, a few months ago took over the New York Stock Exchange firm of E. & C. Randolph which for a number of years maintained an office in Montreal.

In the letter to clients, they say:

"Our reason for taking this step is that owing to the very great expansion of private wires from New York City to Montreal brokers since 1914, as the result of which over fourteen are now in operation: and as all of these are maintained for the solicitation and development of business on the New York Stock Exchange, these facilities, not only now, but have for a long time exceeded the possibilities of the business that develops in that territory.

"While we have been most liberally treated, it has become apparent, not only to us but to many houses, that the total volume of business, distributed as it is amongst so many firms, makes the division handled by most houses according to the tatements which they made to us, individually very small."

## ALGOMA EASTERN RAILWAY

A circular has been sent in London, Eng., to the holders of the 5 p.c. First Mortgage 50-year Gold bonds of the Algoma Eastern Railway Company, signed by Alexander Roger, J. C. Dalton, C. B. B. Smith Bingham and Andrew Williamson, in the course of which they state that in view of the failure of the company to meet the instalment of interest on these bonds which fell due on March 1, 1922, it is desirable that the bondholders should organize to protect their interests and they have been requested to act as a committee for this purpose, and are willing to do so if they receive sufficient support from the bondholders.

For some years past they have been acting as a committee for the protection of the interests of the bondholders of the Algoma Central and Hudson Bay Railway Company and the Algoma Central Terminals, Limited, and are therefore familiar with the local conditions.

In many important respects, it is further stated, the interests of the bondholders of the Algoma Eastern Railway are bound up with the interests of the Algoma Central and Hudson Bay Railway and the Algoma Central Terminals.

## BOND HOUSES MERGE

It is announced that the firms of Foster, Barrett, Riepert & Low, Ltd., and H. B. Robinson & Co., Ltd., both of Montreal, have merged their interests, and will operate under the name of H. B. Robinson & Co. Under the new arrangement, the firm will be headed by H. B. Robinson, with P. P. Barrett as vice-president. Mr. Barrett has had considerable experience, and prior to his association with Foster, Barrett, Riepert & Low, Ltd., with whom he was vice-president, was with Rene T. Leclere, where he inaugurated the retail sales department of that firm. Prior to this he was with Nesbitt, Thomson & Co.

## SIMONS, AGNEW AND CO.

Simons, Agnew & Co., members Standard Stock Exchange, Toronto, have opened offices at 189 St. James St., Montreal.

## COLLECTING ON STOCK SUBSCRIPTIONS

### Bank Which Discounted Note Secures Judgment Though Company Was in Weak Position

In an action to recover the balance due upon a promissory note made by Jacob Schwartz, the defendant, in favor of Fisher Wilkie Ltd., and by the latter endorsed to Molson's Bank, Justice Orde, in dealing with the facts said that the original note was for $4,500 and was given in March 1920 by the defendant in part payment for a subscription for $5,000 of the company's shares, the balance being paid in cash. The note was discounted by the company with the Bank. There were two renewals and something was paid on account each time. The note for $3,500 now sued upon was given in September 1920, and matured in December 1920, when the defendant paid the interest and $100 on account and in March another $150.

It was argued that the Bank knew the note was given as a subscription for shares of the company and that that knowledge coupled with knowledge of the company's insolvent condition, fastened upon the Bank knowledge of the invalidity of the note. No authority was cited for any such novel principle. It is absurd to suggest that when a company is in financial difficulties, even bordering on insolvency, there is anything wrong in endeavoring to save the situation by inducing persons to subscribe for stock. There might in certain cases be some moral wrong in doing so, but it would be establishing a most dangerous principle to hold that, because a company's finances are at a low ebb, a bank or other person who takes a note given to the company is put upon inquiry or is deemed to have notice of every defence which the maker of the note might have against the payee. Any such principle would destroy the foundation upon which the rights of bona fide holders for value without notice of negotiable instruments now rest. The Bank took the original note for $4,500 in good faith for value and without notice of any fraud on the part of the company, and thereafter held it as holders in due course.

## HOW QUEBEC HAS SURPLUS

### Profit on Liquor Business is Big Factor—Revenue Totalled $21,609,396, and Expenditure $16,573,976

The financial statement of the Province of Quebec issued last week showed the ordinary receipts for the fiscal year ending June 30, were $21,609,396, while the ordinary expenditure was $16,573,876, showing a surplus of $5,033,419.

In the last Quebec Official Gazette, the headings under which the receipts figure are given as follows:—Dominion of Canada $2,315,081, lands and forests $4,004,432, mines, fisheries and game $660,304, administration of justice $671,319, licenses, hotels, shops $1,602,736, the Alcoholic Liquor Act (trade account) $2,860,010, taxes on commercial corporation $2,009,673, succession duties $3,005,292, tax on transfers of shares, bonds, etc., $87,900, motor vehicle laws $1,982,906, maintenance of insane $695,461, reformatory and industrial schools $166,871, Quebec Official Gazette $48,896, legislation $19,875, registration stamps $263,270, interest on sinking fund under 60 vic. chap. 2, $34,820, interest on loans and deposits $164,343, interest from municipalities under the Good Roads Act $432,040, railway subsidies tax $10,278, minor revenues $673,881. Total $21,609,396.

### Expenditures

The ordinary expenditure is given as follows:—

Public debt $3,450,066, legislation $640,562, civil government $979,564, administration of justice $1,477,324, judges of the court of sessions of the peace, etc., $57,976, inspection of public offices $20,000 public instruction, including night schools $1,706,360, literary and scientific institutions $4,000, arts and manufactures $22,000, Quebec bureau of statistics $19,992, health $189,087, public works (ordinary) $918,147, labor $61,800, agriculture $1,351,000, roads $1,581, 203, lands and forests $716,135, mines, fisheries and game and registration services (cadastre) $196,500, colonization $581,998, immigration $30,000, charities $78,770, lunatic asylums $1,036,059, reformatory and industrial schools $305,000, charges on revenue $793,983, miscellaneous services $458,634. Total $16,573,976.

**7¼% Return for 20 years**

The East Kootenay Power Company is serving an important area.

Its contracts include one with the Consolidated Mining and Smelting Company.

Revenue from present contracts will show substantial earnings on Common Stock after payment of bond interest.

Bonds carry a bonus of common stock.

It is reported that the Howard Smith Paper Mills, Ltd., have very satisfactory orders on hand for their products, and that their new groundwood mill at Crabtree Mills is working to capacity.

## STEEL OUTPUT SHOWS INCREASE

### July Pig Iron Production Was Also in Excess of That of June

Production of pig-iron in Canada for July presented an increase of 10.2 per cent. over the record for June, according to a report issued by the Dominion Bureau of Statistics.

The output in July was 31,705 tons as compared with a production of 28,763 tons in the previous month. The decided advance in the basic pig manufactured for further use was an interesting development in this connection. In June, 14,714 tons were produced while in the next month the records indicate an output of 25,419 tons. Notwithstanding the encouraging increase over the totals for May and June, the output in July is considerably below the monthly average for 1921 and for the first half of 1922. The average for the half-year was 32,031 and during 1921 the average monthly production was 51,534 tons.

The output in July 1921 was 54,086 tons and the record for the month under review presents a decrease of 41.4 per cent. The cumulative production for the seven months ending July 31st last was 223,892, as compared with a total production of 363,292 tons during the corresponding period of 1921.

The furnace at Hamilton was idle at the end of the month leaving in operation two furnaces at Sault Ste. Marie and one at Sydney.

### Price of Basic Pig Steady

The production of pig iron during July in the United States showed an absolute increase of 39,017 tons as contrasted with a loss in the daily rate of 1281 tons. The composite price increased from $24.05 per gross ton on July 25th to $24.38 on August 1st. The Canadian price of basic pig iron as quoted by one of the steel companies remained steady for July at $27.00 per ton notwithstanding the rapid increase from $24 in April to $27 in June.

A surprising advance in the production of steel was effected in July. The output in June was 32.805 tons while in the month under review 62,767 tons were produced constituting an increase of 91 per cent. The advance occurred chiefly in the open hearth basic ingots produced for further use. The output was 61,243 compared with 31,206 tons in June, comprising an increase of 96.1 per cent. The average monthly output of the grade during 1921 was 53,489 tons and the average for the first half year of 1921 was 27.938 tons. The greater part of the increase for July was reported from the steel plant at Sault Ste. Marie.

### Last Year's Record Better

During the seven months ending with July 31st the production of steel was 239,847 as compared with a cumulative total of 349,118 tons for the same period last year. The output of open hearth basic ingots in the seven months of the present year is below the production in the corresponding period of last year by 104,095 tons. The steel castings produced in the seven months of last year are also in excess of the production for the corresponding period of this year by 3,918 tons or 28 per cent.

The splendid increase in steel production during July in spite of coal shortage speaks well for future prospects. Improvements in marketing conditions is the chief factor accounting for the altered outlook.

# DIVIDEND NOTICES

## BANK OF HAMILTON

### Dividend Notice

NOTICE is hereby given that a Dividend of Three per cent. (Twelve per cent. per annum) on the paid up Capital of the Bank, for the quarter ending 31st August, has this day been declared, and that the same will be payable at the Bank and its branches on 1st September next, to shareholders of record at close of business August 19th.

By order of the Board,
J. P. BELL,
General Manager
Hamilton, 24th July, 1922 20

## LAKE OF WOODS MILLING COMPANY LIMITED

### Dividend Notices

Notice is hereby given that a Dividend of 1¾ per cent. on the Preferred Stock of LAKE OF THE WOODS MILLING COMPANY, LIMITED, for the three months ending August 31st, 1922, has been declared payable on Friday, September 1st, 1922, to shareholders of record at the close of business on Saturday, August 26th, 1922.

BY ORDER OF THE BOARD
M. H. HUTCHISON,
Assistant-Secretary.

Notice is hereby given that a Dividend of 3 per cent. on the Common Stock of LAKE OF THE WOODS MILLING COMPANY, LIMITED, for the three months ending August 31st, 1922, has been declared payable on Friday, September 1st, 1922, to Shareholders of record at the close of business on Saturday, August 26th, 1922.

BY ORDER OF THE BOARD,
M. H. HUTCHISON,
16 Assistant-Secretary

## THE CANADA LANDED & NATIONAL INVESTMENT COMPANY, LIMITED

### Dividend No. 142

Notice is hereby given that a DIVIDEND OF TWO AND ONE-HALF PER CENT. (being at the rate of ten per cent. per annum) on the amount paid up on the Capital Stock of this Company, has been declared for the quarter-year to the thirtieth day of September, 1922, and that the same will be payable at the office of the Company, 23 Toronto Street, Toronto, on and after the 2nd day of October, 1922, to Shareholders of record at the close of business on the fifteenth day of September, 1922.

By Order of the Board,
EDWARD SAUNDERS,
Managing Director.
Toronto, August 23rd, 1922.

## RAILWAY COMMISSIONERS

Arrangements have now been completed for the fall circuit of the Board of Railway Comissioners. The sittings will be open at Quebec on Sep'ember 6 and will close at Fort William on October 4. The following is the itinerary:

Quebec, Sept. 4; Saskatoon, Sept. 9; Edmonton, Sept. 11; Jasper, Alta. Sept. 12; Lucerne, B.C., Sept. 13; Victoria, Sept. 18; Vancouver, Sept. 19; Kamloops, Sept. 22; Nelson, Sept. 25; Lethbridge, Sept. 27; Calgary, Sept. 28; Regina, Sept. 30; Winnipeg, Oct. 2; Fort William, Oct. 4.

The members of the Board on circuit it is expected will be the Chief Commissioner, Hon. F. B. Carvell; Commissioner Rutherford and Commissioner Lawrence.

## PAYMENT OF STAMP TAX

How to avoid plastering stamps all over cheques made out for large amounts is explained in a circular just printed by the Department of Customs and Excise.

The onus has been done away with by the means of individual licenses for embossed cheques, which may be obtained from the collector of the nearest customs and excise port. In other words, by monthly payments made after sworn statements have been sent in, any person, firm or corporation may obtain a number of embossed cheques from the Government.

A special account must be kept for each bank on which the licensee draws cheques, and it is also necessary to show particulars of each cheque, showing serial number, date of issue, the amount and the sum due as excise tax. Once a month, before the 5th day of each month, a statement must be mailed to the Commissioner of Customs, together with a certified cheque for the taxes due. The special cheques will have the words: "tax paid," and the number of the license on the face.

## GEOLOGICAL SURVEY

The Summary Report of the Geological Survey for 1921, Part A, has been published. This presents the results of geological investigations conducted by Dr. W. E. Cockfield in the Mayo district, Yukon, by Dr. George Hanson in the Upper Kitzault valley, British Columbia, by Dr. V. Dolmage along the coast and islands of British Columbia between Burke and Douglas channels, by Dr. J. D. Mackenzie on the copper deposits of Lasqueti island, by W. A. Johnston on the placers of the Barkerville area, by Dr. W. L. Uglow in the valley of North Thompson river and by M. F. Bancroft in the Lardeau area. The report may be had by applying to the Director Geological Survey, Ottawa, or 510 Pacific Building, Vancouver, B.C.

## WOOLEN MILLS WORKING

According to reports received the Canadian woolen mills are operating very nearly to capacity at the present time. Travellers are out booking spring orders and report business to be good and the outlook very promising. Competition in this line is keen, but there has been no price cutting to any extent, as had been reported.

All the mills of the Canadian Woolens, Limited, are working to capacity, and the company has sufficient orders on hand to keep them working this way for the balance of the year.

# NOTICE

## To Bondholders of the Toronto Railway Company

### Interest Due 31st August, 1922

Six months' interest on this Company's bonds will be paid on the 31st day of August, 1922, at the rate of 6% per annum, in accordance with the decision of the Directors of the Company.

As the last coupon on these bonds fell due on the 31st August, 1921, it will be necessary to pay interest by cheque upon presentation of the bonds at the Canadian Bank of Commerce, Toronto, the Agency of the Canadian Bank of Commerce, New York, or at the Bank of Scotland, London, England, as called for under the bonds as issued, at the same time endorsing receipt of payment upon the bonds.

For the information of the holders of The Toronto Railway Company bonds, the Company begs to state that the arbitration with the City of Toronto to fix the price for the Railway Company's property taken over by the city, has now reached the stage where only the argument of counsel remains, all evidence having been put in. The Arbitration Board will reconvene to hear argument on the 19th of September, and it is hoped that the award will be announced during the month of November.

Apart altogether from the above, the negotiations for the sale of the Company's power, electric light and radial railway interests (other than the Toronto Railway Company) to the Hydro-Electric Power Commission of Ontario have now been completed and the formal purchase agreement with the Commission has been duly signed. Under this agreement the purchase consideration in bonds of the City of Toronto and the Hydro-Electric Power Commission will be delivered to this Company during the month of October, and as soon as possible thereafter steps will be taken to realize on these securities and proceed to discharge the obligation of this Company on its bonds.

The Company had hoped that with the payment of interest due 31st August it would have been ready to pay its matured bonds, but unavoidable delays in carrying the above two propositions to their present position have compelled the Company to ask its Bondholders for a further indulgence of possibly three months, by which date, so far as we can see, the bonds and accrued interest will be paid.

Immediately the Company is in a position to redeem these bonds announcement will be made through the press.

THE TORONTO RAILWAY COMPANY,
J. C. Grace,
Secretary-Treasurer.
Toronto, August 22, 1922.

# Corporation Finance

**Northern Canada Power Co.**—The first annual report of the company has just been issued and shows that gross earnings for the year ended December 31, 1921, amounted to $544,483. Operating and administrative expenses for the year totalled $85,668, leaving net earnings of $458,815.

After deducting $10,461 for extraordinary maintenance and repairs, $26,246 surveying charges for the new plant, $1,478 interest on bank overdraft, $28,778 transfer fees, incorporation and legal expenses, etc., $6,907 taxes, bond interest of $77,734, net profits remained of $84,431. Added to this the sum of $7,296 balance forward from 1920, and $5,960 profit on purchase of bonds for sinking fund makes a total of $97,689 at credit of surplus account.

The balance sheet shows total assets of $7,369,266, and liquid assets of $204,696. Propetry leases, rights, equipment, etc., less reserve for depreciation, are valued at $7,161,524. Cash on hand amounted to $107,423, accounts receivable $61,704, and inventories $30,570. Current liabilities are shown as $76,578, or slightly better than one-third of the total quick assets. Accounts payable stand at $37,041.

**Maritime Telegraph & Telephone Co.**—Gross earnings of the company for the month of June were $125,322, and net earnings, after operation, maintenance, depreciation and taxes, amounted to $31,283. Deduction of $13,333 for bond interest left surplus for the month of $17,950.

The company's earnings position at the end of the half-year shows considerable improvement over the corresponding period of 1921, as the following figures indicate:—

| | Six months ended June 30 | |
|---|---|---|
| | 1922 | 1921 |
| Gross earnings | $718,967 | $729,357 |
| Op., maint., dep. and taxes | 552,799 | 582,099 |
| Net for interest | $166,168 | $147,258 |
| Bond interest | 80,000 | 80,000 |
| Surplus | $ 86,168 | $ 67,258 |

**Porcupine Crown Mines, Ltd.**—Shareholders at the special meeting on August 11 ratified two by-laws dealing with the position of North Crown Porcupine Mines, Ltd., in which it is interested, providing for the taking over of the property and the increase in the capital stock to $4,000,000. North Crown will now be constituted as the holding company.

Col. W. I. Gear, first vice-president of Porcupine Crown, in his letter to the shareholders explained that the resources of North Crown, in which Porcupine Crown and Thomson-Krist held a joint interest, had become exhausted, and the company had advanced funds to maintain the property and prosecute development. Col. Gear, in his circular, further explained that—

"Recent development work, principally consisting of cross-cutting drifting to the west border of the old Porcupine Crown Mines property, is now showing interesting conditions on the western limits, and directors feel that it would be more advantageous to purchase the properties of the North Crown Porcupine Mines, Ltd., outright, and save to a certain extent some equipty for the shareholders of that company in which your company holds a 2-3 interest.

"Directors therefore approved of an offer being made to the North Crown Porcupine Mines, Ltd., for the purchase of the property, mines, equipment and other assets of the company by the cancelling of the outstanding obligations and commitments due to Porcupine Crown to the amount of $160,000 and the issue of 600,000 shares of one dollar each of the increased capital stock of Porcupine Crown. Directors have also approved of an application being made to the Ontario Government to increase its capital stock to 4,000,000 shares, of which 1,400,000 shares would remain in the treasury to be sold to provide working capital and 600,000 shares handed to the North Crown Porcupine Mines, Ltd., in payment of balance of purchase price of its property and assets, as set forth above."

**Mond Nickel Co.**—At the annual meeting held in London, England, recently, the annual report was presented, which showed that the balance brought forward from the year 1920 was £114,794, and the balance at credit of profit and loss for the years 1921 and 1922 is £222,630 and £299,041, respectively.

After deducting directors' fees for the two years, amounting to £26,083, there is a balance of £610,383 left for distribution. Out of the balance an amount of £220,000 has already been allocated for dividends declared and paid in respect of the year ended April 30, 1921, leaving £390,383, which the directors propose to deal with as follows: In respect of the year ended April 30, 1922, an interim dividend on the preference and ordinary capital amounting to £110,000 has already been paid. It is now proposed that a further sum of £87,500 be paid in respect of the preference capital to make up the dividend of 7 per cent. for the year, and that a further dividend of 1s. per share be paid on the ordinary capital, free of income tax, which will absorb £45,000. The total amount of dividend proposed to be paid is, therefore, £242,500. In addition to the dividends, the directors have also had to provide out of the profits of the company the sum of £110,000 for income tax. This makes a total of £352,500, leaving a balance of £37,883 2s. 6d. to be carried forward.

**Canada Copper Corp.**—In connection with the plan to reorganize the company, a committee consisting of Esdras L. Gruver, Herbert G. Moulton and Edmond N. Skinner, all of New York, representing the 8 per cent. bondholders, contemplates foreclosing the mortgage and acquiring the property for the new company to be formed.

It was announced that stockholders who participate in the plan must pay cash for stock in the new company, and that they will receive nothing for their old stock. Under the plan they will be given the privilege of subscribing for one share of stock of the new company at $5 a share on the basis of each eleven shares of old stock held. A first instalment of $1 a share must be paid when the old stock is deposited.

Bondholders receive stock in the new company at $10 a share for the principal of their bonds and accrued interest to July 1, 1922, and they have the first right, at their election, to subscribe pro rata at $5 a share to 200,000 additional shares of stock of the new company.

Debenture holders who subscribe to stock of the new company equal to the face value of their debentures at $5 a share receive, without cost, an additional amount of stock of the new company at $10 a share, equal to the principal of their debentures. Debenture holders who do not subscribe receive nothing.

**Porto Rico Railway Co.**—Gross earnings of the company for the month of June were slightly under the returns for the corresponding month of 1921, standing at $110,556, compared with $113,215 for June, 1921, a decrease of 2.35 per cent. Net earnings, on the other hand, show a substantial advance of 6.17 per cent., at $42,472, compared with $40,000. An even greater improvement in the net returns for the first six months of the year is shown, the net aggregate at $267,058 comparing with $245,630 for the first six months of 1921, being an increase of 8.72 per cent. A comparative statement follows:

| | 1921 | 1922 | Inc. |
|---|---|---|---|
| **For June** | | | |
| Gross | $113,215 | $110,556 | *$2,652 |
| Net | 40,000 | 42,472 | 2,471 |
| **For Six Months** | | | |
| Gross | 676,210 | 655,680 | *20,529 |
| Net | 245,630 | 267,058 | 21,427 |

*Decrease.

**Alabama Traction, L. & P. Co.**—Both gross and net earnings of the company show a satisfactory improvement, not only for the month of July, but for the twelve months' period ending July 31. A comparison of figures is given herewith:—

| | 1922 | 1921 | Inc. |
|---|---|---|---|
| Gross | $ 438,097 | $ 355,970 | $ 82,127 |
| Operating expenses and taxes | 205,712 | 174,969 | 30,743 |
| Net | $ 232,385 | $ 181,001 | $ 51,384 |
| For 12 months ending July 31:— | | | |
| Gross | $4,914,474 | $4,491,138 | $423,336 |
| Operating expenses and taxes | 2,352,226 | 2,234,647 | 117,579 |
| Net | $2,562,248 | $2,256,491 | $305,757 |

**American Sales Book Co.**—On August 8 the company declared a distribution of 1¾ per cent. on the preferred stock payable to shareholders of record August 15th, being arrears for the quarter ending June 30th, 1916. There are now outstanding arrears to the amount of 1¾ per cent.

The preferred dividend, which is at the rate of 7 per cent. per annum, was deferred for the whole of 1915 and for nine months of 1916. It was resumed by payment of 1¾ per cent. on February 1st, 1917.

**Cape Breton Electric Co.**—Both gross and net earnings for the month of June show a decrease from the same month last year. Gross earnings during June amounted to $46,053, as against $52,195. Operating expenses were $42,920, as compared with $43,182, leaving net earnings of $3,133, as compared with $9,013 in 1921.

**Twin City Rapid Transit Co.**—The net results of operations for June and the first half of the year are highly satisfactory, more particularly as the gross showing fell off slightly from the corresponding periods in 1921.

June net is up over 21 per cent while for the six months it rose to over 134 per cent. Substantial reductions in operating expenses overcame the falling off in gross. The figures are as follows:—

| June | 1922 | 1921 |
|---|---|---|
| Gross | $1,113,647 | $1,139,505 |
| Op. Ex. | 793,542 | 844,890 |
| Net Rev. | 320,105 | 294,654 |
| Charges and tax | 194,573 | 191,156 |
| Net Inc. | 124,531 | 103,497 |
| Six Months:— | | |
| Gross | $6,998,654 | $7,015,223 |
| Op. Exp. | 5,209,895 | 5,522,642 |
| Net Rev. | 1,968,709 | 1,490,581 |
| Charges and tax | 1,174,839 | 1,151,818 |
| Net. Inc. | 793,860 | 338,763 |

**Canadian Wm. A. Rogers, Ltd.** The earnings for the year ended December 31, 1921, were materially reduced owing to the difficult operating and sales conditions, which prevailed throughout 1921, there being a debit balance amounting to $52,629, after all charges were met, as compared with a credit balance of $13,950 carried forward from the previous account.

Profits from operations during 1921 amounted to $14,276, compared with profits of $108,310 for the 18 months' period ending December 31, 1920. There is available for distribution the sum of $28,226, which compares with $82,523. Out of this the following charges were met: Interest on borrowings, $22,295; advertising expenditures, $36,415; bad debts written off, $6,904. and transferred to realty and plant reserve, $15,240, leaving a balance at debit which is carried forward to 1922 of $52,629.

The balance sheet shows assets totalling $1,488,759, as compared with $1,547,064 for the previous year. There has been a slight increase in the value of plant, machinery and fixtures from $140,189 to 143,030. Investments in other companies are down from $41,354 to $34,873. Good will and trademarks are carried unchanged at $588,223. Merchandise on hand shows a material reduction from $412,323 to $303,274. Accounts and bills receivable are up from $106,325 to $115,946. Cash on hand at $12,422, compared with $13,215. Accounts and bills payable partly secured at $383,838, compare with $436,045 in the previous year's account. Realty and plant reserve has been advanced from $61,568 to $76,128. Mortgage payable stands at $23,500, compared with $24,500.

President S. L. Moore in presenting the report, says: "Manufacturing concerns generally suffered more seriously during the year 1921 than in any previous year. The silverware industry was no exception. The great shrinkage in volume of business, together with the necessity for writting down inventories, made a loss on the year's operations inevitable. Under the agreement with Wm. A. Rogers, Ltd., we are entitled to claim upon that company for any shortage in our profits below $35,000 in any year up to April 1, 1924. As our operations for the year ending April 1, 1922, will show a loss, we shall be entitled to receive from Wm. A. Rogers, Ltd., the full $35,000. This amount will be dispersed as a dividend to holders of preference stock.

"Silverware orders received during the first four months of 1922 are in about the same volume as those received in the same period of 1921. It is still difficult to secure business in satisfactory volume, but we believe that, as the year advances, there will be a gradual improvement."

**Lake of the Woods Milling Co.**—The annual meeting of the company has been called for October 4, at 3.30 p.m., at the head office in Montreal.

BUILDING YOUR BUSINESS

In building a life agency business it is a most valuable asset for the underwriter to associate himself with a Company whose name is his "open-sesame" to the life insurance business in his district.

The North American Life is high in the esteem of the insuring public. Why?

Popular policies, liberal dividends and the great enthusiasm of all our agents is the answer.

Some good agency openings are available.

Correspond with
E. J. HARVEY, Supervisor of Agencies.

BANKING INVESTMENT INSURANCE INDUSTRY

# Protecting Bank Loans by Life Insurance

BY H. MANNING

City Manager, North American Life, Toronto.

(An address before the Life Underwriters' Convention, Toronto, August 22—24.)

The brevity of the time at my disposal will necessarily put a restraint upon the scope with which I can deal with the subject, and for this reason I crave the indulgence of my American friends. In so far as my remarks touch upon the general principles of protecting bank loans by life insurance they will apply to the conditions under which we all work, but in the matter of concrete illustrations, endorsations and methods of procedure, I am going to confine myself almost exclusively to bank loans in Canada. I do this for the reason that the other speakers in the Credit Section this afternoon are Americans, and as the topics treated are closely allied, I take it that they will cover with more interest and effectiveness the procedure followed across the Line, as information along those lines is more easily available to them. The Canadian field is more easily available to me and possibly my quotations from some of our Canadian bank managers will be of interest to them and of value to our Canadian underwriters.

In announcing the subject of my remarks we enunciate a principle to a greater degree than we do a practice. It is from these two angles that I will treat the subject.

### A Fundamental Principle

The principle of protecting bank loans by life insurance, although of more recent recognition, is based upon the very fundamentals of business. It is a fundamental principle of economics that all property values are the result of the application of man's brain and brawn to the raw materials and latent forces of nature. Brains are the greatest assest of any business,—producing brains, buying brains, selling brains, administrative brains and financial brains. Business is but the shadow of a man. It frequently happens that one man is the vital factor in the successful conduct of a corporation. The death of that man would frequently disrupt the organization, impair credit, decrease efficiency of operation, mar the company's prospects and injure its standing with the public. There is only one security that can cover the embarrassment consequent upon such an eventuality, and that is life insurance. It stabilizes the business during the life-time of the policy and steps in at the proper time to preserve the good standing of the business or to assist in the readjustment of affairs.

### Ability to Pay

Failures in business are due in the least degree to lack of intention to pay, and in the greatest degree to inability to pay from a dozen other causes, one of which is the untimely death of the individual upon whose personal initiative or invested capital the business is dependant for its success. Life insurance is a gauge whereby the banks may determine the extent of two factors in advancing credit,—a man's ability to pay, and a man's determination to pay. To take the first;—**ability to pay.** A life insurance policy payable on the death of the individual provides ready cash for the purpose of meeting loans, of releasing invested capital, of strengthening credit or meeting the immediate expenses of readjustment. The life insurance policy, therefore, is security for credit and also avoids the unpleasant necessity of reimbursement by foreclosure,—an embarrassing procedure for the bank as well as the deceased's estate. Secondly, to take the other factor; **determination to pay.** Ample life insurance indicates to the bank that a man possesses that quality of mind which prompts him to provide conscientiously for the greatest of all his obligations—that to his home. On the other hand, the man who belittles this obligation will probably hold in slight regard his obligations to those farther removed from him.

### The Practice of Banks

I am indebted to my friend Mr. E. A. Woods for a list of those banks in the principal cities of the United States who ask in their applications for bank loans as to life insurance carried, —the Federal Reserve Banks in eleven of the largest cities, fourteen Pittsburg Banks and twenty-five New York City banks, four Philadelphia banks and the Union Trust Company of Cleveland. This is not submitted as an exhaustive list, but merely as an indication of the wide recognition of this principle. In Canada the system is different, and when I speak of the seventeen chartered banks of Canada, I speak of the policy and practice of all their branches in every city, town and hamlet throughout Canada. A canvass of the banks of Canada has shown that without exception they have regard to life insurance in making loans. The greater number—and amongst them I include the larger banks—insert in their application for credit specific questions as to the amount and status of life insurance carried. Those who do not require this in their forms have put themselves on record something in this way: (I quote from a letter of the general manager of one of the largest banks in Canada, under date of July 27th, 1922.) "There is no form in general use by this Bank when granting loans. I understand that such forms are used by some banks, but when asking a customer to submit a statement of affairs, we prefer that he should do it in his own way." But he proceeds in these very words:—"The practice. of this bank in protecting loans by life insurance is to require life insurance in cases where a business of any importance is dependent for its existence largely on the life of one man, or, in the case of partnerships, where provision has not been made for the continuation of the business in the case of the death of a partner." There are only two or three banks who do not include the question regarding life insurance in their application for credit, but they conform with the others in requiring life insurance under the circumstances as set forth in this letter. The practice, therefore, is universal and uniform, though the procedure may be slightly different.

### What Banks Want to Know

Without taking time to give the specific wording of the questions in each of the bank forms, let me enumerate the typical questions therein embodied.—Amount of life insurance carried? The Company? Date when policy matures? Present surrendered value? Is policy assigned, and to whom? Loans on policies? How would the business and our position be affected by the death of the owner or chief executive? You will, therefore, see from the detailed nature of the questions that the bank is interested not only in the intrinsic value of the life insurance, but also in the extent to which it denotes the charcter and type of mind of the client, because they realize that the quality of mind which induces one to take out life insurance is the quality of mind that best insures success in business.

Now briefly let us review these questions to see what is the trend of the bank's mind when considering one's application for credit.

1. **Amount.** We have touched upon the complexion which this puts on the application for credit,—the stable security of a policy payable at death, and the quality of mind which prompts one to insure.

2. **Company.** This can have no value except in so far as detail for record.

3. **Date.** Under this heading there is room left for several insertions, because a successful man is continually adding to the life insurance carried. It indicates the consistent attention which the applicant has given to this important obligation. If he has taken out life insurance several times over a period of years, it indicates that at each time he was able to pass a strict medical examination, and if his last policy is of recent date, he can produce no better certificate of his physical ability to apply that energy which the success of his business requires.

4. **Plan.** Under this heading they enquire whether policies are on the life, endowment or term plans. They recognize in the former two the carrying value vested in the policy after the third year, placing it in a much more substantial position.

5. **Maturity.** This is practically identical with the next question—Surrender Value. The Banks recognize in the cash surrender value or coming maturity of the policy an intrinsic cash collateral.

7. **In Whose Favor.** In the names of the Beneficiaries the Bank ascertains the applicant's attitude in protecting homes and business. The man who is carrying adequate protection for home and business is one to whom the banks can justly afford to advance a freer line of credit.

8. **Is Policy Assigned, And to Whom?** This will assist the Bank in determining what has been the applicant's financial circumstances for some time past, and

9. **How Would The Business and our Position be Affected by the Death of the Owner or Chief Executive?** This is a question of wider scope, looking further into the future. Now, you will not find each of the aforementioned individual questions in every application for credit submitted by our chartered banks in Canada, but they have all been quoted verbally from the collection of those forms which I have been able to accumulate and I can safely say that ninety per cent of our Canadian Banks require statements either from the applicant or from the branch manager covering the above scope. From this you will see that it is the man who thinks he can afford to do without life insurance that is subject to special scrutiny.

### Bankers' Opinions

Now let me give you a more intimate endorsation of the principle of protecting bank loans by life insurance, by quoting the personally expressed opinion of seven or eight general managers of our largest Canadian Banks. Let me add, first, that each general manager, in bespeaking the policy of his Bank, is bespeaking that of the hundreds of branches of his Bank throughout Canada. I have selected extracts from letters received from The General Managers of The Royal Bank, The Bank of Toronto, Canadian Bank of Commerce, Imperial Bank of Canada, Banque d' Hochelaga, Molsons Bank, Bank of Montreal and Standard Bank. The order in which I have named the Banks has no relations to the sequence of the letters as I will quote them. I might add that they were received at my office between the dates of July 25th and July 27th. I quoted from one formerly.

"The practice of this Bank in protecting loans by life insurance in cases where a business of

(Continued on page 6)

## ST. BONIFACE, MAN., SPECIAL AUDIT

During the last few weeks considerable newspaper publicity has been given to the special audit of the books of the City of St. Boniface, which made it appear as though the affairs of that municipality were in a state of turmoil, when as a matter of fact such was not the case.

The city clerk of St. Boniface has issued the following statement in connection with this matter, which it is hoped will correct any wrong impression that may have been caused by earlier newspaper reports. The statement of the city clerk is as follows:—

At the request of the council, Messrs. J. D. Reid & Co., chartered accountants, who had been appointed in April last to conduct a special audit or investigation into the city's affairs, submitted to the council a verbal report at its meeting held on the 14th August instant.

They explained at the outset that their work was seriously handicapped by reason of the documents and books that had been destroyed in the fire and also through the absence of some other records which had not as yet been located, and which contributed a good deal to the sum of work to be done. Good headway was, however, being made with the cooperation of the city's staff in bringing up certain important records to date, and rectifying errors and omissions. This applied particularly to levies under by-laws of capital expenditures, which bylaws together with the schedules were in perfect shape, the preparation and submission of new by-laws to cover capital expenditure, which are carried in the general accounts of the city; the bringing up to date of tax sale records.

The tax rolls did not appear to have been properly balanced, and the bank reconciliations were not available; the reconciliation of the last fiscal year, as reported by the auditors of the city, had been handed to the former treasurer but the same was not available. They added that in the absence of the late treasurer the task of verifying and investigating the numerous discrepancies, errors or omissions was naturally more arduous, if not in some cases impossible to trace satisfactorily.

The auditors merely explained these matters so that the council would understand the enormous amount of work which they have to do over and above what might have been considered as the necessary work of a special investigation.

They concluded by laying stress on the importance of reorganizing the whole system at as early a date as possible, and it was finally agreed that they would first submit a special report dealing exclusively with that question.

In order that the council may have a free hand to carry cut the auditors suggestions or reorganizations, it was decided to give a three months' notice to all permanent employees as called for by the Charter.

## TUBBY, SMITH & COMPANY

Announcement is made of the formation of the firm of Tubby, Smith & Company, Limited, investment bankers, Curry Building, Winnipeg. This firm will deal in government, municipal, school, corporation, and foreign bonds. The firm has made very good connections in the east and also in the United States. They will work in conjunction with Housser, Wood & Co., Toronto, and H. J. Birkett & Co., Toronto, for school issues. Just at the moment they are specializing in Brazilian 4% bonds and in their circular calling attention to this issue they point out the importance of investing with foreign governments who have maintained a high standard of integrity in the matter of national obligations.

The firm of Tubby, Smith & Company is composed of Harold Austin Tubby, formerly of the Northwestern Trust Company and for eighteen years associated with the Union Bank of Canada in various executive capacities, and W. M. Smith who has for many years been in the investment field in the Western States and has a special knowledge of American and foreign government issues.

## MACAROW JUDGMENT

Judge Decarie on August 24; declared that he was not yet prepared to render his judgment in the case of D. C. Macarow, former general manager of the defunct Merchants' Bank, charged with making false returns to tho Government, and set September 7th as the day for issuing his decision. His Lordship intimated, however, that should he be able to prepare his judgment before that date he would make an announcement.

## RAILROAD EARNINGS

The following are the approximate gross earnings of Canada's transcontinental railways for the first three periods in August:—

**Canadian Pacific Railway**

| | 1922 | 1921 |
|---|---|---|
| August 7th | $3,285,000 | $3,673,000 |
| August 14th | 3,511,000 | 3,745,000 |
| August 21st | 3,369,000 | 3,494,000 |

**Canadian National Railway**

| | | |
|---|---|---|
| August 7th | 2,181,198 | 2,384,012 |
| August 14th | 2,076,934 | 2,384,012 |
| August 21st | 2,090,160 | 2,384,012 |

**Grand Trunk Railway**

| | | |
|---|---|---|
| August 7th | 2,300,131 | 2,146,136 |
| August 14th | 2,299,738 | 2,291,882 |
| August 21st | 2,318,456 | 2,302,852 |

## GRESHAM LIFE CEASES TRANSACTION OF NEW BUSINESS

The board of directors of the Gresham Life Assurance Society, Limited, have decided to cease the transaction of new business in the Dominion of Canada after August 31st, 1922. This decision has, to their regret, involved the retirement of Mr. A. R. Howell from the position of manager for Canada which he has occupied with great distinction since 1911.

The vacancy thus created has been filled by the appointment as manager for Canada of Mr. Robert Welch, general manager and secretary of the Dominion Gresham Casualty and Guarantee Company, who will attend to the collection of renewal premiums on existing assurances and to the settlement of claims, loans, surrenders, etc.

## BANK ROBBERIES

### Two Banks Were Robbed in One Week in Western Canada

Six masked bandits held up the Union Bank branch at Foremost, about 80 miles southeast of Lethbridge, on the Canadian Pacific Railway, Lethbridge-Weyburn line, between 1.30 and 3 o'clock a.m. on August 29, bound and gagged two clerks sleeping in their quarters over the bank, after forcing the junior clerk to open the outer door of the vault, and completely ransacked the vault and safety deposit boxes, getting $12,000 in cash and $70,000 in securities, mostly registered Vlvtory bonds.

Robbers broke into the Bank of Hochelaga at Eli, Man., 39 miles west of Winnipeg on the Canadian National Railway on August 29. It is believed they were unsuccessful in obtaining anything of value. The local manager of the Bank of Hochelaga stated that the robbers obtained nothing of value, and that they succeeded only in blowing off the outer door of the safe.

## JULY LIFE BUSINESS INCREASES

### New Policies Written Up Increase $1,000,000 From Last Year—Death Claims Slightly Lower

According to reports received from representative Canadian companies, new life business issued in July shows a substantial improvement over the same month last year. Of the five companies reporting, Company A shows the largest increase, being up by about one million from last year. Company D also shows an increase over July, 1921, being up by three hundred thousand.

Death claims paid by these companies show a decrease of thirty-seven thousand dollars from the previous year. Details of the July reports are given herewith:—

**New Business**

| | July 1921 | July 1922 |
|---|---|---|
| Company A. | $5,088,038 | $4,713,692 |
| Company B. | 4,500,631 | 4,803,782 |
| Company C. | 2,397,595 | 3,352,951 |
| Company D. | 1,747,293 | 1,593,920 |
| Company E. | 714,320 | 1,075,270 |
| Company F. | 797,250 | 876,000 |
| Totals | $15,245,127 | $16,415,615 |

**Death Claims Paid**

| | July 1921 | July 1922 |
|---|---|---|
| Company A. | $204,589 | $231,185 |
| Company B. | 121,519 | 88,199 |
| Company C. | 61,630 | 29,521 |
| Company D. | 43,263 | 44,201 |
| Company E. | 9,557 | 15,000 |
| Company F. | 15,930 | 10,955 |
| Totals | $456,488 | $419,061 |

## NEW TRUST BUSINESS IN JULY

### Corporation Issues Not Very Large—Individual Estates Fairly Numerous, Although for Small Amounts

The Montreal Trust Co., was appointed trustee for the $1,000,000 bond issue of the Great Lakes Transportation Co.

For the bond issue of Professional Offices, Ltd., amounting to $275,000, the Chartered Trust & Executor Co., was appointed trustee.

**Individual Estates**

The Toronto General Trusts Corp., has been granted probate of the will of Mrs. Hannah Walmsley, Toronto, whose estate is valued at $114,863.

The Mercantile Trust Co. has been granted probate of the will of Alex. Watt, Hamilton, Ont., who left an estate valued at $6,333.

Probate of the will of Frederick Langmuir, Toronto, has been granted to the Toronto General Trusts Corp. The estate is valued at $10,539.

The Union Trust Co. has been granted probate of the will of Miss Ada M. Read, Toronto, who left an estate valued at $24,767.

The Western Trust Co., has been appointed executor of the following estates: Garneau estate, Edmonton North, Alta., valued at $20,000; C. H. Fox, Strasbourg, Sask., valued at $37,282; A. J. Golfin, Swift Current, Sask., valued at $19,690, and Frank Archer, Yorktou, Sask., valued at $12,673.

Under the terms of the will of Mrs. Charlotte Lawson, Toronto, the Toronto General Trusts Corp., was appointed administrator of the estate, which is valued at $8,001.

The Trusts and Guarantee Co. has been granted probate of the will of James A. Brown, Toronto, who left an estate valued at $57,659.

The Chartered Trust and Executor Co., has been granted probate of the will of Frank Wilbee, Toronto, who left an estate valued at $32,153.

The Capital Trust Co., has been appointed executor of the following estates: Romanet du Caillaud, $80,000; Margaret Boyd, $40,000; and J. F. White, $50,000.

## HAMILTON THEATRES MERGE

Pantages and Loew's Theatres, Hamilton, Ont., have united, it was announced on August 4, under the name of Hamilton United Theatres, Limited. These theatres, most modern in Hamilton, each of which cost nearly $1,000,000, have been in competition for nearly one year within a block of each other, and their managements felt that they should amalgamate. Under the new arrangement, Pantages will control preferred and common stock totalling $1,087,500 and Loew's $900,000. They will now be under combined management and the operating costs will be greatly reduced

# Neccesity of Heavier Immigration for Canada

## Industrial and Commercial Leaders Are of the Opinion That the Government Made a Mistake in Tightening Immigration Restrictions — Labor Leaders Are Changing Their Views

(Special to The Monetary Times)

Ottawa, Aug. 30.—The recent remarks of Hon. Dr. King, Minister of Public Works, on the necessity of heavier immigration, and the desirability of removing some of the restrictions, taken in connection with the opinion shared by other members of the Government, may be considered as a straight tip that a new and much broader immigration policy will soon be announced. As a matter of fact, changes are being forced by the imperative demands of industry, which is recovering so rapidly that the country is in a fair way to be confronted by a dearth, rather than an abundance, of labor.

That many of the best informed leaders in the industrial and commercial life of the country are of the opinion that the Government made a mistake in screwing up the immigration restrictions as they did early in the year by order-in-council, is well known; but the demand of the labor leaders that the bars should not be let down, together with a great deal of talk both in and out of Parliament on the certainty of an even greater unemployment problem next winter, inclined the Government to the side of restriction. The effect of this is now seen during the last four months in the decline of immigration to the extent of 34 per cent. below that of last year.

Happily the labor leaders are now seeing matters in a different light, of which fact the attitude of the recent Trades and Labor Congress is strong evidence. Doubtless convinced that the prospect of much unemployment is a mere bogey, the labor leaders are now looking with favor on heavier immigration from the British Isles, and also of a fair amount from continental countries. So with labor's objections largely out of the way, and the demand from other sections for action, there is no doubt that the Government will let down the bars a little. This opinion is confirmed by Hon. C. A. Stewart, who has just returned from the west.

There is good reason for saying that the restriction of immigration to the extent that it has been carried ,both in this country and in the United States, has put industry up against a rather serious labor problem. Proof of this is to be found in the recent 20 per cent. increase granted to over 300,000 steel workers in the United States. This industry relies to a very considerable extent on the kind of labor that has been received largely from European countries; but the cutting down of the inflow by nearly 60 per cent. of what it was in 1913 has had its natural results, now that the steel industry is beginning to get back to normal.

The granting of this notable wage increase is an indication that the downward wage movement, in the trades at least, is practically at an end. It is probably true that for certain classes of light work wages may still go a little lower, owing to the availability of a large supply of female labor. But the general trend of wages will now be in the upward direction, for if the steel workers get more, workers in other departments will naturally demand more.

### Freight Rates

The resultant effect on freight rates is well worth noting. Business generally has been saying that further reductions in rates are absolutely necessary, this having been the burden of the testimony before the parliamentary committee on transportation costs, as well as the opinion of business leaders all over the continent. Now it is well known that higher freight rates are due chiefly to the increased wages granted during the war period, and rate reductions have been based very largely on the assumption that railway wages would fall. Thus in the United States the Inter-State Commerce Commission lowered rates as the Railway Labor Board lowered wages. In this country the Railway Commission considered this also a safe principle of action. The farmers' representatives from the west told the transportation costs committee: "Lower rates and wages must come down." With all the important steel-producing companies in the United States raising wages, the likelihood of railway wages coming down is not good, no matter what the rates may be. Of course rates will remain where they are.

All this means that the public is probably in for another high-price movement, and that at a time when, at least, prices should remain where they are, and in some lines should go lower. This is another evidence of the ill effects of too much government restriction; for restrictions that were put on during a time of near-panic have not been removed when they should have been.

### Government Departments Handicapped

Government departments are singularly handicapped in dealing with new conditions suddenly created, and which consequently demand quick action. The officials of a department may be convinced that a new course of action is desirable; but they cannot put it into effect until they have converted the minister to their views. Even when they have done so, it by no means follows that the changes desired will be made, for the political effects have also to be taken into account, and these may outweigh all other considerations. In private concerns it is different, for there good business considerations determine policy. To some extent the Government has also been affected by the all too prevalent, but mistaken, notion that America can't come back until Europe, whereas both this country and the United States are coming back so fast that difficulty is being experienced in coping with the conditions.

With one of the biggest crops this year in the history of the country being harvested, with a prospective volume of traffic that will tax our railways; with the lumber and pulp and paper industry running at almost full capacity; with marked mining activity and all the earmarks of a general building boom—to meet all these demands the country has nothing more than a mere trickle of immigration. At the present rate of inflow we shall not get 90,000 immigrants this year, whereas in 1913 we got 400,000.

### Plenty of Work

It should be remembered that these new people built our railways, did the greater part of our general construction work, the very class of work that must be done in a new country such as Canada, and which Canadians today are reluctant to do. Just now there is more of this kind of work to be done than there has been at any other time during the last ten years, and there are fewer people to do it.

There is good reason to think that the western farmers will feel especially the effects of higher wages resulting from undue restricting of immigration, for they must sell their chief product, grain, in the world's markets, and thus under severely competitive conditions, where they cannot expect to be compensated for the higher cost of production resulting from higher wages. So it is not surprising that on his recent tour of the west the Minister of Immigration found the prairie provinces eager to get any kind of immigrants, provided they would become good farmers. This but confirms the view so generally expressed by those acquainted with western conditions, that a very large percentage of those who settle the prairies will have to be drawn from countries in northern and central Europe.

# Canadian Failures

The number of failures in the Dominion, as reported by R. G. Dun & Co. during the week ended August 25, in provinces, as compared with those of previous weeks, and corresponding week of last year, are as follows:—

| | Aug. 25 | Aug. 18 | Aug. 11 | Aug. 4 |
|---|---|---|---|---|
| Ontario | 14 | 13 | 8 | 20 |
| Quebec | 30 | 30 | 28 | 28 |
| Manitoba | 5 | 8 | 8 | 7 |
| Alberta | 1 | 5 | 4 | 4 |
| Saskatchewan | 3 | 4 | 3 | 1 |
| British Columbia | 1 | 1 | 5 | 7 |
| Nova Scotia | 3 | 2 | 0 | 3 |
| New Brunswick | 2 | 0 | 1 | 1 |
| Prince Ed. Island | 0 | 1 | 1 | 0 |
| Newfoundland | 2 | 0 | 1 | 1 |
| Total | 61 | 64 | 59 | 72 |
| 1921 | 45 | 53 | 36 | 39 |

## CANADIAN DOLLAR AT PAR

### During Past Seven Months $173,000,000 of Canadian Bonds Sold in United States—Banks Very Much in Funds

(Special to The Monetary Times)

New York, Aug. 29.—The return of the Canadian dollar in the United States to virtually par, coming as it did on top of an almost unprecedented demand for seasoned dividend paying stocks of all kinds on the part of American investors, has produced an unusually strong demand for gilt edged Canadian securities in the United States. This demand so your correspondent is told by a number of local stock and bond houses specializing in Canadian securities accounts for a very large part of the recent strength of the Canadian exchanges. For according to these houses the same influences which have during the past week or so forced dividend paying preferred and common stocks listed on the New York exchange to record levels for the year have operated to produce similar strength on the Canadian exchanges. Money is exceptionally plentiful in the United States nowadays, almost surprisingly so when one remembers that ordinarily a certain amount of tension is usually apparent at this time of the year when normally the crop harvesting demands of the West and Middle West begin to make themselves felt. The weekly statements of the Federal reserve banks clearly indicate that the local banks in the agricultural parts of the country largely it would seem on acconnt of the success with which they have thawed out most of their frozen credits, are now quite capable of handling the financial needs of their various communities without outside assistance. The banks in the industrial and commercial centers, on the other hand, are finding themselves also very much in funds, as the result of a similar successful liquidation and the fact the slackening of the process of business recovery which was underway when the coal and rail strikes called a halt, has released vast sums of surplus capital belonging to large industrial and financial institutions. The same influences have been working to put the larger type of private investors in possession of surplus funds.

The result of these developments has been to put the money market in an exceptionally easy position and to force banks, financial and industrial corporations, and private individuals, in the face of low money rates, to literally search the world for sound investments in which to place their unemployed capital temporarily. Naturally enough the high yields and the excellent record so far as dividends were concerned of many of the leading Canadian stocks combined with the fact that the exchange problem no longer seemed an obstacle to investment in Canadian securities on the part of the American investor, started a flow of American money toward Canada.

It is interesting to note in this connection that during the seven months ending July over $173,000,000 of Canadian government and municipal bonds were sold in the United States.

Vice-President Stevenson of the National Bank of Commerce in the current issue of the Commerce Monthly estimates that the United States' net investment in Canada is now over $1,000,000,000.

## NEW FIRE COMPANY PROPOSED

Notice is given that application will be made to the lieutenant governor in council, pursuant to the Ontario Insurance Act for Letters Patent incorporating Wilson Saunders Morden, K.C., barrister at law, Toronto, Ont.; Thomas Scott Kerr, manufacturer, Toronto, Ont.; Oliver Hezzelwood, retired manufacturer, Toronto, Ont.; Bryden Napier Campbell, insurance broker, London, Ont.; Emerson Taylor Coatsworth, barrister at law, Toronto, Ont., and such other persons as may become shareholders in the proposed company. The name of the company is to be Empire Fire Insurance Company, Limited, or such other name as may be granted upon the application. The location of the head office is to be in the City of Toronto, Ontario.

The purposes of the company are to carry on the business of fire insurance. The amount of permanent capital stock for which authorization will be asked is $500,000, divided into 5,000 shares of par value of $100.00 each.

(Continued from Page 3

any importance is dependant for its existence largely on the life of one man, or in the case of partnerships, where provision has not been made for the continuance of the business in case of the death of a partner."

"You will note by headings numbered 21, 22 and 23 that it is our policy to obtain information as to the life insurance carried by our borrowing customers. We thoroughly believe in the protection afforded banks by life insurance, and in many cases where the efficiency and ability of the borrower is an important factor in the matter of granting credit, we stipulate that the Banks receive protection through insurance taken out in our favor."

"As you are doubtless aware, Canadian Banks do not make a practice of lending money solely on the security of life insurance, for the reason that the individual insured as a rule is able to borrow from the Company direct in amounts that vary according to the principal sum of the policy and the time it has been in force. On the other hand, it not infrequently happens that a client of the bank offers an assignment of life insurance from a borrower to protect an advance that gives signs of becoming unsatisfactory. In such cases the value of life insurance to the client is obvious and an individual having such protection available is clearly a better mark for credit than he would otherwise be."

"I consider the assignment of life policies to a bank as a protection against loss a desirable and valuable security, particularly in cases where the management or direction of the business of a firm or corporation is in the hands of one or more unusually capable and experienced men, whose loss would be a serious blow to the concern's prospects. Bank credits are based on a number of important considerations, and one of the most important is that of management or direction. Capable management almost more than anything else ensures banks against loss. On the other hand, incapable management will wreck the best concerns. For this reason insurance on lives on which the success of a business depends is an added protection against loss. Further, life insurance is sometimes taken in cases of slow and weak accounts. I am not at all certain as to the wisdom of taking this security in such cases, as it seems almost like gambling on the lives of individuals, nevertheless, when a bank's chance of recovery of an unsatisfactory debt depends on one or two lives, it would seem justifiable to carry such insurance."

## CONFEDERATION LIFE STAFF

One hundred and fifty members of the Confederation Life Association staff were entertained at Bigwin Inn, Huntsville, Ont., on August 24 and 25. Various athletic events were entered into, including the tug-of-war, in which the contestants were teams from Western Canada, Northern Ontario and Eastern Canada. The Ontario team was adjudged the winner.

## SALES OF CANADIAN BONDS

### Ontario Was Heavy Borrower Last Year—Total Issues Show Slackening This Year

Sales of Canadian bonds as shown by The Monetary Times' figures are illustrated graphically herewith. The fluctuations in the totals, even leaving out the Dominion Government loan of $100,000,000 in April last, are remarkable. The busiest months of the past year and a half were April, 1922, and September, July and December, 1921.

One month when conditions are favorable several provinces may come into the market while in an unfavorable month there may be no issues of this kind whatever. Apart from the government loan in April, Ontario has by all means been the biggest borrower in 1921. In January of that year a $10,000,000 issue was made, in May a $15,000,000 issue, and in September two issues of $15,000,000 each. This, it will be noticed, accounted for most of the fluctuations.

Municipal issues of course came upon the market more steadily, but these are also governed by conditions at the time. Toronto was the biggest borrower in 1921, issuing $5,000,000 in February, $5,000,000 in June, and $19,000,000 in September. January of this year was one of the lightest months in municipal finance in a long time, but the volume of sales in February, April and May was heavy.

During the last six months of 1921 there was a great deal of activity in corporate financing. In July there was an issue of $25,000,000 by the Canadian Northern Railway and in September the Canadian National borrowed $25,000,000 and the Canadian Pacific borrowed $34,733,200, December was another active month. The volume of corporate finance has been considerably less this year, it will be observed.

The following is a summary of the sales of Canadian bonds during 1921 and the first six months of 1922:—

## COURSE OF FOREIGN EXCHANGES

### Premium on New York Funds Reduced—Little Change in European Funds in First Six Months

The feature of the foreign exchanges in Canada for the first six months of 1922 was the steady decline in the premium on United States funds. Following out the tendency of 1921, this declined from 5 1/16 premium on January 4, to ⅞ premium on June 14, though there was a slight advance to 5½ during the early part of January. On June 28, the premium was 1⅞.

Sterling fluctuated between a high of 456.75 on February 8 and a low of 444. on January 28, the net result for the six months being an advance from 446.75 on January 4 to 448.62 on June 28. Francs advanced from 8.41 to 9.54 on April 19, then declined to 8.52. German marks suffered a steady decline from .56 to .28½, while Italian lire also went down from 5.15 to 4.65¼, after touching 5.61 on April 12.

The figures given below are for each Wednesday, at Toronto.

### EXCHANGE RATES

## INVESTMENT PROSPECTS

One point which should be borne in mind by investors in considering the new issue of Dominion government bonds is that the time is rapidly approaching when good securities will be scarce instead of plentiful. Up to the present year, since the beginning of the war, the investment market has been a buyers' market, interest rates being high and money scarce. Looking back to a time several years before the war, however, investors will recall that it was then quite a problem to find a reasonably good investment which would yield 5½ per cent. or even 5 per cent.

The coming loan will finance the Dominion government for some time to come. It will probably be the last large Dominion loan for the present generation. The immediate requirements of most of the provinces have also been filled, and there is a wide-spread feeling against the further incurring of public debts.

Turning to the field of business it is obvious that the condition of business and the difficulty of realizing an adequate profit does not encourage the issue of new securities. Only too many promoters take advantage of such a time for issuing worthless stocks. Sound concerns on the other hand wait for definite signs of the return of a condition of business such as would warrant new extensions. A good deal of legitimate refunding has taken place and a few companies for which there were undoubted openings have been promoted but there is no promise of much activity in this field in the coming year.

The opportunities to invest in ten year bonds at 5½% is therefore a good one. The loan will unquestionably be a success and security prices will, judging by prospects, be carried to still higher levels.

## LIFE INSURANCE SALESMANSHIP

Business is founded on the public's requirements—producers are all the time striving to learn and anticipate what will be in demand. Occasionally, however, sentiment creeps in, and in the case of life insurance the agent is sometimes found appealing for his own needs rather than for those of his prospect. This point was brought up in a report of a Committee on Scientific Salesmanship, presented at the National Association of Life Underwriters' meeting in Toronto recently. One of the outstanding contributions of the Carnegie School of Life Insurance Salesmanship—alone sufficiently valuable to have justified the existence of this School—is the dissemination of the theory that the basis of a sale is the satisfying of a need. This idea is not entirely new—very few ideas are. It has been more or less blindly or clearly used before, but the idea is now distinctly taught as the fundamental basis on which the sale of Life Insurance should be presented, and this is being spread by nearly 1,000 men and women graduating into the Life Insurance business from this and similar schools, distinctly imbued with the advantages of this theory.

A little reflection will show that by presenting the value of Life Insurance to satisfy needs, sales will result—

1. More quickly.
2. More surely;
3. For larger amounts.
4. In insurance that will be more lasting;
5. Will be foundation for future sales;
6. Will secure interest instead of antagonism in the home;
7. Will inspire more confidence in the salesman in presenting and urging his case;
8. Will win the confidence of clients and the public.

In the past, too many salesmen have endeavored to secure the prospect's attention, because of the salesman's needs—sometimes frankly admitted, sometimes barely concealed. How many thousands of persons have frankly said they took a certain policy because a relative or friend needed the money? This surely is not the proper foundation upon which to build a permanent insurance program. It is true that even by these methods large numbers of persons have been insured, but, nevertheless, without a distinct realization of the full value of the Life Insurance. Is it any wonder that business men who become naturally intuitive mind-readers should not be properly impressed with the necessity for insurance or its great value, or that they have not respected the Life Insurance man through whom such insurance was purchased simply to give the commission?

Obviously, all of us are most quickly influenced by an appeal to our own interests. Even if the need is not distinctly appreciated so as to become a want, anyone can be quickly interested in any subject when appealed to on the ground of his own need. The sick man does not long keep the physician waiting outside the door.

## THE ALBERTA BANKING INQUIRY

Alberta has been conducting an inquiry into the Canadian banking system. The investigation was made by Professor D. A. MacGibbon, who will report to the provincial government. Hearings were given in various towns and cities of the province.

The real reasons why the government held this investigation are not apparent but it is evident that the criticisms of the present methods of conducting banking in Canada did not assume very definite shape. Newspaper reports have been very slight. There at least appears to be nothing of any value as affecting the coming revision of the Bank Act.

It must be borne in mind that Alberta now has a farmer's administration and there may be political reasons for this investigation. Considering the fact that banking is exclusively under the jurisdiction of the Dominion Government, a provincial inquiry cannot carry any great weight.

## TRADE BALANCE NOW FAVORABLE

For the past three months there has been a considerable excess of exports over imports, a condition reversing that of the past two fiscal years. Back in 1920, during the post-war boom, there was a favorable trade balance of $175,000.000, the exact figures for the fiscal year ended March, 1920, being $1,064,528,123 of imports and $1,239,492,098 of exports. The next year our imports were $1,240,158,882, a large increase, but our foreign markets started to fail us and exports were reduced to $1,189,163,701. The full effect of the collapse in trade was felt in the year ended last March, imports totalling $747,804,332, and exports $740,240,080. The home demand, it is apparent, kept up a fair activity here, which included the purchase of foreign goods..

The figures for the first four months of the present year are:—

| | Imports | Exports |
|---|---|---|
| April .... | $47,695,454 | 31,917,500 |
| May ..... | 66,121,374 | 69,146,171 |
| June .... | 61,668,729 | 71,760,563 |
| July .... | 60,757,019 | 70,430.235 |

In the case of both imports and exports the April figure is the low record for three years past. The recovery has been rapid, but it must not be expected that it will continue at the same rate. In fact indications point to a very slow increase in industrial activity.

## *Business Conditions*

Although there has been no material change this week in Canadian business conditions, according to despatches received by Dun's Review from branch offices of R. G. Dun & Co. in the principal cities, the strengthening effect of continued favorable crop advices and of reports of extensive preparations for the enlargement of industrial activities is clearly perceptible, and both merchants and manufacturers confidently anticipate a good fall and winter trade. While the majority of orders are still moderate in amount and mainly for immediate requirements, they show a steady increase in number and include almost all kinds of staple commodities. There is also a growing disposition on the part of retailers in numerous sections to place orders for deferred delivery, which is regarded as reflecting depleted supplies and the definite return of confidence in the future. Collections seem to be slowly improving.

General business conditions at Montreal as yet show little change, but wholesalers report the receipt of an increasing number of orders for dry goods and other staples, and they expect a sharp expansion in activity to develop early in the coming month. Collections are fairly satisfactory.

Although business is still quiet at Quebec, the practical assurance of the largest crops in several years is having a stimulating effect on sentiment, and both wholesalers and retailers anticipate a material improvement in conditions within the near future. Collections, though still slow, are slightly better.

Retail trade is fairly satisfactory in volume for this period at Toronto, and wholesalers report numerous small orders coming in for dry goods, clothing, furnishings, footwear and other staples, with buyers displaying more confidence in their preparations for the future. Expectations of good crops and indications of a broadening in industrial operations cause a general belief that business will develop considerable activity in the early fall, and the prevailing sentiment is decidedly optimistic. Collections are fair to good.

Business in the far west and northwest is spotty, some cities, among them Winnipeg, Calgary and Regina, reporting the receipt of an increasing number of inquiries from country merchants and the placing of a fair volume of small orders for fall and winter commodities, but advices from others state that little change in conditions is perceptible. Taken as a whole, buying in this section is still conducted along conservative lines and this policy is expected to continue until crop returns are received by the farmers. Collections remain slow.

### BANK CREDITS

#### Borrowers' Statement of Their Conditions Should Be Analyzed

The following observations on bank credits are taken from an address by the well known banker, James G. Cannon, of New York. This address was published in volume 16 of the Alexander Hamilton Institute.

"The cornerstone of credit may be said to be the requiring from borrowers of statements of the condition of their affairs. This has now become an accepted custom in the relation between banks and borrowers on commercial paper. It has come to be recognized that the practice is of value to both the bank and the borrower, and this may be considered the reason for its success. Furthermore, the making of statements oftentimes renders concerns themselves aware of their weaknesses in their methods of operation, financial practices and results of business. The banker, having a substantial interest in the success of the customer may frequently give wholesome advice or timely warning from his wide experience in commercial affairs and his foresight in monetary matters.

"A statement, however, which is not submitted to analysis is a menace. Because, first, if errors have been made, if lack of judgment on the part of the management of the concern has been shown which is not brought to the attention of the borrower, if reckless methods have been indulged in, or any dishonesty has been practiced, the very fact that a statement has been received and accepted by a banker either lulls into a sense of security the careless or heedless borrower, confirms the reckless, financial habit or establishes the dishonesty, if such exists. Frank and open statements bearing upon their face the evidence of a true condition of affairs, are the greatest factor in establishing credit. Nothing will more firmly cement the union between borrower and banker than such a statememnt and nothing will be of more value to a banker and of less harm to an honest, enterprising borrower. Hidden facts are revealed by analysis, and skill in reading between the lines is an important part of a manager's training. By this means, weaknesses may frequently be discovered and proper steps taken to avert trouble before acute difficulty arises.

"A large number of statements will show on their face such evidence of weakness, as to require no further information. This information, of course, is valuable to bankers, and they will at once decline to extend these applicants any accommodation; whereas, if, on the other hand, they were only in possession of indefinite data, they might be disposed to extend a line of credit.

Notes, bills, drafts, cheques, book credits or any form of obligation resulting from a credit transaction, come into existence, not antecedent to, but as a consequence of, a transfer of goods involving futurity. Paper is purely fictitious and illegitimate which is not the outcome of an operation in goods; and we are enabled to test whether loans are legitimate or not, according as we know whether the discounts are granted or not for actual transfer of saleable goods. This test gives us the means of drawing the line between sound and unsound banking.

"The manger sometimes trusts too much to his customer—if the latter wants money presumably he is a prudent man and knows what to do with it; that he must know his own business better than his banker, and that it would be presumptuous in the latter to undertake to guide him. While this may be true of the well-trained and experienced merchant, it is very wide of the truth with hundreds of traders and small manufacturers all over the country. There are really very few men anywhere who can be trusted to handle prudently and safely unstinted loans of money. The proverb, "Give him rope enough and he will hang himself," fitly illustrates the tendency of the average trader to get into difficulty when he is too freely provided with money.

## Personal

ALLAN CAMERON has been appointed Oriental manager of the Canadian Pacific Railway and Canadian Pacific Steamships, Limited, with the office at Hong Kong.

J. B. CRAIG has been elected president of the Winnipeg Grain Exchange and J. A. Richardson has been elected vice-president. Dr. McGill was re-elected secretary-treasurer.

VAN C. GORDON has been appointed district representative at London of the bond firm of R. A. Daly & Co., Toronto.

LIEUT. COL. GEO. H. HAM, known practically all over Canada, who celebrated his 75th birthday last week, was born at Trenton, Ont., and is one of the oldest newspaper men in the Dominion. He covered the Northwest Rebellion for the Toronto Mail. In 1891 he became advertising manager for the Canadian Pacific Railwaly. Only a few days ago Col. Ham mailed a long article to the Manitoba "Free Press", dealing with the description of Winnipeg in 1875 when he worked there as a journalist. At the present time he is busy writing further memoirs; his "Reminiscences of a Raconteur" was published in his 74th year.

H. MILTON MARTIN, of Edmonton, has been appointed public administrator and official guardian of the Northwest Territories, the appointment having been made by the Territorial Council at Ottawa. In his position as public administrator, Mr. Martin will have charge of all the estates of persons who die intestate within those territories and will also look after the interest of all minor children. This new appointment will not necessitate Mr. Martin's discontinuance of his own office and former activities.

FRANK SCOTT, vice-president and treasurer of the Grand Trunk Railway system, has resigned his position.

C. E. E. USSHER has been appointed general Passenger Traffic Manager of the Canadian Pacific Railway and C. B. FOSTER has been appointed Passenger Traffic Manager.

## Obituary

C. FREDERICK BIRKS, former vice-president of the Belding Paul Co., died at his home in Montreal on August 24th. The late Mr. Birks was born in Montreal 77 years ago and was educated at the Montreal High School.

HUGH McMILLAN, Judge of the County of Victoria, died at his home in Lindsay on August 24th. The late judge was born in Erin Township 73 years ago. As soon as he had graduated from school he went to Guelph and studied law. After he had been admitted to the bar he practiced in Guelph in partnership with several prominent legal practioners, and in 1906 he was appointed junior judge of the county of Victoria.

Word has been received announcing the sudden death of T. M. E. Armstrong, joint general manager of the Commercial Union Assurance Company.

The late Mr. Armstrong was for many years general manager of the Ocean Accident and Guarantee Corporation, now a subsidiary of the Commercial Union and was appointed joint general manager of the Commercial Union with Mr. Joseph Powell in 1920, to succeed Mr. E. Roger Owen who had become permanent deputy chairman of the company.

Mr. Armstrong occupied an outstanding position among insurance men in Great Britain and during his connection with the company made frequent trips to various parts of the world, being well-known in Canada, having only visited this country as recently as last February.

---

"With careful and prudent banking, however, much of the mischief is prevented. Inflation is seldom developed to a very great extent without accommodation loans, and these should be sparingly indulged in if not altogether avoided.

"Credits should be carefully scanned and risks divided; and so the skilled banker, by simply following safe rules in his own business—rejecting here and encouraging there—cannot help saving his customers as well as himself from much trouble and loss. But in order to do this well he must be a man who thoroughly knows his business; of strong self-reliance, a man who arrives at his opinions and judgments from observed facts, not from hearsay, and who is not to be frightened into altering his course to suit importunate and perhaps influential borrowers."

### RAILWAY NET EARNINGS INCREASED

#### $3,936,176 in May, Against $1,315,876 in April—Revenue Ton Miles Higher

Revenues of the railways as a whole took an upward turn in May and almost reached the March mark which is the peak so far for the year. Expenses also increased but not to the same extent as revenues, giving a net revenue of $3,936,176 as against $1,315,876 for April. Revenue ton miles increased 13 per cent. but passenger miles showed little change.

Compared with May, 1921, the operations showed considerable improvement. Revenues increased $999,491 or 3 per cent., while expenses decreased $1,460,450 or 4.7 per cent. with an increase in revenue ton miles of 351,239,683 or 22 per cent. With the increased ton miles, freight revenues increased $2,692,430 or 12.4 per cent., but due to decreased rates and travel, passenger revenues decreased $1,120,311 or 15.9 pr cent. The pay roll increased $815,739 or 4 per cent., with a decrease in the number of employees of 3,205 or 2 per cent. Freight train loading increased from 487.4 tons to 512.6 tons, but car loading fell off .3 ton per car.

During 1920 and 1921 railway revenues continued to increase from May till they reached the peak in October. The prospects for increased net revenues, therefore, are much better than in the last two years when the operating ratios were 95.55 per cent. and 95.50 per cent. respectively as against 88.36 per cent. for May, 1922.

#### Canadian Pacific

Canadian Pacific Railways showed a decrease in revenues of $244,103 or 1.8 per cent. from May, 1921, and an increase in operating expenses of $701,191 or 6.5 per cent., giving an operating ratio of 82.72 per cent., as against 76.29 per cent. for May, 1921. Freight revenues increased $661,151 or 7.7 per cent. with an increase in ton miles of 121,199,499 or 19.5 per cent., but passenger revenues decreased $596,114 or 17.5 per cent., with a decrease in passenger miles of 13,432,872 or 12.6 per cent., and decreased rates. Mail, express and other passenger train revenues also show decreases.

Maintenance of expenses show substantial increases over last year, but transportation expenses show a decrease of 5.6 per cent., with an increase in total ton miles of 14 per cent, and an increased train mileage.

#### Canadian National

Canadian National Railways showed an increase in revenues of $1,344,990 or 16 per cent. over May, 1921. The increase was entirely in freight receipts which increased $1,702,899 or 29 per cent. with an increase of 41.5 per cent. in revenue ton miles. The average receipt was 1.140 cents per ton mile as against 1.251 cents per ton mile for May, 1921. Passenger receipts, were 18 per cent. below last year's with decreases in passengers carried and passenger miles. All other pasenger train revenues also show decreases.

Expenses decreased $1,162,494 or 10.7 per cent., reducing the operating loss from $2,554,540 in 1921 to $47,055 and giving an operating ratio of 100.49 per cent. as against 130.65 per cent. for May, 1921.

With an increased ten miles of all freight of 27 per cent. freight train miles increased only 7.8 per cent., indicating an increased train loading of 77.9 tons per train. While the average car loading showed an increase of 1.7 tons per car, the number of cars per train increased 1.9 loaded cars and 3.2 empty cars. Maintenance expenses showed slight decreases but transportation expenses decreased $1,102,968 or 20.8 per cent., while the total pay roll decreased $416,535 or 6 per cent. with practically no change in the number of employees.

#### Grand Trunk

Grand Trunk Railway had an increased freight traffic of 17 per cent., increasing the freight revenue $166,014 or 4 per cent., but passenger traffic fell off 4 per cent. and passenger receipts $168,963 or 14 per cent., the total decrease in revenues being $175,034 or 3 per cent. Operating expenses decreased $461,420 or 8 per cent., giving a net operating revenue of $610,572 and an operating ratio of 89.47 per cent., compared with $324,186 and 94.57 per cent., respectively, for May, 1921.

Maintenance expenses show decreases, transportation expenses show a slight increase, while teh total pay roll decreased $184,464 or 5 per cent., with practically the same number of employees.

BUSINESS INSURANCE

on the lives of the men who run the business is just as important as fire insurance on the property. Fire is a possibility but death is a certainty.

The ready cash from a Canada Life Business Insurance Policy at such a time will readjust matters and carry on the business as nothing else can do.

A Sufficient Reason

"I was much more comfortable when I got my Life Insurance than I had been before, for I could feel that even if I were taken away, I should not leave my wife altogether unprovided for. That is a sufficient reason why every man should carry insurance upon his life."—The late Sir Wilfred Laurier.

There are other good reasons for Life Insurance, besides its main element of protection. It is the finest form of investment, yielding good returns, free from care or oversight during its term of life, with no possible loss of capital, no trouble or anxiety about the security of the investment. Let us submit the investment side of Life Insurance to your business judgment.

**The Great West Life Assurance Co.**

# Current Loans Abroad Show Decline

### July Total is Thirty Million Below June—Current and Call Loans in Canada Decline From Previous Month—Deposits Lower—Call Loans Have Increased

| | July 1922 | June 1922 | July 1921 | Yrs. Inc. or Dec. | Mths. Inc. or Dec. |
|---|---|---|---|---|---|
| Deposits on demand ........... | $ 492,442,491 | $ 505,757,856 | $ 525,085,166 | — 6.21 | — 2.63 |
| Deposits after notice .......... | 1,175,781,711 | 1,181,404,188 | 1,295,226,767 | — 9.22 | — .47 |
| Current loans in Canada ...... | 1,104,122,176 | 1,117,844,707 | 1,237,093,085 | — 9.94 | — 1.22 |
| Current loans elsewhere ....... | 144,071,730 | 174,613,672 | 155,238,085 | — 7.20 | —17.43 |
| Loans to Mun. Canada ........ | 77,475,949 | 83,701,008 | 83,154,559 | — 6.84 | — 7.50 |
| Call loans in Canada .......... | 96,770,236 | 99,804,892 | 107,552,690 | —10.07 | — 3.06 |
| Call loans elsewhere .......... | 175,219,091 | 174,613,572 | 160,809,729 | + 8.95 | + .34 |
| Circulation .................... | 161,887,327 | 166,085,839 | 203,134,777 | —20.31 | — 2.52 |

Perhaps the most outstanding feature of the July bank statement is the substantial contraction in current loans abroad. A comparison of all the principal figures of the government's report with previous records, shows a preponderance of minus signs, the only exception being call loans abroad which show a large increase over last year.

The decline in current loans abroad is not surprising considering the Canadian dollar has almost reached par in New York and, no doubt, the bankers have found that the cost of sending money across the border does not equal the remuneration received. Of course this is not the only reason for the large decline, another being the railway, coal and various other strikes now in process, and as a result trade is not moving to such an extent as formerly.

#### Current Loans Decrease.

Loans on collateral in Canada have also fallen off, although not to quite the same degree. Taking into consideration the quietness on the stock markets during July, the decrease is to be expected. However, it is generally anticipated that the Aug. bank statement will show a substantial increase as ever since the first of August the stock markets have shown increased activity.

The following table illustrates the trend of both these loan accounts since July a year ago:—

| Loans<br>1921 | Current in Canada | Call in Canada |
|---|---|---|
| July ............... | 1,237,093,871 | 107,552,690 |
| August ............ | 1,226,467,704 | 106,115,117 |
| September .......... | 1,239,637,351 | 106,729,270 |
| October ............. | 1,243,748,818 | 105,362,186 |
| November .......... | 1,210,101,634 | 104,392,115 |
| December ........... | 1,174,053,434 | 113,071,089 |
| 1922 | | |
| January ............ | 1,138,151,455 | 102,630,461 |
| February ........... | 1,143,538,489 | 100,379,637 |
| March .............. | 1,149,187,869 | 103,638,801 |
| April ............... | 1,162,975,332 | 102,005,932 |
| May ................ | 1,140,425,500 | 101,239,898 |
| June ............... | 1,117,844,707 | 99,804,892 |
| July ............... | 1,104,122,176 | 96,770,236 |

It is interesting to note how these accounts compare with preceding years:

| July | Current loans in Canada | Call loans in Canada |
|---|---|---|
| 1916 | $ 740,040,741 | $ 87,355,648 |
| 1917 | 829,560,700 | 71,376,788 |
| 1918 | 905,677,233 | 74,382,762 |
| 1919 | 1,014,387,206 | 93,587,497 |
| 1920 | 1,014,387,206 | 115,360,894 |
| 1921 | 1,237,093,871 | 107,552,690 |
| 1922 | 1,104,122,176 | 96,770,236 |

#### Gold Holdings Increase

The following is a comparison of changes in holdings of coin and notes during the months of June and July:

| | |
|---|---|
| Gold and sub-coin in Canada ....... | +$ 276,863 |
| Gold and sub-coin elsewhere ....... | + 1,045,686 |
| Total changes ...................... | +$1,322,549 |
| Dominion notes in Canada ......... | —$ 887,546 |
| Dominion notes elsewhere ......... | + 3,673 |
| Total Changes .......................... | —$ 888,873 |

Owing to reductions in cheques on other banks, and amounts due from banks elsewhere than in Canada and United Kingdom, the ratio of quick assets to total liabilities shows a slight decline from the previous month. The ratio during July stood at 24.65 per cent., as compared with 25.01 per cent., in June, and 21.60 per cent., in July last year.

With several slight changes in municipal securities and railway bonds, the ratio of liquid assets again shows a slight increase over the previous month. The ratio during the month standing at 50.11 per cent., as against 49.92 per cent., during June. The ratio during July last year stood at 47.67 per cent.

During the month there was a slight increase in capital subscribed, the Banque Nationale showing an increase of $278,800. Capital paid up also shown a slight increase, being up $653,710 from the previous month. This increase was also due to the Banque Nationale increasing the paid up capital.

The public savings are dwindling, but are still above some of the months during 1922. The decline during the month has been partly due to the vacation season, as many draw out funds for holiday purposes. Deposits after notice are again on the decline, being lower by about six millions from June. The following table is a record of deposits for the past thirteen months:—

| 1921. | Deposits on demand | Deposits after notice |
|---|---|---|
| July ................ | 525,085,166 | 1,295,226,768 |
| August .............. | 527,362,713 | 1,279,830,731 |
| September ........... | 534,307,452 | 1,263,763,852 |
| October ............. | 565,650,636 | 1,251,323,839 |
| November ........... | 555,901,712 | 1,252,227,394 |
| December .......... | 540,942,522 | 1,240,807,268 |
| 1922 | | |
| January ............ | 487,153,169 | 1,233,208,401 |
| February ........... | 488,079,674 | 1,231,349,001 |
| March ............... | 484,233,074 | 1,230,628,840 |
| April ................ | 502,370,799 | 1,218,195,262 |
| May ................. | 494,185,496 | 1,197,789,747 |
| June ................ | 505,757,856 | 1,181,404,188 |
| July ................ | 492,442,491 | 1,175,781,711 |

#### Call Loans Abroad Up.

The only item to show an increase during the month was call loans abroad, which are up by about half a million from June. With the exception of the May total, call loans during July are higher than for any month this year. In comparison with a year ago call loans abroad show a substantial increase of fifteen millions, or 8.95 per cent. This increase may be considered good in view of the conditions prevailing during the year.

As July is usually a redemption month owing to factories closing for stock taking, pay rolls being reduced, and people leaving the country for holidays abroad and purchasing travelling funds, the circulation during that month usually shows a decline. This year has been no exception to this rule, there being a decline of about five millions in circulation as compared with the previous month, and a decline of about forty-two millions from last year.

#### Municipal Loans Decline.

Loans to municipalities show a decrease of six million from June, and also the same decrease from the total during July last year. The six million decline during the month is due to the fact that municipal taxes are usually payable during that month.

In connection with loans to municipalities it is interesting to note how these loans have increased year by year. The following table shows the trend since 1917:—

| July | | July | |
|---|---|---|---|
| 1917 ...... | $43,989,207 | 1920 ...... | $78,792,822 |
| 1918 ...... | 56,589,173 | 1921 ...... | 83,154,559 |
| 1919 ...... | 54,455,738 | 1922 ...... | 77,475,949 |

The other changes in the bank statement are only minor and in any way do not effect banking conditions in Canada.

Details of the July statement are given elsewhere in this issue.

## *Bank Clearings*

The following are the bank clearings for the week ended August 24, compared with the corresponding week of 1921:—

#### Eastern Bank Clearings

| | Week ending yesterday | Increase over 1921 |

# To Holders of Five Year 5½ per cent Canada's Victory Bonds

### Issued in 1917 and Maturing 1st December, 1922.

## CONVERSION PROPOSALS

THE MINISTER OF FINANCE offers to holders of these bonds who desire to continue their investment in Dominion of Canada securities the privilege of exchanging the maturing bonds for new bonds bearing 5½ per cent interest, payable half yearly, of either of the following classes:—

(a) Five year bonds, dated 1st November, 1922, to mature 1st November, 1927.

(b) Ten year bonds, dated 1st November, 1922, to mature 1st November, 1932.

While the maturing bonds will carry interest to 1st December, 1922, the new bonds will commence to earn interest from 1st November, 1922, GIVING A BONUS OF A FULL MONTH'S INTEREST TO THOSE AVAILING THEMSELVES OF THE CONVERSION PRIVILEGE.

This offer is made to holders of the maturing bonds and is not open to other investors. The bonds to be issued under this proposal will be substantially of the same character as those which are maturing, except that the exemption from taxation does not apply to the new issue.

Holders of the maturing bonds who wish to avail themselves of this conversion privilege should take their bonds AS EARLY AS POSSIBLE, BUT NOT LATER THAN SEPTEMBER 30th, to a Branch of any Chartered Bank in Canada and receive in exchange an official receipt for the bonds surrendered, containing an undertaking to deliver the corresponding bonds of the new issue.

Holders of maturing fully registered bonds, interest payable by cheque from Ottawa, will receive their December 1 interest cheque as usual. Holders of coupon bonds will detach and retain the last unmatured coupon before surrendering the bond itself for conversion purposes.

The surrendered bonds will be forwarded by banks to the Minister of Finance at Ottawa, where they will be exchanged for bonds of the new issue, in fully registered, or coupon registered or coupon bearer form carrying interest payable 1st May and 1st November of each year of the duration of the loan, the first interest payment accruing and payable 1st May, 1923. Bonds of the new issue will be sent to the banks for delivery immediately after the receipt of the surrendered bonds.

The bonds of the maturing issue which are not converted under this proposal will be paid off in cash on the 1st December, 1922.

W. S. FIELDING,
Minister of Finance.

Dated at Ottawa, 8th August, 1922.

# Slight Decrease in July Trade

### Total Decline Two Million From Previous Month—Exports Show Large Increase Over Last Year—Imports Lower by Two Million from 1921—Fibres and Textiles and Iron Imports Show Fair Increase—Exports of Animal and Animal Products Increase $6,000,000

The trade figures for the month of July show a slight reduction from the preceding month but show a substantial improvement over the same month last year. Both imports and exports show a decline of one million dollars from June, although total exports during July show a large increase over the same month during 1921. Imports on the other hand show a decrease of two million from last year.

Imports during the month show very little variation from the previous month, the total imports being lower by only half a million dollars. There were two large increases in imports during July, as compared with the same month last year, these being fibres, textiles and textile products, which are up by three million, and iron and its products which have increased two million. The only large decrease was that of non-metallic minerals and products which are down by six million.

The outstanding change during the month in exports was the increase of six million in animals and animal products over last month. Several other export items show a slight increase, including wood, wood products and paper, iron and its products, and non-metallic minerals and products. With the demand for pulp and paper increasing each month, the four million increase in that commodity over last year is not surprising. Agricultural and vegetable products, mainly foods, show a large increase of four million over last year. Considering the decreases in food values this showing can be considered very good.

Details of the July statement with comparisons are given herewith:—

## IMPORTS ENTERED FOR HOME CONSUMPTION

**Winnipeg, Man.** Aug. 28th. Cotton shed of the Alska Bedding Company (Simmons Limited). Loss $50,000.

# Additional Information Concerning Fires

**Kitchener, Ont.** Kitchener's fire losses for the first six months of this year totalled $16,967 as compared with $19,344 for the same period last year.

**North Bay, Ont.**—On July 29 a fire destroyed about six million feet of lumber and two houses, in the village of Front Mills. The fire broke out in the large mill yards owned by Wm. Milne & Sons. The estimated amount of loss was divided among the owners of lumber in the yards as follows:—

Wm. Milne & Sons $130,000; Union Lumber Co. and Standard Planing Mills $100,000; Canadian Timber Co. $50,000 and Keenan Co. of Owen Sound about $30,000. Cause of fire said to be a spark from a passing train. The property is said to be well insured.

**Toronto, Ont.**—Fire losses in Toronto for the month of July totalled $78,462 with 177 alarms.

**Trout Mills, Ont.**—By the fire which occurred on July 31st in the lumber mills of Wm. Milne & Son. Insurance on lumber: North Brit. and Mer. $10,000; Hand-in-Hand $15,000; Union of Canton $15,000; Liv. & Lon. &Globe $5,000; British America $5,000; Phoenix of London $5,000; Western $5,000; Guardian $5,000; Union of London $5,000; Queen $12,000; British Traders $5,000. Total $87,000. Loss total. On lumber, owned by the Union Lumber Co.: Royal $20,000; American Mutual's $30,000. Total $50,000. Loss total. Grand total $137,000.

## NOTE CIRCULATION DECREASES

### Percentage of Gold Held for Redemption Shows Substantial Increase

The note circulation of the Dominion Government during July shows a decrease of slightly over one million dollars, as compared with the previous month, when the total circulation was $232,748,410.

Due to the decrease in the circulation and an increase of two million in gold held for redemption, of Dominion notes, the percentage shows a substantial increase over June. The percentage during July was 37.91 per cent., as compared with 32.43 per cent., in May.

The position as at July 31 was as follows:—

| | |
|---|---|
| Provincial | $ 27,710 |
| Fractional | 1,241,685 |
| $1 | 16,585,077 |
| $2 | 12,128,933 |
| $4 | 32,915 |
| $5 | 2,562,935 |
| $50 | 3,750 |
| $100 | ........... |
| $500 | 2,927,000 |

| $500 Legal Tender Notes for Banks | 4,500 |
| $1,000 " " " | 929,000 |
| $5,000 " " " | 132,610,000 |
| $50,000 " " " | 57,000,000 |
| | $231,439,506 |
| Gold held July 31, 1922, by the Minister of Finance | $ 90,358,632 |
| Gold reserve to be held on Savings Banks Deposits— 10 p.c. on $33,052,957.68 under The Savings Banks Act | 3,305,295 |
| Gold held for redemption of Dominion Notes | $ 87,053,336 |
| Dominion Notes outstanding against deposits of approved securities, under Finance Act, 1914, and Chapter 4, Acts 1915 | $108,730,824 |

# Insurance Licenses and Agency Notes

The Globe Indemnity Co. of Canada has been granted a license, authorizing it to transact in Canada the business of insurance against damage to property of any kind caused by the explosion of natural or other gas, in addition to the classes for which it is already licensed.

The Norwich Union Fire Insurance Society, Ltd., has been licensed to transact the business of insurance against damage to property of any kind caused by the explosion of natural or other gas, in addition to the classes for which it is already licensed, in Canada.

A Dominion license has been issued to the Canada Security Assurance Company, authorizing it to transact in Canada the business of insurance against damage to property of any kind caused by the explosion of natural or other gas, in addition to the classes for which it is already licensed.

Robert Hampson & Son, Limited, Montreal, announce the appointment of J. A. Campbell Colvil, 14 St. John St., as Chief Agent for Montreal, of the Providence Underwriters Agency of the Providence-Washington Insurance Co.

F. W. Graham, who has been in the service of the Dominion Life for some years, latterly as manager in the Swift Current district, has been promoted to the branch managership of Eastern Saskatchewan as from August 1st. He is president of the Saskatchewan Life Underwriters' Association.

## ONTARIO GENERAL OMNIBUS COMPANY, LIMITED

Under the above name, a company has recently been formed to operate motor buses and motor trucks upon the highways of Ontario. So important has motor transportation upon the highways become, that the development of the country and of the city alike is dependent upon the systematic operation of these vehicles of communication and conveyance. Farms located upon or near such great highways of trade and travel acquire immediately a new value and the life of the residents whose farms adjoin such highways takes on new interest and a great enrichment. For these and other reasons, farmers as well as urban classes have been actively supporting all measures that make for the development of the highways and for more abundant life and greater returns to those engaged in country and city enterprises. The formation of this new company marks a distinct stage in advance. It is capitalized at six hundred thousand dollars, and as it is taking over the operating equipment of the Blue Bird Transit, Limited, a company which has been operating for two years upon the highway between Toronto and Hamilton, it is already established there as a going concern with a large measure of public patronage and good will. The Board of Directors of the company includes Professor W. T. Jackman, president, who is recognized as one of the best transportation economists of the country; Mr. Fred E. Martin, general superintendent, who has been actively associated with the motor industry for over twenty years and whose services overseas in the transport and engineering corps have given him complete familiarity with both the mechanical requirements and the organization of the service; Mr. Thomas H. Sheppard, formerly treasurer of the Spanish River Pulp and Paper Co., and now president of the K. & S. Tire and Rubber Co., whose business experience and connection have assisted in bringing these companies to their present success; Mr. P. S. Bysshe, secretary-treasurer, formerly with the Oldsmobile and National Cash Register companies and later engaged in finance in Montreal; and Captain C. R. Nash, whose long connection with the Commer Cars, Luton, England, and with the entire automotive field in all its aspects in Canada, assures the company of invaluable guidance in administration and operation. The solicitors of the company are Price, Cochrane, Shaver & Co., of whose ability and high standing it is needless to speak.

Of course, the service upon the Hamilton Highway is to be greatly extended and improved and already orders have been placed for new buses of the most approved construction, each capable of seating thirty or thirty-two passengers. As conditions warrant, the company proposes to enlarge the area of its operations over the system of good roads which are being rapidly completed under the direction of the Provincial Department of Highways. While the initial service of the company is along the Toronto-Hamilton highway, the purpose is to extend this service in the near future so as to furnish facilities for the conveyance of passengers to and from places as distant as Guelph, Galt, St. Catherines, Niagara Falls, Woodstock, London and Oshawa. Careful and skilled operators will be in charge of the motor omnibuses and the public may confidently expect the highest quality of service.

## EFFECT OF BANKRUPTCY OF BROKER

The Quebec Superior Court has recently decided Dolphe v. Fairbanks, Gosselin & Co., which was a petition that certain moneys be declared to have priority over claims of ordinary creditors in the bankruptcy of the firm.

Dolphe deposited certain share certificates with Fairbanks and Co., with instructions to sell them and purchase other designated shares with the proceeds. The brokers made an authorized assignment under the Bankruptcy Act after the sale of the shares and instead of purchasing as directed, deposited the money, before assigning, to their own general account in the bank but not in trust. The Court held that the money thus lost its identity and Dolphe had no privilege of any kind over the ordinary creditors on the moneys received by the brokers through the sale of the shares.

# *New Incorporations*

Authorized capital of $14,113,400 is represented by companies whose incorporations were reported to The Monetary Times during the week ended August 26, compared with $4,405,700 the previous week. A comparative summary by provinces is as follows:—

| | Week ended Aug. 19 | Week ended Aug. 19 |
|---|---|---|
| Dominion | $1,291,000 | $2,331,000 |
| Alberta | | |
| B. C. | 855,500 | 900,000 |
| Manitoba | 935,000 | |
| N. B. | 189,800 | 9,900 |
| Ontario | 822,500 | 10,174.500 |
| P. E. Is. | 5,000 | |
| Quebec | 306,900 | 138,000 |
| Sask. | | 110,000 |
| Totals | $4,405,700 | $14,113,400 |

The following is a list of companies recently incorporated under Dominion charter with head office, authorized capital and the name of one of the directors:—

Sonora Phonograph, Ltd. (Earl D. Coots) Toronto, $40.000; Canadiana, Ltd. (Jos. A. Brousseau) Ottawa, $50,000; Balba Co. of Canada, Ltd. (John G. Brown) Leamington, $500,000; London Ladies' Whitewear. Ltd. (Jacob Singer) Montreal, $50,000; Acme Import Co. Ltd. (Joseph M. Bullen) Toronto, $40,000; Canada Fence Co. Ltd. (Helen W. Currie) Toronto, $1,000,000; J. Spencer Turner Co. of Canada, Ltd. (Henry A. Burbidge) Hamilton, $1,000; Wireless Corp. of Canada, Ltd. (Wm. K. McKeown) Montreal, $50,000; Marbro Pipe Co. (Canada), Ltd. (Louis P. Crepeau) Montreal, $50,000 ; Apt. Securities Co. Ltd. (Arthur E. Hall) Montreal, $200,000; Dominion Insulator & Manufacturing Co. Ltd. (Samuel G. Crowell) Niagaar Falls, $50,000; Mintine Co. Ltd. (Ernest V. McMillan) Sault Ste. Marie, $50,000; Trya Cone Manufacturing Co. Ltd. (Ernest G. Pinney) Hamilton, $200,000; Floyd Esbin Co. Ltd. (Frank Callaghan) Montreal, $50,000.

**Alberta**—Norwood Foundry Co. Ltd. Edmonton $20,000; Kinnel Stock Farm, Ltd. Calgary, $75,000; B. Sheldon's, Ltd. Edmonton. $20,000; Lethbridge Oils, Ltd. Lethbridge, $50,000; Scarth Agencies, Ltd. Kelley) Hamilton, $300,000; Georgetown Arena, Ltd. (Wm. V. Grant) Georgetown, $40,000; C. M. Green, Ltd. (Isidore Rosenstein) Sault Ste. Marie, $40,000; International Holdings Co. Ltd. (John Callahan) Toronto, $200,000; Iroquois Falls Drug Co. Ltd. (Henry H. Davis) Iroquois Falls, $40,000; Kerr Line Telephone Co. Ltd. (David Mordy) Foresters Falls, $7,000; Kirkland Excelsior Gold Mines, Ltd. (Wm. Taylor) New Liskeard, $3,000,000; McIntyre-Adams, Ltd. (Daniel J. Coffey) Toronto, $100,000; Brudenell Telephone Co. Ltd. (John Carty) Brudenell, $2,500; Reliance Coal & Coke Co. Ltd. (Edward W. Wright) Toronto, $50,000; Steven & Groff Lumber Co. Ltd. (John W. Steven) Beamsville, $40,000; Charles R. Will & Co. Ltd. (Chas. R. Will) London, $65,000.

**Quebec** — Universal Contractors, Inc. (Jacques Perron) Montreal, $20,000; Horn Realty Co. Ltd. (Henry Weinfield) Montreal, $49,000; Dominion Financial Corp. (Benjamin Robinson) Montreal, $49,000; Whitman Radio Co. Ltd. (Segfried H. R. Bush) Montreal, $20,000.

**Saskatchewan** — Shellbrook Theatre Co. Ltd. Shellbrook, $10,000; Totzke's Ltd. Saskatoon, $40,000; Saskatoon Hide and Fur Co. Ltd., Saskatoon, $20,000; Regina Liquors, Ltd., Regina, $20,000; Southern Exporters, Ltd., Regina, $20,000.

## IMPERIAL OIL PLANT

Within five weeks work on the Imperial Oil Co.'s gigantic oil refinery in East Calgary will be commenced. The construction of the building will give employment to from 300 to 500 men and will cost approximately $2,500,000.

The property selected by the oil company consists of 108 acres, being part of the Walker estate. It is situated on the east side of the Bow River. For tariff and traffic reasons the Imperial Oil Co. finds it much more profitable to import crude oil into Canada, and do the refining in this country. It accordingly imports its oil now from Wyoming and Montana to the Regina refinery, the refined article being shipped then to Alberta. The company was undecided for some time whether to enlarge its Regina plant to the extent of half a million or more, or extend and build a plant some place in Alberta. Calgary was selected because of traffic reasons, and because it is adjacent to the known oil wells in the province, and also because it is not far from the oil fields of Montana.

## DOVER OIL CO.

The Dover Oil Co. report the bringing in of a gas well on their Caledon property in the vicinity of Inblewood, Ont., with a flow of 750,000 cubic feet a day. The well was drilled to a depth of 630 feet, although the flow was first struck at the 555 foot level. This is the third producing well opened by the Dover Oil Co. in this locality, No. 1 having a flow of 106,000 cubic feet and No. 2 318,000 cubic feet. It is the company's intention to start drilling for oil at a greater depth almost immediately. Arrangements are being made for the marketing of the gas in the surounding municipalities. The rate payers are voting on franchises to permit the company to establish pipe lines and supply the respective centres with gas.

## NEW POWER PLANT OPENED

On August 22 the Raney Falls power plant was officially opened and the danger of shortage of electric energy in Central Ontario has been practically eliminated. Four thousand horsepower from one unit was fed into the Trent system of Hydro, and the second unit, which will be opened shortly, will bring up the total development to 10,000 horsepower at that plant.

The plant cost over one million dollars, and has been under construction for the past eighteen months, as many as two hundred men being engaged at times. The power house is one of the best equipped in the world, and is situated two miles below Campbellford, on the Trent River.

In summer the water is 46 feet high, and in winter 52 feet, the increase being due to the lowering of lake levels because there is no navigation in winter months through the Trent Valley Canal.

## NEW PULP MILL FOR EAST KOOTENAY

The pulp and paper mill for East Kootenay, B.C., seems to be assured. It is said the project is being backed by the the Chicago Tribune and other papers who will take the bulk of the mill's output. It is estimated that the mill will take two years to build and will cost $2,000,000. The company which will operate it will be known as the Wigwam Pulp and Paper Company and will be located 9 miles south of Elco, B.C. There is said to be sufficient timber in the Wigwam valley alone to last over 30 years.

C. D. McNab, of Waldo, B.C., president of the Baker Lumber Company, has secured the contract for supplying the company with pulpwood. He has incorporated a company for the carrying out of his part of the contract which will be known as the McNab Logging Company, Limited.

Chicago interests have thoroughly investigated the pulpwood of Wigwam Valley and pronounced it of excellent nature for the manufacture of newsprint, the fibre being longer than found elsewhere in British Columbia, permitting the manufacture of a high grade product. The timber is ideally situated and free from fire hazard.

## NEW COMPANY

James O. Miller Securities, Limited, of Calgary, Alta., is the name of a new company recently incorporated to take over the bond department of J. O. Miller & Co., Limited.

## NORWOOD LAUNDRY

The Norwood Laundry, capitalized at $50,000, have built a modern, up-to-date plant in Norwood, a suburb of Winnipeg, costing $30,000, and commenced business on September 1st. W. M. Hurley, C.A., has promoted the plant and is at the head of the firm.

Some years ago Mr. Hurley operated the Brandon Laundry Ltd., also the Regina Laundry Ltd., but disposed of both of these plants before going to the war.

The new plant is of reinforced concrete and brick. It is equipped with auto force ventilators which gives a complete change of air every four minutes.

## ONTARIO EQUITABLE OPENS NEW BUILDING

On Monday, August 21, the new building of the Ontario Equitable Life and Accident Insurance Co. was officially opened by Mayor Weichel of Waterloo in the presence of a large number of citizens. The company was organized less than two years ago, and since then has twelve millions of insurance in force.

Such has been the progress of the company since its organization that it outgrew the quarters in the Waterloo Mutual building in which it commenced business and found it necessary to seek larger premises. The Devitt Block, situated at the corner of King and Erb Streets, Waterloo, a substantial, solidly built three storey structure, was acquired early in the summer of this year and after being thoroughly remodelled constitutes the new home of the Ontario Equitable as well as of the Reinsurance Company of Canada, also allied with the company.

Oliver A. Harper has severed his connection with J. L. Elvin and has opened an office at 208-9 Kennedy Building, Winnipeg. He will conduct a financial agency there, handling bonds, rentals, mortgage loans and insurance.

# *Ontario Hydro Electric's Reply*

Reference was made in these columns last week to the reply issued by the Ontario Hydro-Electric Power Commission to the Murray report. Sir Adam Beck, chairman, draws attention in a fore-word to the kind of information presented by Mr. Murray and the manner in which it is presented. He says:—

### Neither Exhaustive Nor Impartial

Mr. Murray states that the National Electric Light Association desired to have a report "based on an impartial and exhaustive study." It is proposed in the present refutation to show, briefly, some of the methods adopted by Mr. Murray in order to reach his conclusions and then to leave the National Electric Light Association and the public to judge of the correctness of the charge that Mr. Murray's report is not "exhaustive," it certainly is not "impartial," and, moreover, embodying, as it does, such fallacious methods as Mr. Murray has employed, its conclusions also are necessarily unsound.

Mr. Murray has made definite statements purporting to be true but which are at absolute variance with well-known facts. He has misquoted statements, even replacing significant words therein with others. He has employed partial and misleading data, thereby arriving at conclusions which cannot for a moment be supported if the correct data be employed. He has presented grossly misleading statements respecting even physical facts within his knowledge, and he has made comparisons between entities radically different, when even a proper recognition of the real differences would have created an impression entirely at variance with what he has represented. He has inflated costs in a manner which falsifies the conclusions. Such procedure is characteristic of the use made of much of the essential material embodied in the premises which Mr. Murray has adduced and upon which he has based his conclusions. This accounts for the worthless nature of such conclusions.

### Specific Illustrations

It is unnecessary in this foreword to follow Mr. Murray through the many unjust representations by means of which he plausibly seeks to impose upon the credulity of his readers. His garbling of documentary data, his general misrepresentation respecting the operations of the Commission, his unwarranted statements relating to the concentration of industries or to the throttling of initiative, his puerile dealing with economic subjects, such as municipal taxation, the question of 'intangibles,' bonded indebtedness, and other similar features, and even his unprofessional treatment of important technical data, will all be found to be characterised by the same lack of frank and adequate consideration which is exemplified by the following specific illustrations.

In dealing with the legislation under which the municipalities carry on their electrical operations, Mr. Murray refers in rather a disparaging manner to certain broad powers which the Government of the Province has conferred upon the Commission. He states:

"It is apparent as one reads the many laws enacted that the faith of the people is in an all-wise, unerring commission which 'can do no wrong,' and legislation has been States there are many interested in constantly passed so that the Commission is entirely free from any character of inhibition; barriers, legal or otherwise, are levelled to give free swing to the conscience and action on the part of the Commission."

In referring to certain circumstances where such broad powers as have just been intimated might be invoked, Mr. Murray contends that no suit could have been brought against the Commission "since," states he, "the Commission cannot be sued without flat from the Attorney-General, and to date no flat has ever been granted." Within the period from 1912 to date, the Attorney-General of the Province of Ontario has granted more than twenty-five flats permitting legal action to be brought against the Commission. This statement shows that Mr. Murray has definitely recorded that which is at absolute variance with fact.

### Commission's Authority

When Mr. Murray is contending in his report that the Hydro-Electric Power Commission is clothed with an "unlimited" authority which makes it, as he charges, "the sole judge of its own acts," he purports to quote the Power Commission Act. In so doing, however, he expressly omits certain all-important, qualifying words in the earlier form of the Amending Act he employs. Thus the phrase.

"in respect of which authority is, by this Act, conferred upon it."

is altered by Mr. Murray to read

"in respect of that authority as by Act conferred upon it."

By thus altering the wording of the Act, Mr. Murray creates the false impression that the jurisdiction conferred by the particular portion of the Act cited, relates to the operations of the Commission as a whole, instead of relating as it does only to certain comparatively unimportant and special features covered by the provision of the Act in question—that is, by this Act. These features refer to a relatively minor power of the Commission which permits it to approve of certain matters relating to the joint construction of lines on highways, and in this connection the Commission acts in the capacity of a regulatory commission. Mr. Murray's zeal to support his charge that a power of procedure had thus been "granted to the Commission. unlimited," has impelled him to such an extent that he is ready to misquote even the wording of a statute in order to lend plausibility to his unfounded contention.

### Rates for Light and Power

Again, when Mr. Murray is discussing rates for light and power for certain places as compared with the rates for other places served through the Hydro-Electric Power Commission, he employs data which, rightly understood, totally discredit his conclusions. Mr. Murray, for example, states that, in 1920, the street lighting cost per capita in the city of Buffalo was 60 cents as compared with 67 cents per capita in the city of Toronto. Mr. Murray, however, does not inform his readers that in Buffalo more than one-half of the total number of street lights are gas or gasoline lamps, whereas in Toronto all the street lights are electric. The significance, of course, of this ommission is that Mr. Murray has taken less than one-half of the total cost of street lighting in Buffalo and then compared it with the whole cost of all the street lighting in Toronto. Had Mr. Murray used the figures necessary to effect a correct comparison then he would have had to say that, in 1920, the total cost of street lighting per capita in Buffalo was $1.15 and not 60 cents per capita as he has incorrectly stated. Such a presentation of facts, however, would not argument. What is required in have fitted in with Mr. Murray's matters of this kind is "impartial and exhaustive study" and in an instance like that just cited Mr. Murray shows himself to be singularly incompetent to prosecute such a study.

Even with respect to certain physical facts, Mr. Murray lamentably fails to present impartially the true condition of affairs. With regard to the storage on the Nipigon river as contrasted with the storage available on the Kaministikwia river, Mr. Murray states that the Nipigon development "lacks a storage equal to that available to the Kaministikwia plant." The physical facts are that the Nipigon river has a potential storage of 4,896,000 acre-feet which with the flow of the river would yield a controlled flow of 6,500 cubic feet per second, whereas the Kaministikwia river has a storage of 547,000 acre-feet yielding, correspondingly, a controlled flow of but 1,000 cubic feet per second. Thus the potential storage on the Nipigon watershed is over nine times that on the Kaministikwia. Moreover, the ultimate power which may be developed on the Nipigon river is about four times that which may be developed upon the Kaministikwia river. In view of such facts it is incomprehensible that Mr. Murray should state that the Nipigon development "lacks a storage equal to that available to the Kaministikwia plant" when in point of fact it does not lack, but surpasses it manyfold. Not to have directed attention to the very special features distinguishing the water power of the Nipigon river, and to have compared the Nipigon river with the Kaministikwia river, as Mr. Murray has done, is certainly not "impartial" consideration, but, rather, is an unpardonable breach of professional integrity on the part of the authors of the Murray-Flood Report.

### Average Costs of Power

Throughout his report Mr. Murray effects comparisons between data and circumstances which often are inherently and radically different. Not only does Mr. Murray fail to direct his readers' attention to these fundamental differences, but in some cases he actually precedes the "comparison" he intends to make, by a special discussion of differences between entities which subsequently are not involved in the comparison actually made. In such a case, unless the reader is on guard, he fails to perceive the tricky device by which his attention has been transferred from an important to an inferior consideration.

A typical example of this method as adopted by Mr. Murray, is found in the way in which he presents his comparisons of the average costs of power to the people of California and of Ontario. In discussing this subject, Mr. Murray first directs his readers' attention specifically to the advantages enjoyed by the people of the Niagara district in having Niagara Falls as the source of power. "This,' 'states Mr. Murray, "should be kept in mind especially when the comparison is drawn for the California situation." He then, under the caption, "California Compared to Ontario," makes his comparison, not however, on his broad basis of California and Ontario, nor indeed between California and the only Hydro system which in magnitude is at all comparable with California, namely, the great Niagara system to which he has specifically directed his readers' attention; but between California, and, to use Mr. Murray's subtle expression, the Hydro systems "other than the Niagara." The reader unfamiliar with the actual situation, would probably not know that the systems "other than the Niagara," embrace only the smaller and relatively unimportant systems of the Hydro-Electric Power Commission which serve the less populous sections of Ontario and represent in all less than one-seventh of the total load on the Hydro systems.

The cost of power from these relatively small systems is "compared" by Mr. Murray with the cost in California where over a million horsepower is developed and where the electrical energy "delivered to agricultural industry" states Mr. Murray, alone amounts to about 500,000 horsepower. The comparison Mr. Murray actually makes is foolish, but his attempt thus to beguile his readers is an imposition upon their lack of knowledge of the facts.

### Queenstown—Chippawa

From the illustrations already considered it is apparent how inexcusably inaccurate Mr. Murray has been when dealing with data of fact, but when he undertakes to deal with hypothetical factors involving future circumstances, he, as will be seen from the following comments, transgresses sound procedure in a manner even more indefensible.

By way of illustration, it may be pointed out that in presenting his estimates of the cost of Niagara power with the Queenston-Chippawa development operating under various deliveries of power, Mr. Murray commences by making a number of gratuitous assumptions respecting the amounts of water which will be available, the extent to which he states existing installations will have to be scrapped, and so on, and then, he proceeds in a most astonishing manner to inflate estimates by millions of dollars. For example, in an impor ant instance he has employed an interest rate of 8.15 per cent, thereby imposing a fictitious annual charge upon the Commission's operations of over $1,600,000. In another instance he has provided over $2,000,000 annually for the renewal of plant equipment which he proposes to scrap, and which would not be renewed at all. It will be seen from the more detailed consideration of this aspect of Mr. Murray's report how, by inflation and other devices, he has estimated a total annual production cost for power of $12,310,000 instead of what this total would be if correctly estimated under his own assumptions, namely $7,200,000. In this instance, he has overestimated the cost of power to the Niagara system by about $11.00 per horsepower or 75 per cent. Evidently Mr. Murray's views of engineering economics demand serious attention and revision.

It will be appreciated that such methods of handling and presenting data as those referred to, simply place Mr. Murray's whole report out of the position where it is entitled to be considered seriously, or even with respect; they show conclusively that the report is not compiled in an "exhaustive" nor in an "impartial" manner and hence its conclusions are not entitled to consideration.

### Does Hydro Cost More?

No one reading the Murray report could fail to be impressed with the fact that one of the chief objects which Mr. Murray seeks is to establish his contention that under the auspices of the Hydro-Electric Power Commission's operations the people do not receive advantages in their rates for light and power as great as do the people of the province of Ouebec and others in the United States. In other words, Mr. Murray alleges that electrical energy is dearer in Hydro municipalities than it is in other territories to which refers.

In view of the general-unreliable character of statements and comparisons made by Mr. Murray, his comparisons respecting the cost of power could not be expected to command serious attention, but in this connection also, his basic factors are seen to have been greatly distorted according to the erroneous methods above exemplified from other sections of his report, and thus his conclusions respecting the costs of power are also in error.

## ALGOMA STEEL PLANT

W. H. Cunningham, president of the Lake Superior Corporation, stated that the Algoma Steel Co., was running to capacity filling orders for the Canadian Pacific Railway. Mr. Cunningham is at present in Sault Ste. Marie, where the board of directors of the company are making their annual inspection.

While the mills have sufficient coal for present needs, Mr. Cunningham said, he was doubtful as to the future. The mills have some sixty days supply on hand, with more arranged for, but it is doubtful if they could accept a large order for quick delivery until the situation improves. The smaller mills are working at a fair rate, although on hand to mouth orders.

## CANADIAN LOCOMOTIVE MAY RE-OPEN PLANT

It is understood that the Canadian Locomotive Company is making bids for foreign trade. It is believed that tenders have been made on engines to be shipped to foreign countries, including India and China, but no word of their acceptance has yet been received.

During the war engines for use in foreign countries where types are different were made at the plant, and gave every satisfaction. Now that there is demand for renewal of rolling stock, tenders are being called for.

There is a persistent rumor that the Baldwin Company will take over the locomotive works, and that they will open in October.

## ABITIBI MAKES RECORD

For the week ending August 6th the paper mill of the Abitibi Company made a new high record production. During that week the total production was 2,827.40 tons of newsprint. This made an average daily output of no less than 471.23 tons. During the same week, namely, on August 1st, the largest amount of paper ever turned out in one day by the mill was produced, the figures being 484.75 tons.

# Municipal Finance

**Stamford Twp., Ont.**—The tax rate for 1922 has been struck at 30.7 mills on the dollar, an increase of 5 mills over last year. The rate is made up as follows: County purposes, 11.9 mills; township purposes, 13.9 mills; high school purposes, 1.5 mills; township school levy, 3.4 mills.

**Montreal, Que.**—The city must soon find new methods of taxation, Assistant City Treasurer Collins says in the annual report from that department which he has just submitted to the executive.

The revenue from this source has not kept pace with the enormous increases in expenditure and the time is near when the city will have to figure on more diverse and extended means of raising money.

Withal the fiscal year 1921 was a good one, the report continues, in spite of post-war conditions. Collections were maintained at a right percentage in spite of unemployment and general business depression and the proportion of taxes realized was maintained at the previous year's high level.

The assessment tax represented 67¼ per cent. of the total taxes collected last year, while it was only 56 per cent. in 1900. Water rates were responsible for 12½ per ecnt. of the total revenue last year, and 22½ in 1900; business taxes realized 7½ per cent. of the 1921 revenue, and 8½ in 1900.

As regards expenditure, the sinking fund and interest utilized 30 per cent. of the city's revenue last year, and 35 per cent. in 1900, while public works consumed 16¾ per cent., in 1921 and 25 per cent. in 1900.

The city feels the revolution in traffic that has occurred within the past twenty years. In past years the horse was a source of considerable revenue, while road upkeep was at a minimum. Now, on the contrary, the city no longer can look to the horse for help, while the roads are much harder to take care of. Traffic regulations made necessary by the advent of the automobile have also tended materially to increase the expenditure of the city

Only a very small proportion of vacant land value fails to meet its tax obligations, Mr. Collins remarks, and the sales of land for non-payment of taxes are shown to total only 857 properties in the last ten years.

The low average rate of interest on Montreal's loans is responsible for a comparatively low rate of taxation, the report continues. On its total debenture obligations of $119,753,310 the city paid only $5,500,298 in interest last year. This show an average of about 4 3-5 per cent.—an appreciably low figure in view of the extremely stringent condition of the money market in recent years.

One of the biggest items of last year's work was the flotation of a $5,000,000 loan by the city. This bears interest at the rate of 5½ per cent. in ten-year debentures. Before September, 1923, loans aggregating $18,000,000 will have to be renewed, it is thought. It is not unlikely that it will be reissued at a lower rate of interest than its present average of 6 per cnt.

Dealing with the fire at the city hall the report comments that this department lost very little in the great conflagration. All tax rolls, records and other documents were saved.

The itemized report shows that the following amounts were realized from various sources of taxation: Real estate assessments, $15,130,237; water rates for dwellings, $2,148,147; water rates for commercial purposes, $626,659; business taxes, $1,692,048; licenses, $928,403; and Recorder's court fines, $175,240.

**Port Credit, Ont.**—At a meeting of the council on August 14 the tax rate for the present year was struck at 36 mills on the dollar. The new rate is 4 mills lower than last year. The new rate is made up as follows: School purposes, 13 mills; county purposes, 4½ mills; Toronto-Hamilton highway, 2 mills; street lighting, 1½ mills; and general rate, 15 mills.

The new assessment of the town is $574,565, an advance of approximately $100,000 over 1921.

**Bridgeburg, Ont.**—The tax rate for the present year has been struck at 36 mills on the dollar, a decrease of 4 mills from last year,. The new tax rate will bring in an estimated revenue of $75,000, while the expenditure for the year will be $86,000. It is anticipa ed, however, that the council will receive $12,000 in other receipts, such as water rates and debentures for sewers, leaving a surplus for the year of about $1,000.

**Foam Lake, Sask.**—At a meeting of the village council it was resolved to apply to the minister of municipal affairs for the incorporation of the village into a town, as a recent municipal ceusus disclosed the requisite population.

**Hamilton, Ont.**—All civic departments are working well within their estimates, judging by the report on controllable expenditure from January 1 of this year to July 31. Of a total appropriation of $2,614,501 allotted by the city council under this caption, the sum of $1,501,666 has been expended to date. In no department has the total appropriation been exceeded, and there are few instances in which excessive expenditures have been made over the allotment.

**Nelson Twp., Ont.**—A tax rate of 19 imills on the dollar was struck at the council meeting on August 25.

**Toronto, Ont.**—On August 25, Finance Commissioner Ross issued his annual report in which he states that Toronto has just passed successfully through the most critical stage in its financial history. During the past year more than $6,000,000 of the outstanding debt was redeemed. During 1921 debentures amounting to $32,250,000 were issued, about twice the amount issued in any other one year.

The report shows that on December 31, 1920, the total outstanding debt was $103,819,125. During 1921 $6,061,390 of debt was refunded, and $32,251,219 incurred, leaving the total debt outstanding at the end of last year at $130,008,954.

Reiterating previous statements of his, Commissioner Ross sounds a note of warning regarding the total expenditure for local improvements. The city budget has become top-heavy in this respect, he thinks. The total for "locals" now amounts to $22,000,000, of which $13,000,000 is a direct charge against the properties benefitted, the balance, $9,000,000, being a charge against the city at large.

The report states:

"Unfunded locals (authorized, in progress and completed), to the total of $14,000,000, constitute a serious deadweight on the city's financing, and must be cleared up before any new major works are undertaken. Projects of city-wide interest acocunt for $6,000,000 of this; the other $8,000,000 is for purely local works. The total has become top-heavy.

"Much of the local improvement troubles could be avoided if the city adopted the system employed in Great Britain and the United States, whereby the total cost of the improvement is immediately charged against the property owners benefitted. The city at large is spared the difficulties of financing; the property holders can have their improvements as fast as they are willing to pay for them."

During 1921 the gross debt per capita rose from $202 to $249, but the tax burden is practically unaffected, Commissioner Ross states.

"Population is the true yardstick of the people's needs," says Mr. Ross, and he contends that "the city has drifted for from that sound principle." Since 1912 expenditures, as reflected in the taxes levied, have increased 278 per cent., while in the same period the population has increased only 28 per cent. In the last ten years the asesssment has more than doubled, yet the tax rate has risen from 18½ mills in 1912 to 33 mills last year.

"A city with the unique industrial facilities that Toronto offers cannot afford to have a high tax rate," says Mr. Ross.

School expenditures, including debt charges, are responsible for one-third of the total taxes levied.

The report gives the city's investment in six essential public services as follows:

| | Amount | Pc. Total Gr. Debt |
|---|---|---|
| Local improvements and highways (bridges, subways, viaducts) | $ 26,862,291 | 20.66 |
| Transportation | 25.481,737 | 19.60 |
| Education | 19,741,989 | 15.19 |
| Water | 16,68,904 | 12.83 |
| Light and power | 10,752,923 | 8.27 |
| Health and sanitation | 9,272,668 | 7.12 |
| Totals | $108,796,512 | 83.67 |

**Port Colborne, Ont.**—At a special meeting of the council the tax rate for the current year was set at 34 mills. This is an increase of one mill over last year's rate. The general town rate was reduced from 11.7 mills to 10.6, but other expenditures over which the council has no control were much heavier than last year. The county rate was increased from 6.3 to 7.1. The parks this year require a rate of 1.8 whereas last year one mill was sufficient. The general school rate is increased from 6 mills to 6.6.

Following are the rates as fixed by the council: Town rate general 10.6, garbage rate 2, county rate 7.1, sidewalks deb. 1, waterworks deb. 2.3, parks 1.8, school general 6.6, school deb. 2.6. Total 34 mills.

The town expenses will this year amount to $126,526. The schools require $43,000 for current expenditures and $17,230 is needed to cover debentures. The county this year requires $15,663. To collect garbage costs $4,300. Sidewalks and road debentures require $2,179. Public parks require $3,975. Waterworks debentures require $5,146.

**Cobalt, Ont.**—The tax rate for this year has been struck at 47 mills on the dollar for public school supporters, and 62 mills for separate school supporters. Last year the rate was 59½ mills for public schools, and 69 mills for separate schools. The general rate has been cut from 43 to 32 mills; the public school rate is down a mill and a half, while the separate school rate, due to increased assessment, is up four mills. The town faced a drop of over $20,000 in revenue from the mines this year.

**York Twp., Ont.**—On August 24th council received from W. G. Douglas, county treasurer, a financial statement for general purposes for 1922, not including the public schools and the county requirements. The main features of the reports were as follows:—

| | |
|---|---|
| Township assessments for 1922 | $25,367,187 |
| Rate of 15.75 mills will raise | 399,533 |

This amount is required as follows:

| | |
|---|---|
| Total general expenditure | $215,228 |
| Roads and bridges | 183,670 |
| | $399,533 |
| Total credit from assessments | $254,885 |
| Assumed by North York Township | 39,655 |
| | $215,228 |
| Expenditure for health, charity, elections, municipal grants, etc. | $266,685 |

The waterworks and maintenance debentures are as follows:

| | |
|---|---|
| Section "A" (north) 28.75 mills. | $13,819,384 |
| Section "B" (west) 26.35 mills. | $4,292,471 |
| Section "C" (east) 26.75 mills. | $6,531,324 |
| County of York levy is | $164,850 |
| Township rate to raise this amount, 6.50 mills | 164,886 |

**Edmonton, Alta.**—Acecrding to a statement issued by City Commissioner Yorath, the city's radial system will likely "break even" this year. If the present rates are maintained, there is no reason why this utility should not make the anticipated showing, he says. This will be a record, as in no previous year has the street railway shown a surplus.

For the seven months ending July 31, the various utilities had a net surplus of $212,433, compared with $118,330 for the same period last year. This profit was made after including interest, sinking fund and depreciation charges, and will be taken into current revenue as taxes.

A profit of $45,576 has been made by the power house department, compared with $10,800 last year, while the electric light branch is $90,143 ahead as against $79,357 in 1921. To date the waterworks branch has a surplus of $24,999 or over $7,000 better than last year, and the telephone department's profit of $47,633, is nearly $8,000 in excess of 1921.

For the seven months of this year the street railway showed a profit of $4,083, compared with a loss of $29,021 for the same period of last year. In July the department showed a loss of $2,070, but this was less than half of the deficit in July of 1921, when it amounted to $5,838. It is also pointed out that the traffic in the summer months is lighter than at other periods of the year.

**Walkerton, Ont.**—The tax rate has been struck at 57 mills on the dollar, the same rate as last year. The uncontrollable tax rate in the town is 42 mills, and the controllable rate is 15 mills.

**Scarborough Twp., Ont.**—In a report presented on August 21 by the auditors, who last January were commissioned to go over the books of the township, it was stated that the records had been carelessly kept and, as a result the cash books were practically useless. The statement was made that 150 residents of the township had been assessed twice, while more than 500 lots were not on the assessment rolls, except in their undivided form as farm lands.

The auditors, it is stated, on examining the various ledgers, found outstanding accounts for three years, although the taxes on the same property had been paid for subsequent years. A number of recommendations were made by the auditors, which the council intends to carry out.

**Bond Prices Are Advancing**

Investors who buy high-grade Government, Municipal and Corporation Bonds will benefit by the appreciation in value which financial authorities predict.

We would appreciate an opportunity of suggesting for your consideration, securities which combine all the features of a sound investment.

## PULP AND PAPER TRADE STANDS THIRD

### United States Imports 95 Per Cent. of Newsprint From Canada

The importance of the pulp and paper industry and particularly the pulp and paper export trade is shown by the fact that for the year ended April, 1922, these exports had a total value of over $180,000,000—a figure exceeded only by exports of wheat and agricultural products.

According to Government figures for 1920, the Canadian pulp and paper industry employed an invested capital of over $347,000,000, of which slightly more than one-half was in the Province of Quebec. Production capacity was over 1,200,000 tons per annum. In the first six months of 1922, Canadian mills produced over 516,000 tons of newsprint, as compared with 612,000 produced by United States mills. Although 1921 and 1922 have been years of universal industrial depression, the Canadian newsprint output during the first six months of 1922 was 93.6 per cent. of mill capacity.

While the volume of United States production has remained practically stationary at around 1,300,000 tons since 1913, Canadian production has increased from 350,000 tons to 812,000 in the same time. Exports to the United States have increased from 219,602 tons to 701,978. In 1920 only 5 per cent. of newsprint imports into the United States came from other than Canadian sources.

Not only does the United States depend upon Canada for 95 per cent. of her importations of newsprint paper, but she also leans heavily on the Dominion for importations of pulp. In 1912 there was imported from Canada only $5,000,000 worth of chemical and mechanical wood pulp. In 1921 these importations reached $71,000,000.

An authority says that paper imported from Europe has not been equal to United States or Canadian paper in quality—that its winding and moisture make it difficult to run on high-speed American presses—and that the damage in transit has been high.

## MEXICO IS ANXOUS TO TRADE WITH CANADA

"Mexico is eager to increase its trade with this country," said Mr. Jose Damaso Fernandez, the newly appointed Mexican Consul-General for Canada, in an interview on Aug. 23. "There are many products that Canadians can obtain in Mexican markets at a lower price and of better quality than in other countries."

At present Mr. Fernandez is making his headquarters in Toronto and states that he will be glad to co-operate and assist business associations or any person wishing to do business with the Mexicans.

## JULY PULP EXPORTS

Canadian exports of pulp and paper in July showed a decline from the previous month's figures, the total value of the exports being $9,738,252, compared with $10,534,876 in June. Exports in July of this year, however, were greater than in July, 1921, when the value was $8,666,556. Exports of pulp wood in July were 90,965 cords, valued at $946,946, compared with 75,597 cords in June, valued at $815,155. For the first four months of the current fiscal year there is a considerable increase in the value of pulp and paper exports over the corresponding period of 1921, the total value for 1922 being $35,286,317, compared with $30,331,249 in 1921.

# *Government and Municipal Bonds*

If prices paid during the week for bonds can be taken as an indication of the trend of the government and municipal bond market, then the market is off to a good start for the month of September. With the exception of the Victoria issue, all the large bond issues were purchased at a price of par or over.

The Prince Edward Island issue was the feature of the week, with eighteen bids being received and very little variation in the bids, there being only two points difference between the highest and lowest bid. The largest issue sold during the week was that of Victoria for one million dollars, with four bids being received. Bidding for this issuing was not very keen, there being a spread of about .60 points between the first two tenders. This issue is part of the refunding plan which the city has in view.

The list of coming offerings still continues to hold up, and the general opinion is that the list will continue to show an improvement each week during the next month or so.

### Tenders Invited

The following is a list of debentures reported for sale, particulars of which are given in this or previous issues:—

| Borrower | Amount | Tenders Close |
|---|---|---|
| Guelph, Ont. ......... | $365,000 | Sept. 1 |
| Carleton County, Ont. | 196,000 | Sept. 13 |
| Sherbrooke, Que. ..... | 100,000 | Sept. 2 |
| Giffard, Que. ......... | 85,000 | Sept. 12 |
| Peel County, Ont. ..... | 80,000 | Sept. 1 |
| Three Rivers, Que. ... | 50,000 | Sept. 5 |
| Dartmouth, N.S. ..... | 50,000 | Sept. 5 |
| Springfield, Ont. ..... | 46,000 | Sept. 12 |
| Enderby, B.C. ........ | 23,000 | Sept. 20 |
| Port Coulonge, Que. ... | 20,000 | Sept. 16 |
| Wiarton, Ont. ........ | 18,000 | Sept. 1 |
| Chateauguay Basin, Q. | 10,000 | Sept. 2 |
| Winslow South, Que. .. | 8,000 | Sept. 1 |
| St. Joseph, Que. ...... | 8,000 | Sept. 30 |
| Richardson, Sask. .... | 700 | Sept. 8 |

### Coming Issues

**Saskatchewan,**—The following is a list of authorizations granted by the local Government Board from July 15 to 29, 1922.

School Districts: 8 per cent.: Jack Pine, $500 15-years annuity; Burstall, $4,000, 15-years; Short Creek, $2,000, 10-years; Bench View $3,600, 15-years; Argonne, $1,000, 10-years; Breezy Brae, $800 8-years; Lintlaw Village, $6,000, 15-years.

Rural Telephones: 8 per cent., 15-years annuity: Fairdale, $275; Howell, $15,400; Nipawin, $5,700.

Villages: 8 per cent.: Hubbard $1,000 10-instalments; Maryfield, $2,500, 15-instalments.

**Milton, Ont.**—On July 29, the electors defeated the $15,000 school debenture by-law.

**Iberville, Que.**—Ratepayers will soon be called upon to vote on a $125,000 by-law for the erection of a filter plant and other improvements to the water works system.

**Niagara Fals, Ont.**—On July 17 the council passed a by-law for the issuing of $75,660 debentures for the erection of houses.

**St. James, Man.**—The by-law for the issuing of $25,000, 20-year debentures for the extensions to the school was defeated by the electors.

**North Bay, Ont.**—All tenders for the $47,000 5½ per cent., 20-instalment debentures have been rejected.

**Montreal North, Que.**—The Metropolitan Commission has approved the loan of $160,000 for extensions to the water mains. They also approved the loan of $25,000 for the construction of sidewalks.

**Ford City, Ont.**—On August 4 the ratepayers passed several by-laws for the purchasing of fire and police equipment at a cost of $31,000.

**Vancouver, B.C.**—It is reported that the remainder of the $600,000 bond issue of the Vancouver and District Joint Sewerage Board, half of which was sold recently, will be put on the market in about two months.

**London, Ont.**—The board of education is asking the city council for permission to issue $130,000 debentures.

**Port Dover, Ont.**—The by-law for the expenditure of $65,000 for waterworks was passed by the ratepayers on August 7.

**Lincoln County, Ont.**—On July 19 the council passed a by-law authorizing the issuing of $110,000 debentures for the construction of roads.

**Edmonton, Alta.**—Three money by-laws are to be resubmitted to the burgesses about October 1. These include $75,000 and $250,000 for extensions to the power plant and telephone extensions, and $14,000 for the erection of a market.

**Chatham, Ont.**—The city is proposing to erect a new school at an estimated cost of $75,000.

**Pembroke, Ont.**—The board of trustees of the Roman Catholic Separate schools have pased a $60,000, 6 per cent., 20-year debenture by-law.

### Bond Sales

**Galt, Ont.**—**Wood,** Gundy & Co., were awarded $410,236, 5, 5½ and 6 per cent., various maturity debentures at a price of 103,066, the money costing the city approximately 5.53 per cent. Tenders were as follows:—Wood, Gundy & Co., 103,066; Aemilius Jarvis & Co., 103.037; Bell, Gouinlock & Co., and McLeod, Young, Weir & Co., 102.83; A. E. Ames & Co., 102.71; R. C. Matthews & Co., 102,623; C H. Burgess & Co., and MacNeilt, Graham & Co., 102,233; Canada Bond Corp., 102.16; Gairdner, Clarke & Co., 102.0563; Nesbitt, Thomson & Co., and Municipal Bankers Corp., 101.86, and National City Co., 101.165.

**Victoria, B. C.**—An issue of $1,000,000, 5½ per cent., 20-instalment debentures has been sold to a syndicate headed by A. E. Ames & Co., at a price of 97.13, the money costing the city about 5.85 per cent. The following is a list of tenders:

| | |
|---|---|
| A. E. Ames & Co., Dominion Securities Corp., and Wood, Gundy & Co. .... .... .... .... .... | 97.13 |
| Gillespie, Hart & Todd, Ltd.; Royal Financial Corp.; McLeod, Young, Weir & Co.; Bell, Gouinlock & Co.; and McDonaugh, Summer & Co.; .... ..... ......... | 96.57 |
| British America Bond Corp.; Carstens & Earles; Blythe, Witter & Co.; Miller & Co.; A. Jarvis & Co.; Gairdner, Clarke, & Co.; and W. A. McKenzie & Co. .... | 96.07 |

J. E. Price & Co., of Seattle bid 94.64 for $250,000 only.

**York Twp. Ont.**—An issue of $853,117, 6 per cent., 10 and 30- instalment debentures has been sold to Wood, Gundy & Co., at a price of 101.588. Of the total, $668,117 is payable in 10-instalments and $185,000 in 30-instalments. The following is a list of bids: Wood, Gundy & Co., 101.588; A. E. Ames & Co., 101.40. C. H. Burgess & Co., 101.02; R A. Daly & Co., United Financial Corp., R. C. Matthews & Co., 100.96; Canada Bond Corp., 100,743; McLeod, Young, Weir Co., 100.69; Dominion Securities Corp., A. Jarvis & Co., 100.19; W. A. Mackenzie & Co., 100.12.

**Beeton, Ont.**—Gairdner, Clarke & Co., have purchased $18,000, 6 per cent., ,30-instalment debentures, guaranteed by the County of Simcoe paying a price of 103.51, which means that the cost to the village will be about 5.68 per cent. The following is a list of bids: Gairdner, Clarke & Co., 103.51; W. L. McKinnon & Co., 103.04; Wood, Gundy & Co., 102.87; Bell, Gouinlock & Co., 102.10; C H. Burgess & Co., 102.07; Canada Bond Corp., 101.74; Dyment, Anderson & Co., 101.27; Municipal Bankers Corp., 101.10; and MacNeill, Graham & Co., 101,037.

**Campbellton, N. B.**—An issue of $60,000, 5½ per cent., 35-year debentures has been sold to Thomas, Armstrong & Bell, Ltd., and Royal Securities Corporation at a price of 98.06, the money costing the town about 5.62 per cent. The following is a list of tenders: Thomas, Armstrong & Bell, Ltd., and Royal Securities Corp., 98.06; Gairdner, Clarke & Co., 95.53; Wood, Gundy & Co., 94.58; and McLeod, Young, Weir & Co., 94.11.

**Prince Edward Island.**—The National City Co. were the successful tenderer for the $175,000, 5½ per cent., 15-year debentures, paying a price of 100.637, which means that the province will pay about 5.44 per cent., for its money. Bidding for this issue was keen there being only two points difference between the highest and lowest bid. The tenders were as follows.

| | |
|---|---|
| National City Co. .................. | 100.637 |
| Canada Bond Corp., .... .... ..... .. | 100.412 |
| Dominion Securities Corp., .... .. .. | 100.41 |
| MacNeill, Graham & Co., .... ..... .. | 100.37 |
| R. A. Daly & Co., ..... ....... .... | 100.29 |
| Bank of Nova Scotia, .... ..... .... | 100.279 |
| Eastern Securities Co., .... ..... .... | 100.27 |
| United Financial Corp., .... ..... .. | 100.19 |
| Hanson Bros., ...., ...... ..... .... | 100.03 |
| A. E. Ames & Co., .... ...... ..... .... | 99.909 |
| R. C. Matthews & Co., ...... ..... .... | 99.89 |
| McLeod, Young, Weir & Co., ..... .... | 99.79 |
| W. L. McKinnon & Co., .... ...... .... | 99.65 |
| Bell, Gouinlock & Co., .............. | 99.63 |
| Nesbitt, Thompson & Co., .. ..... .... | 99.57 |
| Nova Scotia Trust Co., .... ..... .... | 99.55 |
| Dyment, Anderson & Co., .... ..... .. | 98.88 |
| C. H. Burgess & Co., .... .... ..... .. | 98.53 |

**Saskatchewan,**—The following is a list of debentures reported sold by the Local Government Board from July 29 to August 19, 1922.

Schools: 10-years: Brightside, $2,500, 8 per cent., to C. C. Cross & Co.; Liscard, $1,000, 7½ per cent., to C. C. Cross & Co.; Dafoe, $1,500, 7¾ per cent., to C. C. Cross & Co.; Tunbridge Wells, $3,400, 15-years, 7¾ per cent., to Waterman-Waterbury Co.; Padgate, $1,000, 5-years, 8 per cent., to C. C. Cross & Co.; Dahinda, $900, 8 per cent., to Nay & James; Mohela, $600, 8 per cent., to Regina Brokerage & Investment Co.; Elrose, $3,800, 7½ per cent., to C. C. Cross & Co.; Mornington, $4,000, 7½ per cent., to C. C. Cross & Co.; Brookside, $3,500, 7½ per cent., to C. C. Cross & Co.; Ardill, $2,400, 15-years, 8 per cent., to Waterman- Waterbury Co.; Beaver Dam, $3,000, 8 per cent., locally; Cudworth, $7,500, 15-years, 7½ per cent., to C. C. Cross & Co.

Rural Telephones: 15-years: Colleston, $2,000, 7 per cent., locally; East Prince Albert, $9-500, 8per cent., to G. Moorhouse & Co.; Bredenbury Northern, $360, 8 per cent., 10-years, locally; Fairdate, $275, 8 per cent., to Regina Brokerage & Investment Co.; Howell, $15,400, 8 per cent., to F. Summerville, Regina.

Villages: 8 per cent., 10-years: North Regina $4,000, to C. C. Cross & Co.; Balcarres, $1,500, locally.

Town of Kamsack : $12,578, 6½ per cent., 15-years to F. Glenn & Co., Portland, Ore.; and $300, 7 per cent., 15-years, locally.

**Point Grey, B.C.**—Wood, Gundy & Co., have purchased $150,000, 5½ per cent., 20- year debentures at a price of 97.38, the money costing the municipality about 5.72 per cent. The following is a list of bids: Wood, Gundy & Co., 97.38; Royal Financial Corp., 96.90; and Gairdner, Clarke & Co., 95.90.

**Gloucester Twp., Ont.**—It was reported in these columns last week that W. L. McKinnon & Co., had purchased $35,000, 5½ per cent., 30-year debentures at a price of 98.83. This is incorrect as all tenders were rejected and new bids asked for.

The bonds were awarded to Wood, Gundy & Co., at a price of 100.65, which means that the township will pay about 5.46 per cent., for its money. The tenders were as follows: Wood, Gundy & Co., 100.65; R. C. Matthews & Co., 100.17; MacNeilt, Graham & Co., 100; A. E. Ames & Co., 99.911; Housser, Wood & Co., 99.46; C. H. Burgess & Co., 99.46, and Canada Bond Corp., 99.133.

## CANADA HAS OPPORTUNITIES IN CHINA

### Canadian Trade Growing and Has Good Outlook Says Commissioner

Dr. J. W. Ross, Canadian Trade Commissioner in Shanghai was a visitor at Ottawa on August 23, and speaking of conditions in China he said, "The outlook in China is now better than at any time since the republic was first formed in 1911."

He believes that China has great development immediately before her and that railroads will play a vital part in it. He says there are immense possibilities for Canadian trade with China, chiefly in manufactured products.

"In fact," said Mr. Ross, "in spite of the world-wide depression, the trade of China has been constantly increasing. China is rapidly becoming important industrially, her cotton-spinning and weaving having increased greatly in the last ten years. In 1913 China imported nineteen million pieces of cotton goods and in 1921 only eleven million. The country also produces much wheat and Shanghai has exported flour largely to South China, the Phillipines, and even as far as Egypt. Indeed, China may not improbably become one of the most industrial countries in the world."

### Paying Industries

"Financiers from other countries are considering the advisability of establishing manufacturing plants in China, and considering the great advantage of cheap and efficient labor. If properly safeguarded, these projects may become paying propositions."

"Canada stands well in China and Canadian goods are found in the chief centres there in greater abundance than ever before. Canadian exports of lumber to China in 1921 were 40,000,000 board feet, a very great increase over any previous year. Many other lines of goods are in demand, notably paper, food products of various kinds, butter and manufactured goods of every description. Canada has the quickest and most efficient steamship service across the Pacific and there is no reason why eventually China should not be the greatest outlet for Canadian manufactured goods of any country in the world."

### Will Visit Cities

While in Canada, Dr. Ross will visit most of the chief Canadian cities with a view to meeting the manufacturers and merchants interested in trade with China. He was at the Toronto Exhibition from August 28 to 31, and during the next two months will tour Eastern Canada as follows:

Port Hope, September 1; Oshawa, Sept. 2; Ottawa, Sept. 5 and 6; Montreal, Sept. 7 to 16; Almonte, Carleton Place, etc., Sept. 18; Brockville, Sept. 19; Toronto, Sept. 21 to 30; Hamilton, Oct. 2 to 5; Brantford, Oct. 6 to 8; Guelph, Oct. 9; St. Catharines and Welland, Oct. 10 to 11, Kitchener, Oct. 12; London, Oct. 13 to 14; Windsor, Oct. 16 to 17; Ottawa, Oct. 18. His western tour has not been definitely arranged yet but he will be at Winnipeg about October 23 and at Vancouver about October 28.

Are Your Funds Profitably Employed?

If your funds are not earning from 5½% to 6¼% while surrounded by highest grade of security, we suggest that you consider the wisdom of placing them in Canadian Government and Municipal Bonds.

No other investment offers more attractive features. Principal is safe, interest is prompt and sure, and should necessity demand immediate cash, these bonds will be found readily marketable.

# *Stock Markets*

While, during the latter part of the previous week under review, the stock market, displayed a tendency to slow up yet, during the first part of this week, the market underwent further expansion.

However, during the latter part of the present week, the trading again showed a somewhat restricted measure, and price movements were fairly unsettled. The market seems to show a disposition to mark time while the buying public accustoms itself to the higher range of values created in the late upward movement.

In spite of the slowing up of activity the undertone on the market continued strong throughout the week, with a very slight easing up towards the latter part of the week.

As the Canadian markets usually observe the trend of events on Wall Street, the decline in activity may be attributed to events on the New York market, where various events such as the continuation of the coal strike, the railway strike and the talk of the government seizing the coal mines and the railways, have had an influence in lowering the activity on the market.

### Papers Quieter

Although last week the paper securities were the leader of the market, during the present week these stocks showed a tendency to quieten down slightly. Meanwhile the market is in a state of expectancy concerning the next move in the paper group, and leaders are holding their hand at present, although resumption of a broader market is considered only a matter of time.

### Call Wayagamack Bonds

Wayagamack Pulp & Paper Company, Limited, 40-year 6 per cent. first mortgage gold bonds, due February 1, 1951, amounting to $1,500,000, were called on the Montreal Stock Exchange on August 24 for the first time.

The bonds are part of an authorized issue of $5,000,000 par value, which are now issued and outstanding in the hands of the public, making the total amount applied for $5,000,000.

Interest on the bonds is payable semi-annually, Feburary 1 and August 1, each year. Principal and interest are payable in Montreal. The bonds are of the denominations of $100, $500, and $1,000 and are registered as to principal.

The company has the right at any time after the expiration of 5 years from February 1, 1911, to redeem all of the then outstanding bonds at par and accrued interest with a premium of 5 per cent. upon the par value. The company shall give the trustees three months' notice of intention to make such redemption.

### Stock Offering

An issue of $350,000, 8 per cent., preferred stock of Piggly Wiggly Canadian Corporation, Ltd., is being offered by W. R. Charlton & Co., of Montreal, at par, $10 per share with a bonus of 40 per cent. of common stock. With every five shares of preferred two shares of common stock are given as a bonus.

The company has been formed to operate a chain of at least 125 cash-and-carry grocery stores thorughout the provinces of Ontario and Quebec, using the self-service system.

The directors of the company are as follows: President, Lt. Col. C. F. Smith, director of Home Bank; vice-president, Paul Galibert, vice president of National Brick Co.; R. M. Ballantyne, J. J. Gibbons, Geo. H. O'Neil and R. J. Yonge.

### Capital Increased

The board of directors of the Mutual Oil Company have voted, subject to the approval of the stockholders, to increase the authorized capital stock from 3,000,000 to 6,000,000 shares of $5 par value each, making a total of $30,000,000.

The statement by the directors says: "It is not the intention to offer or distribute any stock at the present time. Some of this stock will be used to complete the exchange for shares of Boston-Wyoming Oil Company and Western Oil Fields Corporation, in accordance with resolutions of the directors heretofore adopted."

### Nova Scotia Listing

An additional block of the Bank of Nova Scotia stock amounting to $300,000 was listed on the Tornto Stock Exchange, bringing the total listment to $10,000,000.

## ARREARS OF TAXES

### The Amount of Tax Arrears Per Capita May Usually Be Regarded As An Indication of Good or Bad Management

For the purpose of estimating the condition of Canadian cities as to tax arrears, the Citizens' Research Institute of Canada has selected 24 cities as nearly as possible representative of different parts of the country. Some cities which might have been included had to be omitted because the figures were not available to the Institute. The facts given below are based on special information in most cases and on printed public reports in the majority of cases.

Of the three British Columbia cities on the list, all had lower per capita tax arrears than in the previous year. One had a lower per capita of tax sale certificates, and two higher per capitas.

The three Alberta cities on the list had lower per capita tax arrears, but higher per capita tax sale certificates.

Of the two Saskatchewan cities on the list, both had higher per capita tax arrears and one higher per capita tax sale certificates.

Of the two Manitoba cities on the list, both had higher per capita tax arrears and a higher per capita of tax sale certificates.

Of the seven Ontario cities on the list, four had higher per capitas of tax arrears and three lower per capitas . The amount of tax sale certificates was apparently an almost negligible factor in these cities as was also the case in the Quebec and Maritime cities on the list.

Of the four Quebec cities on the list, one had a higher per capita of tax arrears and three lower per capitas than in the year previous.

Of the three cities in the Maritime Provinces on the list, two had higher per capitas of tax arrears, and one the same per capita.

Of the 24 cities on the list, 12 had lower per capitas of tax arrears, the per capita of one remained practically unchanged and 11 had higher per capitas. The increases were much smaller on the average than the decreases, the total arrears being less than those of the previous year by about 12 per cent.

A disquieting feature of the situation, however, is that out of the 12 cities which had lower per capitas of tax arrears, 6 had higher per capitas of tax sale certificates, i.e., land taken over by the city at tax sales. Apparently in order to reduce tax arrears, many cities were forced to increase their holdings of land sold for taxes.

While the total tax arrears of the 24 cities on the list decreased by almost $4,000,000, municipal holdings of tax sale lands increased by almost $5,000,000. The Western cities on the list decreased their total and per capita tax arrears and increased their total and per capita holdings of tax sale lands. The Eastern cities on the list, while having lower per capita tax arrears than the Western cities, actually increased their total tax arrears by over $800,000.

Of the 24 cities on the list, only 12 report holdings of tax sale certificates to any significant amount, but of these 12 cities, 10 had increased their per capita holdings of land in arrears of taxes, over the preceding year.

If these conditions among 24 cities are typical of those obtaining among the total of 58 Canadian municipalties with 10,000 population or over, as is doubtless the case, it would seem that on the whole, some progress has been made in catching up on tax arrears; that the chief improvement in this respect has been where improvement was most needed; that many cities with small arrears are liable to lapse into a condition of having large arrears unless they exercise increased vigilance; that in many cases where per capita tax arrears have been reduced, per capita holdings of tax sale lands have been correspondingly increased; and that no part of Canada is immune from the necessity of scrutinizing closely proposed expenditures before they are incurred and of collecting the necessary revenue to meet expenditures when the expenditures are incurred or as soon thereafter as is humanly possible.

## COBALT ORE SHIPMENTS

The following are the shipments of ore from Cobalt Station for the week ending August 25th: Nipissing Mines, 687,305; Mining Corp., 391,672; McKinley Darragh, 83,301; Dominion Reduction Co., 84,000; total, 1,246,278. The total since January 1st is 6,103,193 pounds or 3,051.5 tons.

# *Unlisted Securities*

In their weekly report on the unlisted market, A. J. Pattison, Jr., & Co. say that while in a few cases slight reactions occurred, the general tendency continued upwards with decided advances for industrial bonds, the feature of this class being the pulp and paper issues which have steadily improved for many weeks with the demand remaining in excess of the offerings even at the increased prices. The market has come through the summer without the generally forecasted slump. In fact in nearly every case the quotations now are points higher than they were in May and while the upward movement was slow it was of an exceedingly healthy character. During the last two weeks investment buying has spread to fair proportions, with every indication of growing to a volume greater than that reached last fall.

Massey-Harris and Cockshutt Plow Preferred showed slight improvement, the former holding firm at 57½-60, up ½ point, and the latter at 46-47½, up 1 point. Ontario Pulp 6's which were quite active reached 101 bid, up 2 points with none offered. Lake Superior Paper 6's at 100 bid show an improvement of 4 points with but few bonds coming into the market on the move up. The oil stocks were comparatively inactive with but little change. Toronto Power 5's moved to higher figures at 96½ bid without changing hands. Sterling Coal common eased a point to 18-19 on offerings of a small block of stock. Famous Players preferred improved to 54 bid none offered on news of the declaration of dividend and the opinion that the worst three months of the year for the moving picture industry are now past. Bank stocks were in some demand, both Sterling and Home showing firmness at present levels, and every indication of moving upward. . Dunlop Tire 6's at 94½ bid showed a gain of 3 points to a new high mark for the year.

## INVESTMENT YIELDS

The following is a special list of liquid investment yields of the better class of investments outside of government and municipal bonds:

(Compiled by A. D. Morrow and Co.)

| Banks and Trust Co.'s | Div. | Rate | Price | Yield |
|---|---|---|---|---|
| Bank of Montreal ............ | 12 | 1 | 219 | 5.93 |
| Bank of Toronto ............... | 12 | | 175 | 6.85 |
| Bank of Nova Scotia .......... | 16 | | 256 | 6.25 |

## LARGE INSURANCE POLICIES

The highest insurance policy in the United States and Canada paid last year amounted to $1,517,820 held by Ferdinand Schlesinger of Milwaukee, Wis., chairman of the board of the Milwaukee Coke & Gas Co., and was distributed among 24 companies. The second largest was that of Isaac Kaufman, Pittsburg department store owner, amounting to $600,000. The largest policies now in force are $4,500,000 held by Rodman Wanamaker and $3,000,000 held by John Wanamaker.

## JAMAICA ANXIOUS TO TRADE WITH CANADA

### That Country Has Many Things That Canada Requires

Although, according to J. B. Kilborne, Confederation Life Association representative in Jamaica, the natural market for all products from that country is the United States, yet the majority of the Jamaicans themselves would prefer to have closer trade relationship with Canada because of their being a British colony.

Mr. Kilborne is at present in Toronto attending the life underwriters convention, and also the convention held by the Confederation Life Association.

### Looking to Canada

Mr. Kilborne pointed out that now as never before Jamaican business men and traders were looking to Canada for a market for their goods. At the present time sugar is practically the only product which comes direct from Jamaica to this country. And while it is true that Canada uses tremendous quantities of the cane-sugar from this island, yet trade should not be confined to the one article alone. Of the various other products available, Mr. Kilborne considers the cocoanut as the next most suitable export for Canada. This country has a strong demand for cocoanuts, which is supplied indirectly from Jamaica by passing through the United States instead of being directly exported to Canada.

On an average, thirty million nuts are exported yearly from Jamaica, a large percentage of which goes to the United States. Figures for 1920 show that 12,000,000 were exported to the United Kingdom, 14,000,000 to the United States and 14,000,000 to other countries. According to Mr. Kilborne there is a great opportunity here for trade operations with Canada on a large scale. Mr. Kilborne added that he would furnish definite information along this line, to Canadian business men who would be interested in such a project.

### Conditions Improve

The speaker declared that general conditions in Jamaica were rapidly improving at the present time. In 1920 there was a general decline in business due to the tremendous falling off in the price of sugar; this has been fairly well stabilized, however, and prospects are good. Figures for 1920 show that of 3,000,000 lbs. of sugar exported, 1,500,000 lbs. went to the United Kingdom, while practically the same amount came to Canada. This year the crop has been good, and almost one-third has already been sold to Canada. As an indication of how the prices have risen, Mr. Kilborne stated that while at the beginning of this year, twelve pounds was paid a ton for raw sugar in Jamaica, twenty-one pounds or almost double is the price now paid.

### Other Exports

The other main exports of the island, nearly all of which go to the States, are bananas, mangoes, cigars and cocoa. Rum is exported in considerable quantities to Great Britain. The present Canadian service to Jamaica by which sugar is brought to this country, and flour and other exports sent to the island, is provided by the Canadian Government Merchant Marine which operates boats fortnightly, and the C.P.R. which operates boats weekly.

## HURON AND ERIE DIVIDEND

The Huron and Erie Mortgage Corp. has declared a dividend of one and three-quarters per cent. for the quarter ending September 30. This will be payable at the company's office in London on and after October 2.

## STEEL & RADIATION, LTD.

The entire assets of the Steel and Radiation, Limited, including the plant and property which has been in receivers' hands for some time, have been purchased by the Imperial Radiators, Limited.

## SATISFACTORY CROP REPORTS

### Bank of Montreal Crop Report Says Harvesting is General Throughout West

Reports from most districts are highly satisfactory, says the Bank of Montreal crop report and harvesting is general throughout the prairie provinces. Weather conditions are favorable and the yield is expected to be generally satisfactory, especially in Manitoba where returns above the average are promised. Excellent crops are being garnered in Ontario, Quebec and the Maritime Provinces. Showers are benefitting late crops in British Columbia.

### Prairie Provinces

Edmonton District—Recent rains have benefitted green feed and pasture. Wheat crop somewhat better than anticipated. Cutting general. No scarcity labor. Calgary district:—Past Week, weather warm and showery. Moisture too late for real assistance, except for fodder crops and hay, which has somewhat improved. Grain cutting general. No shortage of labor. Lethbridge District: — Conditions favorable. Harvesting general, all sections. Satisfactory yields expected. Medicine Hat Section:—Shows improvement. Bow Island's crops light, but feed more plentiful than for some years. Second cutting alfalfa promising. Pasture good. Saskatoon District:—Harvesting well advanced. Slight delay owing to showery weather. Fair yield expected. Labor supply sufficient. Regina District:—Wheat cutting well under way. Grain will grade well. Some damage from sawfly and hail reported. Prospects generally good. Winnipeg District:—Cutting nearly finished in southern district. Northern areas are later where the crop is heavier. Yield generally promises better than average and grade high.

### Quebec

Harvesting of cereal crops is in full swing, and generally speaking, good yields are expected. All roots are doing well. Grass pasture is in good condition. Good crops are reported from all parts of the province.

### Ontario

Weather conditions continue generally favorable. Moisture sufficient in most districts, but Western Ontario needs rains for late crops. Grain crops are all harvested, threshing operations being in full swing, and returns from fall wheat and spring grains are uniformly satisfactory. Corn is in good condition, good average crop assured. Hay, second crop cut, good crop. Roots progressing satisfactorily, better than average crop secured. Early fruits good, winter apples average. Niagara District:—Abundance of peaches, plums and grapes. Pasture good, but rain needed in some districts.

### Maritime Provinces

General crop and pasture conditions excellent throughout, except in the large potato growing districts of the Upper St. John River Valley, where potatoes will be short crop. Annapolis Valley apple conditions good. One and one-half million barrels of good quality expected.

### British Columbia

Warm showery weather beneficial to later crops and pasturage. Grains 70 to 80 per cent. of average crop; oats, 70 per cent.; roots, 75 per cent., with improvement expected. Potatoes only fair, except Ashcroft, where there is good crop. Okanagan apple estimates reduced to 70 per cent. Shipments all varieties of fruit now estimated 4,000 cars, of which 3,000 are apples. Second crop pasturage showing well.

## CANADA'S COAL IMPORTS DURING 1922

### Seven Months' Total Was Nearly Two Million Tons

Canada's imports of anthracite coal for the first seven months of the present year totalled 1,077,847 tons of egg, nut, etc., and 97,042 tons of dust. The three-year average imports for the period of 1919-20-21 were 2,560,895 tons of egg, nut, etc., and 118,325 tons of dust. The percentage of this year's imports thus far to the three-year average was, in egg, nut, etc., 42 per cent. and in dust 82 per cent.

In the same period of the present year, Canada imported 3,341,465 tons of round and run of mine bituminous coal, as against the three-year average of 5,579,863 tons, and 986,855 tons of bituminous slack, as against the three-year average of 1,091,446 tons.

Ontario and the central district received 791,898 tons of anthracite egg, nut, etc., this year, as against the three-year average of 1,692,203, or 47 per cent. Quebec, which was the second largest importer, got 246,554 tons, as against the average of 681,512, a percentage of 36. Quebec's importations this year included 552 tons of anthracite from Great Britain. New Brunswick imported 25,077 tons of anthracite, egg, nut, etc., this year, which included 3,346 tons from Great Britain.

Exports of coal from Canada in the same period, according to a bulletin issued by the Dominion Bureau of Statistics, were 848,033 tons, which was 71 per cent. of the three-year average of 1,199,186 tons.

**The Hamilton Provident and Loan Corporation**

Head Office
King Street, Hamilton, Ont.

Capital Paid-up, $1,200,000. Reserve Fund and Surplus Profits, $1,315,587.70. Total Assets, $4,800,104.87 TRUSTEES AND EXECUTORS are authorized by law to invest Trust Funds in the DEBENTURES and SAVINGS DEPARTMENT of this Corporation.

## GRANBY CONSOLIDATED

The Granby Consolidated Mining and Smelting Company's plant is reported to have broken all records in production in July, producing more than three million pounds of copper matte during the month, the best previous record being approximately 2,800,000 pounds. The company has 1,400 tons of copper matte at Vancouver loading for the New Jersey Refinery. It contains $408,000 worth of copper; $88,000 worth of silver; and $72,000 woth of gold.

## DOMINION GLASS CO.

It is reported that a large manufacturing plant, costing approximately $1,000,000, will be erected soon by the Dominion Glass Company in the vicinity of Montreal. The company now operates two plants in Montreal, but it is understood that the proposal is to erect one large plant which will not only look after the business now being handled by these two plants, but will also provide for any expansion of the company's business.

## CLAIMS ONTARIO HAS COAL

### Geologist Maintains Discovery is Important—Government Discounts Claims

Alfred F. A. Coyne, consulting geologist of the Ontario Anthracite Mines Ltd., has made a report to that company to the effect that anthracite coal exists on its properties near Sudbury, Ont. In his report he states.—

"The history of the discovery and development of the economic minerals of the province of Ontario is replete with instances of which the discovery of coal in this province will only be another parallel. The story of Cobalt and Gowganda is just about to re-occur in the matter of coal.

"Like Cobalt and Gowganda, public opinion and unfortunately public opinion also has been and is recorded against the possibility of any coal deposits being found within the boundaries of the province of Ontario. The economic importance of such a discovery within this province is too well appreciated for me to make it necessary for elaboration, and when I have the duty imposed upon me to write a report giving an unqualified endorsement, that in my opinion, the Ontario Anthracite Mines, Limited, possess upon their properties west of Sudbury, Ontario, a commercial deposit of high grade anthracite coal, I do so after the most careful consideration taking into full cognizance the fact, that in so doing I am about to place on record for the first time the indisputable fact, that a deposit of high grade anthracite coal does not only exist in the first magnitude, but over it runs the main transcontinental line of the Canadian Pacific Railway. The economic importance of such a statement must focus attention.

### Official Reports Wrong

"It may be asked why this discovery was not made before, this in my opinion is due to the fact that the geology of the district has been recorded wrongly, the classification in official reports of the area, being given as Upper Huronian, which I find is wrong. The Huronian system of rocks, cannot contain coal thus techinical opinion at once would naturally treat as an absurdity, any possibility of coal in the Huronian system. It is for this reason that professional advice apparently has heretofore been as against coal within the province.

"The comparative geology as recorded in my report which follows, you will carefully note corroborates to the fullest extent that my examination of your property and the district in which it lies, has established every possibility of a huge deposit of anthracite coal capable of supplying the province of Ontario to all practical purposes for an unlimited time.

"A microscope examination of this coal from the outcrops of your properties showed that it is similar to a sample of high grade Leheigh Valley Pennsylvania coal, which is at present being sold in Toronto. My microscopic examination which I carried out myself, in conjunction with my assistant Mr. Anderson, was replete with the presence of marine and herberiferous fauna, clearly disestablishing the Huronian origin of these rocks, for no life existed in the Huronian age. While deposits found under the conditions as outlined in this report should exist in considerable thickness with a series of coal seams.

### Occurs With Nickel

"The peculiar occurrence of nickel in all parts of the world is associated with the striking productive anthracite coal areas also further points to similar conditions in the geological time when the sediments were deposited in what is generally known as the Sudbury area of Ontario, and more particularly in the Chelmsford basin which I examined.

"In conclusion, there is every indication of a large bed of high grade anthracite coal on your properties, and I am pleased to have had the distinctive honor and privilege of being the first geologist to have established this. That my deductions are correct, I leave the verdict, not to opposite opinions, nor to public sentiment, nor to the derision which may arise from interests of which this important discovery will vitally affect, but to the coal miner. I therefore advise most unreservedly, a detailed survey of your properties immediately, together with the installation of mining machinery and workers, and respectfully submit my continued services in this development."

Three analysis are also reported, showing a carbon proportion of about 88 per cent. The analysis of the Toronto Testing Laboratory, Ltd., shows the following:—

| | |
|---|---|
| Volatile matter | 9.12 per cent. |
| Fixed carbon .. | 88.52 per cent. |
| Ash .......... | 2.36 per cent. |
| Sulphur ...... | .67 per cent. |

### Government's Position

The Ontario Government, however, takes a different view, upholding its recent report to the effect that the deposit does not possess commercial possibilities. Immediately following the issuing of the Government report, Mr. Coyne, addressed a statement to Premier Drury, in which he alleged that the report of the Provincial geologist who made the last investigation was altered before being given to the public, and that he can produce two witnesses who will swear that the report, as presented to the Department of Mines, stated that anthracite coal existed, and in quantities which possessed commercial possibilities.

## INSTRUCTIONS ISSUED TO CUSTOMS OFFICERS

### Currencey Certificates Required With Imports from Country With Depreciated Currency

Instructions to customs and excise officers respecting the importation of goods from foreign countries whose currency is substantially depreciated, based on the amendments to the act passed by parliament last session, have been issued by the department of customs and excise. Officials are advised that the currency certificate of a consul, trade commissioner or bank, in the form previously specified, is not to be required in the following instances:

1. In respect of invoices of goods imported from a country where the currency is not regarded by the department as substantially depreciated, in which case the present authorized certificate of the exporter showing the relative value in standard currency or paper currency of the invoice is to be accepted, subject to the usual certification by the collector at the port of entry.

### Less Than One Per Cent.

2. Where the depreciation or appreciation of the currency of invoice as compared with the currency of Canada is less than one per cent. In respect of such invoices the collector will accept entry as at present and compute the value for duty purposes in accordance with the governing rate of exchange as shown by the appraiser's bulletins.

All invoices of goods imported from a country where the currency is regarded as substantially depreciated shall bear thereon the currency certificate of a consul, trade commissioner or bank in the form specified and until further ordered this instruction will apply to invoices of goods imported from Germany, Austria, Hungary, Jugo-Slavia and Russia; and to countries where the currency has no fixed standard value.

## START MILL AT TRENTON

On August 25 the cornerstone of the big new million dollar mill of the Dominion Combing Mills, Ltd., at Trenton, Ont., was laid by E. Guss Porter, M.P. for West Hastings.

Will Bonds be higher?

What factor should be counted on in estimating what the market will do?

The new Greenshields Review gives investors analyses of all the factors likely to affect the situation. A copy will be mailed on request.

# Corporation Finance

**American Cyanamid Co.**—Due to the abnormal conditions which prevailed during 1921, both sales and profits for the year ended June 30 last show a reduction from the previous report.

Net sales are lower from $6,046,649 in the previous year to $4,303,193 in the present year. This compares with net sales of $8,684,085 during 1920. Cost of sales was materially reduced to $3,678,429, compared with $5,303,478. Gross profits amount to $624,765, compared with $743,171 for the previous year and $2,072,889. It will be noticed, therefore, that operations in the past two years have not kept pace with the standard set in the previous period. From gross profits are deducted general expenses amounting to $262,202, taxes and other charges $339,068, and including other income, $97,560, there is a net profit of $114,055, compared with $260,138, and $1,454,720 for the year 1920. The surplus account shows a decrease of $148,213 for the year, and now stands at $3,143,276, in addition to various reserves totalling $4,200,246.

The balance sheet shows fixed assets to a value of $3,711,171; current assets total $3,128,786, as against current liabilities of $654,090. Cash on hand amounts to $640,077: accounts receivable, $175,027; United States Government securities, $1,292,697, and inventories of merchandise, $1,019,384. Investments in subsidiary companies are valued at $4,930,650 , and the amounts due to subsidiary companies stands at $875,188. Licenses, patents and good will are now written down at $4,587,227.

In presenting the report C. M. Grant, treasurer, says: "We consider the year's returns gratifying in view of the abnormal conditions pervailing during the period covered, and the reduced activity in most of the departments of the company. The outlook for the new fiscal year is encouraging."

Reference is made to the retirement from the presidency on account of ill health of Frank S. Washburn in July last, and the appointment of Wm. D. Bell as his successor.

**British Columbia Electric Ry. Co**—Gross earnings for the month of June amounted to $802,511, as compared with $803,903 for June, 1921. Working expenses, maintenance, etc., amount to $622,697, compared with $620,291, leaving net income at $179,814, as against $183,612, being a decrease of $3,798.

Aggregate gross earnings from July 1, 1921, to June 30, 1922, amount to $10,220,054, compared with $10,097,256 for the 12-month period immediately preceding. Aggregate net earnings at $2,771,029 compare with $2,773,567, a decline of $2,538.

**Canada Bread Co. Ltd.**—The annual report for the year ended June 30, 1922, shows that revenue, after charging bond interest, amounted to $398,953, compared with $307,122 last year. Interest from investments was $14,860, compared with $17,953. The balance on July 1, 1921. amounted to $322,083, compared with $172,295 on the same date in 1920. Depreciation on plant and building is given at $115,000, compared with $60,000. Bond purchases are unchanged at $12,500. There was allowed for income tax for 1919, $6,609; 1920, $7,948, and for 1921, $27,682, and for preferred dividends, $87,500, leaving a balance to be carried forward as at June 30, 1922, of $735,898.

The annual meeting will be held at the company's offices in Toronto, on August 31.

**Hattie Gold Mines, Ltd.**—At the annual meeting of shareholders on August 17, the arrangement of the directors to sell 600,000 shares of treasury stock to John Irving and Carlos Warfield, was ratified. The price paid was 25 cents per share, which will provide $150,000 for development work. The plant for sinking operations is already on the property, and development will start before the end of the current month. The following board of directors was elected· Dr. Wm. P. St. Charles, J. K. Papassimakes, Carlos Warfield, John Irving, A. G. Slaght, K.C.

At a subsequent meeting of the board Dr. St. Charles was elected president of the company. Mr. Papassimakes was made vice-president, and Carlos Warfield managing director.

**Toronto Railway Co.**—Official announcement is made by the company that six months' interest on the company's bonds will be paid on the 31st day of August, 1922, at the rate of 6 per cent. per annum. As the last coupon of these bonds fell due on the 31st of August, 1921, it will be necessary to pay interest by cheque, which will be paid on presentation of the bonds at the Canadian Bank of Commerce.

The announcement continues: "The company had hopes that with the payment of interest due the 31st of August, it would have been ready to pay its matured bonds, but unavoidable delays in carrying the above two propositions to their present condition have compelled the company to ask its bondholders for a further indulgence of possibly three months, by which date so far as we can see, the bonds and accrued interest will be paid."

**Atlantic Sugar Refineries, Ltd.**—Arrears of dividends on the cumulative preferred stock of the company now amount to 10½ per cent. It is stated that there is now outstanding about $1,000,000 of the stock against the original issue for $2,500,000, the difference being represented by the amount converted into common stock.

**Canadian Western Lumber Co.**—For the month of June the company manufactured 11.551,858 feet, as compared with 11,911,931 feet for June, 1921, a decrease of 360,073. Lumber sold amounted to 13,046,480 feet, compared with 8,240,903, and the price realized at $305,399, compared with $201,424, an increase of $103,975.

The aggregate of lumber manufactured for the first six months of the year reached 46,996,892 feet, compared with 47,111,181, and lumber sold in the same period 56,489,597. as compared with 41,948,724 feet for the corresponding period of 1921. The price realized of $1,276,264, compared with $1,205,595.

**Premier Gold Mining Co.**—The company has distributed a dividend of 15 per cent. for the quarter ended June 30. This brought the disbursement for the year to $1,250,000, and the total disbursement since the first dividend was paid in December of last year to $1,650,000. The capital of the company is only $5,000,000, and already within six months of the payment of the first dividend, 33 per cent. of the capital has been restored to the stockholders in dividends. The property is now fully equipped: the transportation difficulty which for a time greatly retarded production has been solved: and an ore reserve capable of maintaining the present rate of production has been developed.

**Spanish River Pulp & Paper Mills, Ltd.**—The annual general meeting of the company has been called for September 28 at noon in Toronto.

**Montreal Tramways Co.**—The annual general meeting of shareholders has been called for September 26, at noon at the head office of the company.

**Lake Superior Corp.**—Owing to the depression in the iron and steel industry and allied industries, the company passed through a very trying year and earnings show a large decline from last year. In view of the unsatisfactory results for the year, the directors of the company announce that the interest on the income bonds will not be paid.

The net earnings for the year totalled $330,000, as compared with $1,541,293 from similar sources for the previous year. There was added to the net earnings the sum of $404,813, compared with the balance forward added to the previous year's account of $2.592,237, making a total available for distribution of $734,814, compared with $4,133,530. After all charges there is a deficit for the year amounting to $763,813. Income accounts for the past two years compare as follows:

| | 1922 | 1921 |
|---|---|---|
| Net earnings | $ 330,000 | $1,541,293 |
| Balance forward | 404,813 | 2,592,237 |
| | $ 734,814 | $4,133,530 |
| Dividends and interest | 1,410,478 | 1,491,247 |
| Dep. of mining prop. | 87,703 | 98,131 |
| General depreciation | ............ | 500,000 |
| Income tax | 445 | 522,251 |
| Inventories written down | ............ | 1,117,087 |
| Carried forward | *$763,813 | $804,813 |

—*Deficit.

President W. H. Cunningham gives a lucid exposition of some of the difficulties experienced during the period. The Algoma Steel Corporation, he points out, has felt the effects of the continued depression in the steel trade. "Steel plant operations were seriously curtailed and decreases shown in both output and earnings. Rail orders received were not sufficient to keep the rail mill operating full time. The mill was operating 50 per cent. capacity for 194 days and was closed down 67 days. For the balance of the year the mill was in full operation. During the first quarter of the fiscal year, it became necessary to make a further reduction in prices of steel products, and in order to meet this economics had to be effected in various directions. There was very little buying in rails and other products by the Canadian railways, but a fair proportion was received of the business offered."

Rail production of the Algoma Steel Corporation for the year was 155,764 tons, as compared with 201,312 tons in 1921, and pig iron shipments were 64,189 tons, as compared with 105,619 tons in the previous year. Orders on hand at June 30 were sufficient to keep the rail mill in operation until September 5, and the merchant mill until August 31. It is expected, however, that further rail orders will be received in the fall for winter rolling. The possibility of the coal and railway strikes in the United States affecting importations of coal and ore for the coming winter is causing the corporation considerable concern.

The tonnage for the year, as compared with the preceding year, is as follows:

| | 1920-'21 | 1921-'22 |
|---|---|---|
| Coal imported | 841,983 | 468,534 |
| Ore imported | 420,830 | 298,740 |
| Limestone produced | 235,399 | 164,218 |
| Coke produced | 429,041 | 273,007 |
| Pig iron produced | 362,805 | 246,779 |
| Steel ingots produced | 327,906 | 230,237 |
| Steel products | 255,209 | 173,013 |

The Algoma Eastern Railway Company suffered through the complete cessation of operations of the International Nickel Co. and other industrial concerns upon which the railway is dependent for its principal traffic. The reduction in the tonnage of mining and other products hauled, as compared with the previous year, is approximately 1,000,000 tons. As the result of this the company is not yet in a position to pay the half-year's interest on its first mortgage bonds, which was due March 1, 1922. It is fully expected, however, the report adds, that this condition is only temporary. For it is understood that the mining ,smelting and refining operations of the International Nickel Co. will be resumed about September 1 on a basis which will furnish ore traffic to the railway of approximately 50,000 tons per month. Coal, coke, quartz and other mining supplies will be shipped in proportion. The physical condition of the property is said to be in excellent shape.

Referring to other subsidiaries, President Cunningham points out that the production of the Cannelton Coal & Coke Co. was 199,272 tons, as compared with 474,848 tons in the previous year. The mines have been idle since shipments of coal to the steel company were completed in October last. It is expected ,however, that as soon as a settlement of the coal strike has been effected buying of coal will be brisk. Production of the Lake Superior Coal Co. is somewhat higher at 288,634 tons, as compared with 235,933 tons in the preceding year. The strike stimulated business at Lake Superior, and a good demand is looked for during the fall and winter months.

The year's operations of the Algoma Central & Hudson Railway Co. and Algoma Central Terminals resulted in a net loss before bond interest of $95,403, as against net earnings for the last fiscal year of $159,425.

The net earnings of the Algoma Steel Corporation totalled $330,087. Disbursements on account of interest totalled $1,161,983, leaving a loss for the year of $831,896. Including the balance forward of $660,083, there is a balance at debit of $171,812. Further reduction of current assets is shown from $11,052,466 at the close of 1921, to $6,990,872, while current liabilities are reduced from $4,924,647 to $1,930,675. Total assets amount to $49,893,343, as compared with $53,712,634.

## IMMIGRATION

The following is a statement of immigration into Canada for the first four months of the year, compared with 1921:—

1921-22

| | British | From U.S.A. | Other Countries | Totals |
|---|---|---|---|---|
| April | 8,476 | 5,035 | 1,541 | 15,052 |
| May | 7,083 | 3,710 | 3,350 | 14,143 |
| June | 6,899 | 3,086 | 2,292 | 12,277 |
| July | 3,772 | 2,388 | 2,294 | 8,454 |
| Totals | 26,230 | 14,219 | 9,477 | 49,926 |

1922-23

| | British | From U.S.A. | Other Countries | Totals |
|---|---|---|---|---|
| April | 2,048 | 3,268 | 1,282 | 6,598 |

# Some Angles of the Immigration Question

### Problem Demands Something Much Deeper Than the Superficial Study Usually Given—Main Problems of Question—Three Persons to Square Mile in Canada

By ROBERT J. C. STEAD

The following is an abstract from an address by Robert J. C. Stead, Department of Immigration and Colonization, given before the Union of Canadian Municipalities convention held in Winnipeg recently.

In any discussion of immigration questions I always think it well to remind my hearers that they themselves are immigrants, either in person or by virtue of the ancestry. A recognition of that obvious fact should mellow the asperity with which immigration problems are too frequently attacked should deepen the sympathies and enlarge the vision of we who, in a sense, sit in judgment upon others who are today that which we were yesterday. And indeed the subject is one which merits all our depths of sympathy, all our breadth of vision, all the sincerity which we can compress into our conception of patriotism.

Canada is what she is today because of the immigrants who have come to her shores. Without these immigrants she would be still the pasture-land of the buffalo in the West, the primeval forest in the East. That which she is, for good or bad, her immigrants have made her. That which she shall be will be determined by the sons and daughters of immigrants now in the land, and by others still to come.

#### Not a Superficial Study

First of all, let me say at the outset, the problem of immigration demands something much deeper than the superficial study usually given it. Nothing, surely, could be more intensely important than the selection of those strains of blood which are to blend with ours in the production of the Canadians of the future, for that and nothing less than that, is what immigration means. We are not a caste country in which immigrants can be herded off by themselves and prevented from inter-marrying with the Canadian stock already established. Canada must look upon every immigrant at her gates as parents look upon a prospective son-in-law or daughter-in-law and with a vision into the future to estimate the type of grandchildren and great-grandchildren such a union will produce.

May I quote from an American opinion, based upon conditions in the United States, but perhaps not without a note of suggestion for us in Canada? Frances Keller, in her book, "Immigration and the Future," says:

"Meanwhile, through scientific study, other countries are assembling information. They are submitting their findings to dispassionate analysis. They are meeting in conventions and perfecting agreements. They are formulating domestic policies to stimulate, to divert, or to retard immigration. Thus, they are arriving at sound conclusions which eventually will give them a sound policy. The men who direct the broad fiscal and commercial policies of these countries, and who direct their foreign affairs, are the men who deal with immigration policies.

"Few will contend that we in America are following a similar course. No such study or analysis of the immigration question is being made, nor are we formulating sound policies, arrived by similar methods. How else are we to keep pace with Europe than by developing in this country a group of men whose word and judgment on immigration will be trusted as readily and deservedly as is the word and judgment of other groups upon finance and commerce?"

Such is the opinion of Miss Keller. Fortunately we in Canada have at least some evidences that the importance of the problem is being appreciated.

#### No Occasion for Timidity

One of these evidences is an extreme timidity on the part of certain sections of our population in dealing with this matter. They have awakened to its far-reaching effects and the knowledge has made them fearful. Instead of grappling with the problem they would evade it by stopping immigration altogether. "Canada for the Canadians" sounds like a good slogan until one remembers that it is quite out of reason to expect that nine million people and their descendants are to possess permanently a country as large as Europe. After 55 years of Dominion building our population is not yet so much as three persons to the square mile. Contrast that with 51 to the square mile in Asia, 120 to the square mile in Europe: even with 30 per square mile in the United States. Compare it with 658 to the square mile in Belgium, 193 in Denmark, 903 in England and Wales, 390 in Japan. In the light of such comparisons is it not well that Canadians should pause to think where they stand? Land hunger is almost an elemental passion with mankind, and unless we show capacity to occupy this great heritage ourselves we may be sure that sooner or later some more aggressive people will relieve us of that responsibility.

On the other hand are those who would throw the doors wide open, unconcerned as to whether the action made of Canada a nation or a rabble. The one policy is timorous; the other reckless rather than brave. Somewhere between the two lies the line of progress.

#### Our National Responsibilities

Before such a body as this I may turn for a moment with peculiar frankness to a consideration of our national responsibilities. The first and greatest of these I have already suggested—the holding of Canada, not selfishly for the Canadians of today, but unselfishly for the Canadian nation and race of which we are now laying the foundation. That is nation-building in its largest view; so large that it quite escapes the attention of those whose vision goes no further than immediate and material prosperity. But there is a phase of this problem which is sufficiently pressing and immediate to spur the most unimaginative mind to some sort of action. Let me invite your attention for a moment to the financial obligations which we Canadians have assumed.

The gross national debt of the Dominion of Canada on May 31, 1922, was $3,001,021,756 It is true the net national debt was some $610,000,000 less than the gross, and there is a tendency among those who discuss our financial obligations to deal with the net rather than the gross. Justification for such reckoning is claimed in the fact that some of the items included in the gross debt are themselves revenue producing, or represent something of permanent value to the country. But in either case the debt exists and the interest on it must be paid. By whom? By the people of Canada. It may be in taxation, or it may be in return for services, such as transportation, but the people have the bill to pay in either case. Therefore I am discussing our gross debts- not our net debts.

As every one knows, the debt of Canada attained its present proportions mainly as a result of expenditures arising out of the Great War. We accept it cheerfully as the price of our freedom and as a substitute for the very much heavier load of indemnities which our late enemies would undoubtedly have imposed upon us had they been able. And when we speak of Canada's debt we think mainly of this three billion odd of the Dominion Government. We may also think of contingent liabilities amounting to $300,000,000 in round figures, not included in the above, for which we are indirectly liable as a result of our railway obligations. But if we are to face this whole question fairly we must also give thought to our provincial and municipal borrowings—borrowings which, for the most part, were not associated with the conducting of the war, but which we undertook deliberately and open-eyed. According to the latest figures which I find Provincial Governments are as follows:—

**Liabilities, Provincial Governments**
1920

| Province | Direct Liabilities<br>$ | Indirect Liabilities<br>$ |
|---|---|---|
| Prince Edward Island | 1,462,713.76 | |
| Nova Scotia | 17,811,330.33 | 130,541.00 |
| New Brunswick | 26,670,764.05 | 1,117,000.00 |
| Quebec | 49,756,763.22 | 4,124,500.00 |
| Ontario | 128,191,754.16 | 31,560,299.57 |
| Manitoba | 60,565,734.02 | 30,466,362.16 |
| Saskatchewan | 38,016,002.51 | |
| Alberta | 44,587,763.04 | |
| British Columbia | 43,693,364.69 | 65,407,227.02 |
| Total | 409,756,189.78 | 132,805,929.75 |

If to this $409,756,189.78 of direct provincial liabilities we add $132,805,929.75 indirect liabilities we have a total provincial debt of $542,562,119.53.

But, unhappily, that is not all. We have next to consider our municipal debt—a subject which, I suspect, lies close to the hearts of not a few of those present. The municipal debt of Canada, perhaps more than any of her other obligations, was incurred in a spirit which I may describe as one of exuberant optimism. When, in playing golf in the environs of some of our cities, one encounters such obstructions as a hydrant, or ignominiously loses his ball down a broken sewer grating, he is forcefully reminded of what may go down in history as the spirit of 1921. Yet we also stood by consenting unto these expenditures and we have no reasonable complaint that we now face their inevitable consequences.

According to a statement of municipal indebtedness in Canada as at the year 1920 the obligations of the various municipal organizations in the different provinces were at that time as follows:—

| Province | Municipal Debt. |
|---|---|
| Prince Edward Island | $ 1,087,900 |
| Nova Scotia | 21,784,132 |
| New Brunswick | 10,549,953 |
| Quebec | 190,204,326 |
| Ontario | 233,098,090 |
| Manitoba | 57,920,588 |
| Saskatchewan | 39,585,388 |
| Alberta | 57,205,275 |
| British Columbia | 96,107,911 |
| Totals | $707,443,563 |

If, now, we add together our various public obligations under these principal heads we get—

| | |
|---|---|
| Dominion of Canada, gross debt | $3,001,021,756.00 |
| Dominion of Canada, contingent | 300,000,000.00 |
| Provincial Direct Liabilities | 409,756,189.78 |
| Provincial Indirect Liabilities | 132,805,929.75 |
| Municipal debts | 707,443,563.00 |
| Total | $4,551,027,438.53 |

If we allot this debt pro rata among the 8,788,341 persons who live in Canada it amounts to the very considerable item of $517.85 per capita.

Now if Canada's population were twice what it is and her debt remained the same the load per capita instead of being $517.85 would be $258.93, and it is because of that very simple arithmetical fact that I feel justified in employing your time in a discussion of immigration.

### Position of Other Countries

Let me hasten to add that these figures of our obligations as a people, although sufficiently serious to justify our very earnest consideration, in no way suggest or excuse panicky action. To say that only by means of immigration can we meet our public liabilities is to take a position of unwarranted pessimism. But to say that an intelligently selected and directed tide of immigration would be of no great assistance in meeting our obligations and in reviving general prosperity is a truism which few would debate—provided always that the immigrant can be brought into contact with employment and made a self-supporting producer.

But I fancy I hear some one rise to remark, "If our indebtedness is so great, what attraction have we to offer to intelligent immigrants? They must know these facts, at least in a general way. Can we say to them, 'We have more debt than we can handle. Come over and help us pay it?' Will not the very fact of this debt provide an obstacle toward obtaining immigrants? Who will be willing to throw in his lot with a country so heavily involved?"

This would be a real problem if it happened that the other countries from which we seek immigrants were out of debt, or if their debt were only a nominal item. But that doesn't happen to be the case. I do not wish to weary you with figures, but I want to draw one or two comparisons between our position and that which obtains in the two countries from which, principally, we seek our immigration. I will not take your time with figures of the municipal debt of Great Britain, or of the state and municipal debt of the United States, but will content myself with a comparison of the national debts of the countries mentioned. If this comparison were carried through the other items mentioned it perhaps would be no less favorable to Canada.

The gross national debt of Canada, not including contingent liabilities or provincial or municipal debts, is, in round numbers, $3,000,000,000, or just about $341 per head. The gross debt of Great Britain at March 31, 1922, was quoted at £7,654,000,000 which, divided over a population of 47,298,601 gives a debt per head of £183, equivalent at present exchange to about ($4.50) $823.50 per head.

The national debt of the United States—net, not gross,—at 1920 was $24,062,500,285, which, divided over a population of 105,683,183 amounts to $238 per head. So that we get the following comparisons:—

| | |
|---|---|
| United Kingdom, debt | $823.50 per head |
| Canada, debt | 341.00 per head |
| United States, debt | 238.00 per head |

For the purpose of this comparison I have used what are undoubtedly the two richest countries in the world, and you will note that our debt per head is considerably less than half of that of Great Britain and only forty-five per cent. more than that of the United States, a country with a vast population and popularly supposed to be rolling in wealth. If I were to carry the comparison to other European countries the proportions would be more striking still.

### Occasions for Optimism

So we have every occasion for a sound and sane optimism. We have not only large debts but large doings; enterprises which, for so young a country, may fairly be described as gigantic. And may I carry you back to the thought with which I opened my remarks, that all this has been accomplished as a result of immigration? May I suggest that our immigration problems press upon us as matters of first importance.

### Our Immigration Problems

What are these problems? It seems to me they divide themselves into three main heads—

1. The creation of a desire on the part of people in other lands to migrate to Canada.
2. The selection of the acceptable, the rejection of the unsuitable, and the physical control of the movement of immigrants.
3. The assimilation of the immigrant.

As any one of the above subjects affords material for an evening's address I shall be able to deal with them only in a very general way. First let me mention what the Canadian Department of Immigration and Colonization is doing to create a desire on the part of the people of other lands to come to Canada. That is a work with which I am particularly associated and upon which I am tempted to linger. It has this peculiarity that it is work carried on exclusively outside of the Dominion, with the result that it does not come to the attention of Canadians in their daily contact, and many of them know very little about it. For example, I have been asked when the Government proposed to resume its immigration activities, and at the very moment that question was asked our advertisements were appearing in no less than four thousand newspapers in the United States. If they had been appearing in Canadian papers the Canadian public would have known all about them, but it is not in Canada that we must advertise for our immigrants.

As a matter of fact, there are many things about campaigns of this kind which cannot be shouted from the housetops, but because we fail to shout it must not be supposed that we are inactive. It is true that Canada's immigration work is carried on on a more selective basis than ever before, and our publicity efforts are not broadcasted at the general public so much as they are directed as special classes. The classes referred to are farmers, farm laborers, domestic workers; and the sources of this immigration are, at present, almost entirely the United States and the United Kingdom. We have to recognize also the fact that the free lands which were so great a magnet to immigration in years gone by are now mainly located at considerable distances from railways, and it is not considered good business to create new settlements in remote districts which will require additional railways. It is generally agreed that we have already too much railway mileage in proportion to our population, and our efforts are directed toward settling the vacant lands convenient to existing lines. This means that we have to seek the settler with some capital, and financial conditions in the United States and the United Kingdom have an important bearing upon our success. While the exchange rate was heavily against Sterling currency we could hardly expect any pronounced movement of settlers with capitial from Great Britain, but that is a condition which is now largely remedied. Reverses to farmers in the United States, particularly the collapse of the farm land boom in that country, retard our work seriously. There could be no more mistaken or superficial notion than that bad times in the United States promote immigration to Canada. On the contrary, it is in good times that people are moved to branch out and try new ventures, and it is good times that they have the capital for such undertakings.

### Some Publicity Details

Although conditions, neither in the United States nor in Great Britain, are particularly favorable at the moment, our work is being steadily carried on, qualified according to the needs of the time. We are steadily making Canada better known in these great neighboring Anglo-Saxon countries. We are approaching, particularly, the children of those countries, supplying the schools with text books in which the truth is told about Canada, with a view to correcting the notion that this is a land noted particularly for its icebergs and Polar bears. Within the last three months we have supplied 300,000 copies of these text books for use in the schools of Great Britain, and wo have now printing 225,000 for use in the schools of the United States. These books are supplied free to schools on the request of the school principals, and the demand is always greater than our financial resources will permit us to supply. Just a few days ago we had a request from the educational authorities of the city of Glasgow for 20,000 copies, which we were obliged to reduce to 10,000 copies. This is long range publicity work; it has to do with the rising generation, and its harvest may not be reaped for years, but it is spreading correct information about Canada, and I am sure it is making for us lifelong friends among the children of our national neighbors.

I wish my time would permit me to go into other phases of our publicity work; our distribution of maps to schools, banks, and newspaper offices in the United States and Great Britain; our various forms of immigration literature; our display advertising campaigns in farm pediodicals; our news distributing organizations; our system of conducted parties of visiting editors and journalists; our motion picture and stereopticon lecture work, and the extensive system of exhibitions which is carried on by our department through the Canadian Exhibition Commission, but I must pass these by to consider for a moment the second phase of our immigration problem, that is, the selection of the acceptable, the rejection of the unsuitable, and the physical control of the movement of immigrants.

## *Bank Clearings*

The following are the bank clearings for the week ended August 31, compared with the corresponding week of 1921:

### Eastern Bank Clearings

### INSURANCE POLICY JUDGMENT

Judgment for plaintiff for $1,969 and interest, was given by Justice Prendergast in Winnipeg on August 4 in the case of Sherman vs. Great West Life, a claim for $2,000 under a policy on the life of a son, Peter Moinhorst, who died January 14, 1919. According to the evidence none of the premiums, not even the initial one, had been paid in full at due date. Notes for balance given on six occasions were not honored when due. Consequently lapsing, the policy was reinstated upon written applications of the insured and the beneficiary. It was in such condition of reinstatement at the death of the insured.

## AUGUST BOND SALES LOWER

### Sales Decline Twelve Million from Previous Month—Are also Lower Than Last Year

New financing during the month of August showed a large falling off from the previous month's total, when sales amounted to $20,199,105, as compared with $8,934,696 in August. The total financing done during August is the lowest amount done during the present year.

Provincial financing during the month shows a substantial decline from the previous month, there being only one issue sold during August, that being Prince Edward Island for $175,000. This compares with four provincial issues sold in July, totalling $12,500,000. Last year there were three issues sold, amounting to $5,000,000, of which $4,000,000 was sold in United States.

Municipal issues sold during August are up by over two million from July, but are lower by one million dollars from August of last year. Ontario municipalities were the heaviest borrowers during August, with British Columbia coming second and Quebec third.

Corporation financing shows a slight decline than for August of last year. United States in- from the previous month and it is also lower the corporation issues sold during August. vestors subscribed to almost fifty pe rcent. of

The following is a comparison of bond sales during July and August:—

| | August 1922 | July 1922 |
|---|---|---|
| Provincial | $175,000 | $12,500,000 |
| Municipal | 5,504,696 | 3,334,105 |
| Corporation | 3,255,000 | 4,365,000 |
| | $8,934,696 | $20,199,105 |

## LIFE COMPANY HELD LIABLE

### Insurance Policy Still in Force, Though Premium Note Was Not Paid

The Supreme Court of Ontario in deciding the case of McNeil v. North American Life Assurance Co. were called upon to apply the provisions of section 159 of the Ontario Insurance Act to a default in meeting a promissory note given in payment of the first premium on a life insurance policy.

Justice Ferguson, in reading the judgment of the Court, said that it was admitted that the policy was delivered; that the company accepted a promissory note as payment of the first premium; and delivered the policy and a receipt for the premium to the deceased McNeil for the insurance. The promissory note fell due on the 8th November, 1919, and was not paid. About the 18th November, the deceased gave the district manager of the respondent company a renewal note which fell due on the 20th January, 1920. This note was not paid at maturity but on the 4th February the deceased gave the district manager a renewal note dated the 20th January and due on the 22nd February. McNeil died on the 20th February.

### Rights of Parties

The rights of the parties were governed by sec. 159 of the Insurance Act; and, by reason of the provisions of that section and the delivery of the official receipt, it must be held that the first premium as premium was paid and that the company's rights on default in payment of the note were limited to such rights as are given by sub-sec. 4 of sec. 159. According to the true intent and meaning of that enactment, the insurer must, after default, elect to avoid; and, unless and until such election is made and communicated, the policy remains in force. In this case the company did not elect and communicate their election to McNeil. If it was necessary for the appellant to show that company waived the benefit of subsec. 4 of sec. 159, that had been established.

### Authority of Manager

His Lordship in dealing with the powers and duties of the district manager further said:

"The title 'district manager' conveys the impression that the person so designated is the manager of the company's affairs in reference to its transactions in the district over which he is manager. The respondents entrusted this district manager with the original note and with the renewals, and when a dispute arose the general manager wrote to the district manager for the notes and correspondence. In the absence of express notice or contract limiting the authority of the district manager, it should be found that a person designated and held out by the respondents as their district manager, when entrusted with a note in reference to a policy taken in his district, had at least ostensible authority to deal with that note by receiving payment of or renewing it."

## ENDORSING NOTES ON ITS FACE

In a case before the Saskatchewan King's Bench Court, it was held that where the clear intention of a person signing a promissory note is to sign as an endorser only, he is only liable as an endorser, although he has signed the note on its face, and apparently as a maker, and is entitled as such to notice of dishonour.

In the written judgment it is said: "The only question I reserved to decide was whether notwithstanding the above clear intention on the part of both parties, the defendant, by signing the said note on its face and apparently as a maker, has precluded himself from now claiming that he is merely an endorser. According to sec. 131 of the Bills of Exchange Act no one is liable as drawer, endorser or acceptor of a bill who has not signed it as such, and an examination of the authorities would indicate that a signature on the face of a bill may be a valid endorsment and that where the intention is to sign for that purpose, it makes no difference where the signature is placed."

## TREND OF BANKING BUSINESS

### Decline in Total Asests Reflects Slackening in Business—Savings Deposits Continue Ahead of Current Loans

The course of total assets, desposits and loans of the chartered banks of Canada as shown by the bank statements for the past year and a half is illustrated graphically herewith. Total assets have been declining since the beginning of 1921. This was apparent about midsummer of last year and the usual activity in the financing of the crop did little more than maintain the total at the August figure. After November there was a decline of about $200,000,000, but total assets have remained fairly steady this year.

Current loans in Canada, one of the best indicators of business activity, declined steadily after April last year, with some recovery in September and October and in April of this year. Call Loans have shown a decline of about $12,000,000 during the past year and a half.

Apart from an unusual drop of over $100,000,000 in April of this year savings deposits have pursued a steadily downward course. The trend of demand deposits has also been downward, apart from the recovery in October. A comparison of current loans with savings deposits, shows that the latter have been slightly above the former with the single exception of April.

The following are the figures for the 12 months of 1921 and the first six months of 1922.

| 1921 | Savings Deposits | Demand Deposits | Current Loans | Call Loans | Total Assets |
|---|---|---|---|---|---|
| January .... | 1,313,093,870 | 584,025,710 | 1,264,490,463 | 112,474,318 | 2,926,867,210 |
| February ... | 1,318,855,482 | 561,578,474 | 1,266,235,381 | 112,680,497 | 2,912,047,332 |

| April ....... | 1,128,195,262 | 502,370,799 | 1,162,975,332 | 102,005,932 | 2,663,824,458 |
| May ........ | 1,197,789,747 | 494,185,496 | 1,140,425,500 | 101,239,898 | 2,660,976,663 |
| June ....... | 1,181,404,188 | 505,757,856 | 1,117,844,707 | 99,804,892 | 2,653,500,379 |

## INSURANCE FIRMS UNITE

An amalgamation has been effected under the firm name of Rainnie, Keator, Fairweather Company, between the insurance offices of Rainnie and Keator, Limited, of Halifax, and G. E. Fairweather and Son of St. John. The company of Messrs. Rainnie and Keator, Limited, which carried on all lines of insurance business, is one of the largest insurance firms in Nova Scotia and until recently had a branch office in St. John.

G. E. Fairweather and Son have conducted an insurance business in St. John for 40 years and the new company will carry on as general insurance agents and brokers.

## MONTREAL AND QUEBEC BANKS

The July statement of the Montreal City and District Savings Bank and La Caisse D'Economic de Quebec, shows very little variation from the previous month's report. Cash in the former bank is lower by about three hundred thousand, as also is loans on other securities, which are down by four hundred thousand. In the La Caisse statement the only important change is an increase of fourteen thousand dollars in deposits. The other changes in the statement are only minor, and do not in any way affect the standing of the banks.

## PAYMENT OF COMMISSIONS TO DIRECTORS

In the action between McIntosh and Premier Langmuir Mines Limited, the Ontario Supreme Court has recently decided that where the letters patent issued under the Ontario Companies Act, incorporating a company, contain a clause providing that "the company may pay a commission not greater than 25% upon the amount realized upon the sale of shares" a by-law under section 92 of the Act, authorizing payment to a director and president of the company for the sale of shares is not necessary, where the commissions do not exceed the rate authorized by the letters patent, the payments being made to him not as a director or president but as a selling agent, on the same terms as other selling agents.

## LIFE INSURANCE AND BANKING.

Many parallels and contrasts between life insurance and banking may be drawn even though they deal with different phases of human requirements. Both banking and life insurance are evidences of a high civilization and neither can prosper except where men believe in the fidelity and justness of their fellows.

In the first place, banking deals with the products of labor represented through accepted standards of value. It is built into a commercial structure so wisely and strongly that a dollar thus combined with many others, does the work of $50 acting separately. Life insurance deals with a thing even more valuable than created wealth. It deals with the man who produces all wealth and it was a great achievement after a man had a hard earned dollar in hand for him to deposit that dollar with some one else and put it to work for other men, at some risk, as well as with some decided advantages to himself. This was the basis of commercial banking. It was, however, a still greater achievement to get the individual to use another dollar as a means of securing another sort of credit, representing what he could produce if he lived, but could not provide if he were to die prematurely. This was the basis of the great institution we call life insurance.

Life insurance answers the question whether or not a man will live long enough to provide for his family. To the extent that money can represent a man's productive power, it doesn't matter when the properly insured man dies. It prevents social defaults which premature death otherwise gives, defaults quite as disastrous to society and frequently as dishonorable as those which occur in banking and general business. It is a banker for millions of people—a banker who cannot be ruined through panic but allows every depositor to draw on him at any time up to the extent of his cash credit.

## FIRE WASTE IN CANADA.

Fire prevention day will soon be here again, when the public's attention will be vividly called to the ravages of fire waste.

The record of this country in the matter of fire loss is so appalling that it is well that the public should have its attention aroused to the seriousness of this great economic loss which is allowed to go on from year to year.

What are the causes of the great fire waste on this continent? Negligent and unscientific house building is one. From the paper covered shack to the brick nobbed imitation of a solid building, all notion is left out of sight that such structures will burn just as surely as the wood and paper materials with which they are built.

We let rubbish gather in our attics and cellars, floor sweepings in our dwellings, and old rags in our factories, all of which will light into disastrous flame at the touch of a match. Village and town authorities too are very lax in permitting rubbish to collect, hot ashes in streets and lanes are surely a menace to the public safety from fire, as rotting vegetables and festering pools of water in the streets of a village are to the health of the villagers.

A curious circumstance is that the average man does not think that his house is ever going to burn down. His neighbor's factory or store may burn, his neighbor's dwelling may go some night, but the average man seems to have a notion that a special Providence watches over his property so doesn't bother over matters of fire prevention around about him. Before a permanent lessening of the fire waste is reached in this country, these things must be changed and it is the duty of everyone to help in forming a public opinion that will result in public economy in this vital matter of fire waste.

It is the individual citizen who is responsible for the prevalence of fire and he will continue to be so until he has been definitely trained. You could build a county full of so called fireproof buildings and a careless people would find a way to burn them up. The remedy lies in educating our citizens to the seriousness of this problem. The child who has been taught to regard fire as something that should be handled with the same care as explosives or deadly weapons is not likely to forget it when he reaches manhood or womanhood. The necessity for proper carefulness will always remain with such a man or woman. Only when this is true of all our people will our fire losses cease to shame us before the civilized world.

## CANADA NEEDS IMMIGRANTS

In this issue of "The Monetary Times" there appears the report of an address on the subject of immigration as delivered before the Union of Canadian Municipalities recently at Winnipeg.

In this address, Mr. Stead has some most interesting observations to make on what is considered by many to be a most vital problem so far as Canada is concerned. He handles his subject in a comprehensive way and analyzes the question from very many angles. The adoption of some clean cut government immigration policy is necessary if this country is to benefit in this connection.

The great need of Canada is population. Intending settlers should be carefully selected and those unsuited for the conditions to be faced should not be accepted.

Some government tribunal should be given authority to locate them geographically upon arrival and any machinery which may be set up for the handling of this work must be a combination of labor bureau and immigration agency if it would function properly and intelligently handle the flood of immigration that is likely to occur within the next few years.

The slogan of "Canada for the Canadians" as is pointed out by Mr. Stead sounds good but is hardly consistent when one considers that Canada has but three persons to the square mile and this after 55 years of effort to build up the population.

There are those in our midst who not only call into question the importance of encouraging immigration but do everything in their power to restrict it. From certain quarters, cries have come that to encourage immigration simply means additional workers and that to do this in the face of the unemployment which is very evident all over the Dominion would be undesirable..

Do those who raise such objections stop to consider that another worker also means the additional customer; the addition of another unit to the market for other workers' production?

It seems absurd in the face of all that immigration has done for the country to our south, to have to argue on such premises or to ask of what value the resources of that country would have been if an influx of people with energy, enterprise, sound character and industry had not come to develop them.

There are so many qualities of mind and heart that cannot be measured by any rule or formula that it is well nigh impossible for any kind of restrictive legislation to be framed that can truly say this man or woman or that man or woman should or should not be permitted to enter the Dominion. The personal equation here as in many other similar connections bulks large and it is possible, if the letter of the law is followed, not only to keep out most desirable types but also to allow undesirables to slip through. The problem is a large and important one and it behooves all Canadians to bring the best they have to bear upon it by way of suggestion in an effort to solve it on a basis equitable to all concerned.

Once more British Columbia has been advised to abandon the Pacific Great Eastern Railway and not to carry it to completion.

This latest report on the enterprise made by Mr. J. H. Sullivan does not make pleasant reading. In view of this fact, it will be interesting to see what action the provincial government will take in connection with the matter.

Occasionally municipalities invite tenders for their debentures, receive several offers, reject them all, and then call for tenders again.

It is very doubtful if this practice should be encouraged and it is sometimes difficult to understand what the municipal authorities expect to gain by adopting such a policy. It is not likely that the market would change between the short time that elapses between the two invitations.

The keen competition exisiting among bond brokers is the best possible guarantee that the town will get the highest price for its securities. The bond houses bid for the issue on the basis of a price at which they can sell the issue. And sometimes it happens that playing with the market as some of the municipalities do, tends to reduce the number of bidders.

It is a curious fact that although bond dealers must have the taxable assessment, the total debt, the tax rate and the population of a municipality before bidding for an issue of debentures, this information is seldom given in the official notice inviting tenders.

It sometimes happens that few and disappointing offers are received for an issue simply because this information is not readily available.

## REASON FOR NEW TAX SYSTEM

### Dr. Adam Shortt Justifies Victoria's Recommendation of Change in Fiscal Year and Semi-Annual Collection

In his report to the city council of Victoria on the city's finances, Dr. Adam Shortt has recommended that the city's taxes be declared due and payable at the beginning of the fiscal year, without any extra charges.

This recommendation is taken as a means of probably saving hundreds of lots from further sacrifice at tax sales, and as a means of encouraging the resumption of ownership of lots already sacrificed but still in the city's possession.

Dr. Shortt in his report states:

"The change from an annual to a semi-annual tax collection has been adopted in many Eastern municipalities, and in the more populous districts of London, England, a recent reduction to quarterly payments has been effected, with most beneficial results. The public utility corporations also, such as those supplying gas, electricity, telephone service, etc., have been gradually increasing the number of payments, until practically all of those in the East have adopted monthly collections, with entirely beneficial results as to facility for payment and consequent maximum collection of revenue.

#### Improve Payments

"In addition to an undoubted improvement in the payment of taxes, and consequent prevention of the accumulation of arrears, such an arrangement would practically abolish the very onerous system of borrowing from the bank to meet current expenditures, pending the collection of taxes at the end of the year. For the past year the interest charges on these revenue advances from the bank amounted to $59,196. Very little of this saving would be required to provide any extra clerical assistance in the monthly collection of the taxes. Already the city of Victoria has adopted this method in the collection of water rates, although in most Eastern municipalities the water rates are collected at the same period, or periods, as the general taxes. The Victoria civic authorities, I am sure, would not advocate, as a more efficient method for the collection of these rates, a return to the annual payment for water supplies.

"In order to render practicable the system of collecting civic taxes in monthly instalments, and to accomplish other improvements in the administration of the city's affairs, a change in the period of the fiscal year is also recommended. It is quite obvious, in most municipalities, that where, as has been the prevailing custom in the past, the financial year of the municipalities is made to coincide exactly with the aldermanic term of office, the result is that, especially where a considerable proportion of the council consists of new members, one or two months are consumed in preliminary discussions, some of which are very useful and informing, but much of it more or less futile, and all of it time-consuming. In the meantime, before financial provision is actually made for the expenses of the current year, the civic expenditures are being met on the basis of the estimates and provisions of the past year, and which cannot be materially disturbed when the budget for the current year is actually prepared and passed, in, say, the third month of the year. Now, it would be much better to frankly recognize this practically unavoidable situation, namely, that the expenditure of, say, the first three months of the year must be conditioned by the arrangements made and the processes in operation in the previous year. Under a reasonable change in the fiscal year, the mayor and council would be in a position to discuss more intelligently the actual requirements of the city for three-quarters of the current calendar year and one-quarter of the following year. It is much better that the new council should determine the financial policy and the revenue provisions for it, for a whole year rather than for only three-quarters of a year. In any case, of course, if sepcial or unforeseen circumstances arose to justify a modification of the normal arrangements for the fiscal year, such changes can be effected by the council which adopted the budget and fixed the rate of taxation, as also by the succeeding council for the first three months of their term.

#### Budget Policy

"It is only necessary to draw attention, in passing, to the fact that when changes take place in the Provincial or Dominion legislatures after an election, the budgets passed by the outgoing governments continue to operate until the new government has determined their policy and embodied it in a new budget. The same takes place from year to year where no immediate change in the personnel of the House, or of the government occurs. The preparation of a budget which would not come into operation, either in the collection or expenditure of revenue, until it is fully considered and definitely adopted, has advantages from almost every point of view; but especially from the point of view of the collection and expenditure of the revenue. Among other advantages, it permits of the operation of the proposed plan of declaring the taxes due and payable at the beginning of the fiscal year, for which the council has to provide. It also permits of the collection of taxes monthly, thus providing, as indicated, for the current expednitures throughout the fiscal year and avoiding the heavy expenses of bank borrowings.

"It may be of some interest to know that, since developing this proposal in connection with the situation in Victoria, and which is of general interest to all municipalities, a somewhat similar proposition has been made in the legislature of Ontario, to meet increasing difficulties in the present system, and it is likely to be more fully considered at the next session of the legislature.

"It is probable, in view of the practical conditions involved, that to fix the beginning of the fiscal year with the month of April would be most convenient for all requirements. The only difficulty which has been suggested is in connection with the preparation and sending out of tax bills, in order to provide for the collection of the first instalment of taxes. This difficulty, so far as it exists, is incidental to the present system of semi-annual collections in May and November in most of the cities of Ontario. In Ottawa I find no special difficulty in getting out the tax notices within a short period. Everything possible is prepared in advance, and then an extra staff of young women is employed for the mechanical work of filling out and mailing the lists."

## *Personal*

HON. F. M. BLACK, new Provincial Treasurer of Manitoba, was born in Scotland and began his business career in London, England. Early in the nineties, he was in the employ of the Canadian Bank of Commerce, serving in the Vancouver and San Francisco, Cal., offices. In 1901 he associated himself with the firm of P. Burns & Co., Ltd., of California, and for several years acted as treasurer for that concern During the years 1916 and 1917 he was president of the Calgary Board of Trade and also served as a member of the Public Utilities Commission of Alberta. He was chairman of the fruit and vegetable committee of the Food Control Board during the war and in December, 1917, was appointed treasurer of the United Grain Growers, Ltd., which position he now relinquishes to take the office of Provincial Treasurer.

W. A. ANDERSON of the North Star Grain Company, Winnipeg, has been elected a member of the Chicago Board of Trade.

S. A. HEWARD, has been appointed district sales manager of the Toronto office of The National City Company.

GEORGE M. MCKEE, general manager of the Donnacona Paper Company, Limited, Montreal, has retired from that position.

J. B. MUSSELMAN, has resigned his position as secretary of Saskatchewan Grain Elevators to become managing director of the Co-operative Elevator Company.

WILLIAM NOXON, Agent-General at London, England for the province of Ontario, arrived in Toronto on September 4th, to confer with the Government concerning the advancement of Ontario's interests in Britain.

J. G. STEPHENSON who has just completed his term as president of the Life Underwriters' Association of Canada has been appointed superintendent of ordinary agencies for the London Life Insurance Company.

The offices of superintendents of Eastern and Western ordinary agencies have been combined and Mr. Stephenson is to have jurisdiction over these combined offices.

Mr. Stephenson has been connected with the London Life since 1906 and has been eminently successful as a life underwriter and his promotion to the superintendency of all the ordinary agencies of the London Life is a very natural one, and , doubtless, will be of great advantage in the unification of the company's field staff and the establishment of a splendid esprit de corps throughout the entire agency staff.

## *Bank Branch Notes*

R. P. Donald has been appointed manager of the Bank of Montreal's branch at Kingsville, Ont., he was formerly manager of the branch at Leamington.

A branch of the Hochelaga Bank has been opened at Beauceville, Que., under the management of H. E. Filteau. The branch at St. Elzear de Laval has been converted into a sub-agency controlled by Cartierville, Que., branch.

C. Stirling Smith, former manager of the Bank of Montreal, 237 Main street, Moose Jaw, Sask., has severed his connection with the bank and has become identified with the Saskatchewan Creamery Company in the position of managing director and vice-president.

## PAYMENTS TO LIFE BENEFICIARIES

### Toronto Leads Canadian Cities, With Montreal Second and Winnipeg Third

Statistics just published by the "Insurance Press," New York, show payments to life insurance beneficiaries in 1921, arranged by cities of the United States and Canada. The eighteenth in the list is Toronto, while Montreal is twenty-fourth. The totals for Canadian cities are:—

Toronto, $2,324,000; Montreal, $2,002,000; Winnipeg, Man., $643,000; Vancouver, B.C., $598,000; Ottawa, $494,000; Hamilton, Ont., $367,000; London, Ont., $356,000; Quebec, $255,000; Westmount, Que., $215,000; Calgary, Alta., $212,000; St. John, N.B., $211,000; Victoria, B.C., $207,000; Edmonton, Alta., $201,000; Halifax, N.S., $185,000; Saskatoon, Sask., $183,000; Regina, Sask., $170,000; Kingston, Ont., $119,000; Stratford, Ont., $117,000; Brantford, Ont., $114,000; Sherbrooke, Que., $106,000.

The largest claim paid in Canada was $360,000, on the policy of the late Frederic T. Nicholls. Other large payments in Canada included Sir Frank W. Baillie, Toronto, $80,000; R. J. Wilson, oronto, $50,000; Lytton W. Shatford, Vancouver, $33,000; W. H. P. Hill, Montreal, $36,000; J. A. Moran, Saskatoon, $66,000.

#### Automobile Fatalities

The statistics show a startling increase in fatalities, due to automobile accidents. No figures for Canada were compiled in this department, but in the United States on a basis of 18 hours' operation a day, automobiles killed two persons every hour in 1921, or a total of more than 12,500 during the entire year. These figures are based upon a tabulation of the experience of fifty principal United States cities.

In the year 1920 the death rate was 149.7 per million population, and in 1921 it increased to 155.1 per million. The principal Eastern cities, despite their congested area, experienced a lower death rate per million than the Western cities.

**BUSINESS INSURANCE**

on the lives of the men who run the business is just as important as fire insurance on the property. Fire is a possibility but death is a certainty.

The ready cash from a Canada Life Business Insurance Policy at such a time will readjust matters and carry on the business as nothing else can do.

# Life Insurance Review for Half-Year

## New Business Issued in 1922 Shows Falling Off—Non-medical and Savings Insurance — Mortality Decidedly Favorable — Group Insurance Has Increased

By RANDOLPH S. MORTLEY

At the beginning of this year the insurance underwriters in Canada seemed to be divided into two camps—those who believed they had weathered the great storm of deflation in values for the most part, and felt justified in looking forward to 1922 as a year of steady growth and progress, barring any unforeseen calamity or handicap; and those who said that terminations and reductions of the huge amounts of business written in 1919-1920 would continue to be heavy, while the difficulty experienced last year in getting new business would also be experienced this year, hence (they argued) the results of 1922 might prove more unsatisfactory than those of 1921. Now that we have passed the half-year milestone the sequel, judging from the experiences ond reports of the vast majority of the Canadian companies and a few of the largest British and United States companies doing business in Canada, proves that the last named prophets, if they may be called prophets, were nearer correct than the first. But, judging from the hopeful, optimistic tone and spirit prevailing among all the companies during the opening months of the second half-year they may not be sustained in their forecast to the end of the year.

### A Falling Off in New Business

Although none issue financial statements or report their progress to the Government until the end of the year, the vast majority of companies, large and small alike, have reported a falling off in new business issued, compared with the figures for 1921, varying from 6 p. c. in the case of one of the oldest and largest corporations, up to 10, 15 and 17 per cent. with the rank and file. Many companies stated that the falling off in new business written, commenced to be felt about the middle of 1921, and continued through that year and well on into the middle of 1922; and with nearly all of them the lapses or "terminations" were heavier during the first half of this year, showing that the business has been more affected, in anything, by the trade depression during the year ending some time in June last than prior to that period.

### Net Gain of Insnrance Smaller

It is not surprising to learn that some companies, not many, are able to report a small increase of new business as compared with the first half of 1921, neither is it to be wondered at that occasionally a Life office reports gains all along the line: This is their usual experience. One company, not one of the largest, reports having writtten three-quarters of a million, or 19 per cent., more new business in 1922 than for the like period of 1921, and increased their premium income by 17 to 18 per cent. It is pretty safe to say that on the whole the new business written this year was better sold than in 1921, but the total of the actual net gain of insurance for the half year is undoubtedly smaller than for the first half of last year. In many companies the salesmen had to work harder even than last year, and accept applications for smaller amounts, consequently a larger number of policies was necessary to accumulate the same aggregate of insurance on the books.

### Non-Medical and Savings Insurance.

Another noteworthy feature of this year's record is that, apparently following the lead of the Hon. E. C. Drury, the Life Companies have adopted a "broadening-out policy," and among other things some have extended the age limit for non-medical applications so as to include those between the ages of fifteen and forty-five years, to assist the Field staffs in writing more business. Of course, the amount of insurance on this plan is limited, by some large companies to $1.500, but the concession places a heavier responsibility upon the salesmen, upon whom the company issuing these policies must rely more than ever for accepting only desirable risks. Ono of the direct results of the non-medical examination insurance is to reduce the average size of the policies issued by probaby 20 to 25 per cent.

Another development within tthe first half of 1922, having for its object the encouragement of more thrift among Canadians and the enlargement of insurance writings and savings bank deposits, is the resort of a few Canadian Life companies to the "Guarantee Savings Insurance" plan, which had been in operation in the United States for a number of years, with more or less success, but is reported to have latterly been on the wane and said to be practically dying out. For each $1,000 to be saved for Life Insurance monthly deposits of amounts differing according to age from 15 to 60 years, are made regularly in a savings bank for ten years only, at the end of which period the depositor will be paid back the amount deposited, plus 4 per cent. compound interest, less the cost of carrying the risk; or, if he should die during the ten years his beneficiary would receive the cash. The agreement differs from an ordinary Term Policy Insurance contract, inasmuch as it is not permanent; the contract may be terminated at any time during the ten years, at the will of the depositor, and is terminated at the end of that period, more often at the time of life when probably the holder of the policy most needs protection. But, as above intimated, there is latterly an insatiable desire among the companies for greater volumes of business, larger figures and totals in the annual reports.

### Terminations and Collections

All the companies report "terminations" heavier, if anything, than for the first half of 1921, especially in the Western provinces, where, according to some smaller companies, they have been abnormally heavy this year. This was expected by some of the older, larger companies, but nearly all report a decided change for the better since about the middle of June last, and during July and August a steady improvement has been noted. As the country resumes a more normal condition in its trade and commerce, with proper care on the part of the agents, "terminations" will become fewer and smaller.

Collections of premium renewals, which in the experience of many companies have been slower and smaller during this year than for the first half of 1922, will continue to improve and make a better showing from month to month during the second half year. In the West so much depends upon the year's crops, which, should they result as expected, will help all the companies to round up a good average year, especially from a financial standpoint. Some of the large as well as the smaller companies have experienced increased difficulty in making collections this year, while a few reported premium collections as good as expected, and interest payments better than expected. These are the exceptions.

### Mortality Decidedly Favorable

Death losses with all the companies this year have been again very light. "Rather more favorable than for 1921"; "slightly less than last year"; "mortality was exceptionally good, only 50 per cent. of the expected"; "quite equal to the previous year"; "even more favorable than last year." "Quite favorable, about the same as last year"; "very favorable, claims smaller than last year." These are some of the answers to the mortality inquiry, with no exceptions to the general rule. The decreased death losses for the first half of 1921 averaged 15 to 20 per cent. compared with the like period of 1920, and this year the decrease will average 25 per cent. in some cases, and in some others about the same as last year. It is most gratifying to find the good health conditions of last year on this continent being fully maintained in 1922. This happy experience may or may not continue till the end of the year; the existence of Life Insurance pre-supposes death as a constant contingency, but while it cannot be foretold, there is no gainsaying that for different reasons, especially evident at the end of the year, the Life Companies much prefer that their policy holders live as long as possible, if not longer.

### Investments and Policy Loans

The demand for mortgage and other investments this year at very attractive rates—7 per cent. to 7½ per cent. in Toronto and other Ontario cities or towns—has been fairly active, and the incomes of most, if not all, the companies from this source show a satisfactory increase compared with those of last year. There is quite a lot of building going forward in Toronto and Hamilton and other cities; the companies will be better able to value these securities, howeyer, when this year's crops have been harvested.

The demand for Policy loans this year is again reported large, and though some companies state that they are trying to discourage and limit them as much as possible, it is to be feared that the total borrowings will far exceed the bounds of discretion, and prove in the main a detriment [illegible] policy holders, agents and companies. It is now pretty generally conceded that the Policy loan as it works out, is a bad feature of life insurance contracts; it delays many surrenders, no doubt, and in a small number of cases does good, but because it is non-liquid it becomes less desirable as the number of such loans on a company's books increases. This clause in the contract often disturbs the company's line of permanent investments, and oftener than not proves a remorseful loss to the policy holder and beneficiary. The State Mutual, of Worcester, Mass., reports that their policy loans in number have latterly increased much more rapidly than their new policies, owing to the company having made a very large number of exceedingly small loans. The result of their investigation was to discourage as far as possible the assured from taking maximum loans, as a means of materially reducing the lapse rate; he should at least leave enough equity to provide for his next year's premium and interest.

### Group Insurance Has Increased

Group Insurance, which is in its infancy and therefore on trial in Canada, was not really a factor in last year's record of Life Insurance; there are at the most only three or four of the largest Canadian companies writing this form of protection ,but still it will be remembered that the amount of new business written in 1921 fell off as compared with the first year (1920), of its operation in the Dominion. This year, however, the Canada Life, Sun Life and others report that there has been quite an increase in the amount of Group Insurance written. The increased demand for it has come from governments and municipalities, rather than from industrial and mercantile corporations and similar bodies. Although the statement is often made by large employers, sincerely yet at random from memory, that there have been practically no deaths among their staffs for a number of years, this statement is not always borne out and justified by searching inquiry. It is only where a considerable pecuniary interest exists that a perfectly accurate record of such deaths is kept.

As far as they have gone the Canadian companies report the business satisfactory, but admit that it is a little early yet in their experience to pronounce upon it.

### Industrial Life Insurance

Although this is the earliest form of life insurance protection extant, being an outgrowth of the old English Guilds and old burial clubs, there are only four companies transacting this branch of the business in Canada—the London Life, London, Ont.; the Metropolitan and Prudential of the United States, and the Mutual Life and Citizens, of Australia. The larger companies report business larger and of a better character this year than last, with death claims less numerous and not so heavy as in 1921; while collections, too, are better than last year. Up to the present cancellations have been fewer than for the first half of 1921. This gratifying state of affairs is attributed mainly to the fact that buyers of Industrial Life Insurance in these times are stronger financially than formerly, and as a result the business in Canada is growing faster, with satisfactory results.

### Life Insurance Gains in United States

According to the table furnished by the Association of Life Insurance Presidents to the United States Department of Commerce, the total of new business issued, exclusive of revivals, etc., for the first half of 1922 in the neighboring Republic, showed a gain of about $186,000,000, or 6.28 per cent. compared with the like period of 1921; while the new paid-for insurances issued in June last showed a gain of nearly $58,000,000 over the total for June, 1921. These figures are tabulated from reports to the Association by some forty member companies, representing 77 per cent. of the total legal reserve business outstanding in the United States, the aggregate half-yearly amounts being $2,462,330,949 and $2,590,603, 622 respectively for 1921 and 1922; and for June the totals were $495,512,120 and $553,134,563 respectively in 1921 and 1922. Industrial and Group classes showed the most notable gains for the six months, the increase of the former this year being $82,000,000 or 13 per cent., and of Group Insurance there was an increase of $46,000,000 or 112 per cent. The gain of ordinary life insurance was $57,000,000, or 2½ per cent.

# Why a Lawyer Should Draw Your Will

There is nothing very formidable about drawing a will. But it needs experience, knowledge of the legal requirements, and exact use of language. Many people who attempt to draw their own wills fail in one or more of these respects. The wills they make, written throughout by themselves or with the doubtful aid of a printed form, are subject to dispute or delay in interpretation and in danger of being disallowed by the Court as not being wills at all. So these suffer to whom the will-maker intended the estate to pass.

Everyone should make a will. Make yours, but have your lawyer draw it up.

A will implies an executor. We act as executor.
WRITE FOR OUR BOOKLETS.

Assets under Administration $94,000,000

22 King Street East, Toronto

### Outlook for the Second Half Year

Almost without exception the executives of all companies with head offices in Toronto are confident of the best results for the second half year. Barring any untoward events unforeseen, the conditions are all favorable. Last year the second half was, if anything, worse than the first, but since the middle of June, 1922, new business has "picked up" wonderfully, some companies having experienced their biggest months; there has been a marked improvement in lapses and collections; the Field Staffs are aroused and are unitedly working harder; the mortality is very favorable, and the incomes satisfactory and promising; better than all, perhaps, the crops are smiling their brightest, pregnant with hope and promise. If the Canadian harvest turns out to be as good as expected, what is there to prevent all these circumstances culminating in a Life Insurance year quite as good if not better than 1921, enabling the companies to largely, if not altogether retrieve any lost ground?

## SPANISH RIVER PULP & PAPER MILLS, LTD.

The report of the Spanish River Pulp & Paper Mills, Limited, for the year ending June 30th, 1922, which has just been issued, indicates that the company has passed through a very satisfactory year, particularly so in view of the general trade depression that has characterized all phases of industrial activity and the fact that prices for the company's product have been somewhat lower than they were a year ago, shows the company's affairs to be in a healthy condition.

Earnings for the year was sufficient to meet all fixed charges and after paying the usual 7% dividend on both common and preferred shares, a substantial surplus was available for addition to reserve. Net earnings for the year, less reserve for depreciation, interest on funded debts and appreciation for contingencies amounted to $3,661,537, as against $4,836,001 for the year ending June 30th, 1921.

During the year the company's new hydro development at Smoky Falls was completed, 2 units of which were put into operation last November, while another 2 units are available for immediate use as they may be required.

The mills are now operating at 100% capacity and the prospects for future business are particularly good.

The following comparative figures for the year 1921 and 1922 will be of interest:

| | 1922. | 1921. |
|---|---|---|
| Current Assets: | | |
| Pulpwood | $5,228,098 | $7,663,072 |
| Woods equip., stores | 1,666,064 | 2,824,278 |
| Mill products | 523,519 | 699,865 |

| Accts. bills payable | 1,721,761 | 3,076,594 |
| Acc. int. bonds, notes | 273,554 | 281,325 |
| Accrued divs. | 276,765 | 376,765 |
| Profit and Loss Account: | | |
| Cons. credit bt. fwd. | 2,349,796 | 1,060,799 |
| Net profit for year | 1,784,917 | 2,936,150 |

## WHAT CONSTITUTES ABSOLUTE ESTATE?

### Alberta Supreme Court Decides Against Limiting Gift to Life Estate

In an application to the Alberta Supreme Court to interpret the following clause in a will. "All my personal estate, I give, devise and bequeath to my beloved wife, for her sole use and benefit during her lifetime, to be used by her as she shall see fit," it was dealt with in these words, by His Lordship:

"I was further asked to say whether or not the bequest to the widow of the personal estate" for "her sole use and benefit during her lifetime to be used as she shall see fit" gives a life estate only or an absolute estate. I have no doubt but that the language used in the will confers an absolute estate and not one for life only. A case almost identical came before me some time ago in re Macdonald, in which I decided that the widow took an absolute estate and not a life estate only. In Re Cooper, Justice Embury decided a case very similar to this one, where the expression used was "Everything I possess at my death" to my dear wife absolutely so long as "she may live," holding that this gave the widow an absolute interest."

# Wrong Impressions of Western Canada

### Financial Position of Farmers Has Been Exaggerated—Local Storms and Disturbances in Manitoba and Western Provinces Greatly Exaggerated—Wonderful Crop Results

(Special to The Monetary Times)

Winnipeg, Sept. 5.—In discussing the outlook in Western Canada recently with a prominent financial man of Winnipeg, he pointed out to The Monetary Times what he thought were gross mistakes in placing Western conditions before the public.

Wrong impressions have been sent abroad on several occasions this summer regarding local storms and disturbances. Quite early in the spring reports were sent out that Manitoba was in a bad way from the flooding of the Assiniboine River, and that a great deal of damage had been done, and that Winnipeg itself was in danger of being flooded out, when as a matter of fact this flood was purely local, and instead of the tremendous damage that was reported as being done, many hundred acres of land that were thoroughly soaked have produced very excellent crops this year. It is true some stock and a few barns were washed away, but these buildings should never have been built in the flats and places where the damage occurred

These reports were sent all over the American continent and to England, and have caused a wrong impression regarding local conditions in Manitoba. Another instance was the occasion of a rather severe wind storm which did local damage in Manitoba, and in this case very exaggerated reports, through the medium of the daily press, were sent abroad. It was reported for instance that $2,000.000 damage was done in Portage La Prairie, when as a matter of fact it is doubtful if the whole damage would exceed $50,000 or $75,000. These exaggerated reports are undoubtedly doing harm to Western Canada and should not be taken nearly as seriously as they sometimes are.

Another case has been the recent forest fires in British Columbia. These fires, while serious and most regrettable, are not nearly so serious as has been reported. It was stated that the town of Cumberland, B.C., also Nanaimo and several other places, were in danger of being wiped out from forest fires when, as a matter of fact, we have been told by a leading Winnipeg business man who was out there at the time, these places were not in any real danger.

The critical financial position of many Western farmers has also been exaggerated. Considerable talk is reported in the press and on the street in connection with financial interests being unduly severe with them. Premier Dunning of Saskatchewan, is making strenuous intervention on behalf of Saskatchewan farmers, and the Manitoba Government has been stampeded into similar action, asking loan companies and banks to ease up on pressing for immediate payment. When it is taken into account that the mortgage loan companies and banks have carried many farmers from two to three years without even interest payments being made, it cannot be said that they have been unduly severe, and it has not been their policy, nor will it be, to squeeze the farmers unduly. The banks do not want to have thirty or forty millions thrown on their hands in a short time, for they might have great difficulty in making profitable use of it. So long as they are satisfied of the integrity, industry and capacity of the customer there will not be much difficulty about credit.

The Western crop of this year is stated in many quarters to be a debt paying crop. This will undoubtedly be the case, and from the enormous crop of from three hundred and fifty to 370,000,000 bushels of wheat, 400,000,000 bushels of oats, 60,000,000 bushels of barley, 50,000,000 bushels of rye, 3,000,000 bushels of flax, very large amounts will be made available for distribution in this connection. Premier Dunning we are told, has gone so far as to even suggest a moratorium for Saskatchewan farmers, but this would create a very wrong impression of the West just at this time. Many farmers all over the West have undoubtedly been hard hit in the past two or three years, but why advertise this to the whole world when the year's crops are so satisfactory? When we are told from reliable sources that the implement firms and mortgage loan companies did not, in many cases, collect more than 50 per cent. from their outstanding last year, and the same possibly may apply for two or three years back; it cannot be said that they have been very badly treated.

What is needed in Western Canada today is a new spirit of optimism on behalf of all those interested in the development of the country. Instances like the above indicate that our leaders and the daily press are going the wrong way about bringing in the much desired development. The West undoubtedly needs a new flow of immigration, also of British and American capital for investment. Unsurpassed opportunities are here only awaiting capital for the development of the wonderful natural resources of the three prairie provinces and British Columbia.

A great many visitors from the Old Country, the United States and Eastern Canada have visited the West this summer, more so than for several years past, and if the West can give the correct impression to these visitors instead of talking about moratoriums, and making exaggeration of purely local conditions, it will be much to the advantage of the whole Western country. Considerable capital is said to be available in the Old Country for investment in Canada, and investors are undoubtedly looking in this direction, more so than for the last five years.

This coming year should see a marked return to better conditions, and it would seem to us that what is needed is to get away from the crying of hard times and present to the financial man and the investor the wonderful opportunities and advantages of the West.

## THRESHING PROGRESSING IN THE WEST

Harvesting operations are making good progress throughout Western Canada, and at many points in Manitoba harvesting is completed and threshing operations are in full swing. On the Portage plains last week along the main highway, fifteen threshing outfits could be counted at work within a few miles. The yield is turning out quite satisfactory. The average yield for Manitoba will reach twenty bushels per acre; Oats forty to fifty; and Barley about thirty. There has been scarcely any damage caused by frost up to the present time. The new crop is coming forward very rapidly and the Railways have everything in readiness to give good car service to the farmers.

The banks at this season of the year do a great deal to assist in the handling of the crop and will continue their policy of extending the greatest assistance to the farmers.

Bright hopes are entertained for improvement in business conditions as a result o fthe crop now being harvested. The banks are in splendid position to do their part this season from a conversation with a number of the Managers of Winnipeg branches. One experienced head of one of the larger banks in the city stated that "Farmers are our customers. We do not regard it as a favor to them to do their banking and provide the needed accommodation. We see that as a duty. We want a contented clientele." This same banker said to The Monetary Times that his bank was not pressing the farmers and that it was not their policy to force all the grain on the market within a short time.

The farmers of Western Canada as a whole are a fine body of men, but during the past few years have had a hard road to travel. Whenever things are good with them there is no tendency, in a very large majority of cases in their trying to escape from their obligations. The purchasing power of the Western farmers this year will be very great as the result of practically a 350,000,000 bushel crop.

A good many farmers are undoubtedly "in pretty deep" and the suggestion of Premier Dunning of Saskatchewan that the banks allow for a "gradual liquidation" will undoubtedly be carefully considered.

Another western bank head stated he had already confirmed the recommendations of some local managers to carry over for another year some customers who were in difficulty. Men who had been with the bank for years and were known for their reliability, had to be carried along as needed; the banks did not want to evade a plain duty.

# To Holders of Five Year 5½ per cent Canada's Victory Bonds

**Issued in 1917 and Maturing 1st December, 1922.**

---

## CONVERSION PROPOSALS

---

THE MINISTER OF FINANCE offers to holders of these bonds who desire to continue their investment in Dominion of Canada securities the privilege of exchanging the maturing bonds for new bonds bearing 5½ per cent interest, payable half yearly, of either of the following classes:—

(a) Five year bonds, dated 1st November, 1922, to mature 1st November, 1927.

(b) Ten year bonds, dated 1st November, 1922, to mature 1st November, 1932.

While the maturing bonds will carry interest to 1st December, 1922, the new bonds will commence to earn interest from 1st November, 1922, GIVING A BONUS OF A FULL MONTH'S INTEREST TO THOSE AVAILING THEMSELVES OF THE CONVERSION PRIVILEGE.

This offer is made to holders of the maturing bonds and is not open to other investors. The bonds to be issued under this proposal will be substantially of the same character as those which are maturing, except that the exemption from taxation does not apply to the new issue.

Holders of the maturing bonds who wish to avail themselves of this conversion privilege should take their bonds AS EARLY AS POSSIBLE, BUT NOT LATER THAN SEPTEMBER 30th, to a Branch of any Chartered Bank in Canada and receive in exchange an official receipt for the bonds surrendered, containing an undertaking to deliver the corresponding bonds of the new issue.

Holders of maturing fully registered bonds, interest payable by cheque from Ottawa, will receive their December 1 interest cheque as usual. Holders of coupon bonds will detach and retain the last unmatured coupon before surrendering the bond itself for conversion purposes.

The surrendered bonds will be forwarded by banks to the Minister of Finance at Ottawa, where they will be exchanged for bonds of the new issue, in fully registered, or coupon registered or coupon bearer form carrying interest payable 1st May and 1st November of each year of the duration of the loan, the first interest payment accruing and payable 1st May, 1923. Bonds of the new issue will be sent to the banks for delivery immediately after the receipt of the surrendered bonds.

The bonds of the maturing issue which are not converted under this proposal will be paid off in cash on the 1st December, 1922.

W. S. FIELDING,
Minister of Finance.

Dated at Ottawa, 8th August, 1922.

# Shall Allied Debts to U. S. be Cancelled ?

## Analysis of Basic Principles Underlying Alleged Debts of Allies—Self Interest Promoted Advances

BY T. B. MACAULEY
President Sun Life Assurance Co. of Canada

Insurance men are happily united by such strong bonds of co-operation and comradeship that I venture through the courtesy of the insurance and financial press to address you on a question in which I am much interested. Though not directly related to insurance, I hope you will in your friendship allow me a little latitude, as you do to speakers at our conventions.

I have in mind the Allied debts to your Government. You may suppose that after the recent announcement by Earl Balfour there is little to be said, but on the contrary the discussion of the question is steadily spreading and with increasing knowledge and interest. I suggest that we eamine the facts judicially applying to them those principles which would govern an American court in a similar case between individuals.

The Allies and Canadians consider that they fought for all nations that did not desire a Kaiser-ruled world, and that the United States therefore had a stake in the war even from its commencement. Had Germany won, she would have had control of all Europe, all Africa and most of Asia. She would probably have made an alliance with the rest of Asia. Her eyes were already fixed covetously on South America, and with the vast resources then at her disposal, what would she have cared for the Monroe Doctrine? The United States would have had to face the rest of the world alone. I do not press this point, however, for I do not suggest that the United States owes anything for the early years of the war. I begin with the day she officially declared war, April 6th, 1917.

### Needed Time to Understand

Even if the United States had an interest from the beginning it does not follow that she should have acted at once. Her people needed time to understand the issue. Her distance must also be remembered. If a fire breaks out in a city block, the interest of the neighbors is in proportion to their distance. The houses immediately adjoining are in greater danger than those a few doors removed. In this case the conflagration began in Central Europe, but at once spread to the adjoining houses, France and Russia. Between them and the United States there were other houses, Britain and the British Dominions. In the absence of a League of Nations to act as general fire brigade, each nation had to decide for itself whether it should join the fire-fighters, and if so, when. Being furthest removed the United States was naturally later in co-operating. By the time she did come in, the flames were raging in all the adjoining houses, and some had already collapsed. There was danger that they might make a clean sweep. Whether she could have intervened earlier is hardly for outsiders to say. We may however ask, what would have happened if she had intervened at the time of the Lusitania incident? The war would have been shortened by two years, millions of lives and tens of billions of dollars would have been saved, the condition of the world would not be what it is, and these debts would not exist. This, however, is of sentimental interest only. We must begin with her declaration of war.

How did these debts arise? For a year after the entry of the United States the tension was at its height. Each nation had to utilize to the utmost every resource it possessed. The United States required time to raise, equip, train and transport her armies. During that terrible year the Allies had to hold the enemy back with little assistance from her in man-power. France, the British Empire and Italy kept 6,500,000 men in the field, and of these one pillion were killed. The Allies could supply men, but were already bled white financially. The United States could not yet supply men, but had a plethora of wealth. Each contributed what it would—the Allies men the United States military supplies and food, or rather funds to purchase them. It was a time for action rather than for commissions to discuss mutual obligations, so that the acknowledgements which the Allies gave took the form of notes. These are the debts which the Allies are now asked to pay.

### Assisted With Supplies

Supplies were the one form of assistance which the United States could render from the moment of her entry. American manufacturers were already turning out artillery and munitions on a large scale. The government furnished these indirectly. Their claim now rests on the fact that they supplied the cost of the materials instead of the materials themselves. Is the difference very great?

Had the American armies been then in France these munitions would have been used by them. Because they were not yet there, and these shells were fired by Allied troops against the common enemy, must they also be paid for by French and British taxpayers? Should not Americans rather rejoice that by these supplies they were able to take an effective part in the struggle?

The services of the men placed by the Allies in the fighting line were given to the common cause. The lives sacrificed during that year were given, for alas they cannot be restored. Should the contribution of the United States be on a different basis, a mere loan to be repaid? Are dollars more valuable than lives?

Our next question is why did the United States advance these sums? Reasonable self-interest is the basis of all business transactions, and, I think we will agree that it was also the prime motive actuating the various countries. France had no option, for she was invaded. Britain's bond to defend Belgium was powerfully seconded by self-interest, for it was better to fight with France as an ally, then to fight later alone. In like manner it was better for the United States to fight with 6,500,000 veteran troops as allies, than afterwards to fight alone. I do not mean that there was no altruism in the motives of the United States and Britain, for there was, but as the events recede in time, we realize that self-interst was in every instance a dominant factor. It was a case of helping others - and ones self.

France and Britain threw every available man into the field because it was to their interest to do this. Britain also advanced huge sums to her Allies because it was to her interest that they should make a strong resistance to the common enemy. She certanly did not make her loans as commercial transactions. Why did the American government make advances? For the same motives that actuated Britain. It was to her advantage that the Allies should make an effective resistance while her armies were getting ready. Had she not done this the war-her war-might have been lost before she could strike a blow. To claim that these advances resemble ordinary commercial loans, is to ignore facts. They were advances to associates to be used in prosecuting the joint enterprise, for the benefit of all; and they were made because it was to the advantage of the American government to make under the supervision of the U.S. Treasury Department.

Let us imagine a case between individuals. A banker and a farmer own large adjoining farms. They put in a drainage ditch for their joint benefit. There was a great rock ledge to cut through, and the work was costly and dangerous The farmer supplied and paid the large number of workmen required. The banker supplied the quire no further investigation. Tsls informa- a staement, and nothing will be or more value aCnada the business of insurance against dam- them. Incidentally these advances were made money to purchase tools and blasting powder. The banker now demands payment of the cost of the materials he supplied, and allows the farmer no credit for the men he employed. Were not the services of the workmen as important as the tools and powder? The workmen needed tools, but tools were useless without workmen. What would any of you hard-headed business men say if you were that farmer? Would not a court hold that the parties were not ordinary debtor and creditor, but associates; that this was not an ordinary loan, but an advance to be expended in the work in which both were interested; and that if the farmer had expended more than the banker he had a complete offset and owed nothing. (

Even when the American troops did arrive in force and began to take their glorious part in bringing the war to a conclusion, they were still very deficient in artillery. In many cases they advanced under the protection of a screen of shells from French or British artillery This was ideal co-operation. It saved untold thousands of Amercan lives and brought victory. Yet much of this artillery and of those shells had been purchased in the United States, and their cost forms part of the so-called debt.

In killed and seriously wounded France lost in the war 2,100,000; Britain, 1,500,000; and Italy 1,000,000. In men actually killed the Allies lost 2,650,000. The United States lost 50,000 killed. Canada lost 52,000 killed.

Prior to the war the wealth of Britain was estimated at $85,000,000,000. She has now a debt of about $35,000,000,000. or say forty per cent.

France's wealth was estimated at $65,000,000 000. Her debt is now about $30,000,000,000 or nearly fifty per cent.

The United States has an estimated wealth of $220,000,000,000, with a war debt of $22,000,000,000, or ten per cent. If the amount now claimed be repaid her debt will be reduced to $12,000,000,000, or a little over five per cent.

The Allies, from the day each entered the struggle, applied all their resources in men, money and materials, to the prosecution of the war, giving everything they had without stint. Should the United States with her vast resources contribute practically nothing for a year after her entry? Was she not as wholehearted as her associates?

During the Napoleonic wars, the British made heavy advances to her Allies and these she freely cancelled. It was felt that the most wealthy nation should properly contribute more financially than the others.

### Summing Up

To sum up: These advances were made after the United States entered the war; they were made from motives of self-interest, exactly as were the contributions in men or money of the other associates; there is no reason why contributions of one associate should be treated as loans while those of the others are treated as gifts; these advances were not ordinary loans, for they were made for expenditure for the benefit of all the associates and because the United States desired those expenditures to be made; if these advances be treated as mere loans the United States made no effective contribution to the joint war for a year after her entry and has not borne her reasonable share of the joint burdens and, finally, the Allies have counter-claims which should be a complete offset. These claims have no basis in equity and as to law, I submit that if the case were between individuals an American court would reject them. That Britain admits the debt merely means that she prizes the friendship of the United States too highly to have a dispute, and agrees to pay rather than tarnish her national honour in the eyes of anyone.

### American Opinion

These views are held by many of your own most eminent citizens, including such an outstanding legal authority as Justice Clarke of the United States Supreme Court. I quote from an address made by him:

"Consider what our condition would have been with Germany victorious. Such is something of the abyss into which we should have been plunged if we had not joined with the Allies and made victory possible.

"What saved us from the immeasurable calamity of such a war? It was the French, Bri-

---

*(This article from the pen of Mr. Macauley was unfortunately received too late for publication in our last issue. Its appearance then in view of the large number of insurance men from across the line in attendance at the recent Underwriters convention in Toronto would have made the article more opportune. However the observations of Mr. Macauley on this important subject and the influence which the question has on reconstruction problems in Europe (which in time affects conditions in world over) will be of interest to all students of world affairs).—Editor.

# Recent Fires

Fire losses in Canada during the week ended September 6, are estimated by The Monetary Times at $685,000, compared with $202,700 the previous week. The details are as follows:

**Aurora, Ont.** Sept. 6th. Barns on Aemelius Jarvis' "Hazelburn" farm.

**Bath, Ont.** Sept. 1st. Barn of Arthur Galt at Hawley. Insurance $5,000.

**Brigham, Que.** Aug. 30th. Barn belonging to Mr. Froley at Brookport.

**Chatham, N.B.** Aug. 29th. G. T. O'Brien's store. Loss, $20,000, partly covered by insurance.

**Chatsworth, Ont.** Sept. 2nd. Barn of Roy Wheildon. Loss, $5,000; insurance, $3,000.

**Cobalt, Ont.** Sept. 4th. O'Brien silver mine. Loss, $250,000.

**Cornwall, Ont.** Sept. 1st. Home of Frank Sawyer. 1 fatality.

**Emerald, Ont.** Aug. 31st. House and bakery shop of Albert Hoselton.

**Fairbank, Ont.** Sept. 5th. Barn on the Sanders Farm, Dufferin street. Loss, $7,000; insurance, $1,000.

**Halifax, N.S.** Sept. 4th. Residence at 47 Faukland street. 1 fatality.

**Hamilton, Ont.** Sept. 4th. House owned by Charles Ortwein, 83 Dalkeith avenue. Loss, $3,500, mostly covered by insurance. Cause, spontaneous combustion.

**Jerseyville, Ont.** Sept. 1st. Home of Stacey Howell.

**Lake Frantiere, Que.** Sept. 1st. House belonging to Mathias Veilleux. Loss, $17,000; insurance, $5,000.

**Limoilou, Que.** Sept. 1st. Shed and stables belonging to Constable Boucher. Loss, $3,000, covered by insurance.

**Markdale, Ont.** Aug. 31st. Stable belonging to Isaac Snell. Cause, lightning. Insurance, $700.

**Milverton, Ont.** Aug. 29th. Barn and garage of the Grand Central Hotel, owned by J. Allison. Loss, $10,000.

**Moncton, N.B.** Sept. 1st. Store occupied by Abdo Odee at 489 Main street. Loss, $9,000.

**Montreal, Que.** Sept. 4th. House of Jack Freedman, 829 St. Urbain street. Loss, $1,000.

Sept. 3rd. Premises of the Tip Top Tailors, 429 St. Catherine street west.

Aug. 30th. Apartment house owned by E. C. Miner at 231-241 Bishop street. Loss, $2,500, covered by insurance.

**Mortlach, Sask.** Aug. 27th. Barn belonging to Percy Smith. 1 fatality.

**Pinkerton, Ont.** Sept. 2nd. Knox Hotel stables. Loss, $2,000.

**Portsmouth, Ont.** Aug. 31st. Three residences occupied by V. Glendenning, W. S. Sherbino and Fred Payne.

**Quebec, Que.** Sept. 1st. "La Misericorde" Hospital. Loss, $35,000, partly covered by insurance.

## FIRE LOSSES ARE LOWER

### August Total Shows Substantial Decline From Previous Month—Also Lower Than Last Year

Fire losses in Canada for the month of August are estimated by The Monetary Times at $1,278,500, compared with $3,652,000 in July and with $3,014,860 in August of last year.

| | |
|---|---|
| Large fires reported | $1,278,500 |
| Small fires reported | 147,855 |
| Estimate of unreported fires | 500,000 |
| | $1,926,355 |

The Monetary Times' record for the past two years shows the following monthly losses:—

| Month | 1921 | 1922 |
|---|---|---|
| January | $2,237,900 | $3,597,500 |
| February | 2,735,500 | 4,062,400 |
| March | 2,112,200 | 4,331,750 |
| April | 2,510,700 | 2,532,100 |
| May | 3,811,350 | 2,956,450 |
| June | 2,303,400 | 2,612,550 |
| July | 2,880,250 | 3,652,000 |
| August | 3,014,860 | 1,926,355 |
| September | 2,410,300 | |
| October | 2,199,700 | |
| November | 1,818,750 | |
| December | 2,897,200 | |
| Totals | $30,932,110 | $25,681,105 |

The following are the August fires with a loss of $10,000 and over:—

**St. Stephen, N.B.**—Aug. 1. Garage. $20,000.

**Guelph, Ont.**—Aug. 6. Office. $25,000.

**Lac Frontiere, Que.**—Aug. 2. Business section. $100,000.

**Montreal, Que.**—Aug. 3. Apartments. $15,000.

**New Westminster B.C.**—Aug. 1. Garage. $10,000.

**St. Henri, Que.**—Aug. 4. Plant. $25,000.

**Sutton, Ont.** -Aug. 4. Bake shop. $50,000.

**Truro, N.S.**—Aug. 4. Mackay Block. $40,000.

**Thamesville, Ont.**—Aug. 3. Mills. $10,000.

**Victoria, B.C.**—Aug. 2. Mill. $39,000.

**Barona, Alta.**—Aug. 12. Buildings. $26,000.

**Britannia Heights, Ont.** — Aug. 16. Farm Buildings. $18,000.

**Campbellville, Ont.**—Aug. 12. Farm Buildings. $10,000.

**Esquesing, Ont.**—Aug. 8. Barn. $20,000.

**Fort William, Ont.**—Aug. 7. Garage. $20,000.

**Montreal, Que.**—Aug. 8. Hospital. $20,000.

**Transcona, Man.**—Aug. 9. Buildings. $10,500.

**Aylmer, Que.**—Aug. 17. Sawmill. $75,000.

**Burlington, Ont.**—Aug. 16. Barn. $15,000.

**Byng Inlet, Ont.**—Aug. 19. Plant. $100,000.

**Corbin, B.C.**—Aug. 21. Roundhouse. $70,000.

**Fort William, Ont.**—Aug. 23. C.P.R. shed. $100,000.

**Gananoque, Ont.**—Aug. 20. Residence. $80,000.

**Half Island Cove, N.S.**—Aug. 18. Plant. $20,000.

**Leamington, Ont.**—Aug. 17. Elevator. $25,000.

**Lime Ridge, Que.**—Aug 20. Barn. $40,000.

**Lower Millstream, N.B.**—Aug. 18. Buildings. $30,000.

**Morrisburg, Ont.**—Aug. 18. Buildings. $20,000.

**Mount Albert, Ont.**—Aug. 23. Buildings. $30,000.

**Oakville, Ont.**—Aug. 19. Stables. $35,000.

**Beamsville, Ont.**—Aug. 26. Plant. $40,000.

**Halifax, N.S.**—Aug. 23. Mill. $15,000.

**Hamilton, Ont.**—Aug. 24. Store and warehouse. $10,000.

**London, Ont.**—Aug. 26. Rink, residences and garage. $50,000.

**Toronto, Ont.**—Aug. 24. Building. $15,000.

**Winnipeg, Man.**—Aug. 29. Cotton shed. $50,000.

The following is the class of structure destroyed or damaged:—barns,46; residences, 39; buildings, 14; farm buildings, 10; stores, 10; plants, 10; mills, 8; garages, 5; stables, 4; bakeries, 4; warehouses, 4; sheds, 4; factories, 2; lumber, 2; apartments, 2; hospitals, 2; business blocks, 2; elevators, 3; workshop, 1; office, 1; business section, 1; cafe, 1; creamery, 1; bank, 1; dry kiln 1; post office, 1; livery, 1; junk yard, 1; orphanage, 1; dance pavilion, 1; hotel, 1; roundhouse, 1; granary, 1; kiln, 1; holiday house, 1; hall, 1; rink, 1.

## SHALL ALLIED DEBTS BE CANCELLED?

(Continued from page 14)

tish and Italian soldiers who held the battle line in Europe for the year that was necessary for us to train and equip and transport to France and the great armies which, thank God, proved sufficient to cast the deciding weight into the wavering balance of the war. No amount of money can pay for such a service. More than a million soldiers of our Allies were killed, and another million gravely wounded during that fateful year.

"Our first and indispensable service, the only one that we were able instantly to render, was to furnish to our all but financially exhausted Allies the advances to enable them to hold the battle line until we could come. What was the money loaned for, and what was it used for? Supplemented by other billions which the Allies themselves provided, the money was used to purchase the cannon, the ammunition, the clothing and food that maintained the six and a half millions of soldiers, who for that year of unparalleled carnage held back the common enemy not less for our country than for their own.

"In length of service, in loss of life, even in money spent, the sacrifice of our Allies was so much greater than ours that we shall never be able to convince them, or to convince impartial history, that these loans used in the common cause, should in justice be returned to us by our prostrate friends.

"The war was the noblest joint enterprise in the history of mankind, and our country discharged the part assigned to it in such a high fashion that the glory of it will be the most precious possession of those who shall come after us for centuries unless we despoil them of it by making America the Shylock among the nations by the collection of these debts."

I protest however against this phrase being applied to my American friends, for I know well that if they appear to take that position it is because of ignorance of the facts.

"To make payment, the nations must impose crushing taxes on their people condemned to pinching poverty year after year to pay a debt which not one of them believes to be morally or justly due.

"We should tell the truth to the country. We should say to the people that these loans are neither a moral or a just obligation, because if they were paid we should not have borne our just share of the burden of defending the great common cause." Surely the opinion of this great American jurist should have weight.

### Cancellation of Debt

The allied peoples do not ask a donation. They ask only justice.. It should, however, be realized that this claim is one of the principal obstacles to the rehabilitation of Europe and of the world. The lessening of the burdens of taxation in countries where they are a crushing weight is a first essential. But for this claim there would already have been a wholesale cancellation of inter-Allied debts and probably other adjustments. Payment of these demands would mean a further addition to the taxes in Britain of from five to seven per cent. on all incomes from £100 up.

It is sometimes said that the cancellation of these debts would encourage Europe in further war expenditures. This is certainly not true of Britain. As for other countries, how can their action be influenced by insisting on a claim which they consider unjust and do not intend to pay? In any case would that create a debt if none now really exists?

And now I rest my case. The judgment ofthe American people is sound, but they must hear both sides. My own conviction is that when they understand the facts they will demand that their government cancel these claims gladly, and without conditions. They will pay their way.

You, my friends, are one of the most influential elements of the nation, and your opinions carry weight and reach far even if you do not agree with me, I at least hope that you will accept my words as those of one who has tried to state his case with fairness and goodwill.

Polson) Hamilton, $40,000; Carlton Theatre, Ltd. (Hilliar B. Bell) Toronto, $50,000.

---

## NEW POST OFFICE SYSTEM

Announcement is made by the Postoffice Department that a C.O.D. service in connection with mail matter will become effective in the Dominion on October 1. The regulation under which the service will be operated are as follows:

On and after October 1, 1922, a C.O.D. service in connection with mail matter will be established within Canada, whereby charges due the sender up to $100 may be collected from the addressee and remitted to the sender by Postoffice money order.

### Includes Rural Routes

This service will apply only in the case of mail matter posted at a money order postoffice for delivery at another money order postoffice within Canada. Rural routes, starting from money order postoffices are for this purpose considered as money order postoffices and may be granted a C.O.D. service.

The C.O.D. fee also covers insurance and registration.

(a) The C.O.D. fee covers insurance in the case of parcels prepaid at parcel post rates, to the extent of the value, against loss, abstraction or damage while in the custody of the postal service, not to exceed $50 when a 15-cent fee is paid, and not to exceed $100 when a 30-cent fee is paid.

(b) The C.O.D. fee covers registration in the case of articles prepaid at other than parcel post rates. This carries with it indemnity for loss only, which in no case shall exceed $25, or the actual value of the lost article when the same is less than $25.

Under the heading of general regulations, the announcement states that in specifying charges to be collected, the sender may include postage and C.O.D. fee paid.

It is forbidden to send articles C.O.D. which have not been ordered or requested by the addressee.

## AUGUST INDEX NUMBER DECLINES.

### Wholesale Prices Are Down Three Per Cent., from Previous Month.

The index number of wholesale prices in Canada. constructed by Prof. H. Michell of McMaster University, Toronto, stood at 164.7 at the end of August, thereby registering a decline of 3 per cent. from the previous figure of 165.3 for the month of July. This compares with 176.7 for August, 1921, 254.4 for August, 1920, and 249.3 for August, 1919. The index for the 20 foodstuffs included stood at 175.7 compared with 179.2 for July, thus registering a decline of 1.9 per cent. This compares with 194.8 for August, 1921, 189.0 for Aug., 1920, and 278.6 for August, 1919. Among the foodstuffs, beef, butter, flour, oatmeal, potatoes and canned peas declined, while fish and currants advanced. The index for the 20 manufacturers' goods stood at 153.8, thus registering an advance of 1.6 per cent. over the previous figure of 151.3 for the month of July. This compares with 158.5 for August, 1921, 219.7 for August, 1920, and 220.0 for August, 1919.

Advances were registered in raw cotton. hides, iron, steel billets,. galvanized sheets and rubber, and declines in cement and coal oil.

It may be noted as interesting that. since April of this year foodstuffs have declined 2.4 per cent. While manufacturers' goods have advanced 7.9 per cent. This probably indicates that, while the cost of living is still slowly dropping, the cost of manufacturing is rising fairly sharply. This view is confirmed by the continual decline of the index number of retail prices of the Department of Labor. This movement may, on the whole, be taken as showing a satisfactory trend. since it really means that disparities in price levels are being evened up, and that we are approaching a more uniform price level of all commodities in Canada.

The movement this month calls for little comment, the fall in foodstuffs being seasonal, and to be expected. The advances in iron and steel products account mainly for the rise in manufacturers' goods.

## FISH CAUGHT

The halibut catch at Prince Rupert totalled 2,250,000 pounds during the month of August. During August of last year the catch was practically the same.

## APPLICATIONS TO SELL COMPANY SHARES

Many applications for the right to sell shares in Manitoba are before the Public Utilities commission, and in connection with them Commissioner P. A. Macdonald has issued the following statement:

"Many applications are being brought before the Public Utilities commissioner by companies for certificates under provisions of the Sale of Shares Act, granting permission to offer its capital stock in the province. Information is also sought by interests contemplating organization and subsequent flotation of stock and the certainty of obtaining certificates providing they measure up to the standards required by the Act. Applications of meritorious character and which should not be retarded in obtaining necessary capital will, in the public interest, be formally received by the commissioner, and disposed of as expeditiously as the reduced staff will allow."

## WAGE INCREASE

Wage increase running from ten to fifteen per cent., and affecting all classes of workers at Sydney Steel plant, were announced by E. P. Merril, general manager of the British Empire Steel Corporation.

Approximately 2,800 men are affected by the new order.

The new schedule will include a general levelling up of rates in different departments.

The minimum rate, that paid for common labor, is increased from 24½ and 26 cents to 28 and 30 cents. A detailed statement of all rates has not yet been worked out.

The official announcement by Mr. Merrill reads as follows:

"A wage increase is being announced at the steel plant today. Labor will now be 28 cents and 30 cents instead of 24½ and 25 cents. A number of readjustments have been made and inequalities corrected. The increase will average from 10 per cent. to 15 per cent. most of the rates being increased the latter figure."

## .FREIGHT SURCHARGE

Announcement is made by the Railway Commission that, in accordance with the judgment and order of the Board, dated January 14th, 1921, the rate of exchange in connection with shipments of freight between points in Canada and the United States, from September 1st to September 14th, inclusive, will be 1-32 of one per cent. No surcharge will be collected on international business, either freight or passenger.

## WANT CHANGES IN BANKRUPTCY ACT.

Efforts to obtain radical changes in the Federal Bankruptcy Act are to be made this fall, it is stated. Objection is to be raised both in regard to violation of the civil laws of Quebec Province and in view of the fact that it has proved detrimental to business in this part of Canada. The exact means of obtaining the repeal of the act or, at least, radical amendments, so as to meet the requirements in Qnebec, have not been announced. The campaign will be conducted by the interested parties and it is stated authoritively that several members of the Federal Cabinet have manifested their intention of supporting any step in this direction.

## THE NEW STAMP TAX

The new stamp tax, combined with the sales tax, continues to demonstrate that it is a money-maker for the public treasury. At the end of August the receipts from these sources promise to be near the fifty million mark, about two-thirds of it resulting from the stamp tax and the remainder from the sales excise.

Up to July 20th the receipts under this heading were $22,000,000, including the sales tax and the modified stamp tax as in force in the last few years. The new scale of stamp levies came into force on August 1st and up to the 20th inst. the revenue from this and the sales tax together was $33,000,000. The returns are regarded as propitious, the more so because August is not the heaviest month for commercial transactions.

# May Send Representative To International Conference

### Bank Branch Question to be Discussed at Annual Convention of American Bankers Association—Demand for Dominion 5's Continues Strong

(Special to The Monetary Times)

New York, Sept. 7.—Canadian bankers here tell your correspondent that an international economic conference will undoubtedly be held in Washington in November after the elections and that the Dominion of Canada will be asked to send a representative. This project has been under discussion for months past, according to information made available here, but its realization has had to wait upon the change of heart on the part of France which has now become apparent. Usually well informed international bankers are saying in private that should Lloyd George succeed in obtaining any large measure of support for his plan to trade debt adjustments for a certain measure of disarmament on the part of France, American financial assistance to Europe will be forthcoming after the holding of the proposed Washington conference.

While the branch banking question still continues to agitate banking circles in west, middle west and southeast, and will undoubtedly form the principal topic of discussion at the annual convention of the American Bankers Association to be held in New York City early in October, those in close touch with the political side of this question seem to be of the opinion that none of the bills now before Congress authorizing national banks to establish branches will pass this session. For while generally speaking Congress is said to favor the granting of the right to the national banks to establish branches within the limits of the town or city where the individual bank's headquarters is located, country congressmen and senators are very cautious in expressing their willingness to support branch banking. Many of them are obviously awaiting the conclusion of the A.B.A. convention, when the general feeling of the association regarding branch banking will be made clearer than it is at present.

The demand for Dominion of Canada five and a half's of 1922 continues strong. While this demand is partly due to the strong market for all kinds of gilt-edged Canadian securities, it is also thought to be a clear indication of the desire on the part of large numbers of American investors to take advantage of the conversion privilege that goes with the 1922 issue.

Conclusions drawn from the action of the security market are supported by the fact that the agencies of most of the Canadian banks in New York report that holders of the 1922 issue are applying for the new issues of 1927 and 1932 freely.

Canadian wheat is beginning to come heavily into competition with American grain in the export market, according to reports current on the Produce Exchange. In face of the relatively light demand for export wheat, the American exporters are feeling the competition.

London and Manchester, according to gossip heard in local shipping circles, are attempting to exert pressure on the Dominion Government to induce it to give every possible consideration to the St. Lawrence Great Lakes Canal project. British opinion, it is said, favors the canal scheme, because it is inclined to believe that its adoption would eventually lessen the price of British foodstuffs.

---

## CANADIAN BACON NOT UP TO THE MARK

### Canadian Products Rank Fifth in Price in Great Britain

Various discussions have taken place recently regarding the place that Canadian bacon takes in the world's market, and to show the true position of the product Thos. Olsen, of the Harris Abattoir Co. of Toronto has contributed the following remarks regarding bacon hogs:

"England is the natural market for the surplus Canadian hogs, but in order to reap the full benefit of this market, our production must come up to the English consumers' requirements.

"Referring to the average prices for 1921, taken from official English market Wiltshire bacon quotations, we find our Canadian bacon in fifth place as follows:

| | |
|---|---|
| Irish .......... | 135s 2d to 153s 2d |
| Danish ........ | 136s 1d to 149s 4d |
| Swedish ....... | 130s 6d to 142s 9d |
| Dutch ......... | 118s 3d to 130s 8d |
| Canadian ...... | 104s 6d to 129s 5d |

"This means that our Canadian bacon shows an average discount of approximately 4c per pound below the top quotation.

### Canada Gets Market

"During the war Canada snatched the English bacon market away from Denmark, which was due to the fact that Denmark was unable to get delivery of grain from her regular sources. Her hog population was reduced from two and a half million to some 40,000, and her exportation dwindled from 267,000,000 pounds in tions from Canada increased from 1914 to nil during the four years of conflict. At the same time exporta-40,000,000 pounds to 250,000,000 pounds during the same period. However, when peace was declared, Denmark started importing corn from business. During 1921 she supplied the United States, and is now gradually recapturing the English bacon Britain with 207,000,000 million, whereas shipments from Canada were reduced to 97,000,000, and the Danish hog killings for 1922 are showing 35% increase over the same period of previous years, and 90% of her production is marketed as Wiltshire bacon in England. It is reasonable to expect that this increased Danish production will still further reduce the demand for Canadian products.

"How did Denmark gain the confidence of the British consumers to the extent that they are ready to pay a premium for Danish bacon.

"The explanation is simple. The Danish farmers are raising the type of hog which, when manufactured into Wiltshire bacon measures up to England's requirements, and is of an even and uniform quality. During my recent visit to Denmark I found that they had discarded all undesirable bacon type hogs, and were raising only two, viz., the Yorkshire and Danish Landrace, both of which are practically the same formation."

### Operation Controlled

"Breeding operations were controlled and regulated by the Department of Agriculture; the feeding methods were regular and hogs were matured at a uniform age, ranging from 6 to 6 1-2 months, weighing approximately 200 pounds alive. This is practically the only secret of Denmark's superior production, and accounts for the popularity of Danish bacon on the British market, and their ability to snatch the market away from us, which is rightly ours.

"What is wrong with our Canadian hog production? We have too many undesirable breeds and cross-breeds of hogs, and as no two breeds produce the same kind of a Wiltshire side we lack uniformity of production, which is very essential. Our Canadian breeds of hogs comprise: Durock Jerseys, Poland China, Chester White, Hampshires, Berkshires, English Blacks, Tamworth, and Yorkshires, with as many cross-breeds as the above breeds can make combinations.

"Under present conditions it would be impossible to discard all hogs which wouldn't come up to the bacon type standard. The hog producers of Canada must, however, realize the situation, and by selecting his most desirable sows, breeding same to a high type bacon boar, we can within two or three years show a great improvement of uniform production. This is the first step necessary, and with our natural advantages over any of our competitors, being able to grow our own feed and favorable climate conditions, we can recapture the bulk of England's 600,000,000 lbs. annual bacon requirements, which would mean a favorable outlet for 100% increased hog production."

---

## BERMUDA SEEKS TO TRADE WITH CANADA

### Steamship Connection Between the Countries Has Helped Trade

Captain F. C. Misick of the Bermuda Trade Development Board was in Toronto on August 31 and in referring to the trade promotion plans of the Bermuda Government, Captain Misick said, "You are probably all aware that Bermuda held aloof from the Canada-West Indies agreement. Why? Because at the time that matter was under consideration it was, so far as we were concerned, not a practical measure. Since, however, the C.P.R. and the Canadian Government Merchant Marine have established steamship connections between the Dominion and Bermuda there is some chance of reciprocal trade between the two countries. United States tariff legislation now pending, has also directed Bermuda's attention to this country as a possible outlet for our winter-grown vegetable products which hitherto have been marketed almost exclusively in New York.

---

Recognizing the necessity of Canadian manufacturers developing their export trade, the Shaw Correspondence Schools of Toronto announce a new course of study designed to interest those who would become familiar with the fundamental principles underlying organization, selling, advertising, financing, packing and shipping.

In order to make this course of the maximum value to those who take it, the Shaw people have secured the services of practical general exporters, bankers, marine insurance experts and freight forwarders.

The course includes 20 lessons and each lesson will be supervised by practical exporters of standing.

## LOWER TIMBER DUES MEAN RELIEF

### Quebec Order-in-Council Encouragement For More Employment

Full details concerning the recent reduction made in timber dues by the Provincial Government have just been made public in the following order-in-council, dated August 30:

"Whereas, owing to the financial crisis now prevailing, and especially in the timber industry, it is expedient to modify temporarily the provisions of the order-in-council of the 6th of October, 1920, respecting timber cut under the conditions mentioned below, so as to encourage licensees to provide employment for lumbermen during the comink winter. That it is expedient for the same reasons, to cause the exploitation of burnt timber or timber damaged by insects, and that a reduction of timber dues should be granted.

"It is ordered that the order-in-council of the 6th of October, 1920 be temporarily modified in favor of the licensees who shall cut frfom this date to the first of May, 1923, at least 25 per cent. of the total amount of their respective cuts of timber for the season of 1920-1921 or of their last year's lumbering operations previous to that season, if they have not operated during 1920-21, and that the dues on the timber so cut be calculated according to the provisions of the order-in-council, No. 765, of the 13th June, 1918.

"That there shall be charged on the burnt timber cut between this date and the first of May, 1923, a rate of $1.75 per thousand feet, board measure, for white pine, of $1.50 per thousand feet, board measure for red pine, elm, ash, basswood, maple, birch, and tamarack, and of $1.25 per thousand feet, board measure, for spruce, balsam, gray pine, hemlock, white birch, aspen, cedar, etc."

The above concessions were asked by a delegation of lumbermen who waited on the provincial cabinet recently.

## PLANT SOLD

The Munitions and Machinery, Ltd., plant of the United States Government, realized $32,700 when put for sale at public auction on Sept., 5.

The plant which is situated at the corner of Notre Dame street and 18th avenue, Lachine, was knocked down at this price to Silvio W. Narizzano, managing director of the Saxonia Fruit Co.

It covers an area of 42,000 square feet, of which 39,605 is taken up by the building. It is assessed for taxation purposes at $29,705 for the land and $89,050 for the building, making a total of $118,755.

The terms of sale were ten per cent. cash, and the balance payable over a period of five years, with interest at 5 1-2 per cent.

The new owners will use the plant for the extension of their present business.

## SWISS TRADE IS SHOWING PROGRESS

### Canada Could Supply Many Commodities to Switzerland

After passing through strenuous conditions, due to the war, Switzerland is slowly but surely recovering its trade and commerce, says A. Strahelin, of Zurich, who is at present in Montreal. Imports and exports suffered greatly and, as this little country is not self-supporting, the people had to do without a great many things.

The exchange situation also added to the difficulties. For a time the Swiss franc was at a premium in this country. Now, however, as the dollar has reached par and is practically remaining at normal, Switzerland will be able to conduct a healthy trade with this country. Coal, foodstuffs, raw materials for industry, sugar, are all imported by Switzerland, and trade of late has been revived in these commodities. Mr. Strahelin stated that his country looked forward to a big trade in silk with Canada.

A resumption of the tourist traffic, which for many years fell off to practically nothing, is doing much to help Switzerland regain her position.

## C. P. R. APPOINTMENTS

The following promotions are announced from the Canadian Pacific passenger traffic department:—

H. W. Brodie, at present general passenger agent, Vancouver, to be assistant passenger traffic manager at Montreal.

W. H. Snell, general passenger agent, Montreal, to be general passenger agent, Vancouver.

George A. Walton, general passenger agent at Winnipeg, to be general passenger agent, Montreal.

R. G. McNeilie, assistant general passenger agent, Winnipeg, to be general passenger agent, Winnipeg.

G. D. Burpee, general agent, Cleveland, Ohio, to be district passenger agent, St. John, N.B.

N. R. Debrisay, district passenger agent, St. John, N.B., to be assistant general passenger agent, Winnipeg.

Walter Maughan, assistant general passenger agent, Montreal, to be assistant to general passenger traffic manager, Montreal.

W. B. Howard, district passenger agent, Toronto, to be assistant general passenger agent, Montreal.

W. Fulton, assistant district passenger agent, Toronto, to be district passenger agent, Toronto.

W. Horder, chief clerk, general passenger department, Toronto, to be assistant district agent, Toronto.

# Municipal Finance

**Vancouver, B.C.**—Over four million dollars in taxes has been paid into the city treasurer's office since the first of the year, when the offices closed on August 13, the end of the 10 per cent. rebate period.

Payments made each month into the treasurer's office since the first of the year were as follows: January, $96,369; February, $69,029; March, $79,130; April, $58,153; May, $59,547; June, $154,858; July, $404,762; first 15 days of August, $1,654,218; total, $2,576,096. With $1,500,000 still to be entered in cheques received before the 10 per cent. rebate period expired this brings the total so far for the year up to $4,076,096.

The total amount payable to the city this year in taxes is a little over $5,316,000.

**Winnipeg, Man.**—At a meeting or the city council on August 14 the council accepted the recommendation of the finance committee that steps be taken at the next session of the legislature authorizing the city to levy a personal income tar, in the collection of which all realty taxes actually paid in each year by any taxpayer shall be set off against and deducted from the income tax, and in the event of such realty tax being higher than the income tax only the realty tax to be payable by the taxpayer.

**Goderich, Ont.**—At the regular meeting of the council on August 18 the finance committee presented their report of expenditres and receipts for the year and recommended a rate of 46 mills, being one and a half mills higher than 1921, made up by the increased amount required by the school boards.

**Saskatoon, Sask.**—The auditor's statement covering the six months' period ended June 30, 1922, has just been prepared. This statement shows a net surplus in the revenue and expenditure statement of the city of $25,805 over the estimates. Last year the statement for the first six months showed a deficit of $594, and as this deficit was wiped out during the last six months of the year and a substantial surplus of over $48,000 substituted for it, it is confidently anticipated that the present year's financial statement when compiled will show a creditable improvement even on last year's results.

The city has been able to show substantial savings under various headings while a larger profit in the public utilities than anticipated has contributed largely to the better showing made this year as compared to last year.

The following is a comparative statement of revenue and expenditure of the public utilities for the first six months of 1921 and 1922:—

| | 1921 | 1922 |
|---|---|---|
| | First Six | Months |
| Electric Light and Power— | | |
| Expenditure | $215,754 | $216,916 |
| Revenue | 246,750 | 257,911 |
| Profit | 30,995 | 40,995 |
| Waterworks Department— | | |
| Expenditure | $ 74,223 | $ 77,915 |
| Revenue | 79,191 | 83,324 |
| Profit | 4,970 | 5,408 |
| Street Railway - | | |
| Expenditure | $158,195 | $148,280 |
| Revenue | 149,967 | 144,847 |
| Loss | 8,225 | 3,432 |

It will be noted a net profit of $42,971 was made for the first six months of this year as compared to $27,740 profit made during the first six months of last year. This is after deducting the loss on the street railway. In figuring the profit on the utilities all operating costs and fixed charges, including depreciation, have been taken into consideration.

The total tax collections for the first seven months of this year amounted to $718,803, made up of $571,468 current taxes and the balance arrears. During the same period last year $695,859 was collected, $583,431 of which represented current taxes and the balance arrears.

**Regina, Sask.**—The annual report of the sinking fund trustees has just been published and shows there is a balance of $62,301 due by the city on account of the 1921 levy

The total amount of money available for investment during the year was $876,318, which has been applied as follows: debentures redeemed, $35,234; new investments, $664,766; accrued interest, $27,109; balance of surplus earnings, $23,000; cash balance in bank and on hand, $126,208

The average yielding rate of the sinking fund investments is now 6.38 per cent., and as a result a surplus has been established, which, for the year 1921, amounted to $40,665, and which, added to the previous surplus shows a total surplus of earned of $150,938. Of this amount, $117,565 has been returned to the city to be used for current expenditures, and $33,373 has been set aside as a reserve to provide for possible losses or depreciation in the securities.

Total assets during 1921 amounted to $2,634,865, as compared with $2,295,236 in 1920.

**Victoria, B.C.**—Important new proposals relating to relief of delinquent taxpayers and the city's reverted lands policy were submitted to the city council by special committees and endorsed, pending legislation.

The recommendations respecting delinquent taxpayers are, briefly as follows:

1. In respect to taxpayers whose property would in the ordinary course go to tax sale this year, sale should be cancelled on condition that half this year's taxes are paid on or before September 29 and an undertaking with the city is negotiated whereby payment of the remaining half of taxes is pledged by December 29, and of the entire amount of arrears within fifteen years at six per cent., provided current taxes are also paid.
2. These privileges to be open to taxpayers in a lesser stage of delinquincy than those subject to tax sale proceedings this year.
3. Holders of "capital sum agreements" in good standing to be allowed privilege on or before October 30 of entering into new agreements with the city on the basis outlined in the foregoing paragraphs.
4. Obtaining of legislation necessary to authorize this form of relief.
5. The Board of Local Improvement Commissioners to reconsider the entire local improvement situation in order that, if the board thinks proper, additional reductions may be made in the future instalments.

**Montreal, Que.**—The grand total of taxes collected for the month of August, including September 1, was $2,264,316. This compares with last year's total of $2,468,005.

**Halifax, N.S.**—It is reported that there is approximately $1,250,000 in the city's sinking fund.

**Hamilton, Ont.**—Street railway receipts for the second quarter of the year fell below the expectations of the city officials, according to the figures received by W. H. Davis, city treasurer. The city's eight per cent. of earnings for three months ending June 30, amounted to $20,005 as compared with $20,292 for the same period in 1921.

**Eureka Mun. Alta.**—The tax rate for this year has been struck at three mills on the dollar, the same as last year.

**Vancouver, B.C.**—The city is purchasing in the London market its four per cent. debentures and four and one-half per cent. consolidated stock payable from 1947 to 1953.

**Augusta Twp. Ont.**—The tax rate for the present year has been struck at the following rates: For ordinary county purposes, 6 mills; for county good road purposes, 6 mills; for township purposes, 6½ mills; for general school purposes, 10 mills; for provincial highway purposes, 7 mills and a rate of nine mills on ratepayers of S.S. No. 17 for debenture purposes.

**Neustadt, Ont.**—The tax rate for 1922 will be 38 mills on the dollar, three tenths of a mill lower than last year. The rate is made up as follows: Village rate, eight mills; county rate, seven mills; school rate, 16.4 mills; street lighting, 6.6 mills.

**Victoria, B.C.**—Recommendations directed at the broadening of the city's taxation were submitted to the city council by a special committee of aldermen.

The report embodying the recommendations was laid over for future action. Briefly the proposals are:

1. Imposition of municipal income tax to be collected through Provincial Government, calculated to raise $200,000 the first year.
2. Readjustment of business tax system, to yield additional $150,000, the levy being based on rental values.
3. Imposition of tax on gasoline amounting to three cents on a gallon.
4. Taxation of amusements to an extent equal to that levied by the province.
5. Taxation of advertising hoardings.
6. Request Provincial Government, in recognition of Gictoria being the capital city of the province, to contribute to municipal revenue.
7. Imposition of tax on horses and increase of dog tax.

The committee opposes the suggestions of Dr. Shrott that real estate sales, liquor and tobacco and water supply be subject to increased or special taxation.

## BRITISH COLUMBIA UTILITIES

### Profits Made on Electric Light Last Year, But Less Realized on Waterworks System

Reference was made in these columns recently to the annual report of the British Columbia inspector of municipalities on results for 1921. The report also covers the public utilities of the municipalities.

### Public Utilities

Operations of utilities show a slight improvement over the previous year, although some of the utilities continue to carry a large deficit. Electric light account was the only one to show a profit. Water works and sundries, the latter including water, light, telephones, irrigation and street railway, showed losses. The following table illustrates the position of these utilities at the end of 1921:

| Electric Light | Total Revenue | Profit | Loss |
|---|---|---|---|
| Cities | $705,108 | $124,204 | $20,982 |
| Districts | 51,790 | 666 | 4,852 |
| Waterworks | | | |
| Cities | 1,206,173 | 53,837 | 147,678 |
| Districts | 321,832 | 1,954 | 275,624 |
| Sundries | | | |
| All Mun. | 626,259 | 30,915 | 55,948 |

For 1920 the figures, in the same order as above are:—

| | | | |
|---|---|---|---|
| Electric Light | | | |
| Cities | 523,630 | 61,764 | 29.930 |
| Districts | 43,100 | 779 | 4,747 |
| Waterworks | | | |
| Cities | 1,140,359 | 102,923 | 118.610 |
| Districts | 299,366 | 33,120 | 259,973 |
| Sundries | | | |
| All Mun. | 497,164 | 21,559 | 40,664 |

The largest surplus in the electric light department was made by New Westminster, that city piling up a profit of $44,675, with Prince Rupert coming second with a surplus of $26,341. The only district showing a surplus in this department was Summerland, which had a surplus of $666.

In view of the large deficit in the waterworks department it is interesting to note that about fifty per cent., of the cities show a surplus, including Enderby, $10,802; Nelson, $25,771, and Revelstoke, $6,001. The only district to show a surplus was Penticton, $1,954.

In the sundries account North Vancouver made a profit of $24,780 in ferries and Prince Rupert made a profit of $6,134 in telephones.

Commenting on the showing made by the utilities Mr. Baird says: "It is pleasing to note that a substantial increase has been made in the amount of moneys received from public utilities; the receipts during the year being $2,911,165, as compared with $2,503,620 in the previous year, and comparing these receipts with those of the year 1917, the first year of which there is any complete record, it shows an increase from $1,869,742."

## COURSE FOR MUNICIPAL TREASURERS

The short course for rural municipal secretary-treasurers to be held at Saskatchewan University next February or March, was discussed by the executive officers of the associated committee of rural treasurers with officials of the University recently. As a result of the discussion, the subjects of the course will probably be arithmetic, general and municipal accounting, and municipal law, with additional subjects pertaining to secretarial work.

The faculty of the University favors a month's course, and the executive is desirous that municipal councils permit their secretaries to take advantage of this, which it is expected they will do in order to increase the standard of efficiency which the association is striving to raise. The syllabus of a correspondence course arranged with the Shaw Correspondence Schools was approved, to conform with the University course, and with additional subjects included. The intention of the executive is to have the secretary-treasurers first take the correspondence course for a year, then follow up with the University course set for the examinations. The University will award a diploma and any secretary may take this examination without first taking the course, if he feels competent.

## COBALT ORE SHIPMENTS

The following are the shipments of ore from Cobalt station for the week ending September 1st: Mining Corp., 622,547; Nipissing Mining, 438,938; total, 1,061,485. The total since January 1st is 7,164,678 pounds or 3,582.3 tons.

## FEELS COAL SHORTAGE

### Algoma Steel Corp. May Close Plant Unless More Coal is Secured

With the completion of the orders on hand for rails the Algoma Steel Corporation will have exhausted its supply of coal and the management is faced with the problem of closing the mammoth mills for an indefinite period. For many weeks the Steel Corporation has been striving to secure shipments of coal, and to date but 12,000 tons have come through, whereas there should be 300,000 tons now on the docks. According to W. C. Franz, Vice-President, even if the strike were ended at once and shipments of coal began to come through it would be two months before enough coal could be unloaded here to keep the mill running.

Mr. Franz stated that he expected the rail mill to be closed till January, 1923, at which time it was possible that considerable coal would have been accumulated, and more rail orders secured. There is sufficient coal on hand to keep two blast furnaces and coke ovens going at present, and they will continue to manufacture pig iron for which there is a steady market, as long as the coal lasts. The operating of this department will employ about one-quarter of the steel plant staff.

Even though coal could be secured at present its price would be so high as to make it impossible for the local mill to compete in the rail market.

## TRADE AGREEMENT WITH AUSTRALIA

### Further Steps Towards Reciprocal Tariff By Australian Government

Australia's request to the Tariff Board for schedules for use in the making a reciprocal tariff arrangement with Canada, referred to in cable despatches is another step in the reaching of a satisfactory trade agreement with that Dominion, for which Canada has been pressing for some time. Negotiations between the governments of the two countries have been under way for some months.

Both the late government and its successor, the present King administration, have dealt with the Australian authorities in this matter, and some time ago the present ernment asked the Australian authorities to secure definite figures along certain lines and submit them to Canada as a basis from which the negotiations could proceed further. Rcent cables indicate that these steps are now being taken by the Australian government.

## WILL ENLARGE PLANT

The Belgo-Canadian Paper Mills at Shawinigan Falls will do financing shortly to increase output from 200 tons daily of newsprint to 350 tons.

---

Afred W. Smith, Son & Ridout, insurance brokers, Toronto, announced that owing to the growth of their businesss, it has been found necessary to secure larger offices and with that object in view, they have moved to rooms 13, 14 and 15 Excelsior Life Building, 36 Toronto Street.

# Government and Municipal Bonds

After being comparatively quiet for a few weeks, the government and municipal bond market is beginning to show signs of approaching activity. Several municipalities have floated loans in the past week or so at prices which indicate a slight strengthening.

It is generally anticipated that the coming Fall will witness a large volume of new financing. The province of Saskatchewan is calling for tenders for a three and a half million loan, which is payable in New York. Alberta is making arrangements for the floating of a loan amounting to about five million, and the city of Montreal is also arranging for a large loan for refunding purposes. The province of Ontario will no doubt be out shortly for a loan and it is expected that Toronto will also float a bond issue for local improvements. Several Western municipalities are expected to issue bonds, but so far no definite information has been received regarding these.

Bond sales during the week were not so heavy as the previous week, and bidding for these bonds has not been lessened one bit, but seems to be more keener than usual. The county of Peel issue is a good example of the keen bidding which has characterized most of the issues sold recently.

### Tenders Invited

The following is a list of debentures reported for sale, particulars of which are given in this or previous issues:—

| Borrower | Amount | Tenders close |
|---|---|---|
| Saskatchewan .... .... ........ | $3,500,000 | Sept. 12 |
| Quebec, Que. .... .... .......... | 495,000 | Sept. 15 |
| Carleton County, Ont. .... | 196,000 | Sept. 13 |
| Giffard, Que. .... ................ | 85,000 | Sept. 12 |
| Middlesex Co., Ont. .... .... | 80,000 | Sept. 20 |
| Toronto, Twp., Ont. .... .... | 68,000 | Sept. 13 |
| Springfield, Ont. .... .... ...... | 46,000 | Sept. 12. |
| Enderby, B.C. .... .... ........ | 23,000 | Sept. 20 |
| Port Coulonge, Que. ........ | 20,000 | Sept. 16 |
| St. Joseph, Que. .... .... .... | 8,000 | Sept. 30 |
| Richardson, Sask. .... ........ | 700 | Sept. 8 |

**Saskatchewan**—Tenders will be received up to September 12, 1922, for the purchase of $3,500,000 debentures. Alternative bids are asked for 5 or 5½ per cent., and 15 or 20-year bonds. Debentures are payable in New York.

**Middlesex County, Ont.**—Tenders will be received up to 2 o'clock p.m. on September 20, 1922, for the purchase of $80,000, 5½ per cent., 20-instalment debentures for road purposes. T. E. Robson, county treasurer, London. See official advertisement in this issue.

**Quebec, Que.**—Tenders will be received up to September 15, 1922, for the purchase of $495,000 debentures. Alternative bids are asked for 5½ per cent., 10-year bonds, and 5 per cent., 20-year bonds.

**Toronto Twp., Ont.**—Tenders will be received up to twelve o'clock noon, September 13, 1922, for the purchase of $18,000, 5½ per cent., 20-year, and $50,000, 5½ per cent., 30-year debentures. J. R. Kennedy, township clerk, Dixie, Ont. See official advertisement in this issue.

### Coming Issues

**Sydney, N.S.**—At the council meeting on August 17 it was decided to print at once and issue $142,000, 5½ per cent., 20-year bonds for local improvements.

**Ottawa, Ont.**—The city council passed two debenture by-laws, one for $62,000 to pay for certain toll roads, and the other for $220,000 for school purposes.

**Montreal, Que.**—Bond dealers are much interested in the prospects for the new $4,000,000 loan which is to be issued late this autumn. It is stated that, besides the issue for $5,000,000 put out at 5½ per cent. in February, the city intends to take advantage of the more favorable money market prevailing. According to the statement of the city treasurer, loans amounting to $18,000,000 must be renewed before September, 1923, so that the new financing will probably be the first of a considerable amount to be spread over the coming year.

The $18,000,000 of loans to be refunded bear 6 per cent., and it is expected that the new issues will be on a much more favorable basis for the city. These loans become due between December 1 next and September 1, 1923.

**Nepean Twp., Ont.**—At a meeting of the council on August 17 a by-law for the issuing of $90,000 for school purposes was passed.

**Parrsboro, N.S.**—The town council is asking for permission to borrow $12,000 for electric light purposes. They will also borrow $4,500 for water purposes.

**Hamilton, Ont.**—The city will be issuing $230,000, 5½ per cent., 5-year debentures to cover the cost of caring for the unemployed during last year.

**British Columbia**—The following certificates have been issued by the Municipal Department upon the following dates:—

July 7: City of Trail, $10,000, 6 per cent., 5-years for schools.

July 10: City of Victoria, $110,000, 6 per cent., 28-years for Johnston Street bridge.

August 3: City of North Vancouver, $9,000, 5½ per cent., 10-years for sewers.

August 5: District of West Vancouver, $31,100, 5½ per cent., 20-years for schools.

August 5: District of West Vancouver, $31,000, 5½ per cent., 20-years for schools.

**Oshawa, Ont.**—At a meeting of the council on August 18 two by-laws totalling $120,000 for school purposes were passed.

**Lethbridge, Alta.**—On September 8 the burgesses will vote on a by-law for the issuing of $4,000, 6 per cent., 10-instalment debentures for completing the erection of the public library.

**Toronto, Ont.**—At a special meeting of the city council, to be called by the mayor, a large money by-law will be considered. This provides for the raising by debentures of $4,048,518 for purposes sanctioned by the provincial government.

**Montreal, Que.**—A loan of $3,000,000 to be raised by the various municipalities under the authority of the Metropolitan Commission was sanctioned by that body at the meeting on August 17. The greater proportion of the loan is to be utilized for refunding purposes, while a part is to be consumed in public works of various kinds.

The loan for $3,000,000 which the commission authorized is to be divded as follows: Outremont, $1,500,000, with additional $400,000 for public works; St. Michel, $200,000 for refunding of previous loans; $27,000 for Pointe aux Trembles, and $165,000 for Laval de Montreal, for the same ends; Montreal North, $150,000 for public works, and $236,000 for liquidation of claims of the various municipalities.

The loan wil be for short term and will bear interest at 5 per cent.

**Ottawa, Ont.**—On July 31 the city council passed a by-law for the issuing of $142,193 debentures.

**Collingwood, Ont.**—The by-law to provide $25,000 for the extension to the waterworks was carried by the ratepayers.

**St. Laurent, Que.**—The Metropolitan Commission will authorize a loan of $160,000 for the municipality on condition that the town will guarantee that it can raise sufficient revenue to pay its own way in administration.

**Guelph, Ont.**—In connection with the city calling for tenders for $365,000, 5 per cent., 20-year debentures it is reported that after the city had called for tenders it was discovered that the city had no authority to issue bonds, and all bids were rejected.

**Regina, Sask.**—The city will shortly call for tenders for the purchase of $15,000 debentures. Two bonds firms submitted privately tenders for this issue, but these were returned and the city council decided to call for tenders.

**Bienville, Que.**—The school commission has secured permission from the government to borrow $25,000 for the construction of a new school.

**Port Colborne, Ont.**—The municipality will be issuing about $8,000 debentures to cover water extensions.

**St. Laurent, Que.**—The town is asking the Metropolitan Commission for permission to float a loan of $160,000, of which $100,000 would be used for the floating debt, while the balance would be applied to public works.

**Minnedosa, Man.**—The town has made application to the public utilities commission to float a $6,000 debenture loan for fire fighting apparatus.

**Hull, Que.**—Provincial approval to several by-laws already approved by the people has been given and the work authorized by those bylaws will likely be started as soon as the City Council meets and makes the necessary arrangements The by-laws approved of expenditures amounting to $603,000.

**Nanaimo, B. C.**—By-law approving the appropriation of $30,000 to replace No. 2 dam, destroyed in March has been given a second reading by the city council.

**Hampstead, Que.**—The Metropolitan Commission has approved, subject to legal requirements the floating of a loan of $185,000.

**Saskatchewan,**—The following is a list of authorizations granted by the Local Government Board from July 29 to August 19, 1922.

Schools: not exceeding 8 per cent.: West Port, $3,000, 15-years annuity; Otthon, $1,100, 20-years; Vantage, $7,500, 15-years; Stoney Hollow, $2,500, 10-instalments; Northfield, $4,500, 15-years; Mozart, $4,500, 15-years; Knox, $1,200, 10-years; High Point, $4,000, 15-years; Utopia, $3,800, 15-years; Shamrock Centre, $2,400, 10-years; Marengo, $5,000, 20-instalments; Look Out, $3,000, 15-years; Niagara, $4,000, 15-years

Rural Telephones: not exceeding 8 per cent.; Eastern Edam, $3,000, 15-years; Pibroch, $700, 15-years; Aldford, $450, 10-years; Lewvan, $4,600, 15-years; Baljennie, $250, 10-years.

### Bond Sales

**Dundas, Ont.**—Wood, Gundy & Co. have purchased $400,000, 5½ per cent., various maturity debentures at a price of 99.33. The block was made up as follows: $127,000, 20-years; $208,000, 30-years; $50,000 30-years, and $15,000, 15-years. The following is a list of bids:

| | |
|---|---|
| Wood, Gundy & Co. .... .... .............................. | 99.33 |
| R. C. Matthews & Co. .... .............................. | 99.07 |
| Gairdner, Clarke & Co. .... .... ........................ | 98.79 |
| Dominion Securities Corp. .... .................... | 98.617 |
| A. E. Ames & Co. .... .... ................................ | 98.60 |
| McLeod, Young, Weir & Co. ........................ | 98.27 |
| A. Jarvis & Co. .... ............................................ | 98.26 |
| Canada Bond Corp. .... .... ............................ | 97.27 |

**Sherbrooke, Que.**—An issue of $100.000, 5½ per cent., 30-instalment school bonds has been sold to National City Co., at a price of 98.39, which means that the cost to the city will be approximately 5.64 per cent. The following is a list of tenders: National City Co., 98.39; Wood, Gundy & Co., 98.38; A. E. Ames & Co., 97.588; McLeod, Young, Weir & Co., 97.56; L. G. Beaubien & Co., 97.20; Dominion Securities Corp., 95.386; and Municipal Debenture Corp., 93.11.

**Peel County, Ont.**—C. H. Burgess & Co. were the successful bidder for the $80,000, 5½ per cent., 10-instalment debentures, paying a price of 99.625. The cost to the county will be approximately 5.58 per cent. Bidding for this issue was keen with very little variation in the offers. The following is a list of tenders:

| | |
|---|---|
| C. H. Burgess & Co. .... .... ............................ | 99.625 |
| A. E. Ames & Co. .... .... ............................ | 99.27 |
| R. C. Matthews & Co. .... ............................ | 99.21 |
| W. A. McKenzie & Co. .... ............................ | 99.21 |
| Wood, Gundy & Co. .... ................................ | 99.18 |
| A. Jarvis & Co. .... .... ................................ | 99.09 |
| Housser, Wood & Co. .... ............................ | 98.887 |
| MacNeill, Graham & Co. .... .... ..... .... ........ | 98.84 |

## PLAN TO SETTLE TEN MILLION ACRES

### Scheme Promoted by Association With Sir John Willison at Head is now Before Government.

A scheme for the settlement of ten million acres of land with ten years in different parts of the Dominion is now before the government, with prospects of coming to a head.

Originally, it was the Western Canada Colonization Association which was behind the proposal, but the scope has been enlarged to include the whole of the country rather than the West alone, but the promoters are the same, headed by Sir John Willison of Toronto. It is stated officially that they have subscribed $1,500,000 for the purpose of promoting immigration.

Negotiations have been carried on for some months with Hon. Charles Stewart, minister of the interior, and in fact were initiated long before that with the former ministry. Latterly the British authorities have been dealt with in regard to the project and the present and apparently final stage hinges upon the degree to which the Dominion government will give its official sanction.

### Act as Intermediary

The general idea is that the association should act as an intermediary agency between would-be land settlers and purchasers and land vendors in the different provinces. Particular attention would be paid to British and American immigration, confined essentially to three classes—land settlers, household workers and boys in their 'teens suitable for farm help. Various kinds of community enterprise are involved in the plan.

It is stated that while a degree of financial assistance is sought from the Dominion government, it is relatively small and more for the purpose of indicating official endorsement of the proposition.

A definite announcement is expected by the beginning of next week, following the consideration to be given the matter at the week-end by the cabinet. The association plans to people a million acres of land each year for ten years, with an organization in every province.

## ELKO PAPER PLANT

### Contract for First Unit Goes to Western Firm

The contract for the first unit of the $13,000,000 pulp and paper plant at Elko, B.C., has been awarded to McDougall & McNeill, contractors, of Vancouver and Calgary. The plant is to be erected for the Wigwam Pulp & Paper Company, and is financed by prominent Canadian and American newspapers.

The first unit will bave a capacity of 100 tons daily and will cost about $3,500,000, while the remaining two units, to be commenced just as soon as the first unit is in operation, will bring the total expenditures to $13,000,000.

## ASSETS PURCHASED

The entire assets of the English and Scotch Woollen Company, Montreal, formerly owned by L. A. Gareau, who assigned for the benefit of creditors sometime ago, have been purchased by Eugene Panneton, president and general manager of the Debenture Savings Company, Limited, Montreal.

The assets are estimated to be worth $600,000. Mr. Panneton intends to continue the business and is applying for a Dominion charter for this purpose.

**Discretion is the Better Part of— Investment**

You may know that Government and Municipal bonds are most desirable investments, but when to buy them is not always quite clear. It is clear, however, that the present is a good time to buy because interest rates are above normal.

This is also a good time to sell certain bonds. For instance, if you have bonds maturing soon you would be well advised to sell them and reinvest the money in bonds of longer maturities so that you may ensure to yourself the current high interest rates for many years to come.

Let us have a list of your early maturing bonds and we will submit a definite exchange proposal.

## Stock Markets

A more buoyant and better tone was in evidence on the Canadian stock markets this week, with total transactions showing a substantial improvement over the previous week.

This buoyancy on the market seems to point to the fact that the market has come to disregard some of the unsettling influences which have been overshadowing the country for some time. One item which has helped to influence the buoyancy on the market is the settlement of the coal strike in the United States which in turn affected conditions in Canada. Business conditions across the line have shown a decided improvement during the past week, partly due to the progress made by the railroads in recruiting shop forces to take the place of strikers, and also due to the increase in coal car loadings, which means the approach of soft coal production to normal.

### Markets Cheerful

As the Canadian markets usually follow the trend of the New York markets, the cheerfulness exhibited by Wall Street has been reflected on the local markets. Not only has Wall Street contributed to the actions of the Canadian markets, but conditions throughout Canada have also had their effect upon the market.

Business conditions in the Dominion have shown a steady improvement during the summer, and expectations are that the winter will witness a heavier demand in every line of business. Within twelve months' time the pulp and paper companies have shown a rapid advancement, and recent reports show that practically all the paper companies are working at nearly capacity, with sufficient orders on hand to keep running for at least six months. The annual report of the Laurentide Company for the year ended June 30 last, just issued, is an indication of what the paper companies had to put up with during the year. In spite of the fact that earnings show a large decline from the previous year, due to stagnant markets, declining prices and high-priced wood, the company was able to show a substantial surplus carried forward, and was able to earn and pay all dividend charges.

### Crop Reports Good

Another important factor affecting the stock market is the excellent crop reports from Western Canada. Practically every district reports a bumper crop, and expectations are that this year's crop will set a record for many years past. When the crops are harvested the circulation will show a decided increase, and with money becoming plentiful, there is no doubt that some of it will find its way to the stock market.

To pick the outstanding feature of the week's trading would be rather hard, as the market has been in a whimsical mood and has turned its attention now to one and now to another group of securities. During the first part of the year the utilities figured prominently in the trading, but they were disregarded and the paper securities had their fling. These issues in turn were flung aside and the steel stock came into prominence. The last few days trading has shown however, that the utility group is again coming back in the limelight, with Canadian Pacific, Mackay, Twin City, etc., being heavily traded in and scoring new advances each day.

With the settlement of coal mines strike in Nova Scotia it was expected that the British Empire Steel issues would show some response to the settlement, but so far it has not been realized. When the strike situation became alarming some time ago the stock was strong and enjoyed an active market so that it is evident that other influences were at work to make the market active. One assumption is that new interests were acquiring stock. There have been some current reports on the Street to the effect that some large blocks of stock were transferred privately.

### Riordon Active

On September 1 there was considerable activity in old Riordon common, one block of 1,500 shares selling in the list at 5 .Since the beginning of August this stock has dropped down from 10 to 5 points. This drop has been attributed to the fact that plans are now practically completed for the levying of an assessment. An assessment has long been regarded as a foregone conclusion and it is probable that a good many people have been taking what they could get for their holdings rather than put up any more money. It is said that the asessment will range from $25 per share in the case of the old preferred down to $1.50 in the case of the new common.

In looking over the general industrial list it is shown that there has been a noticeable improvement over the preceeding week, with gains exceeding the losses.

## FINANCIERS TOUR WEST

For the purpose of investigating at first hand the possibilties of Western Canada from an investment standpoint, Alfred Putnam and D. H. Read, of the financial firm of Dillon Read & Co., of New York, accompanied by P. R. Harrower and H. E. Brand, also of New York, are making a tour of Western Canada. Dillon, Read & Co., through their Canadian representatives, the Dominion Securities Corporation, of Toronto, have handled a large quantity of the municipal and provincial government bond issues in Canada during the past year.

## INVESTMENT YIELDS

The following is a special list of liquid investment yields of the better class of investments outside of government and municipal bonds:

(Compiled by A. D. Morrow & Co.)

| | Div. | Rate | Price | Yield |
|---|---|---|---|---|
| BANKS AND TRUST CO'S— | | | | |
| Bank of Montreal | 12 | 1 | 219 | 5.93 |

## HOUSTON'S ANNUAL REVIEW

Annual Financial Review for 1922, compiled by W. R. Houston, Toronto Stock Exchange Building, is now off the press. This annual, which is number 22 of the series, is a carefully revised precis of facts regarding Canadian securities. Its 816 pages include annual statements of every important company in Canada, together with other valuable information, such as lists of directors, capitalization and so forth.

As in previous years, the field of Canadian finance and industry is covered under such divisions as: war loans, assurance, banks, guarantee, industrials, land, loan, mortgage and savings, light and power, mining, navigation, rails, electric railways, telegraph, telephone, and cable, and trust companies.

The volume is larger than for previous years and contains some simplification in the matter of indexing.

## Unlisted Securities

The report issued by A. J. Pattison Jr. & Co. covering the unlisted market of last week, states that buying of the best type continues in good volume with the result that prices for practically all dividend paying stocks and bonds show marked improvement. Offerings of securities become increasingly harder to obtain at figures reasonably close to the prevailing bids. Indications all point to a continuation of the upward swing which will bring stock yields more nearly in line with yields offered by bonds. For a time sentiment inclined to bonds, due largely to the return offered on investment and the general education of the public to this eype of security through the Victory Loans. This condition is rapidly changing and the result is quite apparent in the increasing number of shareholders recorded for many of the dividend paying companies. At the close of the week everything points to still higher figures with no evidence. as yet, of even a temporary set back.

The pulp and paper bonds all made advances, Brompton 8's moving up to 101 bid—Spanish River 8's to 102¾ bid, and Howard Smith 7's to 96½ bid. Bank stocks show an increasing demand, Home Bank moving to 91½ bid offered at 95 while sterling sold at 104. Both of these issues are sharing in the general advance and should, on the yields offered, reach materially higher figures. Cockshutt Plow pf'd. gained ½ point to 46½-48 while Massey Harris remains unchanged at 57-59¼. Durant Motors, while not as active as in the previous weeks held at 9½-10½. Alberta Pacific Grain pf'd. at 88½-89½ shows a gain of two points with but a few shares hanging over the market at the offered price. The oil shares were quiet—Imperial at 112-113. International at 22⅛-23 and Mutual at 10⅜-⅝.

## MANITOBA PLANS TO PROTECT FARMERS

### Extension of Loans for Financial Distress Recommended

An effort to protect farmers in financial distress from being forced by creditors to throw their grain on the market while the prices are deflated, was made by the Manitoba Government recently when representatives from the corporations went into session with Premier John Bracnen and members of his cabinet.

The following organizations were represented: Retail Merchants' Association, Canadian Credit Mens' Trust Association, Bankers' Association and Mortgage and Loan Association. The Premier, at whose wish the conference was called, pointed out thte advantage of allowing farmers who are hard pressed, more time in marketing their product.

The government will adopt the same policy with regard to the branches of the Provincial Treasury, which assists in financing farmers.

It is estimated that there is more than $1,000,000 due to the government this year from the rural credit loans, the Manitoba Farm Loans, the Cow Scheme and other services. It is stated by officials that the attitude of the Government does not mean that undue leniency will be shown, but only where it can be proved that an extension of time is needed.

## BANK DEFRAUDED

A false cheque for $1,300 was cashed on August 23 at the St. Catherine street, near Bleury street, Montreal, branch of the Royal Bank of Canada. The facts as reported to the police are that early in the afternoon a man who said he was a stranger in the city, passing through from New York to Eastern Canada, had presented the cheque. The amount was $1,300 and the cheque was certified by a United States bank. Later when inquiry was made of this bank it was learned that the cheque was false.

## ALLEN THEATRES

With respect to the application for an extension over several years to enable the Allen Theatres, Limited, to attempt a recovery instead of selling to another picture corporation, G. T. Clarkson, official referee, mentioned that some of the minority shareholders objected to an extension being given. The matter is before the judge in bankruptcy, who will decide as what shall be done.

Dividend No. 154

Notice is hereby given that a quarterly dividend of *two and one-half per cent,* (2½%) for three months ending Sept. 30th, 1922 (being at the rate of ***Ten per cent. per annum***—has been declared upon the Capital Stock of this Institution, and the same will be payable at the offices of the Company, Toronto, on and after Monday, the 2nd day of October, 1922.

The Transfer Books will be closed from the 15th to the 30th of Sept., both days inclusive.

By Order of the Board.

G. A. MORROW,
Managing Director.

## PARSONS OCEAN POWER CO.

"The Monetary Times" has received from the Parsons Ocean Power Company, Limited, Halifax, some information regarding that company which was recently organized principally for the purpose of taking over and developing the patent rights of O. H. Parsons for device for generating electrical energy from the power of the ocean swell. While several devices for this purpose have been devised, it is believed that this latest apparatus will not only prove workable, but practicable. They state that their plans have been very carefully checked by competent engineers, and it is believed that a plant capable of supplying a million horse power at a cost of 7/10c. per K.W.H., while the cost of current at the plant will not exceed 3/10c. per K.W.H. after all allowances have been made for depreciation, maintenance, interest of bonds, waterholders, etc.

The capital stock of the company is $500,000 divided into 100,000 shares of $5 each.

## REFORESTRATION SEEN AS A NEED IN PULP TRADE

### Canada and United States Produce and Consume More Newsprint Than the Rest of the World

Canada is by far the principal source of supply of newsprint not manufactured in the United States, says Commerce Monthly, the organ of the National City Bank of New York. Its capital has gone extensively into the development of newsprint plants near the sources of supplies of pulp. The rapid expansion of the industry in Canada has facilitated the installation of improved hydro-electric machinery, capable of turning out 1,000 feet of newsprint per minute. Such improved equipment renders obsolete many of the older and less efficient plants in the United States, which can be operated profitably only when there is a strong demand for newsprint. Prior to the war exports of newsprint from Canada averaged about 133,000 tons. By 1920 they had increased to 679,000 tons and in 1921 totalled 657,000 tons.

**Immense Development**

The development of the wood pulp and newsprint industry in North America, which now produces more newsprint than the rest of the world, has been on an immense scale and perhaps with more regard for immediate demands than for healthy future growth. In consequence of the partial exhaustion of raw materials, the industry in the United States has, for some years, been practically stationary, while in Canada abundant timber resources have facilitated rapid development. In both countries, the industry in the past has developed on the exploitation of virgin resources. For its establishment on a more permanent basis in the future, a policy of conservation is necessary.

**Supplies are Lower**

"In the Eastern United States, where the principal mills are located, it has been estimated that present supplies of pulpwood will be exhausted within twenty or thirty years," says the September number of the magazine, "although by the extensive practice of reforestration the cut-over areas near the mills could within thirty or forty years be made to yield more than the present consumption requirements of the United States.

"Already the pulp and paper mills of some states are importing more than half of their supply of raw material. While considerable quantities of pulp wood are imported into the United States from adjacent freehold lands of Canada, the newsprint manufacturing industry in the United States is beginning to feel the economic effect of having to ship raw material over long distances.

"There are supplies of pulp wood in the United States and its possessions adequate to satisfy the requirements of the newsprint industry for years to come. These supplies, however, are in the Western States and in Alaska, while 90 per cent. of the newsprint mills of the United States are in the Eastern States which are also the main consuming centres. It is impracticable to ship pulp wood a long distance since transportation costs rapidly diminish the margin of profits.

**Reforesting**

"Apparently the most feasible plan for protecting the source of raw material for the newsprint industry established in the Eastern and Lake States is to adopt a policy similar to that of many European countries in reforesting cut-over and waste areas and conserving present supply. More than 60,000,000 acres of potential forest lands accessible to the present established pulp and paper mills in the United States are now producng nothing. A production of one-third of a cord of pulp wood annually per acre on the waste areas would yield 20,000,000 cords or three times the present consumption requirements in the United States.

## NICKEL PLANT RESUMES WORK

### International Nickel Co. Operating At Third of War-time Capacity

The large plant of the International Nickel Co., at Coppercliff, Ont., commenced operations on September 1 after having been closed down for eighteen months. The company is operating at one-third of its wartime capacity, and preference was given to the former employees in the selection of hands who started work to-day. It is proposed to operate with 650 hands, and an eight-hour shift was inaugurated. The Creighton Mine began operations on August 24th and a large quantity of ore was in readiness for the two great furnaces at the smelter.

Regular shipments of the matte will be made to the refinery at Port Colborne, where all of the refining will be done hereafter, the refinery scrapped. The refined nickel will at Bayonne, Nfld., having been scrapped. The refined nickel will be shipped to the new $2,000,000 rolling mills at Huntingdon, Va., where it will be rolled into malleabe metal and marketed mostly is the United States.

Surplus Strength of the
—Mutual of Canada—

The Company's General Surplus, representing the excess of assets over liabilities, amounts to

$5,790,520.70

This fund has been assigned as follows:—

| | |
|---|---|
| First—Provision for dividends under Deferred Dividend policies issued prior to 1911 ........ | $3,688,146.75 |
| Second—Provision for interim dividends under Quinquennial policies. | 277,897.66 |
| Third—Provision for dividends payable in 1922. | 1,500,000.00 |
| Fourth — Provision for Mortality, fluctuations and other contingencies .. .. .. .. .. .. | 324,476.29 |
| | $5,790,520.70 |

The Financial Position of the Company is such and its dividend earning capacity continues to be so favorable that a **Further Increase In Dividends** has been decided upon for the year 1923.

## DEBENTURES FOR SALE

### TOWNSHIP OF TORONTO
### Tenders for Debentures

Tenders will be received by the undersigned until 12 o'clock noon, September 13, 1922, for the following school debentures.

$18,000 bearing 5½%, repayable in 20 years.

$50,000 bearing 5½%, repayable in 30 years.

The assessment of the township is $4,400,000, the area is 65,000 acres, the tax rate is 5½ mills, and the population is 6,400.

J. R. KENNEDY,
Township Clerk,
26 Dixie, Ont.

### COUNTY OF MIDDLESEX
### Debentures

Sealed Tenders endorsed 'Tender for Debentures' will be received at the Office of the Undersigned up to 2 o'clock p.m. on Wednesday, September 20th, 1922, for the purchase of:—

$80,000.00 County of Middlesex twenty-year Instalment Debentures with 5½% Coupons of Interest attached payable half-yearly on April 1st and October 1st.

These debentures are being issued for Roads Purposes, under authority of Bye-law No. 968, passed June 10th, 1922, copy of which may be seen on application.

Each tender should state a rate per cent. or a lump sum which the tenderer will pay at par in London, Ontario, on or about October 1st, 1922.

The County will be at no expense for legal opinion or otherwise.

Delivery or conveyance of the Debentures to be free of all expense to the County.

The County does not bind itself to accept any tender.

The assessment is $39,192,750; the net debenture debt is $107,096.17; the tax rate is 7 mills and the population is 42,880.

T. E. ROBSON,
Treasurer of Middlesex.
County Treasurer's Office, London,
Ontario, September 5th, 1922.

## MOVEMENT OF GRAIN

With an approximate value of $150,000,000; 116,000 cars of grain were handled by the Canadian National Railway from western points since September 1, 1921, to August 28, 1922, according to A. E. Rosevear, general freight agent. He said the present season's movement had jumped from an average of 100 cars daily to 350, comprised mainly of shipments from Manitoba.

## OFFERS MARKET FOR CANADIAN GOODS.

### Conditions in Haiti Have Improved —Offers Outlet for Certain Canadian Products

As the policy of peaceful penetration gradually extends the horizon of Canadian trade, it becomes ever more essential that the Canadian business man should familiarize himself with new markets abroad says the September letter of the Royal Bank of Canada. A market which is comparatively new, but which offers an important outlet for certain Canadian products, is Haiti.

The island of Haiti is situated in the Caribbean Sea, between the island of Cuba and Porto Rico, about 1600 miles due south of New York. The Republic of Haiti forms the western part of the island, and the Dominican Republic, the eastern part. The Haitian Republic has an area of a little more than 10,000 squre miles and a population of about 2,500,000 of which over 95 per cent are black. The country is mountains in the interior but has a few strips of level growing land. From a standpoint of natural beauty, Haiti is singularly endowed. All species of tropical fruits are plentiful, and the wide variation of temperature makes possible a great diversity of products.

#### History of Island

A brief history of the Republic of Haiti will furnish a background for a better understanding of the present situation. Haiti was originally a French Colony, but native leaders revolted and threw off the French yoke. Independence was declared in 1804 and from then until 1915 the country passed through a series of revolutions. Native leaders held sway by turns, each being deposed and often murdered when he became unable to overthrow an opposing faction. The development of the country was thus retarded. In 1915, the Government of the United States intervened. A treaty between the two countries was signed in 1916 and in accordance with this treaty the American Government retains a protectorate over Haiti, having practically a free hand in administering the Government. A considerable improvement has taken place in Haiti since 1916. The chief harbors have been dredged and modernized. Roads and telegraph lines have been built. New and creditable systems of education and of public health have been organized, and the country is beginning to develop commercially and industrially.

#### Chief Products

Agriculture is the most important industry of Haiti, the chief products are coffee, sugar, cotton, cacao, and logwood. During the fiscal year 1920-1921, the total value of Haitian exports was $4,956,394. Of this, coffee was by far the most important item, its value being $2,915,985. Next in importance come logwood, a commodity used in the production of dyes. Exports of this commodity were valued at over $750.000. Sugar exports amounted to $457,000 and cotton exports to $348,000.

Although there are at present no direct steamship sailings from Canadian to Haitian ports, it is to be hoped that the fact that Haiti lies in the direct line of the Canadian trade routes, in onjunction with the probability of its becoming an important market for Canadian goods, will lead to the establishment of direct steamship connections. The total Canadian exports during the last three fiscal years were as follows:

| | |
|---|---|
| 1920 ............ | $174,543 |
| 1921 ............ | 95,135 |
| 1922 ............ | 71,967 |

The decrease in these figures is due to the decline in trade caused by the general depression, and also to the decrease in the purchasing power of the dollar.

#### Trade Facilities.

There is every reason to believe that if the proper facilities are supplied for carrying on trade between the two countries, the exports from Canada will increase annually. During the fiscal year 1920-1921, Haiti imported foreign goods to the value of $11,957,205. The largest single item in imports was cotton cloth, amounting to over two million dollars. Nearly two million dollars worth of flour was imported and a considerable amount of this was Canadian flour. The value of general foodstuffs imported was more than $1,117,000, and of this also, Canada supplied a fair amount. Some of the chief commodities with which Canada can supply Haiti in increasing quantities are flour, fish, cement, soap, lumber and certain hardware goods. In trading with Haiti, Canada is not obliged to compete with any country to which Haiti grants a tariff preference; in fact of the close relationship between Haiti and the United States there is no preferential tariff agreement between the two countries.

#### Circulation

The unit of circulation in Haiti is the gourde, of which the value has been stabilized at 20 cents by authority of the American Government. United States currency too is in general use, especially in the larger centres. The Republic of Haiti is well equipped with banking facilities so that the negotiation of credits for financing trade is adequately provided for. In addition to the National Bank of Haiti, a native organization, but controlled by American banking interests, there are branches of The Royal Bank of Canada at the three most important centres, namely, at Port-au-Prince, Cap Haitien, and Aux Cayes. In dealing with Haiti, the Canadian exporter should see that his shipping documents include five copies of the bill of lading, six copies of the consular invoice either in English or in French, in addition to the regular insurance papers, commercial invoice and health certificate when required.

---

## BIG ORE SHIPMENTS

The British Empire Steel Corporation on Belle Isle, is working night and day shipping ore direct to Germany. The steamers Henrick Ibsen, 7,100 tons; Greldon, 7,500 tons, and Cymric, 6,200 tons, all sailed recently for Bremerhaven. Several other ships were scheduled to clear later from the "Iron Isle." The Lord Strathcona brought 8,000 tons to Sydney. Large shipments of limestone are also being made to this port from Limeville, Nfld., the Kamouraska being a recent arrival.

## DIVIDEND NOTICES

Toronto, September 1st, 1922. 25

### NOTICE TO CREDITORS
### The Bankruptcy Act

**In the Estate of W. F. Sullivan, of the City of Toronto, in the Province of Ontario. BANKRUPT.**

Notice is hereby given that W. F. Sullivan of Toronto was adjudged bankrupt and a receiving order was made on the 28th day of August 1922.

Notice is further given that the first meeting of creditors in the above Estate will be held at my office, 73 King Street West, Toronto, on the 11th day of September, 1922, at 3.30 o'clock in the afternoon.

To entitle you to vote thereat proof of your claim must be lodged with me before the meeting is held.

Proxies to be used at such meeting must be lodged with me prior thereto.

And further take notice that if you have any claim against the debtor for which you are entitled to rank, proof of such claim must be filed with me within thirty days from the date of this notice, for from and after the expiration of the time fixed by sub-section 8 of section 37 of the said Act I shall distribute the proceeds of the debtor's estate among the parties entitled thereto having regard only to the claims of which I have then notice.

Dated at Toronto this 1st day of September, 1922.

N. L. MARTIN, C.A.
24 Receiver.

# *Corporation Finance*

**Wabasso Cotton Co.**—According to the annual report for the year ended June 30 last, the company experienced a satisfactory year of operations. Although the earnings are below those of the past two years, the company was able to earn its dividends by a comfortable margin, and also increase the general fiscal strength of the organization. Profits for the year, after deducting all manufacturing and other charges and expenses, provision for income war tax, but before depreciation and bond interest amounted to $347,550, as against $386,698 in 1921 and $443,710 in 1920. After interest from investments was added gross income was brought up to $396,014. Deduction of $100,000 depreciation and $52,240 bond interest, left net income applicable on the capital stock outstanding of 35,000 no par value shares, $243,774, or at the rate of $6.96 earned per share. In 1921 net earnings were $283,103, or equal to $8.09 per share earned.

In reporting to shareholders, R. Whitehead, president, says, in part: "Delivery of machinery for extension of the company's works, which was mentioned in a previous report, can only be obtained in the spring of 1923. With the above object ln view directors deemed it advisable to issue new bonds to meet the expenditure. These bonds have since been disposed of, and are now being placed on the market. In submitting the balance sheet, directors feel that the results they are able to present should be very satisfactory to the shareholders.

"The company has been able to improve its working capital position to some extent during the year, this standing as of June 30 at $985,395, compared with $868,131 reported a year ago. Current assets are higher at $1,466,030, against $1,363,541 last year, and current liabilities $480,635, against $495,410 in 1921."

The statement of working capital compares as follows:

| | 1922 | 1921 |
|---|---|---|
| Current assets .... .... ............ | $1,466,030 | $1,363,541 |
| Current liabilities .... .... ....... | 480,635 | 495,410 |
| Net working capital .... .... | $985,395 | $868,131 |

In the balance sheet there is shown an increase in total assets ofrom $4,594.544 in 1921 to $4,772,042 in the current statement. Property account has risen to $1,723,575 from $1,612,302 in 1921, investments in other companies are slightly lower at $1,551,672, against $1,584,187; cash is up at $65,586, against $16.559; investment in Victory bonds, call loans, etc., up at $723,710, against $566,597; receivables $317.907, against $230,108; while inventories are down from $550,277 a year ago to $358,818 in the current statement. Bond debt is lower at $861,000, against $871.500; depreciation reserve, $617,752, against $517,752, and payables $182,103, against $174.911.

**Laurentide Co.**—The annual general meeting of shareholders has been fixed for September 19 at Montreal.

**Trans-Canada Theatres, Ltd.**—The annual report for the year ended June 3, 1922, shows that the operating account for the year had a loss of $100,659. Total gross receipts from theatres under the company's control and attractions, amounted to $619,685, as against the total for the previous wear of $1,417.580. Total cost of operating theatres and attractions for the year amounted to $700.503, against a total for the previous year of $1,381,902.

"In order to finance the cost of the Edmonton theatre," President H. W. Beauclerk points out, "which exceeded very considerably the original estimate, your directors were obliged to obtain mortgages on your properties in London, Hamilton and Edmonton. At the present time your directors do not feel that they are in a position to submit any definite plan of future policy, because so much depends upon the conditions that may prevail in theatrical affairs during the coming season, and their influence on the operation of the company. In the late autumn it should be possible to make some reasonable forecast."

The balance sheet shows total assets amounting to $4.040,703, compared with $3,956,354 for the previous year. Real estate, franchises and contracts are valued at $3,931.538, compared with $3,956,354. The balance at debit of profit and loss amounts to $58,776. Accounts receivable total $11,577. Capital outstanding totals $3,589,600, and includes first preferred $1,414,600, second preferred non-dividend bearing $675,000, and common stocks $1,500,000. Mortgages payable, together with accrued interest, amount to $271,597. Bills payable amount to $23,911, and accounts payable, $69,178. Current loans and accrued interest total $54,685.

The annual meeting will be held in Montreal on Monday, October 16 next.

**Ames-Holden-McCready, Ltd.**—The first mortgage bondholders of the company held their meeting on August 25 and ratified and adopted the plans and proposals of the reorganization committee as outlined at the meeting held about two weeks ago. Under this arrangement, first mortgage holders will be given an equal principal amount of first mortgage bonds of the new company and, in addition, 20 per cent. of the par value shares of the new company. These new securities to be issued under the new plan would be dated as of September 1 next.

A number of other meetings of bondholders and shareholders, of which the first will be held September 6, when the shareholders of the parent company and the Ames-Holden Felt Company will be asked to ratify the arrangement.

**Brazilian Traction, L. & P. Co.**—Gross earnings for the month of July show a substantial improvement over the previous month.

Total gross earnings stand at 16,655,000 milreis, ocmpared with 15.477,000 milreis for July, 1921, an increase of 1.178,000 milreis. Operating expenses have been reduced from 6,606,000 milreis to 5,955,000, and net earnings at 10,700.000 compare with 8,871,000 for July, 1921, an increase of 1,829,000 milreis. The net returns for the month are hardly as favorable as for the previous month, operating costs making a larger inroad in gross returns.

Aggregate gross earnings for the first seven months of the year show a decided improvement, standing at 109.170,000 milreis, compared with 95,676,000, an increase of 13,494,000. An even greater inrease is shown in net, which stand at 67,355,000, compared with 49,697,000, an increase of 17,658,000 milreis.

**Cosgrave Export Brewey Co.**—The company has declared an initial dividend on the stock of 1½ per cent. for the quarter or at the rate of 6 per cent. per annum.

The dividend is payable on Monday, October 16, to shareholders of record at the close of business on September 30.

In making the announcement, James F. Cosgrave, president, made the following statement: "While our earnings may warrant a more generous distribution of profits to the shareholders, the board of directors, in conformity with their usual conservative policy, decided that at present the stock should be placed on a dividend basis of 6 per cent., and later on, this rate of dividend may be increased as earnings warrant."

**Illinois Traction Co.**—Gross earnings for the month of July totalled $1,680,205, as compared with $1,686,191 for July, 1921, an increase of .35 per cent. Expenses for the month totalled $1,329,897 compared with $1,260,042, leaving net earnings at $350,308 compared with $426,149.

Gross for the first seven months of the year at $12,747,668 compare with $12,617,919, an increase of 1.03 per cent. Expenses are somewhat reduced at $9,106,681 compared with $9,344,931. Net earnings total $3,640,986, as compared with $3,272,987, an increase of 11.24 per cent.

**Southern Canada Power Co.**—Gross and net earnings for July, and the ten months ending July 31, as compared with the same period of 1921, are:

| | July 1922 | 1921 | Inc. |
|---|---|---|---|
| Gross earnings ....... | $68,896 | $61,976 | $6,920 |
| Operating expenses . | 32,560 | 32,707 | *146 |
| Net earnings ......... | $36,335 | $29,269 | $7,066 |
| Ten months ending July 31— | | | |
| Gross earnings .... .... | $701,659 | $615,812 | $85,846 |
| Operating expenses .. | 309,821 | 312.365 | *2,543 |
| Net earnings .......... | $391,837 | $303,447 | $88,390 |

*Decrease.

**Canadian Pacific Railway Co.**—A substantial increase in gross earnings and a reduction of operating expenses are note din the report for July. The former are the largest of any month this year and are less than $1,500,000 below the total in July, 1921, while the latter, which increased in May for the first time in over a year, have decreased in proportion to the decline in gross. This results in the second smallest decline in net this year.

Gross earnings for July were about three-quarters of a million over thise of June, standing at $14,463,834, as compared with $15,772,929 for July, 1921, this being a decrease of $1,309,094. Operating expenses were $12,501,926, as compared with $13,718,613, a decrease of $1,216,686. Net earnings amounted to $1,961,908, as compared with $2,054,315, a decrease of only $92,407.

On only three occasions in the history of the road have the gross earnings for the seven months exceeded those for this period ended July, which compare with 1921 as shown in the following table:

| | 1922 | 1921 |
|---|---|---|
| Gross .... .... ...................... | $90,759,193 | $99,828,600 |
| Operating expenses .... | 78,983,213 | 84,824,118 |
| Net .... .... .................... | $11,775,979 | $15,001,182 |

**Twin City Rapid Transit Co.**—The operating income for the month of July shows a reduction from the returns for the corresponding period of 1921, standing at $1,079,027, as compared with $1,111,373. Operating expenses are somewhat reduced and operating income in consequence shows an improvement at $173,342, compared with $123,923 for July, 1921. Net income after interest on funded debt, etc., and including non-operating income, totals $82,518 as against $34,021. The comparaive tncome statement for the month follows:

| | 1922 | 1921 |
|---|---|---|
| Total railway operating income ................ | $1,079,027.77 | $1,111.373.66 |
| Total railway operating expenses and taxes .... .... .... ........ | 905,684.98 | 987,450.10 |
| Operating income ......$ | 173.342679 | $ 123,923.56 |
| Total non-operating inome .... .... ............ | 3,271.41 | 2,597.58 |
| Gross income .... ............$ | 176,614.29 | $ 126.521.14 |
| | Interest | on funded |
| Interest on funded debt, etc. .... ............ | 94,095.31 | 92,499.76 |
| Net income .... .... ....$ | $82,518.89 | $ 34,021.44 |

**Winnipeg Electric Railway Co.**—Earnings for the month of July total $397,684, as compared with $417,754 for June. Net earnings amount to $97,726 and surplus $27,494, compared with $37,845 for the previous month. The surplus after fixed charges is somewhat under the return for the corresponding month of 1921, and the company explains this decline by the decrease in gross receipts and the abnormal increase in operating expenses. The decrease in gross receipts is attributed to the moderate downward adjustment in some of the special rates of fare effective August 1 last. The increases in expenses is due to an increase in the cost of power, on account of operating the steam reserve plant almost continuously throughout the month. This was rendered necessary by the damage to transmission lines in the storm of June 23, and because of a breakdown at the hydraulic plant during the month of July, which put two generators out of service. The company points out taht had conditions been normal the net return would have shown an increase rather than a decrease over the corresponding month of 1921.

**Canadian Woollens, Ltd.**—For the year ended June 30 last, profits of the company amounted to $204,649, after deducting manufacturing, selling and general expenses, and interest on loans. This is a decrease of $87,626 from the previous year.

The compay set aside $51,450 for income tax, and bad debt reserve, expended $35,000 in purchase of preferred dividend of $122,500, which three items represent $4,301 more than the profits of the year.

The excess current assets at the end of the fiscal period amounted to $436,844, which compares with $471,702 a year ago.

During the year, new additions to plant were undertaken to the value of $39,714, and President Dawson reports that an appraisal by the Canadian Appraisal Company shows that the depreciated value of these properties is $232,722 more than they are being carried at in the books.

Mr. Dawson makes allusion to the concentration of the company's manufacturing operations at Peterboro, which was announced during the year. The Standard Mill property at Toronto is thus made available for sale or lease, and operating costs are reduced by the change.

The cheerful portion of the document is found in the final statement that both yarn and cloth mills are running to capacity, and the outlook is promising. There is improvement in the woollen business, and old stocks have gone largely into consumption.

BANKING INVESTMENT INSURANCE INDUSTRY

# The International Position of Canada

By FARIS R. RUSSELL, Vice-President National Bank of Commerce, New York

.From "Commerce Monthly."

By the accepted tests of greatness, Canada now ranks as one of the foremost nations of the world. It is immensely rich in natural resources. Its government is stable, its population is thrifty and energetic, and its business leadership has been proved to be of the imaginative type requisite for the organization of modern industry. The banking and currency system is among the best and transportation facilities, both within the country and with other countries, are equaled in adequancy only by those of the United States.

In value of exports Canada ranks fourth among nations and, after the United Kingdom, is the foremost foreign buyer in our markets. In the fiscal year ending June 30, 1922 exports from the United States to that country were only a little less that the combined exports to France and Germany, and nearly three times the value of our total exports to South America. Imports into the United States from Canada are not erceeeded in value by imports from any other country ercept in occasional years from Cuba. In the fiscal year just ended the United States bought more from Canada than from South America.

Four-fifths of all the foreign trade of Canada is carried on with the United Kingdom and the United States. In the twelve months ending June 30, 1922, each of these countries took about two-fifths of total Canadian exports. Considerably more than half of total imports into Canada have long come from the United States, the proportion being slightly in excess of two-thirds in the same twelve month period.

Clearly trade between Canada and the Uunited States is vital to their mutual prosperity, yet despite the vivid general interest in foreign trade in this country during recent years Canada is practically ignored in current discussions ot our trade relations. This is apparently due in large measure to a covert belief on the part ot many that Canada is in effect another United States, with similar resources, similar institutions, and for the most part the same speech.

It is true that the two countries are much alike in essential ways, but there are also forces at work which are tending to give to Canadian business and to the Canadian outlook a character somewhat different from that of its neighbor to the south, and it is of great importance, not only to the business public but to all the people of the United States that these forces should be recognized, and their results understood.

### National Consciousness

A clear realization of the character of the national consciousness of Canada is the first step toward and understanding of the international position and relationships of the country. It is now fifty-five years since the Federation. At first, unity of aspiration developed slowly, but a nation emerged from the four years' war in Europe. Whatever the technical term which may be applied to the political status of Canada, in effect it is a proud and vigorous nation, sure of its future, rejoicing in its share in the leadership of the world, and also rejoicing in its place as an integral part of the British Empire.

Like the United States, Canada is well located in relation to Europe. In this respect, it has a great advantage over the other partially developed units of the British Empire, Australia and South Africa, as well as countries of South America. From the standpoint of freight charges to Europe, it is in the same ocmpetitive position as the United States and it shares with this country the immeasurable advantage of the most rapidly expanding market of the world, North America.

### Natural Resources

Equally as important as national ambition and fortunate location are the natural resources of Canada. Although already one of the foremost agricultural countries, two hundred and fifty million acres of farm land yet await the plow. Canada has not as much merchantable timber as the United States, but its forest resources are great, and it is one of the foremost producers of wood pulp and its products. Furthermore, public policy and the physical character of the country are such as to afford every reason to expect that Canadian forests will constitute an important permanent asset for Canada, and a source of timber for the world. The coast and inland fisheries are unmatched. Not only is Canada the foremost fur producer, but fur farming is rapidly transforming what might otherwise have proved a temporary source of wealth into a permanent industry.

One-sixth of the world's known coal reserves are in Canada, and although much of this coal is sub-bituminous and lignitic, the country is fourth from the stand-point of known bituminous and anthracite reserves. The available water powers are very great and development is going on rapidly. At present, petroleum production is negligible but explorations for oil are being made n many parts of the Domnion, and favorable indcatons have been found in the Mackenzie district of the Northwest Territories.

As indicated b yexplorations to date Canada is not rich in iron ores which meet present technical requirements, although ores are known to exist in considerable amounts on the Pacific Coast, some ore is mined, chiefly in Ontario, and scattered deposits have been found elsewhere. The country is very rich, however, in mineral deposits of other kinds, and mining is one of the leading industries of the Dominion. The preater part of the mining development has taken place since the beginning of the present century. While in 1921, the Canadian gold output was only about 5 per cent. of the total world output, it was exceeded by that from only two countries, South Africa and the United States. Silver production is also important. About 80 per cent. of the world's supply of nickel comes from the famous Sudbury and Cobalt districts of Ontaria, and 88 per cent of the world's asbestos is quarried in the province of Quebec. Copper in large amounts is produced in British Columbia, and in the nickel-copper area of Sudbury, Ontario. The copper reserves of Canada are already known to be large, and exploration is by no means complete. Canada is also richly supplied with a number of those minerals which are of great importance for special technical purposes, as cobalt, molybdenite, magnesite and mica, and has ample mineral resources of non-metallic character, such as clays, materials for cement, and gypsum.

### Physiography and Climate

A superficial examination of the map of Canada suggests a remarkable physical similarity to the United States. There is an eastern coastal plain, and an extension of the Appalachian Highland. The central part of the country is a low plain, gradually rising to the Rocky Mountains after which is the slope to the Pacific. The apparent similarity is much modified, however, on closer study and two factors, climate and the Laurentian Highland, are the bases of differences.

Canadian climatic conditions can perhaps be visualized by comparison with other areas of the world. Montreal is in the latitude of Lyons, France, and very little north of Turin, Italy. All but a small proportion of the total area of the country, however, lies north of the fiftieth parallel, which is approximately the boundary of northern France. Thus the central portion of Canada from the standpoint of latitude is comparable with the United Kingdom. Holland, Germany and central Russia, while northern Canada is in the latitude of the Scandinavian countries and northern Russia. Many other factors than latitude, however, enter into climate and the Canadian climate is colder than is that of the corresponding latitudes of Europe. It is certain that the extreme northern sections of Canada are too cold for profitable agriculture, although the northern limits of successful farming have not as yet been determined.

While the climate throughout southern Canada does not differ enough from that of contiguous parts of this country materially to affect daily living, the difference is sufficient to affect agriculture fundamentally. While that of the United States is characterized by great diversity of products, Canadian agriculture is characterized by uniformity. The plains of Canada constitute one of the great wheat fields of the world. The crop averaged 236,000,000 bushels during the five years 1917 to 1921, being exceeded during that period only by the crops of the United States and British India. With the possible exception of Siberia, the untilled lands of the Prairie Provinces constitute the greatest potential source of increased wheat supplies. Wheat and other small grains, hay and forage crops of various kinds, peas and beans, potatoes and other root crops, and the live stock which can be maintained on them are and always will be the foundation of Canadian agriculture.

Apples are the chief commercial fruit. They can be grown very successfully through much of southern Canada and British Columbia, and small fruits do well through an extensive area. Peaches, apricots and other fruits which require a fairly mild climate thrive in the coastal regions of British Columbia and corn can be grown for grain in a limited area in southern Canada.

### Trade Routes

The valleys of Canada, hence the lines of trade, run north and south. With the exception of the Pacific slope the entire country is accessible to the Mackenzie Valley, the Hudson Bay basin and the Great Lakes-St. Lawrence Valley. The Mackenzie Valley is a direct route out of the western areas of the grain provinces, but climatic conditions render it useless. There is a direct route with easy gradients from Saskatchewan and Manitoba to Hudson Bay, and only a small section of the railway to Port Nelson is unfinished. In the future, there may be a considerable freight movement over this route, but vessels must go to 63 degrees north latitude to get through Hudson Strait, and the St. Lawrence, more than 10 degrees farther south, is closed to navigation four or five months a year. The natural line of travel from the Prairie Provinces is therefore southward, to the Mississippi Valley, toward Minneapolis and St. Paul, and thence to Chicago. This line meets the barrier of an international boundary.

The Great Lakes-St. Lawrence basin is one of the great trade routes of the world. It is 1,100 miles from Fort William to Montreal and 2,100 miles to the sea. As yet, obstacles to navigation in the St. Lawrence render impossible the movement of ocean vessels above Montreal, and that port is open but seven and one-half months in the year, and the port of

Quebec eight months. Through the remaining period, goods must go by rail, either to the ports of the maritime provinces or to the United States ports. Nevertheless Montreal is the second greatest port in America, and the seventh in the world.

If a broad open lowland to the north of the Great Lakes connected the St. Lawrence Valley with the great plains of the Prairie Provinces, the peculiar problems in relation to transportation within Canada would not have arisen, but it is in this connection that the Laurentian Highland plays a part. This is a belt of broken land which forms the watershed between Hudson Bay and the St. Lawrence basin and extends from Labrador and northern Quebec entirely around the northern portion of Lake Superior. It is not high, but it is rough, the soil is not rich, and this, combined with the fact that the climate through much of it is not favorable to agriculture has prevented any rapid extension of settlement.

### Population.

Sixty per cent. of the 9,000,000 inhabitants of Canada are in Quebec and Ontario, chiefly in the southern parts of the provinces; in other words, in the main part of the St. Lawrence Valley. Of the remainder, 22 per cent. are in the wheat-growing provinces of Manitoba. Saskatchewan and Alberta, the second heaviest center of population being about Winnipeg. The transcontinental railroad lines must traverse hundreds of miles of the almost uninhabited Laurentian Highland between these two closely settled areas.

There are about 40,000 miles of railroads in the Dominion, excluding sidings and double trackings. The Canadian Pacific Railway extends from the Maritime Provinces to the Pacific. The Canadian National Railways likewise for a system extending from coast to coast. An efficient network of roads assures transportation in the St. Lawrence Valley and the grain provinces.

The natural lines of trade can not be defeated, however. Including the two transcontinental roads and branch lines, there are not more than four east and west lines in Ontario at any point from the Manitoba boundary until the Peninsula is reached. Contrasted with this limited transportation between east and west, more than ten miles of railway, including branch lines, cross the international boundary between Lake Superior and the Rocky Mountains, and including ferries and bridges there is a veritable network of railway connections between eastern Canada and the United States. It is 450 miles from Winnipeg to Minneapolis and St. Paul, and 860 miles to Chicago, the entire distance through a rich and settled country. It is 1,400 miles to Montreal, much of the way through a sparsely settled country. While the industrial parts of Canada are thus far from some of the main centers of Canadian consumption of their goods, they are admirably located, by means of their natural southerly lines of trade, to reach the heavily populated Middle Atlantic States and the Mississippi Valley. A frank recognition of this situation is basic to any understanding of Canadian trade relations.

From a transportation standpoint, the relation of British Columbia to central and eastern Canada is about the same as is the Pacific slope of the United States to the remainder of the country. It is connected with eastern Canada by the Canadian Pacific Railway, terminating at Vancouver, and by the Canadian National Railways, and by means of the line formerly known as the Grand Trunk Pacific, at Vancouver and at Prince Rupert. The Panama Canal is being increasingly utulized from the port of Vancouver to Europe. Vancouver is connected by rail with Seattle and the Pacific Coast region of the United States, and there are rail connections with eastern Washington by a number of branch lines.

### Foreign Trade

International trade consists in part of the exportation of an absolute surplus to a country which must have it. Of this class are exports of raw cotton from the United States to the United Kingdom, and imports into the United States of raw rubber. A second class consists of exportation or importation because of differences in the grade of commodity produced. Thus, the United States is a heavy importer of long staple cotton, although the largest net exporter of raw cotton in the world. A large part of all international trade in both raw and manufactured products falls into one or the other of these classifications.

In addition to trade of this character, there is a large trade which is foreign trade in name only. It is the result of the presence of political boundaries and takes place between areas in which conditions of production and consumption are essentially the same. A large part of the trade of Europe is of this character, but never before in history have there been reasons equally as cogent for its development as there have been for its growth between the United States and Canada; for never before have there been two countries, practically identical in speech, customs, government, standard of life, and conditions of production, with 3,000 miles of boundary line. and most of the natural lines of trade crossing this boundary.

Canada is in that stage of economic development when population is small in relation to natural resources, and when exports of raw materials must pay for imported capital to develop them. The United Kingdom is at the other extreme of the economic cycle. It is overpopulated in relation to its natural resources, and is a very heavy importer of food and of practically all raw materials except coal.

### How Our Trade is Divided

The United States is in a position midway between Canada and the United Kingdom. While it is one of the heaviest exporters of manufactured goods, its more than one hundred million people by no means consume either its food products or its output of most other classes of raw materials, and it is still the world's foremost exporter of those classes of products which have their origin in natural resources in excess of domestic needs. Crude materials and foodstuffs together constitute about half of total exports from the United States. The United States is also a heavy importer of crude materials and of foodstuffs, which make up three-fifths of total imports into the country.

In the twelve months ending June 30, 1922, imports into Canada amounted to $732,000,000. Exports of Canadian origin were valued at $752,000,000, and re-exports amounted to an additional $14,000,000. Complete details for this period are not yet available. The great natural resources of Canada are the foundation of its export trade. In the fiscal year ending March 31, 1922, wheat and wheat flour together constituted nearly one-third of the total value of all exports. Other food products, including butter, cheese and milk, fish, vegetables and fruits, grains other than wheat, and meat products accounted for one-fifth of the total. Lumber and wood pulp together accounted for one-seventh of the whole and paper for a little less than one-tenth. The combined exports of the foregoing classifications were about three-fourths of exports of Canadian products.

The remaining one-fourth was made up of a wide variety. Furs and flaxseed were important. Aluminum, asbestos, copper, gold, nickel, silver and zinc accounted for a considerable part. Aside from exports of manufactured food products, including refined sugar and manufactures of lumber and timber products, Canadian exports of manufactured products with unimportant exceptions do not represent a net exportable surplus.

In so far as Canada is a producer of raw materials which the United States does not produce in quantities sufficient for domsetic consumption, this country is a heavy buyer in the Canadian market. Wood pulp, furs, nickel, cobalt and asbestos are representative of this small but important class of Canadian goods sold to the United States. With these few notables exceptions, however, the United States is a heavy exporter of exactly those classes of raw materials and food products which make up the bulk of Canadian export trade. Thus, average net exports of wheat from the United States during the three harvest years 1918-19 to 1920-21 were 271,000,000 bushels, while average exports from Canada for the same period were but 118,000,000 bushels. Clearly, the time is not far in the future when the United States will become a net importer of grain, and until that time Canadian exports of wheat to this country will consist of wheat bought for blending because of the superior milling qualities of much of it, and of wheat imported because it is near the great milling centers of the United States.

The very important movement of lumber and timber products other than wood pulp from Canada into the United States is of the same character as is the wheat movement, while many exports from Canada into this country such as fruits, vegetables and dairy products are really in the nature of local trade. In general, such movement of Canadian manufactures as occurs toward the United States is of the same character.

### Exports To United Kingdom

Canadian exports to the United Kingdom are essentially different from those to the United States. Canada is able to supply the mother country with many classes of commodities which the British must import. Thus in 1921-22, out of a total value of $233,000,000 of Canadian exports of wheat and wheat flour two-thirds went to the United Kingdom. Apples, sugar refined in Canada for export, bacon and hams, cheese, eggs, a large proportion of wood, wood products and paper not sent to the United States, and some nonferrous metals, silver and nickel being the more important, are among the leading Canadian exports to the United Kingdom.

Canadian import trade falls into four main classes. A little more than one-sixth, consisting of subtropical and tropical food products and raw materials, can be directly accounted for by climatic limitations, and an additional share is probably partially attributable to this factor. Typical imports of this class are citrus fruits, raw cotton and rubber. Obviously tropical imports can not originate within the United Kingdom and the United States ordinarily furishes about one-half of them.

A second very important class of Canadian imports consists of raw materials, the importation of which is not connected with climatic limitations but is for other reasons which render domestic supplies insufficient or expensive. Practically the entire Canadian supply of petroleum and its products comes from the United States. Ninety per cent. of the iron ore smelted in Canada is imported from the United States and Newfoundland. Although from the standpoint of potential coal reserves Canada is the second country of the world, coal is the single largest item among Canadian imports. This anomalous situation results from the fact that the main coal deposits of Canada are in Alberta, in British Columbia, and in Nova Scotia and New Brunswick, far from the main centers of coal consumption. As a result a Canadian authority has recently estimated that in the so-called "acute" fuel area of Canada, comprising Quebec, Ontario and Manitoba, 95 per cent. of the coal used is imported from the United States. During the last fiscal year Canada imported 17,000,000 tons of coal, but 2,000,000 tons were exported, chiefly from Nova Scotia and New Brunswick. Half of total exports were sent to the United States.

A source of great potential economic strength for Canada lies in the fact that those areas dependnet on imported coal are especially well provided with water power, about one-third of the total water power of Canada being in Quebec and about one-fourth in Ontario. It is estimated that in the "acute" fuel areas alone, the possible installation, based on the minimum hydraulic power available continuously for twenty-four hours a day, is equivalent to 227,000,000 tons of coal per year. With modern transmission methods, electric current from a single water-power installation can now be distributed over large areas. It is to be remembered, however, that aside from the electro-chemical and electro-metallurgical industries, most industries can not use power twenty-four hours a day, and the possibilities of storage either of water or current are quite limited. The practical industrial standpoint, therefore, would require a considerable reduction in this estimated coal equivalent.

### Imports and Exports of Manufacturers

The development of manufactures in Canada has been ont of the most striking economic phenomena of the last two decades. From 1900 to 1918 the number of persons employed in industry in the Dominion rose from 340,000 to more than 600,000 persons, and the value of products increased seven-fold. The leading manufacturing industries of Canada are the preparation of food products, including flour and grist-mill industry, slaughtering and meat packing, sugar refining, the production of butter, cheese and condensed milk, and the canning and preserving of food and vegetables; the sawing of lumber and the production of its various re-manufactures, and the production of wood pulp and paper; the iron and steel group of industries, including the production of pig iron and steel, but especially the manufacture of finished products, the automobile and agricultural implement and shipbuilding industries being especially important; the textile industries; the manufacture of boots and shoes, and other leather goods; the production of rubber tires and other rubber goods; and miscellaneous manufactures, as the smelting and manufacture of nonferrous metals, abrasive goods, and the making of electrical apparatus. Canada is at an especial advantage in the manufacture of those classes of chemicals where a large amount of cheap power is necessary.

Despite the growth of manufactures, economically speaking Canada is a new country and the domestic industries are not able to meet its rapidly expanding requirements for manufactured goods, which constitute a large proportion of Canadian imports. At the same time, Canadian manufacturers have already proved themselves able to market successfully a wide range of products in overseas markets. This situation results primarily from the fact that the main industrial areas are southwestern Quebec and southeastern Ontario, and manufacturers there are more advantageously placed in relation to markets outside of Canada than they are in relation to many sections of the Canadian market, which can buy better in the United States, the character of demand being practically indentical in the two countries.

### Iron and Steel.

The international position of Canada with regard to manufactures is clearly sown by the situation as to imports and exports of iron and steel and their manufactures. In the last fiscal year imports of iron and steel into Canada amounted to $110,000,000 of which the United States furnished $100,000,000 and the United Kingdom $9,000,000. In the same year, Canada exported iron and steel products valued at $28,000,000 of which the United States and the United Kingdom each took about $4,700,000. Specific classes of iron and steel products show the situation even more clearly. Thus in the fiscal year ending March 31, 1922, Canadian imports of agricultural implements, practically all from the United States, were valued at more than $5,000,000, and exports were about the same, but they were widely distributed throughout the world. In the same year imported automobiles, passenger and freight, were valued at $11,000,000, of which total more than nine-tenths were from the United States. Exports were $8,000,000. Shipments to the United States were very small. The United Kingdom took somewhat less than one-fourth, and more than two-thirds went to other countries.

Transportation costs are likely to be the decisive factor in the case of heavy commodities, such as manufactures of iron and steel. In lines in which values are high in relation to weight, other factors are relatively more important in directing trade, and Canadian imports of many classes originate in the United States because of the relative convenience of the markets of this country. Imports of the class designated as fibres and textiles exceed in value imports of iron and steel manufactures. Practically all come from the United States and the United Kingdom, which last year divided this trade about evenly between them, raw cotton excluded. The intimate relationship between the two countries is especially evident in Canadian purchases from the United States of commodities such as grass seeds, vegetables, fresh gsh, undressed furs and skins, fresh meats, lard, milk and butter. Trade of this type is foreign in name only. Of like character are Canadian imports of clothing, of millinery, and of household equipment.

### Canada and the Supply of Capital.

Today Canada is probably the most favorable field in the world for investment, comparable only with the United States in the era of its most rapid physical development, from the close of the Civil War to the opening of the present century. Although as is the case in all new countries capital must be sought beyond its borders, the capital accumulation of Canada is very great. Estimates are not possible of the large amounts represented by the subjugation of new lands, and by the other costly processes by which a wilderness is converted to civilization. Canadian capital invested in ndustrial enterprises and in governmental securities is, however, in some measure indicative of the national accomplishment. In 1918, an official investigation was made of the nationality of the holders of $1,702,000,000 of stocks, bonds, and other securities of incorporated and joint stock companies engaged in the manufacturing industries of Canada. Fifty-six per cent. or $945,000,000 were held by Canadians. A Canadian financial journal states that from 1915 to 1921, more than $2,512,000,000 of Dominion, provincial, municipal and corporate securities were sold in Canada.

Capital not supplied by Canadians has been secured chiefly from investors in the United Kingdom and the United States. In 1920, British investments in Canada were estimated as amounting to $2,500,000,000. Some additions to this amount have been made since that date, and of late there has been increasing evidence of British interest in Canadian industrial enterprises. Proximity, similarity in conditions in the two countries, and confidence in Canada's future are the governing factors which have combined to direct United States investments in large volume into Canada. Specific considerations have also played an important part. Large investments have been made in the pulp and paper industry, in order to be near supplies of the raw material. In many lines branch plants have been established in order to be on a competitive basis as domestic industries in a rapidly growing country and to secure the advantages of trade relations within the British Empire. In special lines, the immense water power of Canada has been an inducement.

### Holdings of Securities

In 1918, known holdings by United States nationals in Canadian industrial enterprises were $556,000,000. Since that time, United States interests have expanded greatly, by the establishment of branch plants and otherwise. Another measure of investments by citizens of the United States in Canada is offerings of Canadian securities here. From 1915 to 1921 Canadian governmental and corporate securities amounting to $1,194,000,000 were floated in the United States. Flotations of Canadian government and municipal bonds during the first six months of 1922 were $166,000,000. The place of flotation does not indicate the nationality of the final investor and considerable purchases of Canadian securities by nationals of countries other than the United States have undoubtedly been made through the New York market, but it seems probable that holdings of Canadian securities of all classes by citizens of the United States must be well in excess of $1,000,000,000 at this time.

In addition to industrial securities and government bonds, some United States capital is invested in industrial undertakings not represented by securities issues, while holdings in mining securities and in securities of the Canadian Pacific Railway, in land, in mortgage loans, both city and farm, and investments of citizens of the United States in the grain trade of western Canada must run into large figures.

An offset is Canadian capital invested in property and in industrial and governmental securities of the United States. Because of the superior opportunities for investment in a new country, however, it is not likely that the volume of such holdings is very large, and it seems probable that the net total of United States investments in Canada must now be as much as $1,500,000,000.

Both Canada and the United States possess the incomparable advantage of having developed in the period of modern transportation with the result that national mindedness has extended the width of a continent. This is one of the secrets of their greatness, and is the basis of the outlook of their business men.

The two countries have identical standards of living and methods of production, and there is no material difference between their distances to the main markets. Except as affected by climate, there is no marked difference in the character of the natural resources of the two countries, or their products. In a general sense, their development has been and will coninue to be along parallel lines and in overseas markets they are rivals. In so far as there is trade between the two countries in products of a non-competitive character, proximity makes each the cheapest source of supply for the other. A large part of the trade between them has its origin in the same factors as those which cause goods to move freely across the boundaries of contiguous states of the United States and provinces of Canada.

The political relations between the two countries are the outstanding proof that the European gospel of mutual fear and distrust has no basis in necessity. A thorough and widespread understanding by the people of both countries of the true character of their economic relations should lead to the devlopment of trade policies as far removed from mediaeval concepts as are the three thousand miles of unguarded boundary from the exaggerated nationalism which finds expression in the unbearable burden of modern armaments.

---

## POST OFFICE SAVINGS BANK

Although deposits in the Post Office Bank during the month of June are lower than for the previous month, this is counterbalanced by a substantial decrease in withdrawals. Deposits during the month are down from $253,727 during May to $213,000 in June. Total deposits during June are lower than for the same month last year, when they totalled $315,608.

There was a decrease of about sixty thousand dollars in withdrawals during the month, when withdrawals totalled $593,486 as against $655,378 in May. The 1922 total is considerably lower than the previous year when withdrawals amounted to $830,753.

The following is the statement for the month of June:—

| | |
|---|---|
| Balance in hands of Minister of Finance on 31st May, 1922......... | $ 24,009,583 |
| Deposits in Post Office Savings Bank during the month.......... | 213,000 |
| Deposits transfered from the Post Office Savings Bank of the United Kingdom to the Post Office Savings Bank of Canada...... | 10,213 |
| Interest allowed to depositors on accounts closed during month.. | 1,953 |
| Withdrawals during the month. ...... .................. .. $ | 593,486.21 |
| Balance at the credit of depositors' accounts on 30th June, 1922. .... .... .. .... .... | 23,641,264.69 |
| | $ 24,234,750.90 |

# Forms of Insurance Companies' Returns

By CHARLES HEATH

(An Address Before the Insurance Super intendents' Conference, Vancouver

I have been asked to introduce to this Conference the subject of "Forms of Annual Returns of Insurance Companies." I do not propose, nor do I think I was expected, at this time at any rate, to suggest any particular kind of forms. I desire. however, to analyze the subject to a certain extent, and so promote an intelligent discussion of the subject with the view to arriving at some forms of Annual Statements which can be used by the Insurance Departments of all the Provinces. I am a great believer in the unification, as far as possible, of not only Provincial Laws but also forms. It seems to me that we in Canada are all pretty much the same kind of people, living much the same kinds of lives, under much the same climatic conditions, with much the same kinds of occupations, doing business with the same Insurance Companies; then why cannot we have reasonable uniformity in insurance matters?

I am sure the insurance fraternity will heartily welcome any advancement along this line. The annual returns of insurance companies required by all insurance departments are nothing but systems of accountings, and the various forms are nothing but the form in which those accountings are presented to the departments.

### What Information Required

Before proceeding to consider the forms themselves. it is necessary for us to make up our minds just what information we require, and in this connection let me suggest that it would be futile and ridiculous for us to put the companies to the trouble of furnishing us with a mass of figures which we cannot put to some useful and valuable purpose. Having arrived at a decision as to what information we require, the form in which it is handed to us is really not of any great moment. All forms of annual reports are fundamentally much the same in principle, though some are more minute and complex than others.

With regard to the forms for use of dominion companies, for obvious reasons they should be as simple as possible, setting forth the information with regard to our own particular Provinces along the lines of the requirements of the Dominion Insurance Department, so that it will not be necessary for the companies to increase their systems of bookkeeping to any appreciable degree; of course, we would not require this information in anything like as minute detail as is required by the Dominion Insurance Department.

### Provincial Companies

With regard to forms for provincial companies all these kinds of forms require information as to the company, its officers, directors, stockholders, and so forth; also a concise statement of the various kinds of insurance businesses that the particular companies transact.

The various forms that I have seen give this information in many and devious ways. We must endeavour to choose the form that will give us this information in as concise and handy a manner as possible.

The rest of the form will in some way or other refer to "Assets," "Liabilities," "Receipts" and "Expenditures;" each of these items will be given in concise form followed by explanatory schedules.

### Statement of Assets

Assets—The form of this schedule must provide for the accounting for all forms of assets permitted to all kinds of insurance companies for whose use these forms are intended. Before considering the form, it will be necessary for us to decide just what assets are to be admitted for inclusion in a Provincial Government Statement, and for the purpose of uniformity, all provinces should be in agreement on this point. For instance, are the following reasonably good assets for admission in government statements, which may very well be quite a different question to that for the consideration of the stockholders of these companies.

Uncollected premiums on stock.
Uncollected calls on stock.
Office furniture and fixtures.
Automobiles.
Maps and plans.
Cost of opening up new territory.
Agents' balances, and uncollected premiums—to what percentage and in what form.
Advances to agents.

Note—In connection with these last two items, are officers to be allowed to have a contract with their companies calling for an over-riding commission for those officers on business written for the company in lieu of a stated salary?

All of these items considered questionable might be required to be listed in a schedule and the item "not extended."
valuation of securities and real estate holdings.

Liabilities—In like manner the form of this schedule must be comprehensive enough to show all possible liabilities, together with the explanatory schedules, with sufficient clarity, so that the true state of the liabilities can be seen at a glance.

Unanimity with regard to the method of figuring reserves of all kinds is urgently needed.

### Receipts and Expenditures

Receipts—It may be worthy of consideration as to whether a revenue statement as furnished by most auditors, or a "cash statement," as at present required, is most valuable for a government statement. The Dominion insurance department, I believe, require a revenue statement.

I have had many arguments with company officials and others with regard to the present form of Income Statement now in use by most Provincial Insurance Departments. It has been held by some that it is an impossible form. I desire to go on record as stating that that is not so, and that, in my opinion, it is a good form for a cash statement taken in conjunction with the balance at the end of the statement.

**Expenditure:**—The present form requires some amendment to take care of losses paid under various headings other than fire.

With regard to the explanatory and other detail schedules, I do not think it necessary to make any comment here, except that all these necessary schedules must be completed or marked "Nil", and that the form be returned at once for correction if this is not done.

Further, it must be positively insisted upon that the officials completing the statement take the trouble to read the directions and follow them implicitly. A great deal of valuable time is lost by the ignorance and carelessness of some company officials in not following perfectly clear instructions as to the information asked for.

The Auditors' Statement—production of which is called for, should be required to contain a cash statement in addition to, if not instead of, the usual revenue statement, and the auditor should be required to colaborate in the completion of the statement, and sign a certificate as to the correctness thereof; he will then be able to advise the company as to the best system of book-keeping to adopt to provide the information required by the form.

I have heard criticism of various kinds with regard to the present forms in use. I am of the opinion that it has largely been the result of ignorance and carelessness. I am convinced that neither the company officials nor insurance department officials have, in many cases, taken the trouble to understand them.

I am not an expert book-keeper or accountant, but I am of the opinion that although the present forms are susceptible to improvement in certain details, the man who figured them out understood insurance accounting, knew what he wanted, and knew how to obtain the desired information, and that if the company will fill out the forms as required, instead of changing them as they may consider suits their own particular fancy, no insurance department can have the least difficulty in arriving at a true understanding of the companies affairs.

I have with me specimens of various forms, and would suggest that this question be considered by all the Superintendents, and that a decision be arrived at before we disperse and return to our various homes. The actual drafting of the form might be left to a committee to consult with an accountant having experience in insurance accounting.

I suggest that we refer this matter to a committee of the whole, so that an agreement as to certain necessary points can be reached.

## DOMINION ASSOCIATION OF FIRE CHIEFS

### Governments Urged to Prevent Use of Inflammable Moving Picture Films

The Dominion Association of Fire chiefs held its annual convention in Chatham, Ont., August 28-31. Chief Smart of Calgary presided. E. P. Heaton, fire marshal of Ontario, who is president of the newly formed Fire Marshals' Association, urged co-operation between both organizations in perfecting fire-prevention methods. Speaking of the fire menace, he declared it had increased 500 per cent in the last 20 years. Fire prevention methods and fire-fighting facilities, he thought, had kept pace with the increasing fire menace, however. Fire Marshal Heaton urged that fire prevention should be a study in all public schools. He declared that the Fire Marshals' Association will make representations to the various provincial legislatures to authorize this in the actual study, and provide text-books. The speaker also declared that his association would urge a uniform personal liability law. He appealed to the Dominion Fire Chiefs' Association to support these two movements when the time is opportune for action.

### Officers Elected.

James Carlisle was elected president. The other officers are as follows:—First vice-president, Chief Debeau, of Verdun, Quebec; second vice-president, R. McLeod, Port Arthur; secretary, Chief James Armstrong, of Kingston; treasurer, Chief Keyes, of Galt; auditor, Chief Mattice, of the Massey Harris Company, Brantford.

The sample by-law regulating the erection of chimneys, which was presented to the convention, was approved. A paper on the sprinkler system, by James Corbett, chief of the Massey Harris Company, of Toronto, was read and discussed.

### Resolutions Passed.

It was decided to continue for a year the committee appointed to consider the question of pensions and allowances for firemen upon retirement, as it is too big a question to be dealt with summarily. An effort will be made to get others interested in the scheme.

Another resolution calls upon the Dominion, Provincial and municipal governments to take proper steps to prohibit by law, the use of the nitro-cellulose motion picture films on and after January the first, 1925, the resolution pointed out that the films referred to, which are in general use are in the nature of gun cotton and in the handling transportation and storing of them a menace to life and property is created. It also points out that a new film of cellulose acetate has been invented which is of slow burning material and meets with the commendation of the fire chiefs. The resolution adds that in view of the availability of a safe film, the present expensive burden of inspection regulation and surveillance of motion picture displays placed by the motion picture industry upon public fire and safety departments, is unwarranted and indefensible, and it is the moral duty of this industry to adopt at once in the production of all new pictures the exclusive use of the slow burning film.

## CANADIAN FAILURES

The number of failures in the Dominion as reported by R. G. Dun & Co., during the week ended Sept. 8, in provinces as compared with those of previous weeks, and corresponding week of last year, are as follows:—

| | Sept. 8 | Sept. 1 | Aug. 25 | Aug. 18 |
|---|---|---|---|---|
| Ontario | 11 | 14 | 14 | 13 |
| Quebec | 29 | 26 | 30 | 30 |
| Manitoba | 6 | 15 | 5 | 8 |
| Alberta | 6 | 2 | 1 | 5 |
| Saskatchewan | 1 | 3 | 3 | 4 |
| British Columbia | 3 | 3 | 1 | 1 |
| Nova Scotia | 0 | 2 | 3 | 2 |
| New Brunswick | 3 | 2 | 2 | 0 |
| Prince Edward Is. | 0 | 0 | 0 | 1 |
| Newfoundland | 0 | 0 | 2 | 0 |
| Total | 59 | 67 | 61 | 64 |
| 1921 | 42 | 50 | 45 | 53 |

# The Monetary Times

Trade Review and Insurance Chronicle

OF CANADA

The Monetary Times was established in 1867, the year of Confederation. It absorbed in 1869 The Intercolonial Journal of Commerce, of Montreal; in 1870 The Trade Review, of Montreal; and the Toronto Journal of Commerce.

Address: Corner Church and Court Streets, Toronto, Ontario, Canada.

Telephone: Main 7404. Branch Exchange connecting all departments.

Cable Address: "Montimes, Toronto."

Winnipeg Office: 1206 McArthur Building. Telephone Main 3409. G. W. Goodall, Western Manager.

ANNUAL SUBSCRIPTION RATE, $3.00

Single Copy, 15 cents, postpaid, anywhere.

When changing your mailing instructions, be sure to state fully both your old and your new address.

All mailed papers are sent direct to Friday evening trains. Any subscriber who receives his paper late will confer a favor by complaining to the circulation department.

## FINANCIAL AND OTHER PANACEAS

Times like the present are sure to produce fresh crops of sure cures for the world's financial and industrial ills. Because conditions are in many respects bad, aspiring philosophers and financiers would have us believe that the cause lies in the failure to adopt their peculiar nostrums. Careful study of thousands of these proposals, animated by a sincere desire to find the great truths which they profess to herald to a waiting world, leads to the conclusion that in nearly every case the schemes are deceptive and wholly unfitted to be of any benefit whatever to the human race.

This is not to say that the entire economic situation is perfect, and not open to any improvement. Great changes are going on all the time, but they are generally merely adaptations of a system whose fundamentals remain substantially unchanged. Industry, integrity, thrift, judgment and skill—these are indispensable elements of individual and national welfare. No magic formula for dispensing with them has ever been discovered. But science, invention and the perfection of administrative methods have all combined to render these homely virtues more and more productive.

If the qualities named are those most instrumental in aiding human progress, ignorance, hatred, class consciousness and movements aimed to undermine the foundations of society are no less certainly calculated to hinder such progress. The way to combat error, and to bring about beneficient changes, is to uphold the truth. Simple and trite as this statement appears, it is being overlooked by people all over the world today.

## MAN AND MACHINERY

Advocates of the simple life complain that the industrial system is becoming so complicated that the average man is losing his bearings in a welter of machinery and economic relations so confusing that the situation must finally result in a complete breakdown. In reality, the only confusion worth noting is the confusion of thought which gives rise to such conclusions. There is no more reason for confusion in the economic life of today than there ever was; certainly this is 'true so far as the period in which man was forced to divide his labor in order to meet his demands for increased comforts and pleasures is concerned. As a matter of fact, the tendency of economic developments is toward rather than away from simplicity. The worker who performs a simple function in the productive organization has much less to puzzle his brain about than the man who, in the early days, was forced to contrive and produce practically everything he consumed, from wooden shoes to shelter. The simple truth is, that men who see disaster looming in the shape of growing complications in the economic order are incapable of rationalizing its processes and relations. In one sense, there is no more occasion for worry over the realization of the automatic machine than there is over the discovery of the North Pole. The man who lived among the complications of the simple life knew no more about one than he did the other, for neither had been discovered, and that is all that has happened with respect to either—they have simply been discovered, and the machine has been utilized. The utility of the discovery of the North Pole is not exactly clear; perhaps the scientists know what it is, and it is possible that we are all benefitting from their knowledge without suspecting it. The fact that the man who pushes the button which sets the automatic machine going cannot take the machine apart and put it together again affords no ground for pessimism.

In the last analysis, the automatic machine is merely a sublimation or extension of the properties of the human body which enable man to produce the things he needs. An electric crane is so much muscle exerted in lifting from one place to another materials upon which man is at work in the process of production. The telescope is an extension of eyesight; the camera is merely an instrument for making a permanent record of the things the eye sees. The telephone, the telegraph, the wireless and all instruments of communication, including newspapers, books and all printed matter, simply extend the human voice. Automatic machines are merely so many tireless hands which move more rapidly and with less friction than it is possible for the human hands to move. Automobiles, ships, locomotives, airplanes and other instruments of transportation are nothing more than sublimated legs which carry us from place to place more rapidly than our own can carry us. The use of these extensions of the properties of the human body requires no more mental effort than is required for the use of the functions of which they are the extensions. To require that every man should understand every detail and principle of the mechanics of any of these things is no more reasonable than to require that every man be a surgeon or a doctor of medicine. When the human body gets out of order we call an expert—a doctor. That is all we do when a machine breaks down. The man who pushes the button which starts the machine is merely the brain of the machine, the will or force which says when it must get busy. That is all that the average man does or knows about it when he commands his legs or hands to move. There is no more reason for the man at the machine to comprehend the inner workings of the machine than there is for him to comprehend his own inner workings; these are matters for experts.

Nor is there any basis for the complaint that the man who does nothing more than push a button which sets a machine going is losing or will lose the creative impulse. He is in much more danger of degenerating physically than he is mentally, assuming that he has any desire to develop his mental qualities. His opportunities for mental development and for giving free play to his creative impulses are certainly greater under the increased leisure and relief from back-breaking physical labor which the automatice machine has brought the average man. Certainly routine and repetition are fagging, tiring and annoying to the sensitive and highly strung, and, to some extent perhaps, to the more obtuse, but the man who takes his place beside an automatic machine in order to supply the lacking spark of intelligence which is needed to make it work for man much more efficiently and prodigiously than man can work for himself, is simply performing a task as a contribution to co-operative production, and that task is done in payment for the things he consumes. Labor has always been more or less irksome to the average man, and perhaps always will be, but we all must labor in some department of the economic organization. If the man who pushes buttons tires of his job, there is nothing to keep him at it if he has the ability to do something more valuable. Or, if he craves to exercise his creative impulses, there is nothing to stop him. The machine and the economic organization afford him more leisure to give free play to all his latent powers. Modern industry stifles nothing—life under it ought to be as easy as an old shoe.

## PREVENTING CONFLAGRATIONS

Congested cities mean increased fire risk, and one of the methods of reducing this risk is the installation of high pressure fire systems. In an address given at a meeting of engineers at New Bedford, Mass., G. W. Booth, chief engineer of the National Board of fire underwriters, said:—

"Conflagrations spread either by the generation of a heat wave of such intensity that everything combustible in its path is involved, or by means of flying brands carried by the wind far in advance of the origin of the fire and setting fire to combustible roofs or perches. The first type of conflagration is that of which we must think in considering the installation of Higb Pressure Fire Systems, since most of them occur in high value cougested districts and it is only in such districts that the expense of installing and maintaining a separate fire main system can be warranted. There is of course much doubt as to whether such a system or any other fire fighting facility will enable a fire department to make a direct stop of a conflagration well started; probably not, since the heat wave is so intense for some distance in advance of the fire as to prohibit a stand. But it will at least facilitate a narrowing and checking of the fire at strategic points, and should serve to prevent a threatening fire from assuming conflagration proportions, as it has in fact been reported as doing in one or more cases in Baltimore.

"An inspection of the list of cities in which separate fire main systems have been installed shows that 9 out of the 18 cities which have installed such systems with special pumping stations to supply them have a population in excess of 400,000; four of the other 9 are in excess of 300,000, and most of the others either present special fire protection problems or were able to take advantage of favorable conditions to minimize the cost of installation or of maintenance or both. In this comparison are not included in these cities which have made extensions of the domestic high service systems into congested value sections at lower elevations. Such extensions have been made in Worchester, Providence, Newark, N.J.., Fitchburg, Lawrence, and a few other cities, and furnishing from 3.000 to 8,000 gallons per minute at initial pressures ranging from 130 to 180 pounds, must be considered as highly valuable auxiliaries to other fire-fighting facilities."

### A NEW IMMIGRATION BODY

Whatever views may be held regarding the desirability of immigration and the classes of settlers required, there is no doubt but that the Canadian Colonization Association, the plans of which are just now announced, is sincere in its effort and thorough in its work. It is a development of the Western Canada Colonization Association, which was promoted a couple of years ago for immigration work but did not actively commence. An adequate capital has been secured and the plans revised and extended. Behind the project are a group of men prominent in various branches of Canadian business.

There has been an immense amount of work involved in the promotion of a semi-public organization such as this, and in this connection M. A. Brown and F. D. L. Smth have been most active. Before financal support could be secured from corporations and individuals public opinion had to be developed, so that some lapse of tme was inevitable. Then there was the fact that the immigration policy of the Dominion government was not clearly defined, which made the work all the more difficult.

## *Railroad Earnings*

The following are the approximate gross earnings of Canada's transcontinental railways for the month of August:—

**Canadian Pacific Railway**

| | 1922 | 1921 |
|---|---|---|
| August 7th | $3,285,000 | $3,673,000 |
| August 14th | 3,511,000 | 3,745,000 |
| August 21st | 3,369,000 | 3,494,000 |
| August 31st | 5,328,000 | 5,735,000 |
| Totals | $15,493,000 | $16,647,000 |

**Canadian National Railway**

| | 1922 | 1921 |
|---|---|---|
| August 7th | 2,181,198 | 2,384,012 |
| August 14th | 2,076,934 | 2,384,012 |
| August 21st | 2,090,160 | 2,384,012 |
| August 31st | 3,058,892 | 3,405,732 |
| Totals | $9,407,184 | $10,557,768 |

**Grand Trunk Railway**

| | 1922 | 1921 |
|---|---|---|
| August 7th | 2,300,131 | 2,146,136 |
| August 14th | 2,299,738 | 2,291,882 |
| August 21st | 2,318,456 | 2,302,852 |
| August 31st | 3,118,819 | 3,490,363 |
| Totals | $10,037,144 | $10,231,233 |

## *Bank Clearings*

The following are the Bank Clearings for the month of August, compared with the same month last year:—

| | Aug. 1922 | Aug. 1921 | Inc. or Dec. |
|---|---|---|---|
| Montreal | 373,747,612 | 428,570,828 | — 54,823,216 |
| Toronto | 361,698,991 | 371,967,490 | — 10,268,499 |
| Winnipeg | 148,869,182 | 178,302,483 | — 29,433,296 |
| Vancouver | 59,523,689 | 61,466,583 | — 1,942,894 |
| Ottawa | 25,839,442 | 27,026,163 | — 1,186,721 |
| Calgary | 18,297,864 | 24,017,889 | — 5,720,025 |
| Hamilton | 23,796,553 | 22,745,184 | 1,051,369 |
| Quebec | 23,085,609 | 24,803,325 | — 1,717,716 |
| Edmonton | 17,381,273 | 22,719,053 | — 5,337,780 |
| Halifax | 15,160,769 | 14,727,255 | 433,514 |
| London | 10,230,081 | 71,308351 | — 1,078,270 |
| Regina | 14,485,715 | 17,251,243 | — 2,765,528 |
| St. John | 13,127,228 | 11,851,592 | 1,275,636 |
| Victoria | 8,482,555 | 10,132,351 | — 1,649,796 |
| Saskatoon | 7,150,584 | 8,844,944 | — 1,694,360 |
| Moose Jaw | 4,433,704 | 6,125,480 | — 1,691,776 |
| Brantford | 4,133,346 | 4,273,167 | 139,821 |
| Brandon | 3,048,809 | 3,891,453 | — 842,644 |
| Fort William | 3,133,025 | 3,083,012 | 50,013 |
| Kingston | 2,837,952 | 3,350,429 | — 512,477 |
| Lethbridge | 2,293,660 | 3,680,526 | — 1,386,866 |
| Medicine Hat | 1,183,826 | 1,673,498 | — 489,672 |
| New Westminster | 2,588,098 | 2,536,772 | 51,326 |
| Peterboro | 2,699,696 | 3,280,962 | — 581,266 |
| Sherbrooke | 4,010,774 | 5,009,051 | — 998,277 |
| Kitchener | 4,016,365 | 3,970,279 | 46,086 |
| Windsor | 15,505,739 | 13,692,485 | 1,813,254 |
| Prince Albert | 1,384,049 | 1,444,690 | — 60,641 |
| Total | 1,172,146,195 | 1,291,746,538 | —119,600,343 |

# New Immigration Plans are Announced

### Canadian Colonization Association Obtains Government Support—Linked Also with British Overseas Settlement Fund—Cost to Canadian Government Will Be Small—Prospects for Settlers From Europe

(Special to The Monetary Times)

Ottawa, Sept. 13:—The Dominion Government has at last taken a new and decisive action to secure a much larger volume of immigration. Proof of this being seen in its support of the social welfare feature of the Canadian Colonization Association's scheme. It is reported that this involves an annual expenditure of less than $100,000, but to the movement it is worth many times that. It was the very thing required to enable the actual starting of operations; for it gave to the work of the Association that official approval, which to the British, whose co-operation is equally necessary, means so much.

The Canadian Colonization Association's scheme not only looks well, on paper; but it has been passed upon by so many qualified persons and seems to be so well backed up, that its success appears to be fairly assured. Sir John Willison has very truly said that, from the standpoint of settlement, it is the biggest thing tried since the building of the Canadian Pacific Railway. It is fortunate that the scheme is a private one, for this means that it will be free from some of those pernicious political influences that so often attend governmental ventures. The fact that a settler taking advantage of it has to have a certain amount of capital, will act as a strong influence to sift out the applicants.

**British Connection**

The linking up of the Association with the British Overseas Settlement Fund is fortunate, for in this way it will command important financial support that otherwise would hardly have been available. This Fund is the most important investment in colonization that the British Government has ever made, its plans calling for an expenditure of $225.000,000 on this work during the next ten years. By this means Britain not only hopes to rid herself of a large amount of surplus population that is eating up annually a great many millions of pounds sterling in the form of unemployment doles, but Britain is also hoping that this emigration to the outlying portions of the Empire may greatly increase the demand for her exports.

If this colonization scheme succeeds in getting the class of immigrants desired in Britain, there will be no lack of British capital to finance the new settlers. This requirement has received a great deal of attention, and it is understood that the underwriting of a large loan has already been arranged for.

**May Be Few British**

It is, however, doubtful whether as large a percentage of the settlers expected will be obtained from the British Isles as some think. In the first place, only those with farming experience, or who are prepared to undergo a course of training in farming, are desired. This is bound to reduce the number of applicants from the British Isles, the nature of whose population is much more industrial today than it was forty or fifty years ago. Then the capital requirements may still further reduce the number from this quarter.

Many of those most qualified to express an opinion think that the United States will be the best field for the class of settlers desired. They say there are large numbers of tenant farmers over there eager to take advantage of an opportunity to get a land holding of their own on easy conditions, spread over such a term that they can't help but make good. There is little doubt of the ability of these people to make the first payment. Besides, knowing thoroughly farming conditions on this continent, they soon will become effective producers. The sooner settlers can do this, the more is their success assured.

It is expected that quite a large number of new settlers may be obtained from Europe. Of course the rate of exchange will militate against the coming of some; for it is not encouraging to a newcomer to find that at the very beginning his money is subject to a discount that seriously reduces the value of his capital. In this respect the settler from the British Isles will also be affected. Now these are days when, to most persons, dollars count.

**Government Risks Little**

The arrangement into which the Government is entering would seem to ensure the maximum of returns at the minimum of expense. Certainly the Government is not risking much; on the other hand the impetus that this new movement will impart to the work of immigration generally can't but have a very stimulating effect on its whole immigration organization, both at home and abroad. In the Department of Immigration there is a very great deal of ability; but there is just as much outside of it. It is not generally known that the Canadian Pacific has spent even more money on colonization during the last forty years than has the Dominion Government; but such is the case. The western manager of the Canadian Colonization Association, as head of the Luse Land Co. sold 100.000 acres of land in the West. All this ability, and much more, is being lined up behind this immigration scheme. Behind all this talent stands a great deal of private money.

A feature that has attracted much attention is the broadening out of this, which at first was a Western Canada scheme only, into an all-Canada one; for the name of the organization has been changed from the Western Canada Colonization Association to the Canadian Colonization Association. This has made the country east of Ottawa feel more kindly towards it; for in times past there has been an impression that the West has been getting the lion's share of the immigration. So it is argued that what is good for the West is equally good for the Maritime Provinces. The latter have a real grievance, but Ontario has not, insofar as the number of new settlers secured is considered. Indeed, in recent years Ontario has been getting the largest number.

## *Personal*

VERNON G. CARDY has been appointed manager of the Mount Royal Hotel, Montreal, which is expected to open about the first of the new year.

C. W. DAVIS, formerly secretary and advertising manager of the Williams Manufacturing Co., Limited, has joined the Montreal staff of McConnell & Ferguson, Limited, advertising agency.

J. C. ROSS has been admitted a partner director of Waghorn, Gwynn & Company, Limited, Vancouver.

F. PERCY SMITH, secretary of Canada Steamship Lines, Limited, has resigned his position owing to his health.

R. S. LOGAN vice-president in charge of land tax and claims and A. B. Atwater, assistant to the president, lines west of Detroit and St. Clair rivers, have retired from active service with the Grand Trunk Railway system.

STEWART W. GOODERHAM has been elected a member of the Standard Stock and Mining Exchange.

. . .

## *Obituary*

GORDON B. HERRIDGE, representative of W. A. Mackenzie Co., at Ottawa, was accidentally shot on September 5th. The late Herridge was 30 years of age.

ALEXANDER ARCHIBALD ALLAN, president of the firm of A. A. Allan & Company, Limited, Toronto, died at his summer home, Invermere, Atherley, Lake Simcoe.

HON. A. M. COVERT, M.D., a member of the legislative council of Nova Scotia, died in Halifax on September 4th. The late Dr. Covert was born at Musquash on May 3, 1870. He entered McGill University from which he graduated in 1898.

# Effect of Tourist Traffic on Trade

By A. B. BARKER

The Fordney Act intended to restrict importation of goods into the United States and Canada's trade with that country has been hurt in common with the trade of other countries. We must import goods from that country and in quantity for several reasons, certain classes of goods at any rate, coal and cotton for instance. These must be paid for in goods shipped from Canada either shipped there direct or else shipped to other countries and the debts arising therefrom sold in the United States. Also we are borrowing there heavily, it is the only place outside of Canada we can borrow, and the proceeds of these loans must come to us in the form of goods. The transactions are carried out in forms of money of course but American money as such is of no use to us in Canada; it must be sent back to the United States for redemption and there its only use is to exchange for goods or services. Our money as such in the United States is in the same position. At least one way of defeating the Fordney Act is open to us and that is to attract American tourists to Canada.

So far as trade is concerned it consists in the exchange of goods for other goods or services, money being used as a means of facilitating the exchange between individuals. So long as Canadian goods are purchased by Americans it makes no difference in the volume whether Canadians ship the goods to the States or whether the Americans come over here as tourists and pay for the supplies consumed by them during their stay. The latter method is more advantageous to us as all the profit remains in Canada as tourists buy at retail while exports are wholesale usually. Apart therefore from the benefits of social intercourse with our visiting neighbors from across the border there is a very real material benefit which is only partially appreciated. It is up to us, therefore, to devise means to increase the volume of American tourist travel in Canada on business grounds.

### Effect of Intercourse

This is recognized as a benefit to more classes of business immediately connected with the traffic but it has a far wider effect. The business of the country as a whole feels the impetus derived from the voluming trade which a big tourist traffic means to the country fortunate enough to attract it.

Reports from Europe are that the hotels and shops through their exhorbitant charges have disgusted travellers and for this reason may discourage travel abroad. This should make it easier to attract visitors to Canada from the United States as they have been the ones who have suffered most in pocket from their continental experience this year. It is to be hoped that our people will not make the same mistakes as the French and Italian hotelmen and traders.

## COURSE OF RAILWAY EARNINGS

### Only Slightly Below Last Year—October is Biggest Month for Canadian Pacific and Canadian National

The gross earnings of the railroads of Canada are only slightly less this year than last. These figures are a reliable indicator of business activity and it must be remembered that as rates have been reduced a larger amount of traffic is represented per dollar of earnings.

The gross earnings of the three Canadian railways are given in tabular form below and are illustrated graphically herewith. The figures cover 1921 and the first half of 1922. It will be noticed that the Canadian Pacific attains its maximum in October, the three months from September to November being the crop moving period. January and February are quiet months followed by an increase in March and another quiet month in April after which there is a steady increase until October. This was the course of the Canadian Pacific's gross earnings in 1921 and the trend of the figures during the first 6 months of 1922 was practically the same.

The earnings of the Canadian National follow a similar course with less extreme fluctuations. February was the biggest month of the first half of 1921 and January the dullest. After January there was a steady increase to the maximum in October. This year March was the biggest month for the Canadian National.

In the case of the Grand Trunk the trend of gross earnings is considerably different. There was not much change in 1921 until about midsummer, the earnings for the months from July to November being about $200,000 higher than for the other months of the year.

The upward tendency shown in June, 1921, was repeated in June of this year indicating that the earnings of the road had followed a similar course this year.

The following are the gross earnings of the three roads by months for 1921 and for the first half of 1922:—

**Canadian Pacific Railway**

| By Months | 1921 | 1922 |
|---|---|---|
| January | 14,208,000 | 11,066,000 |
| February | 12,394,000 | 10,923,000 |
| March | 14,466,000 | 13,589,000 |

| December | 7,618,869 | |

## TRAVELERS' INDEMNITY WINS CASE

One evening towards the end of January, 1921, the Toronto police received a telephone message to the effect that robbers had entered the jewellery store of I. Shoot and Company, 354 Queen street west, and had made a haul. Further investigation brought out details to the effect that the robbers had thrown Mr. Shoot down the cellar stairs and had locked him there while they ransacked the store. An estimation of the money, securities and merchandise bagged by the bandits placed the total at $7,238.

It happened that the preceding May, Shoot and Company had placed a $10,000 policy with the Travelers' Indemnity Company. When that company refused to be satisfied with the proof of loss, Shoot and Company entered an action to recover the alleged amount of the loss. The case came before Justice Lennox. I. F. Hellmuth, K.C., appeared for the plaintiff and J. C. M. German for the insurance company.

Justice Lennox gave judgment on August 4. He does not believe Shoot's story of the robbery. The intermittent incapacity which Shoot attributed to the attack upon him by the robbers, the judge declares, to have been merely a pretence. He suggests that possibly Shoot may have met with a slight accidental injury on that day—fell down the stairway for that matter—and, following a previous line of thought, sequestered a mishap as the background for an actual robbery.

## DOUBLE INDEMNITY POLICIES NOW GENERAL

Pursuant to the passage by the Dominion Parliament at the last session of an amendment to the Dominion Insurance Act, permitting life insurance companies to issue policies embodying the Double Indemnity clause, in July of this year, the larger life companies in Canada commenced to issue what are called "Double Indemnity" policies. It is expected that the smaller companies will be compelled to follow suit, but they will doubtless take time to study the more or less strict regulations of the Act before plunging into the new form of competition.

By order of the Board of Directors.

A. D. LANGMUIR,
General Manager.

Toronto, August 29th, 1922.

# Bumper Crop is One Favorable Factor

### Other Encouraging Signs Are Increase in National Revenue, Recovery of Export Trade, Advance in Exchange and Straightening Out of Labor Difficulties—Immigration and Taxation As Outstanding Problems

Ottawa, Sept. 12. The reports of a really bumper crop in the West, the straightening out of the various labor troubles, the increase in some of the important sources of revenue, together with the return of the dollar to par and a reviving export trade—this combination of fortunate circumstances is radiating a great deal of sunshine in Government circles, even though there is likely to be a shortage of anthracite.

The Government attaches a very great deal of importance to the West, and is much affected by what it hears from there. Both Minister of Agriculture Motherwell and Minister of the Interior Stewart have been out there looking over the ground very carefully and their reports have been of a very favorable nature. They both tell a story of big crops and growing contentment, despite the fact that the Wheat Board is not functioning. This is very satisfactory, for big crops mean a busy Canada, and there is a conviction that prosperity will mean the minimum of political troubles.

### Government's Attitude

As recent addresses delivered by the Prime Minister indicate, the Government intends to adopt pretty much of a laissez faire attitude towards business, this being taken on the general ground that business generally knows a great deal more about how it should be conducted than the Government does. There is also an impression that the world situation is so troubled that the only thing to do is to let business flow in the channels it shows a natural inclination to follow.

This is especially true in the matter of trade. After a careful survey of the situation in Europe, Minister of Trade and Commerce Rohb, who, before he entered office was well acquainted with conditions overseas, has concluded that trade in that quarter can't be forced, and that about all that can be done is to keep an eye open for what business offers. Europe will need more of our wheat than she did last year; but the action of France in returning to whole wheat flour is an evidence that, though her wheat crop is lighter than last year's, she will not buy any more grain than is absolutely necessary, and that for financial reasons.

The trouble over the reparation payments, which most good judges are afraid will yet preciptate a financial crash, seems likely to make Canada more dependent for a while on the American market. For this reason it is a source of satisfaction to learn that the organized farmers movement in the United States which is responsible for the high duties on grain, is now favorable to the reduction of the duty on cattle for feeding purposes a large percentage of farmers in the western states requiring feeders to use up their large grain crops, which it may be impossible to move.

### Tax Collections

One of the most gratifying features of the revenue is the strength shown by the income tax collections should be received with a grain of led $44,758,000, which while $7,416,000 below those for the same period last year is, all things considered, an excellent showing. Reports from reliable sources are to the effect that private incomes generally do not disclose nearly the percentage of reduction that many had predicted.

Talk of a serious falling off in the income tax collections should be received with a grain of salt, for even if there should be a reduction in the collections from those now paying, it should be remembered that the number of income taxpayers last year was only a little over 190,000. It is ridiculous to say that this anything like represents the number of those having a taxable income. The collections will increase in proportion as the collecting machinery is perfected.

Considering the great need of revenue, and the fact that large though it is, the national income does not yet equal the outgo, it is surprising that, in some quarters, a demand should be made for the reduction of the income tax: indeed it is understood that the Quebec Retailers want it wiped out altogether. Like the people of old France, the French-Canadians prefer indirect, rather than direct methods of taxation, thinking that a tax is good in proportion as it does not provoke "squawking." It is, however, pretty well agreed in economic circles that the British and American method of direct taxation is not only preferable from the standpoint of general results but is much fairer.

### Income Tax

As the income tax is levied in proportion to a person's ability to pay, it is manifestly much more equitable than one levied according to one's use, or consumption, of goods. Besides, if those who have surplus wealth do not pay taxes in proportion, who can be expected to do so? Well on to $500,000,000 a year must be raised for federal purposes, and if the well-to-do do not pay in proportion to their income, those not so well-to-do must pay an unduly heavy proportion.

If the income tax were abolished or much reduced, it would have to be made up for, either through a considerable increase in customs, or by another marked increase in the sales tax. To increase the former is out of the question, for the trend is undoubtedly in the direction of tariff reduction, rather than of increase. Even the Conservatives are committed to the policy of leaving the tariff as it is rather than increasing it. Moreover the Progressives are a formidable barrier to increases in duties. The sales tax might be further increased; but it is now so high that any further appreciable increase might raise the cost of living above what it is in the United States where such a tax does not exist. Besides, the opposition represented by the Progressives to this tax might make it almost as difficult to get further increases through Parliament, as it yould be to further increase the tariff. The income tax, however, might well be adjusted so as to bear lighter on those whose income is derived from wages, salary, or professional services.

### Should Cut Taxes

Canada must do her utmost to get immigrants, and one of the best ways of doing this is to make this a cheap country to live in. This cannot be done, if there is to be a continual increase in direct taxes, least of all can it be possible, if the income tax is to be much reduced, and the deficiency made up through increases in the customs and sales taxes. Even now, many Americans sheer off from this country because a comparison of the taxes paid on both sides of the boundary line tell against Canada.

The true solution for high taxes is reduced expenditure. Much may still be done to reduce outlay through a reorganizing of the departments of the federal administration Much has been said against the work of Arthur Young and Griffinhaggen, efficiency experts who reorganized certain of the departments; but the undeniable fact is that the departments overhauled by them are the ones in which the expenditure has been reduced. Expenditure remains high in some of the others because the dead wood has not been cleared out.

But after all is said and one the big reduction must come in the Government Railways. The saving of a few millions here or a few others there will avail little, if the annual deficits continue to touch the $70,000,000 and more mark. And to date there are no indications that this year's statement will be much different from last year's. So until these problems of expenditure are solved, it is useless to talk about reducing taxes, especially those such as the income tax, which are among the best revenue producers we have, and which promise well for the future.

---

## Bank Branch Notes

A branch of the Bank of Montreal has been opened at the corner of St. Timothee and St. Catherine streets, Montreal, to be known as the St. Timothee and St. Catherine streets branch.

Gordon G. Laird, manager of the main Halifax office of the Canadian Bank of Commerce, has been appointed manager of the Bank of Hamilton.

Charles Warren, accountant of the Union Bank at Owen Sound, has been appointed manager of the branch at Caledon, Ont.

---

## NEW BRUNSWICK MUNICIPAL UNION.

### J. W. McPhail, of Perth, Elected President at Annual Convention Held Recently at Edmundston.

J. W. McPhail, of Perth, was elected president of the Union of New Brunswick Municipalities at their convention in Edmundston, August 24-26. Delegates accepted the invitation of Campbellton for next year's convention. It was voted that the New Brunswick Government be requested to draft an autonomous Municipalities Act. A unanimous resolution was passed that "In opinion of this union, the railway freight rates should be materially reduced without any further delay, therefore, be it resolved that this union hereby place itself on record as urging the railway authorities to effect freight rate reduction," and that a copy of the resolution be forwarded to the Prime Minister of Canada and the Minister of Railways.

### Municipal Legislation.

In his annual report as secretary treasurer J. King Kelley, secretary treasurer of St. John county, urged the need of a full and as far as possible, complete autonomous municipality act for New Brunswick, giving each municipal corporation as far as possible jurisdiction over taxation for municipal purposes and power to issue bonds, with reasonable safeguards, by the several councils.

He suggested that such an act should be drafted by a commission and that ultimately it would result in a great deal of time now taken up before the municipalities commission of the Legislature. He further suggested that before bonds were issued the facts could be investigated by the provincial secretary treasurer's department, and that all municipalities should be compelled to keep standardized books which could be audited periodically and within a short time.

G. O. Doty, K.C., gave an address on "Equalization of Taxation."

---

## Business Conditions

Despatches received by Dun's Review from the branch offices of R. G. Dun & Co. in the principal cities of the Dominion of Canada continue optimistic in tone; retail trade in most districts is being stimulated by generally favorable weather, satisfactory crop results, extensive building operations at many points, and increasing activity in numerous important industries. A growing volume of orders of dry goods, clothing, furniture, footwear, jewelry, furnishings, hardware and other staples is being received by wholesalers at the leading jobbing centres, and further improvement, especially in business with country merchants, is expected as soon as harvesting is completed. Less difficulty is being experienced by the manufacturers in obtaining financial accomodation than formerly, but collections, as a rule, are slow.

Montreal reports some improvement in retail trade and some increase in demand at wholesale for seasonable staples. Buyers are still cautious in their operations, but a disposition to anticipate requirements more freely is clearly perceptible, and sentiment generally is very confident regarding the future. Collections are slow to fair.

Wholesalers are receiving Fall orders in greater volume at Quebec and the prevailing sentiment in most lines is now quite cheerful. Collections are slow.

Well maintained industrial activity, encouraging crop reports and generally favorable weather have stimulated business in retail lines at Toronto, and this, in turn, is resulting in more liberal placing of orders with wholesalers for dry goods, clothing, footwear, furnishings, and all other Fall and Winter commodities. Collections show no improvement.

Irregular conditions still prevail in the Far West and the Northwest, Winnipeg, Regina, and a few other points reporting a fairly brisk retail trade and wholesalers receiving a slowly increasing volume of orders for clothing, dry goods, footwear, hardware and other seasonable staples, while advices from Calgary and some centres in Saskatchewan where the farmers are apparently waiting for assured harvesting returns, state that business is quiet. Collections continue to drag.

# To Holders of Five Year $5\frac{1}{2}$ per cent Canada's Victory Bonds

**Issued in 1917 and Maturing 1st December, 1922.**

---

## CONVERSION PROPOSALS

---

THE MINISTER OF FINANCE offers to holders of these bonds who desire to continue their investment in Dominion of Canada securities the privilege of exchanging the maturing bonds for new bonds bearing $5\frac{1}{2}$ per cent interest, payable half yearly, of either of the following classes:—

(a) Five year bonds, dated 1st November, 1922, to mature 1st November, 1927.

(b) Ten year bonds, dated 1st November, 1922, to mature 1st November, 1932.

While the maturing bonds will carry interest to 1st December, 1922, the new bonds will commence to earn interest from 1st November, 1922, GIVING A BONUS OF A FULL MONTH'S INTEREST TO THOSE AVAILING THEMSELVES OF THE CONVERSION PRIVILEGE.

This offer is made to holders of the maturing bonds and is not open to other investors. The bonds to be issued under this proposal will be substantially of the same character as those which are maturing, except that the exemption from taxation does not apply to the new issue.

Holders of the maturing bonds who wish to avail themselves of this conversion privilege should take their bonds AS EARLY AS POSSIBLE, BUT NOT LATER THAN SEPTEMBER 30th, to a Branch of any Chartered Bank in Canada and receive in exchange an official receipt for the bonds surrendered, containing an undertaking to deliver the corresponding bonds of the new issue.

Holders of maturing fully registered bonds, interest payable by cheque from Ottawa, will receive their December 1 interest cheque as usual. Holders of coupon bonds will detach and retain the last unmatured coupon before surrendering the bond itself for conversion purposes.

The surrendered bonds will be forwarded by banks to the Minister of Finance at Ottawa, where they will be exchanged for bonds of the new issue, in fully registered, or coupon registered or coupon bearer form carrying interest payable 1st May and 1st November of each year of the duration of the loan, the first interest payment accruing and payable 1st May, 1923. Bonds of the new issue will be sent to the banks for delivery immediately after the receipt of the surrendered bonds.

The bonds of the maturing issue which are not converted under this proposal will be paid off in cash on the 1st December, 1922.

W. S. FIELDING,
Minister of Finance.

Dated at Ottawa, 8th August, 1922.

# Uniform Automobile Conditions

(By V. Evan Gray, Ontario Superintendent of Insurance.)

(Report of the committee on uniform automobile statutory conditions, presented at the Provincial Superintendents' Conference in Vancouver, August 8-10.)

At the Fourth Annual Conference of the Association held in Quebec in October last, the form of Statutory Conditions for Automobile Insurance was approved and adopted by the Conference, and recommended for enactment to the Legislatures of the Provinces. It was agreed that these recommendations should be first submitted to the Ontario Legislature and for that purpose the undersigned was continued as a committee of the conference in charge of the matter.

The recommendation was duly considered by a select committee of the Ontario Legislature respecting insurance and the Automobile Statutory Conditions were duly enacted and are now contained in The Ontario Insurance Amendment Act of 1922. The form in which they were enacted is appended hereto.

A number of very important changes and some unimportant changes were made in the form of the Quebec draft. These are indicated in the following report. As finally adopted the form of the Conditions was approved by representatives of the insurance companies, of The Ontario Motor League. The Toronto Board of Trade and others representing the interests of automobile owners. Changes were also concurred in by the undersigned as the committee of the conference.

These changes are now submitted herewith for approval and confirmation by this conference.

Paragraphs 5a and 5b respectively, defining automobile and automobile insurance are new and were not discussed by the Quebec Conference.

Section 198b is new: This merely indicates the application of the Act.

Section 198c is new: This provides that the term of the contract may not exceed three years and is, I believe, already a provision of the law of most Provinces.

Section 198b is new: This section provides the requirement of a form of written application for an automobile insurance policy, specifies what shall be the content of the application, requires a copy of the application to be attached to the policy and provides for a temporary or interim binder pending completion of the formal application and policy for a term not exceeding 14 days, and for the printing on the application of a warning to the applicant against misrepresentation or concealment. This section is very important. Members of the conference will remember the discussion at Quebec of the desirability of including a statutory requirement for a written application. The undersigned was one of two members of the conference who were disposed to think that this should not be made a statutory requirement and the remaining members of the conference were of opinion that this was a desirable requirement. When the consideration of the Quebc draft came before the select committee of the Ontario Legislature, representatives of the Ontario Motor League pressed strongly for the enactment of a provision for a written application, basing their suggestion on the argument that this would enable the elimination of some of the moral hazard of automobile insurance, reduce fraudulent claims and dishonest losses. The representatives of the insurance companies concurred in the suggestion of The Ontario Motor League and the Legislature thereof adopted the provision as shown herewith.

Section 198e: This section is new but follows the plan of the Model Fire Insurance Policy Act as recommended by the commissioners on Uniformity of Legislation.

Section 198f: This is new and was inserted by the request of the representatives of the insurance companies who desired to have it expressly stated that the contract might provide for the exclusion of special risks.

Section 198g: This is in the usual form of introductory sections to Statutory Conditions as now used in the various Provincial Acts.

### Statutory Conditions.

Condition No. 1: This condition is new but was copied from the form of Statutory Accident and Sickness Conditions as approved by the Quebec Conference. Condition No. 1 as shown in the Automobile Conditions approved by the Quebec Conference is now provided for in sub-section 3 of section 198d above mentioned.

Condition No. 2: The only change in this condition is to limit the facts which the insured is obliged to communicate to those which are required by the terms of the written application to be made known to the insurer.

Condition No. 3: This is identical with the form approved by the Quebec Conference.

Condition No. 4: This is the same as the Quebec draft in so far as applies to written applications for insurance. The part relating to verbal applications has been omitted because of the requirement of written applications in all cases.

Condition No. 5: This has been amended to delete clause (a) which relieved the insurance company where the automobile was being used for an illegal purpose, and also by eliminating the final words of clause (b) relating to the driving of the car by an unlicensed person. It was decided by the committee that the words used "for an illegal purpose" were too indefinite to admit of proper use in the Statutory Conditions and that the existing law might better be left to take its own course in the protection of the insurer under this head.

Condition No. 6: Has been rearranged but no substantial change in substance has been made except by the addition to paragraph (d) of provision for transfer of title by an authorized assignment under the Bankruptcy Act.

Condition No. 7: Is identical with the Quebec draft.

Condition No. 8: (1) This is the same as paragraph (a) of Condition 8 of the Quebec draft except that the words "shall promptly give written notice" have been substituted for "shall give immediate written notice thereof."

(2) This is the same as paragraph (b) of Condition 8 of the Quebec draft.

(3) This is the same in substance and substantially the same in form as paragraph (c) of the Quebec draft.

Condition No. 9: Clause 1 (a). The words "or until the insurer has had a reasonable time to make the examination provided for in sub-section 2 of this Condition" have been added at the end of this paragraph.

Clause 1 (b) This is identical with the Quebec draft.

Sub-section 2 and 3 of Condition 9 are an entire rearrangement of the contents of paragraph (c) of this Condition in the Quebec draft. The only change in substance is that the right of examination is limited to a degree sufficient to enable the representatives of the insurer to ascertain the amount of damage sustained.

Sub-section 4 of this Condition is the same as paragraph (d) in the Quebec draft.

Sub-section 5 of this Condition has been amended by the addition to paragraph (e) of the Quebec draft of the words "except where an appraisal has been had" at the beginning of the paragraph and of the words "giving written notice of its intention so to do within 7 days after receipt of the proofs of loss" in the middle of the paragraph.

Sub-sections 6, 7, 8, 9, 10 and 11 of this Condition are substantially the same as paragraphs f, g, h, i, j and k of the Quebec draft.except that in sub-section 11 the term of fifteen days has been substituted for the term of sixty days for payment of the award of the appraisers by the company.

Condition No. 10: is new. It specifies who may give notice of proofs of claim. It is copied verbatim from the provisions of the Uniform Accident and Sickness Statutory Conditions.

Condition No. 11: is the same as Condition No. 10 of the Quebec draft with the following words added at the end thereof "in any matter affected by such fraud or false statement."

Condition No. 12: is substantially the same as Condition 11 of the Quebec draft.

Conditions 13, 14 and 15 are identical with Conditions 13 and 14 of the Quebec draft.

Section 198h: was agreed to in substance by the Quebec Conference. It provides for the omission of Condition 8 or 9 respectively when not applicable to the risk insured.

Section 198i: This is identical with the provisions in existing Acts relating to Variations in Statutory Conditions except that sub-section 3 is new and has been added to permit the extension of cover to additional risks where permitted by the policy without such extension being considered a variation of conditions.

Section 198j: This provision restricts the use of red ink to the same as that adopted in the Accident and Sickness Statutory Conditions.

Section 198k: This is new. It is identical in form with the provision inserted in the Model Fire Insurance Policy Act and in the Accident and Sickness Statutory Conditions.

Section 198l: This is new but is the standard clause relating to partial payment of loss clause.

Section 198m This is new: It provides that where the amount of the loss or the adequacy of repairs to the automobile is in dispute, no action may be brought until the award of the appraisers has been had pursuant to the Statutory Conditions and that in any such action the award of the appraisers shall be conclusive.

The undersigned respectfully submits the above report for approval and confirmation by the Conference and begs to move its adoption and further moves that this Conference recommends to the Legislatures of the Provinces, the enactment of the legislation respecting this subject in the form in which it was enacted by the Ontario Legislature in the Ontario Insurance Amendment Act 1922.

## RECOVERY ON LIFE POLICY

### No Proper Notice of Enlistment Being given Policy is void

In an action by the executrix of A. W. Beasant against Northern Life Insurance Co., the Manitoba King's Bench Court has recently held that no proper notice of enlistment having been given the policy was void in accordance with its conditions.

The policy contained the following clause: "that the insured may without the consent of the company engage in the active service of the militia of Canada, notice thereof to be given by or on behalf of the insured within ninety days after the date of his so engaging and will also pay such extra premium during such service as the company shall fix."

The insured, enlisted in the Canadian Expeditionary Force, went overseas and was killed in action. No actual notice was given of the enlistment although it was admitted that the "agency manager for the part of Manitoba where the policy was issued knew of the enlistment of the insured;" it was also shown that the enlistment had been mentioned in two letters to the treasurer of the insurance company, written by the party who held no office in the company and who had sold certain lots to the insured in connection with the insurance which was taken as collateral security.

The court held that there was no evidence that the proper notice was given as required by the policy.

## EMPLOYERS' LIABILITY INSURANCE.

### Company Conditionally Liable To Indemnify The Insured

The appeal in the case of Melukhova v. Employers' Liability Assurance Co. has recently been decided by the Supreme Court of Canada which held that the assurance company was conditionally liable to indemnify the insured.

A clause in the policy stated that no action was to lie against the assurance company to recover for loss under the policy unless brought by the assured for loss actually sustained and paid in money by the assured in satisfaction of judgment.

After an accident giving rise to an action the insured company made an assignment and the liquidator obtained from the court authority to retain a certain sum to cover the claim if an action was maintained. A judgment was subsequently obtained against the insured company for damages. The insured company did not pay the judgment and the assurance company claimed that it was under no liability because the amount of the judgment had not actually been paid.

The court held that the assurance company owed a conditional debt and that a seizure under garnishment proceedings should be held to be binding until the condition rendering its obligation payable, was fulfilled.

# *Recent Fires*

Fire losses in Canada during the week ended September 13, are estimated by The Monetary Times at $1,199,300, compared with $685.000 the previous week. The details are as follows:---

**Arsenault Siding, N. B.**—Sept. 6th. Mill belonging to L. A. Malenfant in the Metapedia Valley. Loss $10,000 not covered by insurance.

**Athens, Ont.**—Sept. 11th. Barn on the farm occupied by Fraser Darling. Cause, lightning.

**Blenheim, Ont.**—Sept. 10th. Barn belonging to Thos. Holdaway. Cause, lightning.

**Billings Bridge, Ont.**—Sept. 7th. Home of Albert Birch, Hill street. Loss $4,000.

**Chipman, Alta.**—Sept. 7th. Barn of Emil Henning.

**Chicontimi, Que.**—Sept. 8th. Government wharf. Loss $25,000.

**Chauvin, Alta.**—Sept. 7th. Home of Fred Holbrook. Loss is partly covered by insurance.

**Champion, Alta.**—Sept. 1st. Guy Standish Pool hall. Loss, $4,000.

**Caron, Sask.**—Sept. 2nd. Residence of D. L. Campbell. Cause, overheated stove pipes. Loss $10,000, insurance $3,300.

**Carillon, Que.**—Sept. 2nd. Residence and store of Mr. Ranger. Cause, explosion. 1 fatality.

**Cargill, Ont.**—Sept. 8th. Barn belonging to Jos. Frieberger. Insurance $1,700.

**Deschambeault, Que.**—Sept. 8th. Residence of Mr. Paguin, and three neighboring houses and a store. Loss $30,000, 1 fatality.

**Exeter, Ont.** Sept. 7th. Barns of Willington Batten. Cause, lightning.

**Frelighsburg, Que.**—Sept. 13th. House and barn belonging to James Harvey. Loss $50,000, partly covered by insurance.

**Hull, Que.**—Sept. 7th. Residence of Donat Paquin, on Main street. Loss $3,000.

**Halifax, N.S.**—Sept. 6th. Phinney Building on Barrington street. Loss $90,000.

**Knowlton, Que.**—Sept. 8th. House and stables of Robert Blackwood.

**Keene, Ont.**—Sept. 5th. Barn belonging to Milton Easson in Otonabee township. Cause, combustion.

**London, Ont.**—Sept. 7th. Residence of R. Heuston. Cause, lightning.

**Lindsay, Ont.**—Sept. 10th. Barn owned by Marmaduke King on the 2nd. concession of Mariposa, and a barn belonging to Ronald McDonald on the 5th concession of Mariposa. Cause, lightning.

**Leader, Sask.**—Sept. 8th. Two grain elevators. Loss $22,000.

**Maxwell, Ont.**—Sept. 13th. Barn of Alex. Findlay. Cause, lightning. Loss is partially covered by insurance.

**Massawippi, Que.**—Sept. 6th. Barn belonging to Mr. Harkness.

**Montreal, Que.**—Sept. 7th. Premises occupied by the St. Lawrence Waggon Company, Limited, 26-34 King street, and belonging to Meldrum Bros. Loss $20,000.

Sept. 6th. Store of F. P. Ranger, 1236 Ontario street east. Loss is partly covered by insurance.

Sept. 12th. Residence owned by Abraham Augi, 33 St. Claude street.

**Ottawa, Ont.**—Sept. 10th. Store and carpenter shop at 287 St. Patrick street, owned by Edward Metot.

Sept. 4th. Warehouse of A. L. Florence on Catheart street. Loss $10,000.

**Peterboro, Ont.**—Sept. 6th. Barn on the farm of Joseph Milburn, on the Chemong road. Cause, lightning. Loss $3,500, partly covered by insurance.

**Omemee, Ont.**—Sept. 5th. Stable in rear of Dr. Younie's residence, King street.

**Strathroy, Ont.** Sept. 6th. Barn belonging to George Skinner 9th concession of Caradoc. Cause, lightning. Loss $4,000.

**Sheffield Mills, N.S.**—Sept. 1th. Warehouse owned by Percy Ells. Loss $7,000, partly covered by insurance.

**Winnipeg Beach, Man.**—Sept. 4th. Eight business houses. Loss, $55,000.

**Winnipeg, Man.**—Sept. 11th. Buildings on Portage avenue. Loss $300,000, partly covered by insurance.

# Angles of the Immigration Question

BY R. J. C. STEAD

(Continued from last week)

The Immigration machinery consists of some eighteen offices in the United States, twelve in the United Kingdom, an European office recently opened in Antwerp, and sub-offices being opened from time to time in Europe as occasion requires; medical and civil inspectors at the various ports of landing in Canada and on the international boundary, and all the detail necessary to co-ordinate such a machine functioning over so vast an area and dealing with the most variable of all commodities—human beings themselves. The regulations as to who may be admitted to Canada are severe; I think, properly severe, but they are enforced with as much consideration for the immigrant or intending immigrant as is consistent with efficiency. I wish you could see the work which is being done by our Woman's Branch under the direction of Miss Burnham, or our Juvenile Immigration Branch under the direction of Mr. Smart, and you would realize that immigration is not merely a matter of statistics and regulations, but touches every branch of human relationships, not infrequently on their most pathetic and even their most sacred sides. But there is one point which I must mention. You may have seen arguments in the Press that Canada should select her immigrants at the point of origin and not wait until they arrive at her ports before turning them back, to their great disappointment, and, frequently, to their financial ruin. The only thing wrong with that suggestion is that it comes too late to be of any practical value to the Department as we have been doing that very thing for a number of years, and are steadily extending the machinery for that purpose. Obviously, we can't put officers at every foreign seaport in the world to turn back immigrants at those ports, but so far as Great Britain is concerned the field is well covered, and our machinery is being gradually extended in Europe. Of course, we retain the right, no matter what examinations an immigrant may have undergone at his port of embarkation—we retain the right to reject him at the Canadian port, for cause, but when I tell you that out of 74,262 immigrants from the British Isles for the fiscal year ended March 31, 1921, it was necessary to reject at Canadian ports only 193 individuals—that is, one person rejected for every 385 who landed—you will see that the hardships arising from rejection of these classes have been reduced perhaps as much as is humanly possible.

### Assimilation

We now come to the third, and, perhaps, most important phase of the problem—the assimilation of the immigrant after he arrives. That is a phase of the problem in which you will be particularly interested, as, I may suggest, it is one which lies largely at your doors. Immigration is a matter which touches our life so closely that it cannot all be relegated to the hands of the Dominion Government, or, indeed, of any government. It calls for the active participation of the individual. Particularly is this true of assimilation, which may be described as the process of making the new arrivals into Canadians. It is here that the active co-operation of municipal organizations everywhere is so greatly needed, for I may confess that the real limiting factor on our immigration work at the present time is the ability of Canada to assimilate the immigrant, socially as well as industrially.

How is this to be done? In my opinion, the basic thing—the foundation upon which everything else must be built—is a strong Canadian spirit. Let us be so permeated with a genuine Canadianism that it will be impossible for any immigrant long to escape the contagion. Here I am tempted to digress into a favorite theme of mine that one of the most effective ways to do this—perhaps the only permanently effective way—is by the building up of a genuine and sincere Canadian literature, a literature which shall gradually assort and crystalize our national ideals, which shall make us proud of our past, confident in our present, triumphant in our future. The making of a Canadian literature has a significance a million times greater than the dribble of royalties to a few Canadian writers; it lies at the root of our national existence. I cannot pause tonight to elaborate that argument but I submit it to your intelligence, and I ask you to think about it.

Other mighty factors in promoting assimilation are the school, the church, the lodge, the press, the social life of the community, but only in so far as these agencies are opened to and do consciously absorb the newcomer into the very body and soul of all they stand for. Through your municipal organizations you can wield a tremendous power in that direction. Many of you already are doing so. My word is, Keep up the good work, and increase it, because assimilation is today the problem that lies before us as a nation.

### To Recapitulate

Let us now review just for a moment, the ground which I have so hurriedly and sketchily covered. We are in Canada less than three persons to the square mile compared with 51 in Asia, 120 in Europe, 390 in Japan, 903 in England and Wales. Our permanent right of possession will be determined by our ability to possess. We have national, provincial and municipal debts, not staggering it is true, but sufficiently heavy to sober us. We have resources so great that we have not yet been able to have an accurate stock taking of them. By applying labour to these resources we can minimize our burden of debt, restore national prosperity and develop our country to the status which nature intended her to occupy among the nations of the world. To do this we require labour and capital, and the most fruitful field from which to draw these requisites lies in other lands. The machinery for bringing settlers into Canada is in existence and is halted only to await the assimilation—socially as well as industrially—of those who have already come. That assimilation is the duty of the whole people of Canada, but on account of their close touch with the individual and their intimate knowledge of local conditions, I suggest that it is peculiarly the duty of the municipalities of Canada. That is the word that I would leave with you as the conclusion arrived at from a somewhat serious and extended observation of our immigration problem.

# *Insurance Licenses and Agency Notes*

The Metropolitan Life Insurance Company has been licensed to transact in British Columbia the business of accident and sickness insurance in addition to life insurance for which it is already licensed.

The American Insurance Company has been licensed to transact in British Columbia the business of fire insurance.

The Cornhill Insurance Company has been licensed under the British Columbia Fire Insurance Act to transact in British Columbia the business of fire insurance, and under the Insurance Act the bsuiness of insurance against damage to property of any kind caused by the explosion of natural or other gas.

The Policyholders' Mutual Life Insurance Company has been licensed to transact in British Columbia the business of life insurance.

## RECENT FIRES

(Omitted from last week)

**Renfrew, Ont.** Sept. 5th. Garage of Peter Godin, Hincks street. Loss, $5,000; insurance, $2,500.

**Slocan, B.C.** Aug. 29th. Ottawa mill on Springer Creek. Loss, $40,000; insurance, $25.000.

**Toronto, Ont.** Sept. 5th. Union Stock Yards. Loss, $20,000.

**Windsor, Ont.** Sept. 3rd. Plant of the Moloney Electrical Company, Hanna and McDougall aves. Loss, $250,000.

**Vancouver, B.C.** Fire losses in Vancouver during July amounted to $87,434, with 233 alarms.

## BECOMES CANADIAN CORPORATION

### Head Office of Belgo-Canadian Pulp & Paper Co. Will Be Moved To Montreal

The plan to change the Belgo-Canadian Pulp and Paper Co. into a Canadian Corporation is now said to be practically accomplished and the head office will be changed from Belgium to Montreal. A meeting has been called in Belgium for October 24 to ratify the transfer. Early in January a four months' statement will be made public, covering the period from September to December inclusive, and it is expected that sometime in January the new stock will be listed on the Montreal Exchange.

### New Capital

The new company will have an authorized capital of $20,000,000 common stock, of which $14,000,000 will be issued and in addition, $1,500,000 in bonds. It was further intimated that the output will be increased by next year from 200 to 350 tons daily. It is said the bonds have already been underwritten.

The officers of the new company are: President, Adolphe Stoclet, Brussels; vice-president and general manager, H. Biermans, Shawinigan Falls; other directors, Count Hypolite D'Ursel, Alfred Rouvier, Lambert Jadot, Gaston Perrier, Albert Marechal; sec-treasurer, A. Dehauffe.

### Old Capital

The capitalization of the Belgo-Canadian Pulp & Paper Co. was $900,000 of first preferred, and $300,000 of second preferred, and $2,500,000 of common. The preferred stocks each paid 6 per cent. regularly. Several years ago when it was decided that it was advisable for the headquarters of the company to be changed to Canada and a Canadian charter to be secured, an intermediate company was formed, namely, "the Belgian Industrial Co." which took over the preferred and common stock of the Belgo-Canadian Pulp and Paper Co., and gave in exchange 56,000 shares of common stock of no par value. This company was in existence for 16 months and went out of existence last week and the Belgo Paper Co. began its career. It is understood that for each share of the Belgian Industrial Co. $250 was paid the share holders of par value in common stock of the new company, the Belgo Paper Co.

---

## WILL RESUME OPERATIONS

Following the official announcement which was made at the conclusion of the annual meeting on September 8 of the shareholders of the Canadian Locomotive Company, that contracts had been secured for the rebuilding of a number of engines, it was stated that the works would probably reopen in about a month's time. At first about 100 hands will be employed, but it is expected that this number will be increased as new business is secured, the prospects for which are declared to be very bright.

---

## ACQUIRES MORE ELEVATORS

N. M. Paterson, president of the Paterson Grain company, announced recently the acquisition of 13 country elevators formerly owned and operated by the Young Grain company. The houses are all situated in southern Manitoba in the vicinity of Deloraine, nd their purchase by the Paterson company gives them a total of 95 country elevators being operated throughout the west.

---

## OUTLOOK IN BARBADOS IMPROVES

L. M. B. Meyers, office of the Canadian Trade Commissioner Barbados, writes in the Commercial Intelligence Journal that the general financial outlook in Barbados is considered to be somewhat improved and the monetary position easier.

Owing to continuous small showers the canes continued to thrive, and the outlook for the coming crop is hopeful, although heavy rains are still needed. The price of dark crystals is about four dollars per hundred pounds, first cost (exclusive of shipping charges).

The market is in fair supply of flour, corn meal and general breadstuffs. A considerable amount of fish has recently arrived. Potatoes are temporarily scarce, and are selling at $8.30 per barrel of one hundred and sixty pounds; onions are in fair supply, and are being sold at $4.50 to $5.00 per hundred pounds.

COMMONWEALTH

THEN— NOW—

March 1st, 1922

First issue of capital stock offered to the public, before charter could be granted—

**Then** - the company was required to sell $300,000 of stock before receiving charter.

**Then** - the proposed company had no agency force - and no actual guarantee of charter.

**Then** - the investment market touched low ebb early in 1922 - since remaining steady.

September 5th, 1922

Mr. W. E. Levan, formerly Western Ontario representative of The National City Company, will be associated with Mr. Murray.

September 16, 1922.

Telephone
Adelaide 8293

# The National Land Settlement Plan

THE Western Canada Colonization Association, in close co-operation with the Federal and Imperial Governments and the Canadian railways, has worked out a well-matured land settlement policy, which is to be put into effect forthwith—a policy which carries the backing and co-ordinates the colonization activities of these Governments and railways, and of other immigration agencies.

The plan is the joint product of the best available sources of information on the subject. It represnts more than a year of continuous investigation, to which the foremost colonization experts of Canada, Great Britain, and the United States have contributed the knowledge born of experience.

The net result is a comprehensive scheme, which, by mobilizing the latent immigration forces of the day in a far-reaching, co-operative land settlement movement, should speedily inaugurate an increasing flow of carefully selected settlers to the vacant agricultural areas of the Dominion. In so doing it will go far to assist the Federal and Provincial Governments, and the railways, in solving the most pressing of the economic problems which face them in a trying post-war period. It is chiefly by a marked increase in the number of people on the land that we shall wipe out the deficit on the national railways, lessen the burden of the national debt, lighten the incidence of taxation, and introduce a new era of prosperity for the whole country.

**THE FINAL CONFERENCES.** In successive conferences at Ottawa, leading up to the present announcement, the Prime Minister, Honorable W. L. Mackenzie King, the Minister of Immigration, Honorable Charles Stewart, and the Immigration Committee of the Cabinet, including Senator Dandurand, Senator Bostock and Honorable T. A. Low, have all participated. As Minister of the Interior and of Immigration, Mr. Stewart has, of course, taken a leading part in the laying down of the principles underlying the colonization policy, now given to the public.

The negotiations with the Imperial Government, the Dominion Government, the Canadian Railways, and other organizations, have been carried to success under the leadership of Mr. M. A. Brown, Vice President, and Mr. F. D. L. Smith, an Eastern Director of the Western Canada Colonization Association.

At recent meetings of the Eastern and Western Boards of the Association, it was decided to proceed immediately with the creation of an active organization to carry out the policy thus decided upon. The chief executive officers have been selected and the machine should begin to function within the next few days.

**TEN MILLION ACRES** The full amount of working capital originally contemplated by the Colonization Association, viz., $1,500,000, has been over-subscribed.

It is estimated that the working out of the plan will involve the expenditure by the Canada Colonization Association alone of $30,000,000 to $40,000,000, within the next five or ten years. The major portion of this fund will be available from commissions earned on the sale of privately-owned lands.

It is calculated that a minimum of ten million acres of vacant land will be settled within the next five to ten years.

The activities of the Colonization Association are to extend beyond the three prairie provinces originally included, so as to embrace every province of the Dominion.

The organization will function under a Board of Directors thoroughly national in character, which will delegate large powers to one small operating committee for Western Canada, and to a second small operating committee for Eastern Canada.

The head office for Eastern Canada will be located at Ottawa, and that for Western Canada at Winnipeg.

**FEATURES OF THE PLAN.** Incoming settlers will be located only in carefully-selected, fertile districts, close to existing railway lines and other facilities of civilization.

Land in the Western Provinces is to be sold on a 32-year payment basis, and in the Eastern Provinces on terms which will be governed by local conditions and other considerations.

Owners of vacant land throughout the country will at once be invited to list their lands with the Colonization Association for sale on a long-term basis.

Local land men in Canada and the United States will be paid reasonable commissions as a commercial incentive to put all their energies behind an extensive immigration movement.

Canadian land agents, all over the country, will be employed in showing lands to prospective settlers and in closing or assisting to close sales.

By the time the snow flies, several hundred American land agents will be engaged in drumming up settlers for the Western Provinces.

The Canadian immigration machinery in the British Isles, and other European countries, will be greatly expanded and gingered up, so as to obtain a largely-increased share of British and other European agriculturists suitable for settlement in this country.

Honorable Duncan Marshall, Federal Commissioner of Agriculture, and formerly Minister of Agriculture for Alberta, will shortly tour the British Isles, speaking in support of British agricultural migration to the land in Canada, and explaining the welfare work to be carried on on behalf of British settlers in Canada.

**THE PRESIDENT.** Sir John Willison has been appointed President of the Association, and is now touring the West with the Vice-President, conferring with Provincial Governments and explaining the National Land Settlement Plan to the public. Full publicity is being given to the people through the medium of the press and of public meetings so that the listing of land may be expedited and inspections made before winter sets in.

Mr. Howard Everett, for many years President of the Luse Land and Development Company, which has colonized over a million acres in Western Canada, is to be the Western General Manager.

Dr. George C. Creelman, for seventeen years President of the Ontario Agricultural College at Guelph, and later Agent General for Ontario in London, is to have supervision over all operations in the Eastern Provinces.

# PLAN OF CO-ORDINATION

## Canada Colonization Association

### Subscribers, Directors, Officers

List and inspect land in approved districts.

Sell land on 32-year payment plan.
Assist Governments in originating and selecting settlers.

Care for settlers en route.

Direct settlers in the purchase of land.

Establish community welfare clubs to befriend settlers from outset.

Direct movement of farm labourers to Canada where they can become proprietory farmers.

Promote extensive movement of British boys to Canadian farms.

Encourage the migration of British women to Canada for employment on farms and in domestic service.

## Imperial Government

### Overseas Settlement Board

Financially assist the Canadian Colonization Association.

(a) In caring for British settlers en-route to Canada.

(b) In guiding and directing them in the purchase of fertile, well-situated land.

(c) In befriending them through local community clubs until they become firmly established.

(d) In such other ways as may be agreed upon between the Oversea Settlement Board and the Canada Colonization Association.

(e) In preserving the manpower of the Empire for the Empire, and thus increasing the trade and prestige of the British Commonwealth.

## Dominion Government

### Minister And Department Of Immigration

Maintain and extend its agencies in Great Britain, the United States, and other countries, to promote an increasing flow of selected settlers to Canadian farms.
Carry on an effective advertising campaign for agricultural settlers in Great Britain, the United States, and approved countries.
Utilize its agencies to post prospective settlers re 32-year purchase plan and welfare work of the Canada Colonization Association.
Use the British and foreign press and governmental literature in giving wide-spread publicity to the Canada Colonization Association and its benevolent activities.
Financially assist the Canada Colonization Association to carry on its welfare work throughout the Dominion.

## Provincial Governments

### Minister And Department Of Agriculture

Assist in selecting districts for settlement.
Extend expert agricultural advice to settlers, especially during the initial period of their tenure.
Aid settlers by scientific soil surveys, thus determining the adaptability of particular lands to various crops.
Utilize their Agents-General in Great Britain in helping to select the right kind of settlers for the various provinces.
Furnish the Canada Colonization Association with literature describing the special agricultural attractions of respective provinces.

## Canadian Railways

### Presidents And Departments Of Colonization

Co-ordinate their immigration activities with those of the Canada Colonization Association.

Provide special transportation rates for settlers.
Reduce freight charges on settlers' effects.
Establish special rates for colonization agents.
Participate in the management of the Canada Colonization Association by appointing representatives to the Board of Directors.

**Owners of unoccupied land in the Western Provinces are requested to communicate immediately with the Association at the Bank of Hamilton Building, Winnipeg**

## LIFE INSURANCE PAYMENTS

### Largest Claim in Canada Last Year Was on the Life of F. T. Nicholls

Reference was made in these columns last week to "Insurance Press'" list of payments to life insurance beneficiaries in 1921 in the United States and Canada. The following are the totals for Canadian cities:—

| | |
|---|---|
| Toronto, Ont. | $2,324,000 |
| Montreal, Que. | 2,002,000 |
| Winnipeg, Man. | 643,000 |
| Vancouver, B.C. | 598,000 |
| Ottawa, Ont. | 494,000 |
| Hamilton, Ont. | 367,000 |
| Belleville, Ont. | 357,000 |
| London, Ont. | 356,000 |
| Quebec, Que. | 255,000 |
| Westmount, Que. | 215,000 |
| Calgary, Alta. | 212,000 |
| St. John, N.B. | 211,000 |
| Victoria, B.C. | 207,000 |
| Edmonton, Alta. | 201,000 |
| St. John', Nfld. | 190,000 |
| Halifax, N.S. | 183,000 |
| Saskatoon, Sask. | 183,000 |
| Regina, Sask. | 170,000 |
| Kitchener, Ont. | 165,000 |
| Baden, Ont. | 121,000 |
| Kington, Ont. | 119,000 |
| Charlottetown, P. E. I. | 117,000 |
| Stratford, Ont. | 117,000 |
| Brantford, Ont. | 114,000 |
| Ontario, Ont. | 112,000 |
| Sherbrooke, Que. | 106,000 |

### List of Large Claims

The following were the largest claims:—

| | |
|---|---|
| Frederick T. Nicholls, Ont. | $360,000 |
| James Livingston, Ont. | 112,000 |
| Frank W. Baillie, Ont. | 80,000 |
| J. A. Moran, Sask. | 66,000 |
| Arch. R. H. Macpherson, Nfld. | 63,255 |
| Osmond S. Mitchell, Sask. | 48,000 |
| John Drynan, Ont. | 41,000 |
| R. J. Wilson, Ont. | 40,000 |
| W. H. P. Hill, Que. | 36,000 |
| Lytton W. Shatford, B.C. | 33,000 |
| G. E. McCraney, Sask. | 30,000 |
| J. A. Allen, Sask. | 26,000 |
| Joseph A. Tilton, N.B. | 25,283 |
| J. F. Robertson, Canada | 25,176 |
| Joshua W. Windsor, Que. | 25,040 |
| R. M. Britton, Canada | 25,000 |
| C. K. Hagedorn, Ont. | 25,000 |
| Fred Ryan, N.B. | 25,000 |

### Detailed List

The larger payments to Canadian policyholders arranged by cities and towns, were as follows:—

#### Alberta

| | |
|---|---|
| H. P. Wright | $14,000 |
| Calgary— | |
| Duncan Gillespie | 10,000 |
| Name not given | 10,000 |
| Name not given | 6,000 |
| Edmonton— | |
| M. R. Jennings | 19,461 |
| D. Patrick | 5,000 |
| Name not given | 5,000 |
| New Dayton— | |
| Name not given | 5,000 |
| Waterhole— | |
| Name not given | 12,500 |

#### British Columbia

| | |
|---|---|
| Kamloops— | |
| Name not given | $ 5,000 |
| Kerrisdale— | |
| J. H. Ingram | 7,500 |
| Nelson— | |
| Name not given | 20,500 |
| Revelstoke— | |
| Florence McCarty | 5,000 |
| Vancouver— | |
| Lytton W. Shatford | 33,000 |
| Name not given | 20,000 |
| Name not given | 11,000 |
| Fred O. Downing | 10,000 |
| A. G. McGregor | 5,000 |
| Louis H. Weber | 5,014 |
| Knut A. L. Rastad | 5,002 |
| Fenwick C. Riley | 5,000 |
| Irving H. Willson | 5,000 |
| Victoria— | |
| R. S. Day | 13,500 |
| Name not given | 12,300 |
| Name not given | 8,010 |

#### Manitoba

| | |
|---|---|
| Hartney— | |
| William F. Underhill | $10,000 |
| Maniton— | |
| G. F. Bradley | 5,500 |

# *New Incorporations*

Authorized capital of $8,569,900 is represented by companies whose incorporations were reported to The Monetary Times during the week ended September 9, compared with $14,767,300 the previous week. A comparative summary by provinces is as follows:—

| | Wk. end. Sept. 2 | Wk. end. Sept. 9 |
|---|---|---|
| Dom. ........... | $ 1,748,400 | $ 934,500 |
| B.C. ............... | 270,000 | 1,995,000 |
| Man. ............. | 50,000 | ............. |
| N. B. ........... | ............. | 123,900 |
| Ontario .......... | 12,220,000 | 4,655,000 |
| P. E. Is. ........ | 100,000 | ............. |
| Quebec .......... | 378,900 | 339,500 |
| Sask. ............. | ............. | 522,000 |
| Totals .......... | $14,767,300 | $8,569,900 |

The following is a list of companies incorporated under Dominion charter with head office, authorized capital and the name of one of the directors:—Natural Air Driers' Corp. Ltd., (Jas. M. Sinclair) Sault Ste. Marie, $200,000; Electric Sales & Engineering Co. Ltd. (William A. Dowler) Fort William, $40,000; Massie & Renwick, Ltd. (Robt. F. Massie) Toronto, $50,000; Fedders Manufacturing Co. Ltd. (Louis F. Fedders) Bridgeburg, $50,500; Canadian Ruler & Wood Advertising Novelty Co. Ltd. (Thos. H. Wilson) Toronto, $100,000; Andrew Gray Co. Ltd. (Andrew J. Gray) Toronto, $50,000; South America Development Co. Ltd. (Jos. A. Marion) Montreal, 99 000; Supreme Oil Co. Ltd. (Harold E. Bounsall) Toronto, $200,000; Northland Studios, Ltd. (Colville Sinclair) Montreal, $20,000; British Columbia Pilotage Assoc. Ltd. (Robt A. Batchelor) Vancouver, $25,000; G. Noel & Co. Ltd. (Georges Noel) Montreal, $100,000.

### Provincial Charters

**British Columbia**—Crofton Logging Co. Ltd. Crofton, $10,000; International Timber Co. Ltd. Vancouver, $500,000; Great War Veterans Association (Vancouver Branch) Memorial Building, Ltd. Vancouver, $100,000; International Egg Co. (Canada,) Ltd. Victoria, $200,000; Vancouver Golf & Country Club, Ltd. Burquitlam, $10,000; Freezo Kitchennette Co. Ltd. Vancouver, $100,000; Yellow Fir Lumber Co. Ltd. Vancouver, $50,000; Nordlund Placer Mining Co. Ltd. Vancouver, $15,000; Augustine Coal Co. Ltd. New Westminister, $10,000; Consolidated Exporters Corporation, Ltd. Vancouver, $1,000,000.

**New Brunswick**—Nashwaak Estates Ltd. (Wm. C. E. Richard) Barker's Point, $9,900; Comeau & Co. Ltd. (Wm. R. Stevens) Bathurst, $15,000; New Brunswick Films Ltd. (Wm. Pugsley) St. John, $99,000.

**Ontario** — Mammoth Porcupine Mines, Ltd. (Geo. H. Sedgewick) Toronto, $3,000,000; National Polish Co. Ltd. (Richard A. Biggs) Toronto, $75,000; North American Graphite Co. Ltd. (Andrew W. Hunter) Toronto, $800,000; Eagle Drug Co. Ltd. (David Esser) Toronto, $40,000; Gun-Son-Ola Co. Ltd. (Wm. Gunn) Wingham, $150,000; E. J. Shepard, Ltd. (Edward J. Shepard) Hamilton, $40,000; Quill Mines, Ltd. (Wm. S. Walton) Toronto. $500,000: Victoria Theatre, Ltd. (Hillard B. Bell) Toronto $50,000.

**Quebec**—Riviere du Loup Auto Co. Ltd. (Jos. Mercier) Riviere du Loup, $50,000; La Compagnie Dechene, Ltd. (Alphonse P. Dechene) Quebec, $199,000; Roma Bakery Co. Ltd. (Enrico Terzi) Montreal, $49,500; La Compagnie de Construction Mondoux, Ltd (L. August Mondoux) Aylmer, $20,000; College P. E. Lalime de Montreal, Ltd, (Pierre E. Lalime) Montreal. $1,000; Lechasseur, Ltd. (Napoleon Lachasseur) Montreal, $20,000.

**Saskatchewan**—Central Agencies, Ltd. Swift Current, $25,000; Prince Albert Gold Mines, Ltd. Prince Albert, $250,000; Kjellander Steel Co. Ltd. Wilcox, $50,000; Fair Drug Co. Ltd. Saskatoon, $10,000; Burrow Tire Section Co. Ltd. Saskatoon, $2,000; Atlantic Investments, Ltd. Leader, $45,000; Prairiedale Farming Co. Ltd. Smiley, $75,000; Stadium, Ltd. Moose Jaw, $50,000; Silverwood & Conboy, Ltd. Saskatoon, $20,000; Vernon Coal Co. Ltd. Moose Jaw, $5,000.

---

## LAST WEEK'S INCORPORATIONS

The following were omitted from last week's list of new companies:

**Prince Edward Island**—Prince Edward Isand Films, Ltd. Charlottetown, $100,000.

**Quebec**—Rubin Clothing Co. Ltd. (Lazarus Phillips) Montreal, $20,000; Carbolacene Co. of Canada, Ltd. (Percy R. Thornton) Montreal, $20,000; William Ziff Co. Ltd. (Jos. A. Budyk) Montreal, $250,000; Service Press. Ltd. (John Kerry) Montreal, $20,000; La Compagnie de l'Association Colombienne de l'Abitibi, Ltd., Amos, $19,900; La Compagnie Electrique du Lac Bouchette, Ltd. (Edmond Tremblay) Chicoutimi, $49,000.

---

## PROPERTY OF ASSIGNEE

### Action To Recover Goods Consigned To Bankrupt Agent

In an action before the Alberta Supreme Court in Bankruptcy to recover goods consigned to a bankrupt agent, Justice Hyndman says: "In my opinion the assignee is entitled only to such interest in the goods or money which was found by the authorized assignee as the bankrupt had at the time of the act of Bankruptcy. Registration is not essential in connection with the agency agreement referred to in the argument as the Bankruptcy Act supersedes any provincial legislation in that respect.

"The claimants are entitled to priority if they can establish that the property in the trust moneys or goods never passed to the assignor in bankruptcy but was at all times in the consignor or principal for whom he acted as agent and provided further that they are sufficiently earmarked to be identified.

"The claimants are therefore entitled to: (1) Such of the goods as can be identified, found amongst the stock in trade of the assignor in bankruptcy and have not been paid for, which were consigned to the bankrupt under the agency contract; (2) Accounts owing by customers to the bankrupt for goods sold by him, which goods were acquired by the bankrupt under the said agency agreement, and which can be identified or earmarked; (3) Cash on hand which is capable of being ear-marked as the proceeds of the sale of goods held under such agency agreement; (4) The proceeds of the sale of such agency goods sold by the trustee since taking possession should be paid to the consignors (owners) of such goods."

## ACTION ON BILL OF SALE

### Position of Innocent Purchaser of Automobile Where Credit Company is Interested

In an action between Commercial Credit Co. and Fulton Bros. before the Supreme Court of Nova Scotia, in which Commercial Credit Co. claimed damages for wrongful conversion of a motor truck, the Court held that where a manufacturer, A, enters into an agreement with a dealer, B, that goods comprised in a bill of sale and delivered to such dealer, B, are not to be removed from B's place of storage until the full payment of the purchase-price is completed, such covenant must be construed as a covenant not to remove or dispose of such goods otherwise than in the ordinary course of trade; and an assignee of such manufacturer, A, (herein Commercial Credit Co.) who with knowledge of all the facts; allows B, the dealer, to expose the goods for sale in the ordinary course of trade, cannot recover against an innocent purchaser who has paid for and obtained possession of the goods without knowledge of the agreement or assignment; A, the manufacturer and B, the dealer, having fraudulently failed to turn over the proceeds of the sale. Such an innocent purchaser is protected by sec. 27 (2) of the Nova Scotia Sales of Goods Act.

The Court also held that although section 8 of the Bills of Sale Act, 1918, ch. 11, provides for the filing of such an instrument, in accordance with the Act, this does not make it necessary for one who purchases goods exposed for sale in the ordinary course of business to protect himself by searching the Registry of Deeds, or make him liable although such an instrument is filed, if he purchases without notice.

## EMPLOYMENT AGAIN SHOWS INCREASE

### July Report Shows Improvement Over June and is Higher Than Any Period in 1921

Further expansion on a moderate scale was indicated by the firms making returns at the end of July, according to reports received by the Emploment Service of Canada, the curve of employment which again stood higher than any period in 1921, having gained 2 points during the month.

Statements received from 6,305 concerns showed that of the aggregate pay roll of 769,306 persons, 754,533 were actually at work on July 31, as compared with 741,395 at the close of June. The index number therefore rose from 91.1 on the latter date to 93.1 for the period under review. For the corresponding month of last year it had stood at 88.9. In this upward movement, emploment followed the same direction as in July, 1921, but the expansion registered during the month under review was twice as large as durin g the corresponding period of last year.

The repoening early in July of the railway car shops, temporarily closed at the end of June, cause the greater part of the increase, but further improvement was also evidenced in transportation, railway and building construction, as well as in sawmills and in some other branches of the manufacturing industries. Employment on public highways, in logging and in textiles, on the other hand, declined considerably.

### Manufacturers

The recovery in the railway car shops, supplementing large gains in sawmills and smaller increases in several other divisions, caused employment in this group to be in considerably greater volume than at the close of June. Statements were tabulated from 4,139 manufacturers employing 419,721 workers as compared with a combined working force of 412,078 in the preceding month. The difference represented a gain of nearly 2 per cent. Carriage, sugar, fruit and vegetable canning, biscuit, rubber, electric current, electrical apparratus and non-ferrous metal factories were decidedly busier. On the other hand, reduced activity was indicated by fish canneries, fur, boot, shoe, pulp, paper and garment concerns. The situation during July of last year had been slightly unfavorable and the index number for the period under review again stood somewhat higher than for the same month in 1921.

### Trade Unions

Employment as indicated by returns tabulated from 1541 labor organizations with an aggregate membership of 162,632, showed a further slight increase during July, when the index number stood at 95.9 as compared with 94.7 on June 30( and with 90.9 on July 31, 1921. The general tendency of the curve has been upward during this year, there having been more than 11 per cent. increase in employment since December 31, 1921. The recent improvement caused the percentage of employment to be higher than at any period since September, 1920, since which month unemploment has been much more prevalent than in the preceding reports. The slight increase in activity over June was largely due to increased employment in iron and steel, fishing, construction and transportation.

# Eastern Canada's Coal Supply

By E. L. CHICANOT

The coal strike on the American continent which has engulfed Canada as well as the United States has placed a formidable obstacle upon the road Canada was steadily pursuing back to brighter and more prosperous times. The situation, for various reasons, is comparatively more serious for Canada than across the border and the Dominion's position of absolute dependence upon the Republic has in the past few weeks been brought harshly home to many who previously had no conception of it. Yet out of this dismal chaos has come one revelation which almost makes all the suffering worth while, a knowledge which properly assimilated and taken full advantage of might work a veritable revolution in Canadian trade and work to Canada's untold benefit.

To those who have followed fairly closely in Canada, in an untechnical way, the coal situation, and irked under the fell necessity Canada has labored of practically truckling to the United States to ensure the eastern provinces their winter's coal supply, it must have come as an almost unbelievable surprise to learn through the investigations conducted to secure eastern Canada's coal for the present winter somewhere, somehow, that even at the present high prices prevailing and the extraordinary demand from the American continent English and Welsh coal can be put on the market at Montreal or Toronto on a basis of equal competition with Pennsylvania coal and that in normal times coal is procurable in the British Isles and laid down in eastern Canada cheaper than that from across the line. This is brought about through cheaper labor costs, low ocean freights and the preferential tariff.

One naturally asks why this has never been done, and presupposes some reason for continuing to buy eastern Canada's coal from the United States and neglecting the Motherland. If there ever were a reason it exists no longer. Students of the economic situation know that the very opposite is the truth now and that the transfer of the purchase of our large coal importations from the United States to the United Kingdom would work to Canada's great benefit by supplying the one factor which has long been wanting to adjust trade situation as existing between Canada and the United States and on the other Canada and the United Kingdom.

### Affects All Legislation

For years eastern Canada has been entirely dependent upon the United States for its winter coal supply. Whilst the United States has treated Canada with every justice and consideration in this regard, and is continuing to do so in the present acute circumstances, Canada has continually felt this dependency as a sword hanging over her head which might be dropped at any time. It has been a prime consideration and affected all legislation in which trade with the United States is involved making Ontario and Quebec reluctant to put into operation embargo measures of any kind in fear of retaliatory measures on her coal supply. In this one respect Canadians have always been given to understand they were pretty much at the mercy of the Republic and this has had a significant bearing on many other phases of the economic life.

In the fiscal year 1922 Canada purchased from the United States 196,686 tons of anthracite coal worth $487,777; 2,784,258 tons of bituminous slack worth $7,033,899; 9,998,718 tons of other bituminous coal worth $32,193,596; and 4,219,235 tons of other anthracite coal worth $38,509,678, making total importations from across the border of $78,224,950. The practically exclusive extent to which American coal is used in eastern Canada is seen in the fact that the only other importations were 5,193 tons worth $31,975 from the United Kingdom and 224 tons worth $1,800 from other countries.

### Our Trade Balance

For some time Canada has had an unfavorable trade balance with the United States which forced the Canadian dollar down until at times the United States currency was at a premium of about 20 per cent. Even now when this situation is practically righted Canada's excess of imports over exports in respect of the United States amounts to over two hundred million dollars. If it is possible to buy coal profitably elsewhere than in the United States, transferring this $78,000,000 which in the previous year was $111,000,000 it would go far towards adjusting Canada's trade situation with the Republic.

The antithesis of this situation is apparent in Canada's relations with the United Kingdom. The balance of trade has long been overwhelmingly in Canada's favor and Great Britain continues to be in a worse position with respect to Canada than Canada was ever in with the United States. It is a situation that has vainly cried for a remedy for some time and still exhibits little sign of righting itself. Canada's excess of exports to the United Kingdom over imports from that country in 1922 amounted to more than $183,000,000 and in the previous year more than $101,000,000. No reasoning is required to see just what the effect would be of transferring Canada's seventy-eight or one hundred million dollar coal purchases to the United Kingdom. The transfer would go a very long way towards adjusting in one move the trade evils existing between Canada and both countries, and largely equalizing her imports and exports from and to each of them.

### Supply is Available

It may be argued that English coal may not be in the future at all times procurable by Canada and the output not be sufficient to include filling Dominion demands. From all accounts the reverse is the case and British coal is seeking new markets. Not an inconsiderable amount of the English and Welsh coal output went to the myriad ships of the British navy and with the disarmament conference scrapping so many of these a surplus production resulted. Thousands of miners in the United Kingdom were laid off and their services were conveniently being dispensed with until the strike in the United States and the unusual demand for English coal by that country resulted in unprecedented British activity. There is no

reason to suppose that Canada could not, in ordinary times, conveniently have at least that supply which the now deserted ships of the navy once used.

Apart from the trade benefits the securing of coal for Canada from the British Isles must be reflected in many other phases of Canadian life and that of the British Empire in general. It must inevitably result in greater British activity and employment. There is the transportation for instance. Coal brought to Montreal or Toronto from Pennsylvania passes over American roads for practically the entire distance and in addition to what Canada pays the United States for the commodity nearly the entire revenue arising from transportation is retained by American roads. The movement of coal from England to the Dominion, resulting first of all in increased mining activity and employment in the British Isles, to which Canada is naturally sympathetic, ensures transportation by Canadian or at least British boats and by Canadian roads—British the entire route and the retaining of the entire moneys and revenue within the Dominion or the Empire.

### Sentiment Not a Factor

Canada has come to realize that whilst the most cordial and friendly of relations exist between Canada and the United States, which it is the earnest hope of both countries nothing may ever occur to shatter, these relations are as between rival merchants, or storekeeper and customer. Sentiment enters nowhere into the case. Trust in the United States as a permanent market for Canadian farmers was rudely and suddenly dissipated by the imposition of the Fordney tariff. When the United States citizen needs protection his government rightly gives it him and Canada gets slight consideration. Exactly the same thing might happen at any time in regard to Canada's coal supply should the exigencies of the internal situation demand that Canada's supply be cut off. Canadians go about in a certain state of fear of this measure and it seriously affects other phases of Canadian economics to an extent it is difficult to estimate.

The Fordney tariff sternly reminded Canada that she was a part of the British Empire and in the necessity of going to the Motherland and other Dominions to find new markets she discovered the greater permanency which lay in these. Here sentiment does not enter into the case, the bonds which dren of the same parent. It is just possible, and most confidently to be hoped, that this revelation having been so providentially made something of the same kind will happen and Canada find it possible to take the gratifying step of retaining her coal trade within the British Empire.

## APPLE PRODUCTION

The commercial production of apples in Canada in 1921 was 4,046,813 barrels of the value of $29,898,649, according to information collected by the Dominion bureau of statistics. In the previous year the commercial production of apples was 3,404,340 barrels, valued at $29,849,149. This represents an increase for 1921 of 642,473 barrels in production and of $49,500 in value.

**Annual Financial Review**

THE ANNUAL FINANCIAL REVIEW is a carefully revised summary of facts regarding securities listed on the Montreal and Toronto Stock Exchanges, and of other prominent Canadian companies.

It includes the Current Annual Statements of Companies; the highest and lowest prices of stocks and bonds on both Exchanges for each month for ten years; number of shares sold each month for the past fifteen months; rate of dividends paid for past years, and other important items in the history of the different Companies, such as increases in capital stock, particulars of franchises, when bonds are redeemable, dividends payable, together with a mass of other facts.

It comprises 20 pages of solid information, well printed in a clear and concise manner, and is neatly bound in full cloth. The work is invaluable, not only to financial institutions, but also to the general investing public.

JUNE 1922 PRICE $10.00 PER ANNUM

# Municipal Finance

**Hamilton, Ont.**—For the period ending September 7 tax collections amounted to $2,772,611, as compared with $2,584,457 for the same period last year.

**Yorkton, Sask.**—At a meeting of town council, the tax rate for 1922 was fixed at 40 mills for town and school purposes and two mills public revenue tax. This is a reduction of three mills from last year's rate. The net assessment of the town is $5,217,540, an increase over 1921 of $134,711 Total amount of taxes to be collected is $214,955. Of this amount over $90,000 is required to finance public and high schools.

**Haldimand Township, Ont.**—For the coming year the tax rate will be 23.6 mills on the dollar, made up as follows; country rate, 11.9 mills; township rate, 5 mills; and debenture rate 6.7 mills.

**Milton, Ont.**—The tax rate for the present year has been struck at 38 mills on the dollar, the same rate as last year.

**Regina, Sask.**—For the month of August tax collections totalled $42,761. Tax collections for the first eight months of the year totalled $1,070,774.

**Toronto, Ont.**—According to the complete returns made by the assessment Department, the population of the city is 529,083, and increase for the year of 6,141. The total assessment is $828,165,835, and increase of $52,031,199 over the total of $776,134,636 the previous year.

Incoming assessment is the only one showing a decrease; land, buildings and business assessments indicating increases. The total amount of assessment liable for school rates only is $56,051,537, an increase of $4,135,840.

Following are the details of the assessment for the whole city:

| | 1923 | 1922 |
|---|---|---|
| Land.... .... .. | $339243,869 | $335,263,214 |
| Buildings.. .. .. | 326,902,441 | 280,027,259 |
| Business .... .. | 90,198,274 | 86,326,559 |
| Income......... | 71,821,251 | 74,517,604 |
| Total.... .... . | $828,165.835 | 776,134,636 |
| Exemptions .. .. | $108,730,938 | $103,136,818 |
| Population .... . | 529,083 | 522,942 |

**Blenheim, Ont.**—The tax rate for this year has been struck at 35 mills on the dollar, the highest in the history of the town. This year's rate is 6 mills higher than last year. The increase is caused principally because of the local improvement rate being 2.30 mills above last year's rate, on account of the first pavements on pavement debentures being due. The county rate is also 1½ mills higher and the general town rate is 2 mills higher.

..**Sherbrooke, Que.**—The valuation roll for 1923 shows an actual increase of $510,045 over the previous year.

The valuation for 1923 is fixed at $33,564,635 of which amount $7,667,400 is non-taxable. The school tax is accordingly based upon $25,897,235 while the municipal tax is based upon this amount less the machinery and plant valuation which is placed at $2,234,500, or an amount of $23,662,735.

**Owen Sound, Ont.**—The tax rate for the year has been struck at 45 mills on the dollar, an increase of 5 mills over last year. The rate is made up as follows: General, 25.5 mills; pubic school, 12.2 mills; collegiate institute, 7.3 mills; and separate schools, 10 mills.

**Millbrook, Ont.**—At a meeting of the council the tax rate for the current year was struck at 40 mills on the dollar. This is a decrease of 5 mills from the previous pear.

**Lethbridge, Alta.**—The total cash paid into the city for current taxes up to the 31st of August amounted to $289,281. Adding the taxes from the utilities and the city hall, which totalled $34,654, the sum collected represented 56.08 per cent. of the total levy. In the corresponding period last year the sum of $350,920, including the city taxes, was collected, representing a percentage of 57.95 of the total levy. The showing so far this year is, therefore, a little less than that of the last.

On September 1st, including cheques received by mail, the sum of $10,800 was paid in in taxes as against $6,500 on the same day last year.

**Cavan Township, Ont.**—On September 5 the council struck the tax rate for the current year as follows: country rate 11.5 mills; towwnship rate, 4 mills; general school rate, 5 mills; and Long Swamp rate, 4.1 mills.

**Toronto, Ont.**—According to Finance Commissioner Ross the arrears of taxes prior to 1922 total $2,316,217. The sum of $170,343 was received against arrears during August.

**Vancouver, B. C.**—According to a statement by the city treasurer, on August 31st, total taxes paid this year, including arrears and amounts in lieu of this year's taxes, have reached the sum of $4,928,000.

**Welland Ont.**—Receipts on the first instalment of city taxes up to August 31st were $102,873., according to figures furnished by City Treasurer A. W. Jackson.

The total levy is approximately $310,000, one-half or $155,000 being due on this instalment, so there is about $47,000 outstanding.

**Hamilton, Ont.**—Up to the period ending August 28th, the works department has spent $405,535 out of an appropriation of $595,474.

**Manitoba.**—Incorporation of a portion of Grand Beach and a portion of Grand Marais into a town, will be asked for at the first meeting of the provincial legislature. A meeting of business men and holders of property in Grand Beach and Grand Marais was held recently and it was decided to make the application in order to secure all the advantages such an incorporation would supply those who make the town their residence in the summer particularly.

## UNION OF N. S. MUNICIPALITIES.

### Seventeenth Annual Convention Held in Kentville on August 29-31 — Election of Officers.

The seventeenth annual convention of the Union of Nova Scotia Municipalities was held in Kentville from August 29 to 31. In the absence of ex-Mayor Parker of Halifax, who was ill, Parker Archibald, municipal clerk of Halifax occupied the chair.

The first day of the session opened with the reading of report of the executive for the past year. The report showed that a number of municipal measures passed at the last session of the Legislature, and that it was a matter of congratulation that the Tax Commission Act, one of the measures introduced, failed to pass.

The membership stands at last year at sixty-one, comprising thirty-nine cities and towns and twenty-two rural municipalities. Out of forty-one towns in the Province four are not members, namely, Wedgeport, Port Hawkesbury, Port Hood and Oxford, and out of twenty-four rural municipalities two are not members, namely, Argyle and Clare.

J. A. Knight K.C., Commissioner of Forestry and Game for Nova Scotia, spoke on forest fires. He said there had been a great advance this is a very important subject in Nova Scotia. No Province of its size has such dense forests. He quoted statistics showing the damage done by fires in the different Provinces in 1921. Nova Scotia had 7000 acres destroyed with a loss of $120,000, while New Brunswick had 84,000 acres destroyed with a loss of $466,000. Last year was very bad for fires owing to the dry season. This year there was a great improvement, up to July only 14 fires had been reported, with a loss of $12,000. Annapolis, with a loss of $24,000, and Cumberland with $54,000, had the greatest loss last year through fires. Halifax County, with 57 fires, had a loss of only $3,000.

### Municipal Law.

Gilbert N. Allen, M.P.P., Warden of Cumberland, followed with an address on "Municipal Legislation, Session of Nova Scotia Legislature. 1922." Mr. Allen spoke about the laws that had been passed the last year. He said it was well known that much important legislation is kept back until near the close of the session and then it often happens that many persons directly interested, tire of waiting and leave without the legislature getting the benefit of their knowledge and experience.

The result is that ill advised laws find their way in the statute book. Taking the session of 1922 for an example no less than 42 public statutes passed out of 50, were to amend previous statutes passed by the House. There was only one statute directly relating to municipal affairs. There are more sections of act. Boiled down the act allows the municipalities to borrow money not exceeding $20,000 for the purpose of assisting the poor polling districts to purchase cattle, feed and seed grain. The government guarantees payment of the amount first being fully secured.

Mr. Allen also spoke on the turn to the right act, district exhibitions, Workmen's Compensation Act, recognition of women's rights, etc. Of 62 local acts no less than 40 were to enable cities towns and municipalities to borrow money.

### In the United States

Dr. H. W. Dodds, Secretary of the National Municipal League of the United States, was introduced by Arthur Roberts, Secretary. Dr. Dodds' subject was "Problem of Municipal Government in the United States." He said that people were taking more interest in Municipal legislation to-day than formerly. There had been a great change in the States, the last few years. Many cities were throwing out the old two chamber systems. While formerly all the Mayor's subordinates were elected, they were now chosen by the Mayor himself. It was under the old system that the great Municipal scandals occurred. Thirty years ago, when the National Municipal League was organized, the Councils were greatly reduced, the Upper Chamber being done away with and the most of the control being centred in the Mayor. But this was not a good system, as the Mayor would use the spoils system, which gave the jobs to the men who were the best vote getters. When these men had learned to handle the jobs in the right way there would be another election, and with a new Mayor, new men would be put on.

The second day of the session was continued with an address by Geo. E. Graham, general manager of the Dominion Railway Co., who dealt with the question of immigration.

### Resolutions Passed.

The final session of the convention was held on August 31 and the following resolutions were passed:

Resolved that this convention endorse principle of provincial aid to roads through incorporated towns which are connecting lines with the main highways of the province.

Town Incorporation Act should be amended to enable towns to exact a license fee from non-residents of the town selling products of the farm, forest or the sea, other than those selling produce of their own farm or fish of their own catching.

Whereas, in the opinion of this convention no remuneration should be paid by municipalities for assistance rendered in suppression of forest fires as provided by sub-section fifteen of the forests and game act, therefore resolved that the provincial legislature be requested to amend said act by repealing said sub-section of said act.

Resolved that the Union of Nova Scotia Municipalities again protest against the growing encroachment by the provincial government upon municipal sources of revenue.

Resolved, that the president appoint a committee to consider the council-manager plan and submit report at the next annual convention.

Resolved that this convention go on record in favor of municipalities being exempt from the law requiring stamps on cheques and receipts.

### Election of Officers.

The election of officers for 1922-23 took place during the day with the following results:

President, Parker Archibald, municipal clerk Halifax. 1st Vice President, H. A. Rice, mayor of Canso. 2nd Vice President, W. Kerr Dimock, municipal clerk, West Hants. Secy.-Treas., Arthur Roberts, K. C., town solicitor, Bridgewater (re-elected).

Executive Committee—John Murphy, mayor of Halifax; F. W. W. Doane, city engineer, Halifax; W. Fitzgerald, mayor of Sidney; James McNeill, municipal clerk, Cape Breton County; Mayor Morrison, Glace Bay; Mayor McIntosh, Antigonish; Mayor E. W. Robb, Amherst; J. W. McKay, municipal councillor, Pictou; W. W. Ferguson, municipal clerk, Truro; A. E. H. Chesley, Mayor of Kentville; Daniel Outhit, municipal clerk, Annapolis County; W. Raymond, Warden Yarmouth; A. H. Spierry, Deputy Warden, Lunenburg County, and the Warden of Shelburne municipality.

## NICKEL CO. ENTERS NEW ERA

### Operating at One-Third of War ....Time Capacity But is Expected To Expand.

With the resumption of mining and smelting operations at Copper Cliff and Creighton, the International Nickel Co. has entered a new era in its history. Although operations are only at one-third of war capacity, it is confidently expected that the nickel industry will steadily expand, and within a few years will again assume proportions that will tax the mining and smelting capacity of the company.

"The company is starting in a small way," J. L. Agnew, general superintendent stated. "It is our intention to begin on a sure and permanent basis, and as the use of nickel expands we will accordingly increase our staff. Employment is being provided for about 650 men, who are working in three shifts. The plant closed in the spring of 1921, and since then there has been a large exploitation staff engaged in the work of finding a new use for the refined nickel. Among the changes that have taken place is the refining of the matte. The entire output of the smelters here will be refined in Canada. The large refinery operated for years by the International Nickel Co. at Bayonne, N.J., has been scrapped. The refinery at Port Colborne will be used exclusively and as the output increases the refinery will be considerably extended. The refined nickel will then be shipped to the new rolling mill at Huntington, Va., where we will have the advantages of natural gas for heating purposes. There has been no change made in the new tariff affecting nickel."

"A large portion of nickel will be used in the automobile industries. At present the market will be largely in the United tates, but as soon as conditions right themselves in Europe the market will rapidly expand."

## STEEL PLANT OPERATING

The Manganese and Steel Foundry, Limited mill at Sherbrooke, Que., is now turning out castings. The furnace is capable of handling one ton at a heat, and three heats can be run in a day. This capacity is expected to be reached within the course of the next few weeks, as the company has a number of excellent orders booked up, and prospects are stated to be bright.

## RAIL MILL CLOSED

Owing to the lack of coal the rail mill of the Algoma Steel Corporation at Sault Ste. Marie was partly closed down. The company is trying to acquire coal from the United States. It is not known how long the mill will be shut down.

## NEW COMPANY

The Cameron Securities Limited is the name of a new Company recently organized at Saskatoon. It is the intention of the company to offer shares of stock to the public. For the present at least the company will confine it's investments entirely to the purchase of tax sale certificates on well improved farm and possibly city property in the Province of Saskatchewan.

# Government and Municipal Bonds

The government and municipal bond market is entering upon its Fall session with what seems to be plenty of activity ahead. There have been several interesting events recently, and there is yet to come Toronto. Montreal and Ottawa, and many others not yet heard of definitely.

Last September the city of Toronto floated several loans amounting to nineteen million, of which four million was for the Harbor Commission. Of the totai floated, fourteen million went to the United States and the remainder were sold in Canada. The city of Ottawa also floated a loan last September amounting to about two million, which was also sold across the border.

One item whch will show the true trend of the market is the ten million Ontario issues, for which tenders have been called for until next week. It is interesting to notice that the province has reduced its interest rate to 5 per cent., as compared with 6 per cent. last year. Of course this is only natural in view of the downward trend of interest rates. Last year the province borrowed thirty million, of which fifteen million were sold in the United States and the remainder in Canada.

The feature of the week was the sale of the Saskatchewan bonds in the United States. The price paid for the bonds is considered to be good for a 5 per cent .bond, and the cost to the province being 5.19 per cent., is considerably lower than last year when the province borrowed $3,000,000 in September at 6 per cent., at a cost of 5.82 per cent. Last year's bonds were sold in the United States, so that the cost to the province was higher than 5.82 per cent., due to the exchange.

### Tenders Invited

The following is a list of debentures offered for sale, particulars of whicvh are given in this or previous issues:

| Borrower | Amount | Tenders close |
|---|---|---|
| Ontario | $10,000,000 | Sept. 19 |
| Alberta | 3,000,000 | Sept. 21 |
| Three Rivers, Que. | 460,000 | Sept. 29 |
| Regina, Sask. | 114,000 | Sept. 21 |
| Middiesex Co. Ont. | 80,000 | Sept. 20 |
| Enderby, B.C. | 23,000 | Sept. 20 |
| Fort Coulonge, Que. | 20,000 | Sept. 16 |
| St. Joseph, Que. | 8,000 | Sept. 30 |

**Ontario.**—Tenders will be received up to 12 o'clock noon, September 19, 1922, for the purchase of $10,000,000 5 per cent., 20-year debentures, dated September 15, 1922, and payable half-yearly on September 15 and March 15. The bonds will be payable at the office of the provincial treasurer, or at the Bank of Montreal, Montreal, at the option of the holder. Hon. P. Smith, provincial treasurer, Toronto. See official advertisement in this issue.

**Regina, Sask.**—Tenders will be received up to 2 o'clock p.m. September 21, 1922, for the purchase of $114,000 5½ per cent., various maturity debentures. Alternative bids are asked for bonds payable in United States and Canada, and bonds payable in Canada only. John E. Snowball, city treasurer. See official advertisement in this issue.

**Alberta.**—Tenders will be received up to September 21, 1922, for the purchase of $3,000,000 20-year debentures. Bids are asked for bonds payable at the rate of 5 or 5½ per cent. The issue will be used entirely for refunding purposes. Hon. H. Greenfield, provincial treasurer, Edmonton.

**Three Rivers, Que.**—Tenders will be received up to 4 p.m. September 29, 1922, for the purchase of $460,000 5½ per cent., 25-instalment school debentures. Bonds are in denominations of $100 and $500, with interest payable at the Bank of Hochelaga in Three Rivers, Montreal and Quebec. Arthur Nobert, treasurer.

### BOND SALES

**Dartmouth, N.S.**—An issue of $500,000 5½ per cent., 20-year debentures has been sold to Eastern Securities Co. at a price of 99.58, the money costing the town about 5.53 per cent. The following is a list of tenders:

| | |
|---|---|
| Eastern Securities Co. | 99.58 |
| Johnston & Ward | 99.31 |
| W. F. Mahon & Co. | 99.109 |
| Nova Scotia Trust Co. | 99.07 |
| J. C. MacIntosh & Co. | 98.146 |
| C. H. Burgess & Co. | 98.12 |
| Dominion Securities Corp. | 97.371 |
| MacKay-MacKay | 97. |

**Haileybury, Ont.**—W. C. Brent & Co., have purchased $8,000, 6 per cent., 10-instalment debentures at a price of 97, the money costing the town about 6.64 per cent.

**Dunville, Ont.**—An issue of $95,000, 6 and 6½ per cent., 10 and 20-instalment debentures has been awarded to A. Jarvis & Co., at a price of 103.14, which means that the cost to the town will be approximately 5.65 per cent. The following is a list of bids:

| | |
|---|---|
| A. Jarvis & Co. | 103.14 |
| A. E. Ames and Co. | 102.61 |
| Wood, Gundy and Co. | 102.43 |
| C. H. Burgess and Co. | 102.23 |
| Canada Bond Corp'n | 102.11 |
| R. C. Matthews and Co. | 101.68 |
| Municipal Bankers Corp'n | 101.61 |
| Dominion Seeurities Corp'n | 101.40 |
| W. A. Mackenzie and Co. | 101.17 |

**Carleton County, Ont.**—Dominion Securities Corp. were awarded $196,000, 5½ per cent., 20-instalment debentures at a price of 100,269, the money costing the county about 5.47 per cent. Tenders were as follows: Domlnion Securities Corp., 100.269; Canada Bond Corp., 100.145; R. C. Matthews & Co., 100.09; Wood Gundy & Co., 100.04; A. E. Ames & Co., 99.83; A. Jarvis & Co., 99.63, and Gairdner, Clarke & Co., 99.57.

**Lanark County, Ont.**—An issue of $100,000 5½ per cent 20-instalment debentures has been awarded to the Canada Bond Corp., at a price of 100.44, which means that the cost to the county will be approximately 5.45 per cent. With fourteen tenders being received, bidding for this issue was very keen, the range between the high and low was very narrow. Tenders are as follows:

| | |
|---|---|
| Canada Bond Corp. | $100.44 |
| W. A. MacKenzie and Co. | 100.27 |
| Dominion Securities Corp. | 100.26 |
| R. C. Matthews & Co. | 100.09 |
| Wood Gundy & Co. | 100.04 |
| C. H. Burgess & Co. | 100.02 |
| A. E. Ames & Co. | 100.012 |
| Dyment, Anderson & Co. | 99.67 |
| A. Jarvis & Co. | 99.56 |
| Municipal Bankers Corp. | 99.33 |
| Sterling Bank | 99.17 |
| MacNeill, Graham & Co. | 99.31 |
| W. C. Brent & Co. | 99.061 |
| W. L. McKinnon & Co. | 99.05 |

**Saskatchewan,**—A syndicate headed by Dominion Securities Corp., was the successful tenderer for the $2,600,000, 5 per cent., 20-year debentures paying a price of 97.652, which means that the cost to the province will be approximately 5.19 per cent. Alternative bids were asked for 5 per cnt., bonds payable in 15 and 20 years, and 5½ per cent., bonds payable in 15 and 20-years. The following is a list of tenderers:

| | 5% | | 5½ % | |
|---|---|---|---|---|
| | 20 yrs. | 15 yrs. | 20 yrs. | 15 yrs. |
| Dominion Securities Corp., and Dillion Read & Co. | 97.652 | 97.379 | 102.81 | 102.039 |
| National City Co., and Wood, Gundy & Co. | 97.638 | 97.45 | 103.17 | 102.17 |
| Ed. Brown & Co., and Miller & Co. | 97.441 | 97.511 | 101.811 | 101.611 |
| A. E. Ames & Co., and Guaranty Trust Co. | 97.335 | 97.195 | 102.15 | 101.83 |
| A. Jarvis, & Co., R. C. Matthews & Co., Halsey Stuart & Co., and Cyrus Pierce & Co. | 97.09 | 97.09 | 101.88 | 101.23 |
| McLeod, Young, Weir & Co,, and Blair & Co. | 96.64 | 96.547 | 100.22 | 100.01 |
| R. A. .Daly & Co. and Spencer Trask & Co. | 96,18 | 96.68 | 97.77 | 99.53 |
| MacNeill, Graham & Co., C. H. Burgess & Co., and Mc Donagh, Somers & Co. | 96.07 | ...... | ...... | ....... |
| Gairdner, Clarke & Co., Seattle National Bank, Carstan Earles & Co. and Stacey, Brown & Co. | 94.328 | 94.922 | 100.448 | 100.52 |
| W. A. Mackenzie & Co. | 93.67 | 94.57 | 96.67 | 99.57 |

# Stock Markets

The past week on the stock exchange gave a further demonstration of the strength, as compared with the previous week.

This movement was, however, not general throughout the week, but taking into consideration the various influences affecting the market, it may be said that the cheerfulness exhibited by the market during the preceding week, has been carried through into this week.

The week opened with a slight reaction in prices and a dropping off in the value of trading. The papers as a group were slightly weaker than the previous week, with the Spanish River issues leading in the break. Wall Street was also unsettled, the market moving according to precedent in view of the prospective settlement of all labor troubles. Trading on the market continued in this way until on Sept. 8th, when the market once again regained its cheerfulness. From then on the market displayed an unusual element of buoyancy, coupled with a distinct expansion in the trading.

Paper securities were in fair prominence during last week, but these were superseded by such stocks as National Breweries and Canadian Cottons, who made a bid for the leadership of the market. These stocks inturn were cast aside and steel stock came into prominence with British Empire second preferred heading the list, and the common stock of the same company coming second in regard to activity.

Another group to show considerable activity was the utilities, with Canadian Pacific, Toronto railways, Winnipeg Electric, Bell Telephone, etc. showing large turnovers and an advance in price.

The only discordant note during the week was the reduction of the Canadian Locomotive dividend, although this came as no surprise as the company have been without orders and showed a deficit in its last annual report.

With business conditions improving throughout Canada and the United States the stock market is bound to reflect these conditions and a busy Fall and a busier Winter is looked for.

W. L. McKinnon & Co. of Toronto are offering $225,000, 5 per cent., bonds, repayable October 22, 1943 of the Lacombe and North Western Railway Co., at 93.74 and interest to yield 5.50 per cent. The bonds are a first mortgage on the railway and are unconditionally guaranteed as to principal and interest by the Province of Alberta.

The bonds are payable on April 22nd and October 22 in London, England in sterling at $4.86 2-3 to the £, or in the Montreal or New York and are in denominations of $1,000 each.

The railway is owned and operated by the province, thus making these bonds virtually a direct obligation of the province.

### Southern Canada Power Stock

An issue of $650,000, 6 per cent., cumulative preferred stock of the Southern Canada Power Co., has been purchased by Nesbitt, Thomson & Co. The issue will be used to liquidate notes payable to the amount of $527,120.

With the purchase of the present issue the outstanding preferred stock of the company stands at about $969,000.

Th authorized preferred stock stands at $1,500,000, of which $319,000 was outstanding at the beginning of the year.

---

### New Bond House

A new bond house has been formed by Hugh W. Murray, under the name of Murray and Company, with offices at 401 Continental Life Bldg., Toronto.

Mr. Murray has had a wide experience in the bond business, having been with the Dominion Securities Corp., from 1905 until 1911. From 1911 to 1915 he was with Murray, Mather and Co., and in 1915 he joined the Canadian Forces and went overseas. On his return from overseas in 1919 he assumed the position of manager of the Toronto office of the National City Co., where he remained until the end of August, when he resigned his position to establish the new company.

Associated with Mr. Murray, is W. E. Levan, formerly Western Ontario Represntative of the National City Co.

The firm will deal in government, municipal and corporation bonds.

## SALMON CATCH TO BE HEAVY

### Over 800,000 Cases to be Canned This Year—Quarter More Than Last Year.

According to a report from the Dominion Fisheries Department more than 800,000 cases of canned salmon is the approximate total which the production in British Columbia will reach this season.

The report anticipates 766,702 cases from a compilation of figures now at hand, but when all statements are received from the fishing districts the total will go beyond 800,000 cases an official of the department stated.

The increase over last year will then be more than 200,000 cases, as the total for that season was 603,000 cases.

The present report gives 268,000 cases of sockeye salmon, 395,000 cases of pinks, 33,226 cases of red springs and 34,217 cases of chums.

## SHIP WHOLE OUTPUT

A recent despatch states that the three paper mills of the Spanish River Pulp and Paper Company at Sault Ste. Marie, Espanola, and Sturgeon Falls, are operating 24 hours daily in order to keep up with the demand for paper.

Usually at this time of the year they have been able to stock a certain amount of their production for winter supply, but so far this year their entire production has been shipped out.

## NEARS 500 TON RECORD

On August 29th the Abitibi paper mills reached a new record daily tonnage of newsprint of 493.82 tons. The mill is stated to be aiming at 500 tons daily. The highest weekly average was that of August 6 for 471.24 tons and this was practically duplicated in the last week of August with 471.11 tons. The daily average for August was 462.29 tons. This compares with 455.20 tons in

## GRAIN FIRM GETS CHARTER

The old firm known as Matheson Lindsay Grain Co., Winnipeg, has just been granted letter of incorporation, and will now be known as "The Matheson Lindsay Grain Company, Limited." The new company has a capital of $500,000, and the officers are G. J. Thacker, president; Thos. S. Matheson, vice-president; and Geo. W. Matheson, R. A. Roberts and M. McGregor as directors. The new company is, it is stated by Thos. S. Matheson, a broadening out of the old organization, made necessary by an increase in business.

## TRADE COMMISSIONER'S VISIT

Major G. B. Johnston, Canadian Trade Commissioner in Glasgow, has arrived in Canada to visit the manufacturers and exporters interested in the Scottish and Irish markets. He was in Montreal until September 13 and will begin a tour of Ontario. He will go to Toronto first and remain there until October 4. The remainder of his Ontario itinerary is as follows: Peterboro, October 5; Hamilton, October 6 to 10; St. Catherines, October 11 to 13; Guelph, October 14; Kitchener, October 16; Brantford, October 17 and 18; Woodstock, October 19 to 21; Windsor, October 22 to 25, and London, October 26 and 27.

**Convenient Investments**

When you have money to invest, it is advisable to place it in a security where principal is safe, where interest is promptly paid and easily collected, and which you can readily convert into cash.

Canadian Government and Municipal Bonds answer these requirements.

They offer the highest grade of security, are readily marketable, and the interest coupons which are attached to each bond need only be clipped off and deposited in your bank on the due date.

At existing prices, these bonds yield from 5.40% to 6.25%.

## PRIVY COUNCIL APPEALS.

**(From the Montreal "Gazette").**

The agitation for the abolition of appeals to the Judicial Committee of the Imperial Privy Council, an agitation which, oddly enough, has its springs in Toronto, a stronghold of Imperialism, has met with little encouragement from those best qualified to speak for the bench or bar in Canada, but it is not yet dead. The bill, which was introduced by the Attorney-General of Ontario during the last session of the Provincial Legislature, and which evoked a spirited. if dignified, protest from the benchers of the Law Society, will make its appearance again if its sponsor gets his way, and he has the support of one newspaper, if not more. in Toronto. The narrow view expressed by Mr. Raney and those who think with him is not shared by many in this province, and it is doubtful if any substantial body of public opinion in Canada favors the change proposed. Those who do support the agitation will draw few recruits from among the ranks of those who have heard or read the addresses delibered by Lord Shaw of Dumfermline before the Canadian Bar Association in Vancouver, and the Canadian Club in Ottawa, bearing upon the Privy Council and its functions.

The essence of the case as put by Lord Shaw is contained in the statement, "The judicial committee is not our court; it is yours." The Privy Council is not, to quote.again from this distinguished authority, a court administering some central law, but the law of the different Dominions, according to their own legislation and traditions. The range of law. nowadays, as administered by the judicial committee, embraces every climate, almost every race. religion and creed under the sun. Nor is it the fact, as represented, that the system has been condemned by comparative disuse, so far as this country is concerned. At the recent sitting the number of Canadian appeals was almost as great as the number from India. with its four hundred millions of population. The vigor of the tribunal, says Lord Shaw, reinforced by able men from India. Australia. Africa and Canada, does not abate. The volume of work discharged. and the clear grasp shown of the principles of law and equity involved in the multitude of cases which come before this common court of appeal, do not suggest that there has been any abatement of its strength. That the right of appeal to it is of no value to Canada and to Canadians is a proposition which is, at any rate, debatable. The recent Grand Trunk arbitration appeal was taken to the judicial committee in order that a judgment might be secured which would be conclusive. The case was one, and there are many others like it from time to time, involving interests which were not all Canadian. It was important to the Government and people of Canada that the justice of the arbitration should be passed in review and upheld by a tribunal which could command the confidence of the British investor. The finding of no Canadian court, however sound and right, would have been nearly as effective in such a situation.

## SUFFICIENCY OF EXECUTION OF WILL

In an application to prove a will in solemn form, recently before a Surrogate Court in Ontario. the facts were that a testator having drawn his own will and signed it, handed the paper to a witness and asked him to sign it as witness saying that it was his (deceased's) will. The witness did not remember seeing testator's signature, but could have seen it if he had looked and probably did see it. The witness then in the presence of the testator subscribed as an attesting witness. The testator called to the other witness, who was working in the same room about ten feet away, and asked him to sign and after this witness had signed the testator said that it was his (testator's) will that he had witnessed. The witness also could have seen testator's signature if he had looked. This witness did not see the other witness sign, but there was nothing to prevent him seeing if he had looked when such witness was signing.

The Court held that the will was properly executed within the meaning of the Wills Act.

## UNION OF QUEBEC MUNICIPALITIES

Last week the union of Quebec municipalities held a convention of Chicoutimi, September 6—8,discussing fire prevention, municipal accounting and other problems of the kind. It was decided to form a tourists' bureau for the province in co-operation with the railways.

What is the Outlook for Fall?

The new issue of the Greenshields Review, explains, with the help of 4 charts, the factors that affect the situation and indicate their trend.

A copy will be mailed to investors who are concerned with the question of future values.

## COBALT ORE SHIPMENTS

The following are the shipments of ore from the Cobalt station for the week ended September 8th:—Nipissing Mines, 479,114; Mining Corporation, 364,613; La Rose Mines, 79,912; total, 923,639. The total since January 1st is 8,088,317 pounds or 4,044.1 tons.

## EMPLOYMENT DECLINES

### July Employment Report Shows Decline of 514 Workers From Previous Month.

The recent actions of the pulp and paper securities on the stock markets are reflected in the employment report for the month of July, when there was a slight reduction of one per cent., in employment.

During June the employment in this industry was fairly stationary, and the securities on the market were inclined to be inactive. However, during the month of July the securities showed a tendency to decline and this is attributed to a slackening up in the paper industry.

If the actions of the stock market during August and the first part of September can be taken as an indication of the trend of the paper industry, then this industry must have shown a substantial improvement over July.

### Employment Report

The July report of employment shows that the upward trend that employment in this group has evidenced since the end of March was checked during July and there were contractions involving the release of 514 workers. As the 464 firms making returns, reported an aggregate pay-roll of 47,031 persons as compared with 47,545 on June 30, this represented a decline of over 1 per cent. Practically all the shrinkage was registered in Quebec, the changes in the other provinces being slight. Pulp and paper mills were decidedly slacker and reduced activity was also reported in printing and publishing. Approximately 49 per cent of the pay-roll in this group was employed in the former division, while the printing trades reported roughly 39 per cent of the total, the production of paper goods employing about 12 per cent. Employment during the corresponding period of last year had declined also and the index number at that time stood 6 points lower than for the period under review.

### Logging Declines

An industry allied to pulp and paper is logging and during the month of July there was continued dullness in this group. The 162 concerns making returns, whose pay-rolls covered 9,662 persons, reported that they had laid off 1,333 men since the end of June, a decline of over 12 per cent. Slightly over half of these employees were released from logging camps in Quebec, while the declines in Ontario and British Columbia were also extensive. Shrinkage had been reported during July of last year, but from the beginning of August the trend of employment was decidedly favourable and continued to be progressive until the end of the year. The index number for July 31, 1921 was slightly over 4 points higher than for the period under review.

## CIGAR FACTORY CHANGES HANDS

O. R. Brener, for many years one of the leading figures in the cigar manufacturing industry in London Ont., has completed negotiations for the control of the Big Stettler Cigar Factory Ltd. at Vancouver. It will be operated under the name of the Van Loo Cigar Company. His brother, William S. Brener, formerly with the United Cigar Stores Limited, will be vice-president.

The above bonds will be issued under the authority of 12-13 Geo. V. (Ontario) Chap. 8.

The highest or any tender not necessarily accepted.

P. SMITH,
Treasurer of Ontario.
Toronto, September 13th, 1922. 35

### BATHURST CO. TO MAKE NEWSPRINT

According to a statement by Angus McLean, general manager of the Bathurst Co. Ltd., of Bathurst, N.B., the company is starting the erection of a mill for the manufacture of newsprint in the very near future. Preparations for the construction of the new building necessary to house the machinery for the new mill are now being made, and within a very short time the actual work of construction will be undertaken.

# Corporation Finance

**Maritime Telegraph and Telephone Co.**—Gross earnings for the month of July amounted to $132,467 and net earnings after operation, maintenance, depreciation and taxes amounted to $36,543. After bond interest of $13,333, surplus for the month was $23,210, an increase of $5260, as compared with June.

For the seven months ended July 31st, 1922, net earnings after bond interest were 27,812 higher than for the corresponding period of last year, as the following figures indicate.

| | 7 months ended July 31st 1922 | 1921 |
|---|---|---|
| Gross earnings.... .. .. | $851,434 | $855,024 |
| Op., main., dep., taxes.... | 648,723 | 680,125 |
| Net for interest ...... . | $202,711 | $174,899 |
| Bond interest.... ..... .. | 93,333 | 93,333 |
| Total .. ....... .... | $109,378 | $81,566 |

**Canadian Locomotive Co.**—A year of idle plants, save for the execution of a few repair orders, is reflected in the annual report for the year ended June 30th, 1922.

The report shows an operating loss of $191,351, which, with payments of interest, sinking fund and dividends reduces the surplus to $1,089,975. Last year's profits amounted to $767,891.

There was a net loss of $166,299 this year, compared to net profits of $605,000 last year. Last year's figures represent profits after deduction of $90,000 for the interest and $125,000 for depreciation the laater item being omitted in this year's net loss figures.

In his statement to shareholders, Amelius Jarvis, Chairman of the Board, says that the company has been without locomotive orders for the entire current year, business being confined to repair orders.

"The outlook," he adds, "is by no means unpromising. The shortage of motive power on Canadian railways is pronounced and we doubt if they are in a position to handle the increased traffic that the settlement of the coal and railway strikes will bring, which, with the accumulated requirements for locomotives for maintenance purposes, bids fair to give us at no distant period, work to keep our plant going some time."

Total cash in banks and on hand down from $866,988 to $241,996, while materials are down from $138,907 to $120,786. This year's sinking fund account totals $127,365, compared to $105,518 for last year. Net working capital compares as follows:—

| | 1922 | 1921 |
|---|---|---|
| Current assets .... .. | $1,637,810 | $2.178,568 |
| Current Liabilities .... | 189,900 | 210,966 |
| Totals.... ... .... | $1,447,910 | $1,967,602 |

Included in the current assets for the year are Victory and War bonds, aggregating $1,253,058, and for the year previous $1,066,599.

At the annual meeting of the directors on September 8th the regular dividend at the rate of 7 per cent. per annum was declared on the preferred stock and a dividend of 1 per cent. for the quarter ending September 30 on the common stock, both payable to shareholders of record of September 20th. This is a reduction from a quarterly dividend of 2 per cent. on common, which obtained formerly.

**McIntyre-Porcupine Mines, Ltd.** — Due to the large amount of development work accomplished the earnings for the year ended June 30 last show a reduction from the previous twelve monts.

There is a slight improvement in the value of bullion recovered from $1,904,326 to $1,937,105. Operating costs and general expenses were somewhat higher at $1,242,535 as compared with $1,088,763 for the previous year. To the net operating earnings of $694,568, there was added non-operating revenue amounting to $166,791. Appropriations accounted for $308,613 leaving the profit for the year, which is carried forward to surplus account at $552,746, as compared with $815,530 for the previous year. A comparative statement follows:

| | 1922 | 1921 |
|---|---|---|
| Bullion recovery .. .. | $1,937,105 | $1,904,326 |
| Operating costs .... . | 1,072,645 | 935,440 |
| General expenses .. . | 169,890 | 153,323 |
| Net op. earnings .... | $694,568 | $815,562 |
| Non-oper. rev..... .. .. | 166,791 | 272,951 |
| | $861,360 | 1,088,513 |
| Apprpriations ....... | $308,613 | 272,983 |
| Profit for year.... .... | $552,746 | $ 815,530 |

The company's assets show a slight growth from $6,668,340 to $6,804,378. Total fixed assets are valued at $5,413,836, as compared with $5,065.003. Current assets at $714,496, compare with current liabilities of $154,496. The company's investments are valued at $644,944, reserves total $1,371,177 and surplus $1,646,207.

Ore production during the year totalled 193,971 tons, with a gross value of $2,074,088 and an average value of $10.69 per ton. Bullion containing 93,127.83 ounces of gold and 17,949.35 ounces of silver was recovered, with a gross value of $1,937,105. Referring to the development work of the year, Genl. Mgr. R. J. Ennis points out that the cost in this connection amounted to $126,184. The main shaft was sunk from 1,610 to 2,022 feet and stations have been cut at 1,625, 1,750, and 1,875-foot levels. The mill operated continuously during the year treating 193,971 tons of ore at a cost of $1.24 per ton, including crushing and transportation. The new mill addition designed to handle 500 tons of ore is completed and is ready for operation.

The ore broken in stopes amounted to 211,129 tons, and from development 20,174 tons a total of 231,303 tons; 193,915 tons were hoisted and the balance of 37,388 tons increased the broken ore reserves to 130,136 tons, against 92,748 tons at the beginning of the fiscal year.

**Porto Rico Railways Co.**—During the month of July there was a decline in gross earnings as compared with the same month last year. Gross earnings amounted to $113,067 as against $116,278. Net earnings at $42,713 compare with $49,780, a reduction of 14.19 per cent. Gross for the first seven months of the year shows a reduction of 2.09 per cent. standing at $768,748, compared with $792,486. Net for the same period shows a small increase at $309,771, compared with $295,411, an advance of $14,360, or 4.86 per cent.

**Blue Diamond Coal Co.**—The annual report for the year ended June 30, 1922, shows a substantial improvement over last year.

Profit from operations for the year totalled $166,276, and from this the sum of $59,436 was applied in taxes, royalties and lease rentals, and $51,341 in interest, leaving a net profit of $55,498, which is transferred to surplus. The report for the previous period showed a net deficit after all charges of $157,127.

The balance sheet shows total assets of $2,532,284, compared with $2,311,893 for the previous year. Fixed assets are valued at $2,045,522, as against $1,919,268. Current assets total $469,587, as compared with $316,453. Cash on hand at $117,118 compares with $5,587, and accounts receivable at $156,551, with $138,057. Inventories are valued at $191,917, as compared with $166,109. Current liabilities of $379,211 compare with $126,761. Reserves total $39,728 and surplus $61,560. From this latter item is deducted adjustments for previous years' account to a total of $28,214.

**Laurentide Co. Ltd**—Although net profits for the year ended June 30, 1922 were lower than for the previous year, the company was able to earn 6.4 per cent. on its stock.

Operating profits for the year amounted to $2,266,254 as compared with $5,374,565 the previous year. Miscellaneous profit was down to $94,386 from $1,029,829, while profits from investments were $332,513, as compared with $319,639. The total income of the company was, therefore, $2,693,154 as compared with $6,724,032 the previous year. Interest charges last year amounted to $440,631, as compared with $885,260. The deduction of $458,461 as reserve for depreciation of plant leaves net profits of $1,794,061, or slightly over 6.4 per cent on the stock of the company, as against $4,515,928 for 1920-21. Payment of dividends amounting to $1,728,000 left a balance for the year of $66,061 to be carried forward to surplus account, which now stands at $1,423,467. The surplus for 1920-21 was $787,928 after deduction of $2,000,000 as reserve for reduction of inventories and $1,322,843 as reserve for taxes, depreciation and depletion.

As presented in the statement there is a decline of nearly two millions in working capital, but there would actually seem to have been a slight improvement in current position. The depreciation reserve of $2,000,000 which was set up the previous year, has been applied to logs and other supplies and disappears this year from among the liabilities, while the inventories are shown at a reduction of nearly 50 per cent. This big reserve was not shown among current liabilities last year, but it is assumed that it is effective this year in the inventory reduction, and might, therefore, have been classed as a current liability last year. Had it been so regarded last year's working capital would have been $5,482,621 or slightly lower than that shown for 1921—22, although both current assets and liabilities are considerably lower.

Outstanding among the current assets is the reduction in inventories from $8,392,812 to $4.771,436. Accounts receivable at $756,045 are less by over half a million, while mill supplies at $652,835 are down about $300,000.

Perhaps the most striking feature of the balance sheet is the reduction of the bank loan from $5,067,945 to $3,572,960. Bills and accounts payable are down to $657,347 from $1,301,370. Tax reserve of $573,559 is down from $1,095,918, indicating the payment of a half million on this account.

The working capital position of the company for the past two years compares as follows:

| | June 30, 1922. | June 30, 1921 |
|---|---|---|
| Curr assets | $11,296,891 | $15,958,254 |
| Curr. liab. | 5,792,764 | 8,475,633 |
| Work cap. | $5,504,127 | $ 7,482,621 |

In his remarks to shareholders, President Chahoon says:

"In the last annual statement a reserve of $2,000,000 was created to cover possible depreciation of Inventories. It was deemed advisable to write this amount from logs and other supplies in order to place these inventories on a conservative replacement value basis. Of this amount $535,000 was consumed on materials used during the fiscal year.

"General conditions in the newsprint industry are decidely better than at the time of our last report. Prices have held consistently throughout the year, and demand has increased sufficiently to absorb the new production that was brought in during the year.

"Your directors feel gratified that the company's strength enabled them to go through this most trying readjustment period with so little inconvenience either to the organization or the shareholders."

## DOMINION GOVERNMENT SAVINGS BANKS

The July statement of the Dominion Government Savings Banks shows that deposits have declined from the preceeding month, and withdrawals are up as compared with June.

Deposits during the month declined from $112,138 in June to $99,365 in July, and withdrawals have increased from $169,881 to $184,821.

The following is a comparison of balances as at the end of June and July:—

| | June, 30. | July,31. |
|---|---|---|
| Victoria, ....... | $ 1,052,924 | $ 1,048,431 |
| Charlottetown, ... | 1,716,652 | 1,703,881 |

# Manager of Merchants Bank is Acquitted

### Judge Decarie Finds That October, 1921, Return Was Not False, and Finds D. C. Macarow Not Guilty—Letter of Law Was Strictly Carried Out By Making Return "According to the Books" — Appeal Is Possible

D. C. Macarow, general manager of the defunct Merchants Bank, was on September 14 acquitted of the charge of having made a false and deceptive statement in the returns to the Government for October, 1921. The judgment was delivered by chief Judge of Sessions Decarie.

The full text of Judge Decarie's judgment follows:

The accused is indicted before me on the charge of having on or about November 19, 1922, being then and there the general manager of the Merchants Bank of Canada, a chartered bank, with intent to deceive or mislead the Minister of Finance and Receiver General for the Dominion of Canada in particular, and the public in general, made wilfully false or deceptive statements in a return respecting the affairs of the said bank, to wit, in a return for the month of October 1921 to the said Minister of Finance and Receiver-General respecting the liabilities and assets of the said bank, on the following items in Schedule "D" of the Bank Act. to wit:—

In liabilities, on November 10:—"Due to banks and banking correspondents elsewhere than in Canada and the United Kingdom.

In the assets, under 13:—Railway and other bonds, debentures and stocks.

14—Call and short (not exceeding 30 days) loans in Canada on stocks, debentures and bonds.

16—Other current loans and discounts in Canada.

21—Overdue debts.

22—Real estate other than bank premises.

23—Mortgages on real estate sold by the bank.

24—Bank premises at not more than cost less amounts (if any) written off.

25—Liabilities of customers under letters of credit as per contra.

26—Other assets not included in the foregoing heads.

The official position of the accused as general manager of The Merchants Bank of Canada, the date of the report, its address to, and its receipt by, the minister of finance for Canada, the signature of the chief accountant, Mr. J. Gillespie Muir, and the signature of the accused Mr. D. C. Macarow are all proved.

#### Questions in Dispute

The questions in dispute may be resumed in the following questions:—

1. Has the Crown established that the report was false?

2. Has it been made wilfully false or deceptive?

3 Did the accused make it?

On the first question. "Is the report false"? The main evidence offered by the prosecution relies on the testimony of Mr. George Edwards, a chartered accountant. Objection was raised to his evidence on the ground that it was hearsay evidence. Mr. Edwards is an accountant and his testimony is more in the nature of a report on figures which he has seen in some of the books of the bank, and in quarterly or semi-annual reports. Being an expert accountant, his evidence is admissable on matters of accountancy. (Bond and Barrow Co., 1902, 1. ch. 353. Phipson Law of Evidence, 4th edition, p. 358.)

In resume, his criticism of the report for October is based more on the reports on books, than on the books themselves.

It has been established that local managers, about three hundred and fifty in number, make a monthly report on the same form as Schedule D, and these are certified by each of these managers according to the formulae in this schedule.

These reports or returns are sent to, and received by, the department of the chief accountant of the bank. He himself looks through all the reports, sees if they are correct, has them checked over by his assistant, and when this is done, and when the return is found correct, he signs it. It is presented then for the signature of the president, and of the general manager.

#### October Return True

It has been established that the October return is a faithful and true return of these reports.

The chief accusation coming from the examination of Mr. Edwards is that debts, or currents accounts, are entered as assets for amounts above their real value.

It is established that these debts and current accounts are correctly entered at their face value in the books. The debt exists in fact for the amount stated, and appears as such in the bank's books.

The contention is that there are amongst them bad and doubtful debts. Then the question arises, is the monthly report supposed to make deductions or appropriations?

The obligation for the bank to give a return to the Minister of Finance is found in article 112 of the Act respecting banks and banking assented to 6th June, 1913. This article reads:

"112. Monthly returns shall be made by the bank to the Minister in the form set forth in Schedule D of this Act."

Paragraph 4 reads: "The monthly return shall be signed by the chief accountant, or by the acting chief accountant, and by the president or a vice-president or director then acting as president, and by the general manager, or other principal officer of the bank next in authority in the management of the affairs of the bank at the time at which the declaration is signed."

#### Overdue Debts

It is imperative, in my opinion, that Schedule D must be strictly complied with. Section 21 of Schedule D declares that overdue debts shall be reported. There is no mention in this item of any valuation for the different characters of these debts. So that, by reporting the overdue debts as they appeared in the books of the bank, the strict obligation is fulfilled. Therefore, the monthly report must copy the books, and must mention all debts at par, subject only to such appropriation as the directors may have made to cover the losses, and those appropriations should have been entered in the books.

Is it the intention of the law that the monthly report should be made so?

If the law had required more classification of these debts, it would have repeated what is required in Article 54. This article orders the directors to submit a clear and full statement of the affairs of the bank, exhibiting on one part the liabilities of the bank, and on the other the assets and resources thereof. It goes further in section 2, and states what the statement shall contain, but without restricting the generality of the requirements of the preceding sub-section on the different items on which the statement is to be made. For instance, in regard to overdue debts, they have to set forth debts and estimated loss provided for. It goes still further in section 3:—The report must state any or further particulars than those called for by details of said sub-section 2 which in the opinion of the directors are necessary to a full and clear statement of the affairs of the bank.

Section 4 calls for a profit and loss account It is clearly evident that the statement must relate not only what is in the books proper, but even what in the opinion of the directors is necessary to show a clear statement of the affairs of the bank.

So I may conclude that in the monthly return it is not necessary to report all valuations of the debts, and that reporting on the strict appearance of the overdue debts in the books is within the requirements of the act. Therefore, all the evidence which has been given as to the valuation of these debts or current accounts having been taken from reports on the books, has no application to form the basis of a report on the falsity or truthfulness of said books.

#### No Wilful Deception

Coming to the second point: "Has it been made wilfully false or deceptive?"

The evidence, as I have already stated, shows how it has been made. There is no evidence that anyone in the bank, who had anything to do with the preparation of the government monthly return, changed anything that appeared in the books. Moreover, it has been established that the return is a faithful report of such books. So that there is no evidence of any wilful tampering with these reports.

Was it wilfully deceptive? There is no evidence of any such intent.

Did the accused make it? My considerations given above state that the report was made by Mr. J. Gillespie Muir. He is the chief accountant of the bank. The duty falls upon him of making this report. All the witnesses state that this report is absolutely correct according to the books. It is the declaration required by the law, which reads:

"I declare that the above report has been "prepared under my direction and is correct "according to the books of the bank."

This declaration forms part of the Schedule D and is as much obligatory as every other disposition of Schedule D.

But the prosecution contends (and I think this is the place to discuss this point) that though, in fact, the accused, Mr. Macarow, has not made the return, but, having signed it, he should be convicted of the offence of having negligently signed such a statement.

#### Prosecution's Argument

The argument advanced is based on Article 951 of the Criminal Code, and on Article 153 of the Bank Act. Article 951 of the Criminal Code reads: "951—Every count shall be deemed divisible; and if the commission of the offence charged. as described in the enactment creating the offence or as charged in the count, includes the commission of any other offence, the person accused may be convicted of any offence so included which is proved, although the whole offence charged is not proved; or he may be convicted of an attempt to commit any offence so included."

Article 153—A, makes an indictable offence of making any wilfully false or deceptive statement in any account, statement, return, report or other document respecting the affairs of the bank; or (b) The using of any false or deceptive statement in any account. statement, return. report or other document respecting the affairs of the bank, with intent to deceive or mislead a person."

The article creates in section 2 an indictable offence for every president, vice-president, director, auditor, general manager or other officer of the bank, or trustee. to negligently prepare, sign. approve, or concur in any account. statement, return, report or document respecting the affairs of the bank containing any false or deceptive statement.

The law makes a separate offence in making a wilfully false or deceptive statement, and another offence in using such statement in a return.

Another offence is created for the persons named in Section 2 to negligently sign such a return. Therefore the offences are entirely separate and distinct one from another.

### "Making," Not "Signing"

In the present case the charge is that the accused has made wilfully a false statement. The making does not necessarily imply the signing. The making of a wilfully false statement does not include the signing with negligence. These two acts are not committed by the same person. They cannot be included in the same offence. Therefore ,the count cannot be divided, and the only offence upon which the accused can be tried, is the one described in the indictment, to wit, the making of a false return.

It is proved—more, it is admitted—that the chief accountant made the return. It was his legal obligation to make it. The only duty imposed upon the General Manager, or the President, was to certify that the return was made from the books of the bank. It is the basis of their knowledge and belief, and it is an obligatory part of Schedule D.

The General Manager, the accused in this case, having had nothing to do with the making of this report, cannot be held criminally responsible for an act which he has not committed. In concluding, I find that the report was made by Mr. J. Gillespie Muir, and was certified by him as true according to the books of the bank, as the law requires him to do; that the accused had nothing to do with the making of said report; that there is no evidence of negligence on his part in signing, and that therefore I find him not guilty.

### Appeal is Possible

At the conclusion of the case, C. A. Wilson, K.C., counsel for the Crown, stated that he would report the verdict to the Minister of Justice and that it would rest with him to decide if any further action should be taken in appeal to the Court of King's Bench on a reserve case. Asked on what grounds the appeal could be based he said. "I don't think that it would be on the ground of being against the weight of evidence, but there are many questions of law which the Department of Justice will have to consider. The point at issue is a very simple but very big one—it is whether the officers of the bank are mere automatons and have to sign the report that it presented to them by an official as a mere matter of form.

"There is always the right of the Minister of Justice to order a new trial but that has only been done in one case, and I don't think it is likely in this case. I shall report the decision to the Minister of Justice and it will be for the Crown to decide what shall be done."

### The Allan Case

The trial of Sir H. Montagu Allan, former president of the Merchants Bank of Canada, was fixed pro forma for September 21, but that is only a temporary date to enable counsel for both sides to consult with the Chief Judge of Sessions as to when the trial shall proceed.

In the meantime Sir Montagu was allowed to go on his personal parole that he would appear when required, Chief Judge Decarie deciding that for some people a bond, redeemable in money, for their appearance would be nothing—"their word would be the very best security given to me that they would appear for trial," and that he would take Sir Montagu Allan's word for his appearance, as "some people may very well afford to lose even a big amount of money and could not afford to lose their word."

## TRIAL OF SIR MONTAGU ALLAN

The Grand Jury of the Quebec Court of King's Bench on Sept. 13 brought in a true bill against Sir Montagu Allan, president of the defunct Merchants Bank, who is charged with negligently signing a false return on the bank's financial condition to the Government for October, 1921. Sir Montagu chose a speedy trial and will be brought before a judge without a jury in the Court of Special Sessions, as was D. C. Macarow, general manager of the bank.

## *Exchange Quotations*

Closing rates in Toronto Wednesday, compared with the preceding week, were as follows:—

| | Sept. 13 | Sept. 20 |
|---|---|---|
| Sterling | 442.75 | 443.50 |
| France | 7.55¾ | 7.66¼ |
| British W.I. | .92 | .92½ |
| Jamaica | 4.44½ | 4.45¼ |
| Belgium | 7.12¼ | 7.24¼ |
| Denmark | 21.32½ | 20.85½ |
| Germany | .06 1/16 | .07⅛ |
| Greece | 2.60⅛ | 2.15 |
| Holland | 38.73¼ | 38.77¼ |
| Italy | 4.21⅛ | 4.23¾ |
| New York | 3-32 | 1-32 |

## *Bank Clearings*

The following are the bank clearings for the week ended September 7, compared with the corresponding week of 1921:—

### Eastern Bank Clearings

| | Wk. ending Sept. 7 | Increase over 1921 |
|---|---|---|
| Montreal | $ 75,863,525 | *$ 9,971,573 |
| Toronto | 72,056,728 | *760,690 |
| Ottawa | 5,958,849 | 103,709 |
| Hamilton | 4,845,136 | 120,909 |
| Halifax | 2,727,354 | *222,149 |
| St. John | 2,661,012 | 225,291 |
| London | 2,359,034 | *114,322 |
| Windsor | 2,333,710 | *530,192 |
| Moncton | 1,103,255 | 12,364 |
| Kitchener | 891,306 | 64,506 |
| Brantford | 884,090 | *58,610 |
| Sherbrooke | 863,980 | 4,799 |
| Peterboro | 628,173 | *195,454 |
| Kingston | 581,291 | *189,940 |
| Total | $173,762,443 | *$11,511,262 |

### Western Bank Clearings

| | Wk. ending Sept. 7 | Increase over 1921 |
|---|---|---|
| Winnipeg | $ 34,838,782 | *$ 8,427,928 |
| Vancouver | 11,999,057 | *1,500,335 |

# War Talk Not Welcomed in Canada

## Our "National" Status Now Assumes a New Aspect—Financial Position Not So Good As in 1914—Large Obligations Are Maturing, and Untapped Wealth is Not Available to the Same Extent

(Special to The Monetary Times)

Ottawa, September 20.—As can readily be believed, the war scare startled both the Government and the Capital; indeed, in some quarters there was genuine nervousness until the exact situation was known. Now that it is pretty well over the general impression is that there was more scare than anything else. It is difficult to tell what the exact situation was, but the exact nature of the communication received from the British Government differed so much from the first report, as to suggest that the propagandist had been set at work.

It is now thought that there was little real intention of entering on a war of magnitude for the defence of the Dardanelles, the desire being rather to produce a show of strength, which would be made more impressive by ready responses from the Dominions. But the fact remains that a government when it commits itself to a certain policy must be prepared to go all the way, and that is what undoubtedly made the Government here cautious. In dealing with the home situation, it had to be much more cautious than the governments of either Australia or New Zealand; for the people who count in those Dominions are practically all of Anglo-Saxon origin; but it is not so in Canada.

### Financial Position

From the standpoint of finance, active participation in a war of magnitude would have caught Canada at a very bad time. A loan for $178,000,000 is just about to mature, and it is expected that the Government may have to pay out at least about $80,000,000 on this account, though it is hoped that the amount may not be as large. Now the expectation is that this will have to be borrowed in the United States, to which must be added the capital expenditure for the year on the National Railways, plus a deficit of probably about $70,000,000.

Manifestly to have had to go to the United States for such an amount of money, to which would have had to be added millions more for war expenditure would, to say the least, have created a bad impression in the very quarter, where the country is now getting its new capital and where it is very necessary that its credit should be protected. One may be sure that before all Canada's capital requirements for ordinary purposes are met there will be some discussion as to whether too much is being borrowed, and this would come quickly, if a large portion of the money borrowed had to be spent on war.

### Not a Popular Campaign

From this standpoint Canada is not as free to go to war as she was in 1914. At that time she readily secured at first from Great Britain the money she required. At home there existed much untapped wealth, which was afterwards called upon so heavily, and which responded so well. But that surplus wealth has been, for the time, pretty well used up. It is true that under the stress of circumstances, such as national defence, a large amount of money could be raised at home; but a war loan campaign for the defence of the Dardanelles against the Turks would be an altogether different matter from one conducted to raise funds for a war waged to "save the world for democracy."

If war had come it probably would soon be necessary to start the printing presses making money, as so many countries in Europe have done. Fortunately those responsible for financial policy during the war kept pretty well out of this, from which we are now reaping a decided advantage. Certainly the dollar would not have remained long at par, and a discount of 10 per cent would have added at least $2 to almost every ton of coal.

The impression is that any advice the Government gets from its own representatives on the Continent is hardly in the direction of decisive action. Moreover, the French-Canadians are in closer contact with the Continent than English-Canadians are, and the information that they are likely to communicate would be more on the side of caution than anything else. It should be remembered that English-speaking Canada gets its information respecting Europe from London; while French-speaking Canada gets quite a little from Paris.

### Turkey's Importance

During recent days there has been much eagerness to get a glance at the Treaty of Sevres for the purpose of examining its provisions. But to get a copy is very difficult. If one's memory serves one right, when this Treaty went through Parliament it was not even printed. At that date the Turk seemed to be down and out for good; indeed, he appeared to be in a fair way to lose Angora. For this reason none thought anything of either the actual or implied obligations. One effect of the war scare will be to ensure a much more thorough discussion of such matters in Parliament.

It is possible, however, that rather too much has been made of Canada's resulting obligations in signing the Treaty. Not having been given effect it can hardly be seriously contended that Canada is committed strongly to its conditions, when so important an ally as France has gone right back on it, and has apparently, consented to Turkey's demand for a portion of Thrace. Moreover, it is practically certain that Parliament would not have ratified the Treaty, if there had been any thought that in doing so she ran the risk of another costly war.

### "National" Obligations

It is also probable that the war scare may make many less assertive in discussing the question of Canada's new national status. The truth is that this claim has been based too much on what we have done, this having been carried to the extent of ignoring that claim to a given position must be equally based on what the country is prepared to do in the future.

When the treaty was under consideration one of the arguments advanced for its prompt passage was that it provided for the payment of certain claims made by Canadians, one being for $500,000 made by a certain firm. As Turkey now claims a heavy indemnity from Greece, she may have more to pay with, but this will be at the expense of Canada's $61,000,000 credit to Greece, mention of which, in the light of her recent debacle, induces a smile. Canada's business relations with the Balkan States have been very expensive, and war experience would be even more so.

---

# WHO WILL MANAGE SWIFT CURRENT?

## Control of City's Affairs Only Matter Now Preventing Agreement With Creditors

Delegates from Swift Current, Sask., and representatives of the debenture holders and banks to whom the town is indebted met in Winnipeg on September 19 and adjourned before noon, unable to reach an agreement. The meeting, however, was adjourned until the end of the month, by which time all parties will have had time to consult their principals again, and it is hoped that when the committee reconvenes at Swift Current an agreement will be reached.

Little information was obtainable from the delegates, but it is understood the main point of difference that remains to be settled is the proposed Board of Management of the town. The debenture holders want three representatives, which would give the city only two representatives.

At the previous meetings there were other points at variance, one of which was the interest clause, which provided for 6 per cent., and another was the entering into of a new long-term agreement at the expiration of five years.

It is understood the debenture holders agreed to an interest easement at 3 per cent. for five years, and that the negotiations have cleared the way for a settlement, provided both parties can agree on the question of the control of the city.

In round figures, Swift Current owes $1,350,000 in principal and interest to debenture holders, and another $400,000 to other creditors, principally the banks which were represented at the meeting.

---

# GOLD SHIPMENT NOT PROFITABLE

## Discount of Five-Thirty Seconds Required to Warrant Movement from United States

(Special to The Monetary Times)

New York, Sept. 20.—Canadian exchange bankers believe that the shipment of $500,000 gold to the Canadian Bank of Commerce at Montreal by the New York Trust Company was a special transaction having little or no importance as an indication of conditions in the Canadian exchange market. The American dollar would have to be selling at a discount of at least five thirty seconds of one percent before it would be profitable to ship gold to Canada in settlement of American balances.

### American Immigration

Canadians residing in the American West tell your correspondent that the decrease in American immigration to Canada during the past year has been largely the result of the unfortunate position of the American farmer. While there are said to be many American farmers who would like to pull up stakes and leave the United States for Western Canada, the failure of farm product prices to recover in face of increasing prices for all kinds of manufactured products, has placed most of them in position financially from which it is extremely difficult to extricate themselves. And in spite of the fact that the Federal Government has through the War Finance Corporation granted farmers extra credit to the extent of $300,000,000 during the past year, their failure to market their 1922 crop at prices which insure fair profits has rendered their position even more difficult than it was early in the summer. Even Easterners predict that the next year or so if the present inflation of prices of manufactured products continues, will be difficult for farmers of all kinds.

### National Railway Head.

Wall Street is watching with the closest interest the efforts the Canadian Government is making to induce an American railroad executive to take over the presidency of the Canadian National Railways. The opinion seems to be more or less general among Canadians and Americans alike that the appointment of a capable American railway man as head of the Canadian Government roads, and the elimination as far as possible of political interference of all kinds with the operation of the Canadian National system, will do much to strengthen Canada's credit here. American financial men during the past year or so have been very outspoken in their criticism of the railway policy of the Dominion Government and the effect it has been having on the general financial position of the Dominion. Should the Dominion Government succeed in inducing some American railway man of standing to take over the operation of the Canadian Government roads with the understanding that he was to have a free hand in attempting to operate them on a strictly businesslike basis, it will be found that a great deal of the criticism of Canada which has been heard of late in the downtown district will have been effectually stilled.

---

# GOLD SHIPPED TO CANADA

The first gold to move to Canada since the armistice has been shipped from New York, according to formal announcement on September 14th, by the New York Trust Company, which shipped $500,000 in specie to the Bank of Commerce at Montreal. This shipment follows the recent strength of Canadian exchange.

The embargo on the export of gold from the United States has been removed for some time, although a similar embargo here is still in effect. Ottawa, however, will in special cases sometimes agree to the entrance of gold into Canada with the understanding that it may be withdrawn within a specified time. This may have been the procedure followed in the present transaction. A United States firm doing business in Canada could, by a specie shipment to be withdrawn in six months, guard itself against further fluctuations in exchange rates. The express charges on such a shipment would amount to 5.32 per cent. which would represent a saving for the shipper, if exchange should undergo a further rise, provided, always that the gold could be returned to the United States at any time.

# The Record of a Distinguished Banker

By ANDREW T. DRUMMOND

The last of that remarkable coterie of able financiers and railway builders that constructed the Great Northern Railway from the Great Lakes across the continent to Seattle, and the Canadian Pacific Railway from St. John, New Brunswick to Vancouver, with all their various systems of branches, has just passed away. The impress that these men have left on whole states and provinces in succession, on either side of the long United States—Canadian boundary, is now seen, not merely in the large cities and very numerous important towns built up through the transport condition they created, but also in the broad bands of cultivated country, continental in length, access to which they had given to some millions of people. They were all men of vision, with wonderful imagination and tremendous energy, but practical and cautious to a degree, in that every mile of road constructed, had a definite object in view, and a definite profit to earn, not merely for bondholders and shareholders, but for the population the railways brought in. Energy, and the constant outlet for their thinking powers, added to a strong physicial constitution, appeared to prolong their lives. The active members of the syndicate, as the coterie was called, lived to ages beyond the three score and ten of the Biblical text, and the subject of the present sketch, Richard Bladworth Angus, has just, in the quaint language of "The Bonnie Briar Bush" slippit awa at the good old age of ninety-two years.

### Rose Rapidly In Bank

Many of the men of successful careers, who have contributed largely to the building up of Canada, have hailed from Scotland. Like his friends and colleagues, Lord Mount Stephen and Lord Strathcona, Mr. Angus was of Scottish birth, but whilst they had their early experiences in the quieter, and perhaps more hardening, influences of life in the north country, his were within a few miles of the excitements of the Scottish capital, at the small but busy town of Bathgate, where he was born on the 28th May, 1831. Like them, when in time fitted by age for serious work, he sought a wider field for his energies than was afforded by the life of a country town. His first banking position appears to have been with the Manchester and Liverpool Bank. Passing over, however, the events of intervening years, which are of less interest to Canadians, we find him in 1857, at the age of 26, on the staff of the Bank of Montreal. Here his rise from position to position was very rapid. In 1861 he was appointed to the charge of the Chicago office, and shortly afterwards to that of New York. From this last post, he, in 1863, returned to Canada to assume the local managership at Montreal.

During the next few years, there were eventful times in the history of the bank. The paid up capital at the time was only $6,000,000, but it was the leading financial institution in the country, and had offices even in London, England. E. H King, who was then the general manager, was in banking circles, both in New York and Canada, regarded as an autocrat, and somewhat daring in his methods, but he satisfied the shareholders by accumulating for them large profits, especially on Wall Street. The American civil war was at its height, United States currency was very depressed, and gold at a high premium and in strong demand. The Bank of Montreal and the Bank of California were the only institutions in New York understood to have ample supplies of gold, and Mr. King took full advantage of this, charging for the loan of gold as high as even one half of one per cent. per day to the merchants there, who at that time had to pay their customs duty in gold. It was said that he was not above creating a corner in gold. On one eventful Saturday morning, just before the departure of the Cunard steamer for Liverpool, a dray loaded with boxes of gold left the bank's offices on Wall St. for the steamship docks. The crowded financial street was always observant, and noting the heavy shipment, at once increased the premium on gold to the advantage of the bank. The shipment to Great Britain, the brokers afterwards alleged, was never intended, for later in the day, the dray returned to the bank with its load of boxes untouched.

### Made General Manager

On the resignation of Mr. King in 1869, Mr. Angus, then at the age of only 38, and only twelve years after he had joined the staff of the institution, was promoted to the highest administrative position in the bank—that of general manager. He was a man of a totally different temperament from his predecessor, and with different gifts. In commercial circles in Montreal, he was sometimes designated as "the man of peace," and his quiet manner and remarkably good judgment attracted customers to the bank, which under his guidance continued its upward career. His predecessor's action in only encouraging large accounts, which had damaged the prestige of the bank in Toronto and other western points, was changed, and the business adapted more to the needs of each branch and agency. About this time, some men of great breadth of view and initiative joined the board of directors. Especially of this type were Donald A. Smith, the Governor of the Hudson Bay Company, and George Stephen, the woollen and cotton manufacturer, both of whom afterwards became important factors in increasing the business of the bank, and in aiding to give it status and power as a financial institution in Great Britain as well as America, and the latter of whom became vice-president in 1873 and president in 1876.

### Entered Railway Field

Unexpected circumstances often turn the currents of men's lives into new channels. A deep depression overshadowed trade in America during 1876-8, and made it difficult to raise money for new enterprises. Among other railway developments west of Chicago, which were held up, was the St. Paul and Pacific railway, at that time constructed from St. Paul as far as Fargo, but whose charter empowered it to extend westward to the Pacific Ocean, and to build a branch along the Red River to the Canadian boundary. This branch was subsidized with a huge land grant, given by the State of Minnesota, contingent on its being opened for traffic by a fixed date. The railway company had defaulted on its bonds, which were entirely held in Holland, and James J. Hill of St. Paul had been appointed one of the receivers. He was a Canadian by birth and education, and a man of keen insight and great energy. The advancing prospects of the new Province of Manitoba furnished to him a reason for securing the railway and this splendid land grant of prairie country along the Red River valley. Through Mr. D. A. Smith, the matter was brought before Mr. George Stephen, and, eventually before Mr. Angus and the directors of the Bank of Montreal. Mr. Stephen, with his large vision, took in the situation, and formed a syndicate which also included Jas. J. Hill, D. A. Smith, J. S. Kennedy of New York, and, eventually, Mr. Angus, who, for the purpose, resigned from the bank and took up his residence in St. Paul, to become, on foreclosure being effected, vice-president of the newly constituted St. Paul, Minneapolis and Manitoba Railway Company. The directors of the bank agreed to advance sufficient funds to construct the branch to the Canadian boundary line, and for the syndicate, arranged with the Dutch bondholders to take over their holdings. The branch was then constructed and operated within the prescribed time, and the land grant secured. The syndicate, having leased the Canadian Government line built simultaneously south from Selkirk, was thus enabled to operate its trains through from St. Paul to the newly founded city of Winnipeg. This gave to Canadians, for some years, their only railway connection between the eastern provinces and Manitoba.

The reference to this railway would not be complete unless it touched briefly on the financial success which the undertaking brought to the promoters, and to the changed circumstances under which it became the Great Northern Railway. Mr. Stephen held the presidency until 1883, when, with huge new railway interests on his hands, he resigned the reins in favour of Mr. Hill. About the same time , Mr. Angus returned to Montreal to co-operate with Mr. Stephen and Mr. Smith in these new interests, leaving, in St. Paul, Mr. Hill as the controlling force which, with the aid of other members of the syndicate in financing the bonds in Great Britain and New York, gradually extended the road from the Great Lakes to Seattle on the Pacific coast, a distance of over 2,000 miles, and through five states of the American Union. Its financial position had almost from the beginning become extremely satisfactory. The initial share capitalization had been $15,000,000, which, it was understood, was divided among the syndicate as, practically, paid up stock. The railway being for four or five years the sole inlet to Manitoba for streams of Canadian settlers, and for all freight, the railway company operated the road with its own advantage in view, and was enabled to pay dividends almost from the start. With a revival in trade, the New York market was favourable when a large bond issue was floated which relieved the company of all of its previous debts. The capital stock became marketable, and eventually rose in Wall Street to a heavy premium to the enrichment of all the syndicate members, although less to Mr. Angus, whose interests were moderate.

### The Confederation Problem

Another unexpected circumstance awaited the syndicate in 1879-80, and opened up a new field for the ambition of its members. Sir John A. Macdonald, on assuming the reins of power in 1878, found his government burdened by his predecessors with the responsibilities of financing, constructing and operating a Canadian transcontinental railway. It was part of the bargain with British Columbia on its entry into federation. His opinion was that private enterprise should undertake such a scheme, and he approached the St. Paul syndicate with this view. The proposal embraced much more extensive and more difficult work than had hitherto been undertaken on the American continent, but it appealed to the syndicate, and after some prolonged negotiation, an agreement was signed in October 1880, under which the subsidies granted by the Dominion were $25,000,000 in cash, 25,000,000 acres of land, and the completion by the Dominion, and the transfer to the syndicate, of the Lake Superior, and the Kamloops to Vancouver sections. The chartering by Parliament of the present Canadian Pacific Railway followed shortly after. The syndicate was at this time strengthened by the addition of the banking firms of Morton, Rose & Co. of London, and Kohn, Reinach & Co. of Paris, and of Mr. Duncan McIntyre who brought in the Canada Central Railway and its subsidized extension to Lake Nipissing then under construction. On the organization of the company, Mr. Stephen was elected president.

By the month of May 1881 work under the new regime was in active progress. It was a vast undertaking requiring courage, faith, initiative and financial ability of a high order. The leading part in matters connected with the land grant and with construction on the prairie sections was taken by Mr. Angus and Mr. Hill, they being more familiar with the similar conditions in Minnesota and Dakota. The organization and energy displayed in the building of the St. Paul road, which attracted the Canadian Premier, was to be repeated here. On the level, treeless prairie, this became a marked feature. When the graders on long stretches, were ready for the rails, a train left Winnipeg each morning laden with the ties, rails and fastenings necessary for laying two to three miles of track. Thus the railhead was pushed forward day by day to a new point that distance ahead. It was strenuous work, involving not merely railway construction, but all the numerous details of camp and other equipment, food supplies, and local transport for a small army of men, who, at times each evening, when they ceased work, would be from one to three miles beyond where they started in the morning.

The original route selected and surveyed for the railway, and which led through the present city of Edmonton to the Yellow Head Pass, was changed for a more southern route along the Qu'appelle, South Saskatchewan and Bow Rivers to the Kicking Horse Pass. Thence to the Fraser River, considerable difficulty was experienced in finding a suitable line with easy grades. Many months were spent by the engineers in the mountains in explorations. It is said that on one occasion when they were almost in despair ,the route taken by a large eagle gave them a suggestion which, when followed up, led to their discovering the pass in one of the mountain ranges through which now the trains daily operate.

### Removed to England

The successful accomplishment of any great and prolonged undertaking necessarily furnish-

TORONTO, FRIDAY, SEPTEMBER 22, 1922

## THE CONVERSION PRIVILEGE

The advance in the price of 1922 Victory bonds has been slightly out of proportion to the advance recorded by the other short term issues, as the following shows:

| Closing price week ended | 1922 | 1923 | 1924 |
|---|---|---|---|
| July 26 | 99.87 | 99.95 | 99.90 |
| Aug. 2 | 99.87 | 99.75 | 99.50 |
| Aug. 9 | 100.00 | 99.80 | 99.20 |
| Aug. 16 | 99.85 | 99.80 | 99.40 |

The time for converting 1922 bonds into the new five or ten year bonds closes on September 30, and dealers report considerable buying orders for the 1922 issue on this account. It is probable that the total is not large, however, as investors will undoubtedly have the opportunity of buying for cash, the month's bonus of interest being only a small factor except on large amounts. Those who do not convert may hold until maturity or realize upon them in the market at any time. Those who have new money to invest will have the satisfaction of waiting for the public offering, though it will not, unless there are unforeseen developments, be more attractive than the conversion offer. In this connection it should be noted that a month's interest bonus is just .46 per cent., so that a buyer might have paid 100.46 for 1922's and still have realized 5½ per cent. on his new bonds.

## THE NEAR EAST

Having subscribed to the League of Nations and settled down to gradual recovery from the effects of the world war, Canadians felt relieved of further military effort. It was somewhat of a shock, therefore, when the news of the week indicated that Canada might be invited to send forces to combat the Turks at the Dardanelles. Our lack of experience in international diplomacy may have lulled us to a false sense of security.

Turkey's aim, as expressed by the Kemalist group, seems to be to regain what she lost in the peace settlement, and it appears to be the view of the allied authorities that any movement instigated by Turkey cannot be disregarded. From the point of view of the Empire it is especially dangerous because of Turkey's kinship with the other Mohammedan peoples. The Dardanelles campaign has bitter memories for the British troops, and it may be that their failure there still encourages the Turks.

As the British Empire's American branch, subject to United States influence and necessarily influenced by the discarded Monroe doctrine, Canada has always had less interest in European affairs than the other colonies. There is a strong desire here to be left alone, especially after having made a substantial contribution of men and money in the great emergency of the world war. Therefore the anti-war sentiment expressed by the London Daily Mail and Evening News will be reflected here, and Canadians will favor trying out the strength of the League of Nations "in a short conference over a mahogany table."

## THE REPARATIONS DEADLOCK

The catastrophe which has overtaken the mark during the past month has accentuated the difficulties which, even with the utmost goodwill, must attend any effective settlement of the problem of reparations and Allied debts. It has moreover emphasized the tendency of each country to insist upon its own immediate national interests without proper regard for broader issues and for the general welfare of others. This is unfortunate because any permanent and really satisfactory settlement of war debts and reparations must be based upon the facts of the situation, even if these cannot be entirely reconciled with acknowledged rights or national ideals. Ideally it should also have regard not only to present financial difficulties but also to financial potentialities. It would, for instance, be regrettable should it result that the country which shouldered its obligations to the last halfpenny ultimately found itself, by reason of its burden of debt, with a lower standard of living for its people than countries whose external debts had been forgiven and whose internal debts had been written down by a devaluation of currency. To penalize those nations who, by drastic taxation, had sacrificed their immediate well-being to their financial ideals would not only be unjust, but it would create a very dangerous precedent. Yet such a result is quite within the realm of possibility if the problem of reparation and Allied debts is settled without regard to other cognate factors.

Any question of helping debtor nations by forgiving them their debts is in fairness a matter for general agreement, for otherwise, the ultimate benefit of a creditor country's sacrifice might well accrue, not to the debtor whom it was desired to help, but to other creditors. The fact has to be faced, however, that the possibility of a general settlement is remote because apart from other factors, American public opinion is not yet ripe for its consideration. The position is, however, too urgent to wait upon eventualities, and it would therefore seem that unsatisfactory as such a course may be—if only because of the uncertainties it leaves—a partial settlement must in some way or another be arranged. Any settlement reached must be generous to France, but with goodwill it should not be impracticable to achieve this without imposing an impossible burden on Great Britain, or potentially placing her in a relatively worse position than other countries.

## RUSSIAN RELIEF

Russian relief, in the shape of $15,000,000 to be lent by the Canadian Government for the purchase of seed wheat and grain, as proposed by a resolution of the United Mine Workers of America, was voted down by the Trades and Labor Congress of Canada at its recent meeting in Montreal. Emotional speeches were made by some of the delegates, who described the moneys involved as "a few paltry millions,' and thought that if for nothing else there were humanitarian grounds for the expenditure. Another delegate thought that the Congress committee had "succumbed to the yellow journalistic campaign against working classes in Russia," and a third delegate thought that Russia would emerge majestically as a phoenix out of the ashes to be the greatest country in the world, and would reward those who reached out a helping hand in time of need.

The reply was a scathing criticism of Soviet Government principles by President Tom Moore. "Don't think because they have overthrown Czarism," he declared, "that they have overthrown autocracy. The Red Guards are ruling and an open meeting like the one we are holding now would never be tolerated in Russia today. When Russia gets freedom of speech and when the Government removes the soldiers from the midst of the workingmen it is plenty of time to come with such appeals."

The resolution of the U.M.W. of A., endorsed by West Toronto Brotherhood of Railway Carmen, called for a loan of $15,000,000 being made by the Canadian Government, "and to take such steps as may be necessary to persuade the Dominion Government to grant said loan to Russia." Delegate Jos. Gibbons (Toronto) moved the non-concurrence of the resolution. The committee, he said, had not regarded it with favor. "The Canadian Government is endeavoring to negotiate a loan for $300,000,000," replied Delegate Gibbons, "and there is a very great deal of unemployment right here in Canada. Some delegates seem to be more concerned about the workers of Russia than about our own people. We have already had some sad experiences, as in the case of the loans of Greece and Rumania, and we should first of all look after our own troubles."

Delegate Watson thought that the "small sum of fifteen millions" could easily be set aside for this purpose, especially in view of the fact that the money was to be expended in this country. A great deal of locomotives and rolling stock, he said, would be built and afford employment and prosperity to many Canadians.

President Tom Moore began his reply by saying that there was no question of building locomotives, as suggested by Delegate Watson, but of seed grain. For a long time the workers had been trying to get a grant of $40,000,000 for Canadian workers' houses, but this was denied. "It is easy to pass resolutions," he said, "and to make sentimental speeches. But why not help yourselves, instead of asking somebody else to do it. If you believe in this, there are plenty of places to hand in your money. After this Congress had appealed for Russian funds for over six months, in every conceivable way, we found that we had received the great sum of $160. Don't confuse starvation appeals with Soviet matters," he went on. "Do you realize that a meeting of this kind would never be tolerated in Russia? Any man who dares to criticize the Soviet Government is stood up against the wall and shot down by Red Guards. There is no democracy in Russia. Because they did away with Czarism they have not done away with autocracy in the worst form, and with military government."

### THE COAL SITUATION

As the winter season approaches the coal problem becomes more and more acute, and it is evident now that normal supplies will not be available. Bituminous coal is moving freely, but no anthracite has as yet arrived in Ontario. Large quantities of bituminous are now going up the great lakes, but when navigation closes this supply will be turned to the east. As the consumption by industries is below normal, some of this should be available for domestic purposes, but with present heating systems it cannot be used to any great extent.

Where, then, are we to look for substitutes? By-product coke is now being tried out and is proving a satisfactory substitute, though much more expensive and inconvenient. Crude oil, coal oil and hardwood are also being used in small quantities. The peat experiments on which considerable sums have been spent by the governments have not as yet yielded appreciable results. It is evident, therefore, that as the weeks go by supplies of all available fuels will be taxed to the utmost, and even at that normal requirements will not be met. Incidentally the cost to Canadian consumers will be greatly increased, for these substitutes, even at their ordinary prices, do not show the results per dollar as does anthracite coal.

### THE RECORD OF A BANKER

(Continued from page 6)

es in its details, the leading incidents for any sketch of the lives of the men to whose vision and energy this success was largely due. When Mr. Stephen resigned the presidency, and took up his residence in England, the work of expansion and operation rested for some years largely with his successor Sir Wm. VanHorne and with Mr. Angus who remained constantly at the headquarters of the company at Montreal, where they were aided in the administrative posts by a remarkably able staff of men who had risen in the service of the railway. Present day results bear testimony to their work. No railway in the United States or Europe can furnish such a record of successful construction amid great difficulties, and of new ideas in the development of traffic.

Some time after his return to Montreal, Mr. Angus rejoined the Bank of Montreal as one of the directors He, years afterwards, on the death of Sir George A. Drummond, became president, but only for a short time, as apparently, at his increasing age, he did not desire to assume responsibilities which the important financial position to which this great institution had attained, required. He was also associated with various industrial companies as director. But he had other interests on a higher personal plane. He was fond of art, and was for some years president of the Montreal Art Association, to which he presented paintings on more than one occasion. His interest in Scotland was never lost, and led to his being long president of the St. Andrew's Society. When the Royal Victoria Hospital, Montreal, was founded, he became president, and had, previously, been on the board of the Montreal General Hospital. It is even understood that he was offered knighthood, but the general public has never been made aware of his reasons for not aspiring to an honor and a title which only a rare few in Canada have, like him, had the courage to refuse.

Although at his death, he was probably a millionaire, those who knew him in his earlier years could readily believe that the accumulation of great wealth was not with him an aim. He had rather a pride in the institutions or undertakings with which he was associated. He had both courage and initiative, although not the daring with which George Stephen, D. A. h and Jas J. Hill were ready to push gh their enterprises, but his calm judg- his insight into character and events, fixity of purpose when a great end was made him a splendid associate. It was rough them in the huge undertakings y inaugurated, that sudden influxes ame to him.

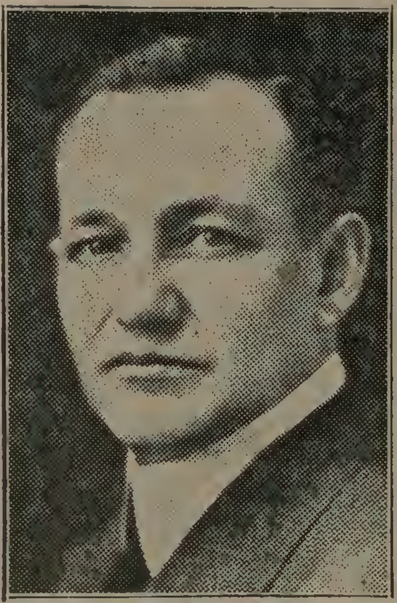
## Personal

HON. F. N. BLACK, Provincial Treasurer of Manitoba has been elected to the Legislature.

R. P. DOUCET, has been appointed general manager of the Asbestos Corporation of Canada, Limited, Montreal.

HAROLD G. HANSON, C. A., has been admitted into partnership in the firm of MacIntosh, Cole and Robertson, chartered accountants. Mr. Hanson will continue as manager of the Winnipeg branch which is now located in the Electric Railway Chambers.



M. A. BROWN, vice-president of the Canada Colonization Association, who originated the Western Canada Colonization Associaton and was the primary factor in raising the Association's fund of $1,500,000. He is largely responsible for the National Land Settlement plan just announced, and also for the successful negotiations recently concluded with the Imperial and Canadian Governments.

## Obituary

RICHARD B. ANGUS, past President of the Bank of Montreal, a director of that institution and of the Canadian Pacific Railway and other corporations, died September 17th at his country home at Senneville, near Montreal, in his ninety-second year.

FREDERICK CLARENCE MULKINS, for many years manager of the branch of the Bank of Nova Scotia in Ottawa, died in Ottawa on September 17th. He was born in Simcoe.

GEORGE A. WHITE, for twenty-five years manager of the Bank of Montreal, at Woodstock, died in Shediac, N. B., on September 15th.

JOSHUA KINGHAM died in Victoria, B.C., on September 3rd. The late Mr. Kingham was born on February 22, 1866, in Beaconsfield, Buckinghamshire, England and was educated in Bedfordshire, beginning his business life as an accountant with the firm of T. Lye and Sons. In 1890 he went to Victoria and in 1897 accepted the agency of Nanaimo Collieries. He was the active head of the firm of J. Kingham & Co., up to the time of his death.

CHARLES EUGENE HOWARTH, died on September 12th, at his home in Toronto. The late Mr. Howarth was born in Toronto 52 years ago, and was a graduate of Toronto University, and was a candidate for Board of Education in the municipal elections in 1919. He has been associated with the Imperial Life Insurance Company for the past 8 years, prior to that date he was secretary-treasurer of the A. R. Clark Company.

HERBERT RUTHERFORD KIRKPATRICK, died in Montreal on September 12th. The late Mr. Kirkpatrick was born in Kingston, Ont., 48 years ago. He received his education at the Collegiate Institute, Kingston, and was a graduate of Queen's College. He was vice-president and managing director of the Consolidated Steel Co., Ltd., Toronto; director Albany Car Wheel Co., Albany, N.Y.; President Mercantile Realty Co., Montreal; assistant to managing director of the Allis-Chalmers Bullock Co., Montreal; assistant to president Caledonian Iron Works, Montreal, and vice-president Canada Grip Nut Co.

## Business Conditions

General improvement in Canadian business is reported in despatches received by Dun's review from the branch offices of R. G. Dun & Co. in the principal cities. Although wholesalers express some disappointment at the size of orders being placed, which indicate that a conservative sentiment still widely prevails, the number of visiting buyers at the leading distributing centres is unusually large, and almost all are extremely optimistic in regard to prospects for the coming Fall and Winter, as the crops are turning out well in practically every section, and industrial activities are gradually being extended. City retail trade is reported to be relatively satisfactory in volume, and country merchants are beginning to order more freely in anticipation of further business. Collections in some districts are slightly better.

Montreal reports improved retail trade, with the return of vacationists and the opening of the schools, and business in wholesale lines is being stimulated by the presence of many visiting buyers, who are placing orders for seasonable goods, clothing, footwear, millinery, furnishings, and other commodities with increasing confidence. Collections show an improving tendency.

Retail trade at Toronto has been stimulated by the return of many residents to the city, the great number of people attending the National Exhibition and purchases made in preparation for the opening of the schools, and merchants generally regard the outlook with a good deal of optimism. Numerous country buyers are present, and though their orders are not particularly large in amount in the aggregate they represent a quite satisfactory business. Crops in the terriory tributary to this centre are almost uniformly good, and, with industial activities well maintained, prospects are thought to be unusually encouraging. Collections are about fair.

In some respects the crops in the Far West and Northwest seem to be turning out better than was expected a few weeks ago, and though business in most sections is still quiet, country merchants are beginning to purchase more freely in anticipation of a better demand from consumers later on. Retail trade at Winnipeg and a few other points shows some improvement, but at most centres rather quiet conditions prevail, as the farmers are busy harvesting and threshing and not much grain has yet been marketed. Collections remain slow.

### BANK BURGLARS GET $3,000

Burglars entered the sub-agency of the Banque Nationale, in St. Nicholas, ten miles from Quebec, at one o'clock on Wednesday morning, and blowing the safe to pieces, made their getaway with $3,000 in cash. Laborers employed on road work are suspected.

## BUSINESS INSURANCE

on the lives of the men who run the business is just as important as fire insurance on the property. Fire is a possibility but death is a certainty.

The ready cash from a Canada Life Business Insurance Policy at such a time will readjust matters and carry on the business as nothing else can do.

# Guarantee Bond as Bank's Security

By A. B. BARKER

Many advances are made by banks against guarantee bonds signed by parties other than the borrower. Such security is usually rated much higher than it deserves, as the bond is liable to be voided by what may appear to be a trivial incident not affecting in any way the equities of the situation. In the forms used by the banks the different chances are guarded against as completely as possible, but the trouble is that any weakness there may be does not develop until it is necessary to rely on the security and then it is too late to remedy.

The time to discuss the terms of a guarantee is when the document is to be executed, so that there shall be no difference of opinion as to the terms of the bond in case it has to be looked to. This is essential, not only from the point of view of preventing a possible monetary loss to the banks, but from the effect such a dispute will have on future relations between the bank and the guarantor. A bank like other business organizations depends on the good will of those with whom it does business to increase its volume of trade. This goodwill is best retained by having its contracts so drawn that, when executed, there will be no loophole by which the different parties can escape liability.

### Importance is Overlooked

The chief trouble with guarantee bonds is that when such a document is executed, neither the bank nor the guarantor expects that it will be necessary to look to it. If the bank anticipated having to collect from the guarantor it is safe to say the loan would not be made, and if the guarantor thought he would ever be called on to pay he would refuse to sign. It is because both consider the contingency remote that the transaction is undertaken, and when, therefore, the bond must be looked to it comes as an unwelcome shock to both. So far as the bank is concerned the position is that, relying on the security it has advanced moneys, and, if the borrower does not carry out his part of the contract, it naturally looks to those parties, who have agreed to be responsible in such a case, to carry out their agreement.

So far as the guarantor is concerned, the fact that he has executed such a document is prima facie evidence that he was sufficiently satisfied with the circumstances of the borrower to warrant his action in becoming responsible for a particular debt owing by the latter. There is an old saying that "No one wants to pay for a dead horse," and a debt which must be collected under a guarantee is usually a very much deceased equine. It is only human nature to resent such a clause and to try to escape responsibility if possible. If therefore it can be shown that the terms of the contract have been violated even technically, the temptation to take advantage of this is usually overwhelming. To guard against this banks usually insist on the use of their own forms, which are drawn to provide for the continuation of the liability under varying conditions such as, different laws, where the guarantor is domiciled and where the guarantee is to operate changes in the personnel of the concern whose advances may be guaranteed, operation of the account and disposition of the customer's assets in the course of business.

### Renew Guarantees

Some institutions consider it advisable, in the operation of accounts where the advances are seasonal and intended to clean up periodically as in the case of certain grain accounts, to have new guarantees executed each season and in this way the security is definitely renewed periodically and the terms reviewed by all. In this connection the necessity for clarity in the terms of a contract is well illustrated in the plan of Faust. When Faust objects to the sealing of the contract with Mephistopheles in the orthodox way, claiming that his word should be sufficient, that worthy remarks "Believe me Doctor I have had considerable experience in this sort of thing, and have found it best to have these agreements in regular form. It avoids all possible misunderstanding in the future."

---

## PLANS OF COLONIZATION ASSOCIATION

### Details of Project Just Announced—Organization Will Assist Settler After He Arrives

The outstanding features of the plans of the Western Canada Colonization Association may be summarized as follows:—

(1) The problem is the restoration of national prosperity.

(2) The solution lies in an extensive land settlement movement.

(3) The settlers are available in Great Britain, in the United States, in other approved countries ,and in Canadian urban centres.

(4) Millions of acres of fertile, well-situated lands are available close to existing railway lines.

(5) The movement will include none but carefully selected settlers, who will be conducted directly to the land and be so looked after that they will not drift to the cities.

(6) The full amount of working capital originally contemplated by the Colonization Association, viz., $1,500,000, has been oversubscribed.

(7) The activities of the Colonization Association are to extend beyond the three prairie provinces originally included, so as to embrace every province of the Dominion.

(8) The organization will function under a board of directors thoroughly national in character, which will delegate large powers to one small operating committee for western Canada, and to a second small operating committee for eastern Canada.

(9) The head office for eastern Canada will be located at Ottawa, and that for western Canada at Winnipeg.

(10) -The plan just published has been approved by the Imperial government, the Dominion government, the Canadian railways and the joint boards of the Colonization Association.

(11) The plan co-ordinates the immigration activities of the Imperial government, the Dominion government, the provincial governments, the Canadian railways, private land agencies and the Colonization Association.

(12) It is estimated that the working out of the plan will involve the expenditure by the Canada Colonization Association alone of $30,000,000 to $40,000,000 within the next five or ten years. The major portion of this fund will be available from commissions earned on the sale of privately-owned lands.

(13) It is calculated that a minimum of ten million acres of vacant land will be settled within the next five to ten years.

(14) Incoming settlers will be located only in carefully-selected, fertile districts, close to existing railway lines and other facilities of civilization.

(15) Land in the western provinces is to be sold on a 32-year payment basis, and in the eastern provinces on terms which will be governed by local conditions and other considerations.

(16) Owners of vacant land throughout the country will at once be invited to list their lands with the Colonization Association for sale on a long-term basis.

(17) Local land men in Canada and the United States will be paid reasonable commissions as a commercial incentive to put all their energies behind an extensive immigration movement.

(18) Canadian land agents, all over the country, will be employed in showing lands to prospective settlers and in closing or assisting to close sales.

(19) By the time the snow flies several hundred American land agents will be engaged in drumming up settlers for the western provinces.

(20) The Canadian immigration machinery in the British Isles, and other European countries, will be greatly expanded and gingered up, so as to obtain a largely-increased share of British and other European agriculturists suitable for settlement in this country.

(21) Honorable Duncan Marshall, federal commissioner of agriculture, and formerly minister of agriculture for Alberta, will shortly tour the British Isles, speaking in support of British agricultural migration to the land in Canada, and explaining the welfare work to be carried on on behalf of British settlers in Canada.

(22) To each of the participants in this joint national effort a special function is assigned.

(23) The Canada Colonization Association will—

(a) List land for sale.

(b) Assist the government in securing settlers from Great Britain, the United States and other countries.

(c) Act as a national land selling agency in bringing settlers and vendors together.

(d) Set up a national welfare organization, embracing local community clubs, to care for incoming settlers until they become thoroughly established as successful farmers.

(e) Direct the movement of British farm laborers to Canada, where they can in time become proprietary farmers.

(f) Promote an extensive movement of British boys to Canadian farms, and

(g) Encourage the migration of British women to Canada for employment on farms and in domestic service.

(24) The Imperial government will assume a liberal share of the cost of the welfare work to be carried on in Canada on behalf of incoming settlers.

(25) The Dominion government will—

(a) Rejuvenate and extend the immigration agencies abroad, in order to stimulate the flow of qualified agricultural settlers to Canada.

(b) Employ a large number of active field men abroad, and

(c) Carry on a widespread publicity campaign with this end in view.

(26) The provincial governments are asked to—

(a) Assist the Colonization Association in selecting suitable districts for settlement.

(b) Assist in directing settlers through the instrumentality of the district agricultural representatives during the initial period of their pioneer careers, and

(c) Provide the Colonization Association with literature regarding the agricultural attractions of the respective provinces.

(27) The Canadian railways are to co-ordinate their colonization activities with those of the Colonization Association, and also provide special transportation rates for settlers and settlers' effects and colonization agents.

The negotiations with the Imperial government, the Dominion government, the Canadian railways, and other organizations, have been carried to success under the leadership of M. A. Brown, vice-president, and F. D. L. Smith, director and secretary-treasurer of the Western Canada Colonization Association.

Sir John Willison has been appointed president of the association.

Howard Everett, for many years president of the Luse Land & Development Company, which has colonized over a million acres in western Canada, is to be the western general manager.

Dr. George C. Creelman, for seventeen years president of the Ontario Agricultural College at Guelph, and later agent-general for Ontario in London, is to have supervision over all operations in the eastern provinces.

# Why a Lawyer Should Draw Your Will

There is nothing very formidable about drawing a will. But it needs experience, knowledge of the legal requirements, and exact use of language. Many people who attempt to draw their own wills fail in one or more of these respects. The wills they make, written throughout by themselves or with the doubtful aid of a printed form, are subject to dispute or delay in interpretation and in danger of being disallowed by the Court as not being wills at all. So these suffer to whom the will-maker intended the estate to pass.

Everyone should make a will. Make yours, but have your lawyer draw it up.

A will implies an executor. We act as executor.

# Accident and Sickness Conditions

(By V. Evan Gray, Ontario Superintendent of Insurance)

(Report of the committee on accident and sickness insurance uniform statutory conditions, presented at the Provincial Superintendents' Conference in Vancouver.)

At the Fourth Annual Conference of the Association held in Quebec in October 1921, a form of Uniform Statutory Conditions for Accident and Sickness Insurance policies was agreed to by the superintendents and recommended for enactment to the Legislatures of the Provinces of Canada. It was resolved that this would be first submitted to the Ontario Legislature for consideration and the undersigned was continued as a committee of the superintendents in charge of the submission.

I have to report that the recommendation of the superintendents was duly enacted by the Ontario Legislature in the Ontario Insurance Amendment Act 1922, with only a few minor changes which were in every case, agreed to by representatives of the insurance companies and which the undersigned also undertook to approve on behalf of the superintendents. Particulars of these changes are submitted herewith for approval and confirmation by this association.

### Changes in Ontario.

In the Ontario Act a number of additional sections of substantive law were enacted which are not variations from the statutory conditions as approved by the Quebec Conference. Particulars of these are also given. Copies of the Ontario legislation as enacted are appended hereto.

Section 2 sub-section (1) and sub-section (4) defining accident insurance and sickness insurance respectively, are new and were not discussed by the superintendents.

In section 12 of the Act—

Section 190a sub-sections 1 and 2 are new and were not discussed by the superintendents.

190b is in substantially the same form as approved by the superintendents with the exception that the words of the former section 172 of the Ontario Insurance Act, "such act not amounting to voluntary or negligent exposure to unnecessary danger," were struck out.

Sub-section 2 of section 190c is new and was inserted at the request of the insurance companies in order that they might not be embarrassed in dealing with policies of long standing.

In the Statutory Conditions, conditions Nos. 1, 2, 3, 4, 6, 7, 8, 10, 11, 14, 15, 17, 18, 19. 20 and 21 are exactly as approved by the superintendents.

An unimportant change was made in Condition No. 5 by the substitution of the words "contracted by" for "occurring to" as used in the superintendents' draft.

In Condition No. 9 an unimportant change was made by the use of the words "in either case" instead of the words "in both cases" as approved by the superintendents.

In Condition No. 12 an important change was made in paragraph (a) whereby the insured is allowed thirty days in which to give notice of claim in the case of both accident or sickness instead of thirty days in the case of accident and fifteen days in the case of sickness as provided in the superintendents' draft.

In Condition No. 13 an unimportant change was made by the substitution of the word "statement" for the word "proof" in the eighth line of the condition.

In Condition No. 16 a change was made by the insertion of the word "beneficiary" in the third and fourth lines.

Sub-section 4 of section 190d is new and was substituted for sub-section 4 of section 2 of the superintendents' draft.

Section 190e is new.

Section 190f is in the form approved by the superintendents.

Sections 190g and 190h are new but are similar in form to sections recommended in the Model Fire Insurance Policy Act by the Commissioners on Uniformity of Legislation.

The undersigned respectfully presents the above report for consideration by the Conference and begs to move that the report be adopted and that this Conference recommends to the Legislatures of the other Provinces, the enactment of the legislation respecting Accident and Sickness Insurance Policy Conditions in the form in which it was enacted in The Ontario Insurance Amendment Act 1922.

---

## LARGEST CROP IN HISTORY

### Manitoba Free Press Estimates Wheat Yield at 731,901,000 Bushels. Crop larger than that of 1915

In its nineteenth annual crop estimate for the three prairie provinces, the Manitoba Free Press estimates the wheat yield this year at 371,901,000 bushels from a total acreage of 21,471,000 acres. This estimate exceeds all previous figures forecasted by various authoritative bodies this year.

During the growing period of the crop there have been comparisons made with the famous crop of 1915, the paper says, when the total yield of wheat of the prairie provinces was 360,187,000 bushels from 13,867,715 acres. It is only necessary to compare these figures to realize that while the present crop of wheat in actual number of bushels is the largest ever produced in the West from point of average of yield, it falls very far below 1915.

Previous estimates made this year have varied from 297,781,000 bushels to 350,000,000, the former being the Dominion Bureau of Statistics estimate, based on conditions at the end of July, and the latter the Grain Trade News' estimate.

This year's Free Press estimate would average 17.31 bushels to the acre, while in the banner year, 1915, the average was 25.97 bushels.

Other grain yields in the prairie provinces this year are estimated as follows, the figures in parenthesis indicating the acreages sown:

Oats, 413,539,000 bushels (10,861,000); barley, 61,080,800 bushels (2,053,400); rye, 54,311,000 bushels (2,329,000); flax, 3,088,000 bushels (504,200).

### Yields by Provinces

Yields by provinces are estimated as follows:

| Grain | Acreage | Total Yield |
|---|---|---|
| —Manitoba— | | |
| Wheat | 3,239,000 | 71,258,000 |
| Oats | 2,247,000 | 103,115,000 |
| Barley | 498,000 | 13,446,000 |
| Rye | 278,000 | 6,116,000 |
| Flax | 62,700 | 439,000 |
| —Saskatchewan— | | |
| Wheat | 12,970,000 | 226,975,000 |
| Oats | 5,782,000 | 231,128,000 |
| Barley | 1,032,000 | 36,120,000 |
| Rye | 1,771,000 | 44,275,000 |
| Flax | 416,500 | 2,499,000 |
| —Alberta— | | |
| Wheat | 5,262,000 | 73,668,000 |
| Oats | 2,832,000 | 79,296,000 |
| Barley | 523,400 | 11,514,800 |
| Rye | 280,000 | 3,920,000 |
| Flax | 25,000 | 150,000 |

### Wheat Acreages Too High

With regard to acreages, the Free Press has, as in former years, taken the various acreages issued by the Dominion Government. The newspaper is entirely satisfied with its average of yield, but it has less confidence in the accuracy of the acreage, it says. It is felt that while the acreages in wheat are too high in Alberta and Saskatchewan, the acreages in Winter rye are far too small, and this is also true of Manitoba. Manitoba's acreage is too conservative, the newspaper claims.

The newspaper calls attention to the fact that the crop of 1922 has been produced in a shorter period of time than almost any crop in the history of the prairie provinces, in many districts not more than 102 days elapsing between seeding of wheat and cutting.

The season of 1922 emphasizes in a marked degree some of the wonderful recuperative powers of the prairie provinces, the Free Press says. Over very large wheat acres in Saskatchewan, after an unduly delayed seeding, no general rain fell for 99 days, and in spite of this, on well cultivated lands already yields have been threshed that run from 25 to 30 bushels, though these, of course, are not general in these districts. The paper also calls attention to the recovery of the section of Manitoba which suffered tremendous hail damage in June, and also to the reversal of moisture conditions.

### Government Report

The Dominion Bureau of Statistics reports the receipt of the following telegrams on the condition of crops in Canada at the end of August:

Prince Edward Island—Dominion Experimental Farm, Charlottetown: "August weather conditions favorable for all crops except cereals, three rainy periods with heavy winds lodged many fields of oats. There was some rust injury. Harvest became general August 10; cereals filled well. Corn and roots now promise full crop. Pactures in splendid condition. Fruit, vegetables and potatoes above average."

Nova Scotia—Dominion Experimental Farm, Amherst: "Weather for August very unsettled, poor weather for harvesting. Heavy continuous rains caused much damage to grain, hay and potatoes; grain in stook badly sprouted; ground very wet; difficult to harvest roots. Corn, sunflowers pastures in excellent condition."

New Brunswick—Dominion Experimental Farm, Fredericton: "Heavy rains have lowered yield and quality of oats and potatoes; straw lodged badly grain shattering. Many potato fields flooded also considerable late blight. Roots, forage corn and sunflowers good .Pastures good. Abundant roughage for stock in most districts. Early apples good, late varieties below average, quality good."

### Ontario and Quebec

Quebec—Quebec Bureau of Statistics: "Harvest beginning in the lower part of the province and finishing in the higher part. Cereals generally abundant everywhere. Potatoes, roots and vegetables will give an average yield. Drought on the Lower St. Lawrence and abundant rains on the Upper St. Lawrence have caused injury. Fruits fairly abbundant. The total rather medium, also corn."

Ontario—Ontario Department of Agriculture: "Actual threshings of grain show all cereals to be above their respective average yields, barley and oats especially, the former averaging nearly 33 and latter over 40 bushels per acre. Root crops also promise to be large, and but little rot of potatoes is reported. Corn has come along with a rush in August, and will likely be an average crop Patsures have kept up unusually well all summer, and the flow of milk has been in proportion. The season has been favorable for the yield of fruit, but prices are disappointing. A large acreage is being ploughed. Farm help offering was barely sufficient and wages were little if anything below last year."

### Western Provinces

Manitoba—Manitoba Department of Agriculture: "In southern Manitoba all crops cut and much threshing done. Two weeks later in northern Manitoba. Good crop in all districts. Prospects are good for average of 20 bushels wheat per acre. Recent weather showery. No frost damage slight rust. Second growth of most crop entirely hailed out June 23 will be cut and threshed." Dominion Experimental Farm, Brandon: "First half of Aug. was wet over 3 inches of rain fell. This delayed harvesting somewhat. Since then the weather has been fairly suitable for harvesting; cutting practically finished and a good start made in threshing; wheat is the best since 1915; yields good and quality No. 1."

British Columbia—British Columbia Department of Agriculture: "Beneficial showers during August greatly aided all root crops. Owing to continued drough during June and July yield will fall short of last year. Oats and wheat nearly all harvested, due to light hay crop considerable was cut green for feed. All varieties of apples being harvested in excellent condition, but the market is very unsteady and low prices prevailing."

---

## FOREST FIRES.

Serious forest fires, an unusual occurrence at this season, were reported on September 8 to the Forestry Branch, Quebec. Instructions were given by Gustave Piche, chief engineer, to take extraordinary means to prevent their extension in view of the persistent drought throughout the province. The most important ones were in the St. Maurice district and imprudence of hunters and settlers is credited as responsible for the outbreaks. "There are now about 60 small fires in progress," stated Mr. Piche, "and due to the dry weather, which is rather unusual at this time of the year, severe orders have been issued by the Department to forest rangers this evening, to enforce strictly the forest permit regulations. The losses by forest fires this year have been considerably reduced, but in addition to the favorable weather which persisted for some time, there were 40 per cent more forest rangers at work than usual, and the circulation permits have prevented many abuses."

# To Holders of Five Year 5½ per cent Canada's Victory Bonds

**Issued in 1917 and Maturing 1st December, 1922.**

---

## CONVERSION PROPOSALS

---

THE MINISTER OF FINANCE offers to holders of these bonds who desire to continue their investment in Dominion of Canada securities the privilege of exchanging the maturing bonds for new bonds bearing 5½ per cent interest, payable half yearly, of either of the following classes:—

(a) Five year bonds, dated 1st November, 1922, to mature 1st November, 1927.

(b) Ten year bonds, dated 1st November, 1922, to mature 1st November, 1932.

While the maturing bonds will carry interest to 1st December, 1922, the new bonds will commence to earn interest from 1st November, 1922, GIVING A BONUS OF A FULL MONTH'S INTEREST TO THOSE AVAILING THEMSELVES OF THE CONVERSION PRIVILEGE.

This offer is made to holders of the maturing bonds and is not open to other investors. The bonds to be issued under this proposal will be substantially of the same character as those which are maturing, except that the exemption from taxation does not apply to the new issue.

Holders of the maturing bonds who wish to avail themselves of this conversion privilege should take their bonds AS EARLY AS POSSIBLE, BUT NOT LATER THAN SEPTEMBER 30th, to a Branch of any Chartered Bank in Canada and receive in exchange an official receipt for the bonds surrendered, containing an undertaking to deliver the corresponding bonds of the new issue.

Holders of maturing fully registered bonds, interest payable by cheque from Ottawa, will receive their December 1 interest cheque as usual. Holders of coupon bonds will detach and retain the last unmatured coupon before surrendering the bond itself for conversion purposes.

The surrendered bonds will be forwarded by banks to the Minister of Finance at Ottawa, where they will be exchanged for bonds of the new issue, in fully registered, or coupon registered or coupon bearer form carrying interest payable 1st May and 1st November of each year of the duration of the loan, the first interest payment accruing and payable 1st May, 1923. Bonds of the new issue will be sent to the banks for delivery immediately after the receipt of the surrendered bonds.

The bonds of the maturing issue which are not converted under this proposal will be paid off in cash on the 1st December, 1922.

W. S. FIELDING,
Minister of Finance.

Dated at Ottawa, 8th August, 1922.

# Can Banks and Life Insurance Unite?

BY RANDOLPH S. MORTLEY

The practice of greater thrift by Canadians, always commendable ,seems particularly desirable at this period of our country's history, when owing to post-war readjustments, trade depression and the heavy deficits of our National Railways, Canada's National debt has been increased to the large sum of $2,400,000,000.

As the country grows it is natural that plans of Life Insurance, like those of other kinds of business should multiply and increase; and as such, are not to be condemned so long as they are based upon sound principles of underwriting, in the best interests of the policy holders. As most readers are aware, during the last few months some two or three Canadian life insurance companies have been co-operating with a few savings banks and trust companies in Ontario to build up "guaranteed savings insurance" accounts. The plan or system has been in operation in the United States for several years, with somewhat indifferent success, and is now reported to be slowly dying out, in the larger field, in the States. In July last the Ontario Government opened a number of savings bank offices, ostensibly for the convenience and advantage of farmers, but recently it leaked out that they too, had formed an alliance with one or more life insurance companies to create accounts for the payment of premiums on ten-year term life insurance policies. During the short time that has since elapsed, all was reported to be going well, until a few days ago when a despatch from Ottawa announced that the constitutionality of the act of the last session of the Ontario Legislature establishing a farmers' savings bank is being questioned by banking and other interests and disallowance by the Federal Government was sought. It is claimed that under the Bank Act, as well as the B.N.A., provincial banks are in violation of the law. Disallowance, however, is an extreme measure, and the matter will be looked into carefully. Apart from the legal aspect of the case there is a political consideration of the Federal Government, as regards the Provincial Government.

Following almost immediately upon this action, a protest against the movement for the co-operation of banks with the life insurance companies as above described was raised at the recent international convention of life insurance underwriters in Toronto, and a resolution was passed, asking the Ontario Government to use their influence in favor of its discontinuance.

### Deposits for Ten Years.

It may be known to many that "Guaranteed Savings Insurance," - called the "easy, safe, and convenient plan" - provides for monthly deposits in a savings bank for ten years only, by the person to be assured, the amounts differing according to age, from 15 to 60 years. At the end of 120 months if the assured has kept up the monthly deposits, he is to be paid $1,000, assuming that the Policy calls for this sum, or if he should die at any time during the ten years, his beneficiary, would receive the $1,000 cash. The contract may be terminated, howevere, at any time during that period, when the assured would be returned the amount paid in by monthly deposits, plus 4 per cent., compound interest, less the cost of carrying the risk to date. At the age of forty the monthly deposit for each $1,000 of insurance is $7.55 or a total of $906 for the ten years; and at age of forty-five the monthly deposit required is $7.70, a total of $924 to get $1,000 at the expiry of 120 months, when the contract expires.

It will be seen that this agreement differs from the ordinary Life Insurance contract in some important particulars: in the last-named contract the Policy of protection cannot be terminated except by the lapse of premium payments; the short-term policy, in most cases, expires at that period of the holder's life when probably he most needs insurance protection. He runs the imminent risk of never being able to get re-instated, and if he should be so fortunate as to do so, it would necessarily be at a considerably higher cost. Of course if he is still young enough he may be able to commute his policy at maturity to an Endowment Policy if in a good Company, at probably increased cost than if he had at first secured the more permanent form of protection, in the ordinary way. The ten or "Twenty Pay Life" Policy, too might have proved more satisfactory and secure, for the amount of the expenditure.

In discussing this form of co-operative insurance, it is noticed that Life Underwriters' Associations are inclined to divide the various plans into classes: first, the class in which the wholly dominant purpose in the plan and prospect's mind is life insurance. In this class the bank serves solely as a useful adjunct to Insurance by advising the people to systematically accumulate out of their earnings interest-bearing savings accounts for the purchase of Life Insurance, and thus be always prepared to meet the premiums as they fall due on their policies. To this proposition of mutual helpfulness between life insurance companies and savings banks, in the interests of the people, no objection can be taken.

### Decreasing Term Policy.

In another class of this combined effort to insure more citizens for the future of their families or themselves, bank savings doubtless is the wholly dominant purpose of the plan, and in the mind of the prospect. Here everything else serves only as an adjunct to the savings idea, and it all terminates at the end of ten years. Only one form of policy is used, viz; the decreasing term policy, covering the sum yet to be saved, and ending with the ten years' period. Under these special temporary policies no expert agent's advice is needed; they fill their designed purpose in the savings plan and are not useful for anything else. In this case the depositors are secured through special advertising or in conjunction with special solicitors, bank clerks or other than regular Life Insurance Salesmen. This is not life insurance work, and while it may once-in-a-while absorb a small sum that might have been paid on a life policy, its total effect is not to cut down but build up the number of good prospects for life insurance. Of course in all such enterprise the stability and character of the bank as well as of the life insurance company are essential features that must always be safeguarded.

A third, most desirable class includes all plans, for both the purposes of permanent life insurance and ten-year bank savings, neither being wholly dominant while the prospect may have either or both purposes in varying degrees. Here the regular permanent insurance policy forms chiefly on the Ordinary Life plan. are used, and at the end of ten years the Policy amount or cash value of the Insurance, plus the accumulated bank savings, is paid to the assured. There is a vulnerable side to this plan, inasmuch as it cannot be foretold how large a proportion of the policies may be surrendered. The use of the regular permanent policies, however, brings the plan into the field of the regular Life Agent, and secures to the prospect his needed expert service to fit them to his circumstances and conditions. The policy holders are always entitled to this service, ant it is in the best interests of the companies that it should invariably be rendered.

So far as it relates to Canada, this co-operative plan of guaranteed savings insurance is in the experimental stage; time and experience are needed to tell how far Life Insurance Salesmen can be advantaged by it in selling the regular permanent policies of protection, while at the same time giving their necessary counsel to prospects as to the varied uses of these policies. Meanwhile the Companies adopting it will be well advised to make "haste slowly," using due precaution against disturbing sound underwriting practices.

---

## SLIGHT CONTRACTION IN PERMITS

### July Total of Building Permits Lower Than June, But Higher Than July of Last Year

The value of the building permits issued during July showed a slight contraction as compared with June, though the total was considerably higher than for the same month of last year. The 56 cities reporting authorized building to the value of $14,275,036, as compared with $15,799,680 in the preceding month and with $10,182,125 in July, 1921. There was, therefore, a decrease of $1,524,654, or 9.6 per cent. in the former and an increase of $4,092,901, or 40.2 per cent. in the latter comparison.

Prince Edward Island and Alberta were the only provinces to record gains as compared with June. In the latter, the increase, which amounted to $59,365, or 14 per cent., was chiefly due to contemplated activity in Calgary. Of the declines in the other districts, that of $683,725, or 8.5 per cent. in Ontario was the largest actual loss, while the greatest percentage decrease occurred in Saskatchewan, where the value of the permits issued showed a falling off of $309,083, or 43.5 per cent.

As compared with the returns for July, 1921, all provinces except Manitoba and Saskatchewan registered expansion in the value of the building authorized. The decreases in those districts were small, standing at 5.2 and 1.8 per cent., respectively. The gain in Ontario of $2,462,591, or 50.7 per cent., and in Quebec of $1,034,977 or 41.1 per cent., were the most noteworthy. The increases in Alberta, British Columbia and New Brunswick also were considerable.

The following is a comparison of the value of building permits issued during July, 1922, June, 1922. and July, 1921:

**Estimated Cost of Building Work as Indicated by Building Permits**

## NEW RATINGS FOR VANCOUVER.

### Will Shortly be Announced by Fire Underwriters — Meeting of Metropolitan Life Agents.

(Special to the Monetary Times)

Vancouver, Sept. 20.—The new schedule system of fire insurance rating for the business sections of Vancouver will be put into operation and new rates announced shortly, according to the B. C. Fire Underwriters' Association. Secretary John L. Noble explained the details of the new schedule at a special luncheon meeting of the Vancouver Fire Insurance Agents' Association on Tuesday attended by the majority of Vancouver agents. The work of reinspection has been under way for some time by board surveyors and it is expected that a substantial reduction in rates on mercantile risks will generally be the result, except in some risks where an actual increase in the hazard has arisen since last inspection. Owing to the many inconsistencies that have crept into the rating methods of the past. the Board decided not to make a flat reduction over all risks, as it was felt that this would only accentuate the anomalies which now exist and would lead to further dissatisfaction on the part of insuring property owners. Hence the reinspection of the whole mercantile section of Vancouver. This decision has caused delay but was considered by the Underwriters to be in the best interests of the public.

An effort will be made by the shipping bureau and the civic bureau of the Vancouver Board of Trade to get a fire boat for the harbor. A joint luncheon of the two bureaus will be held in the near future at which the Harbor Commissioners will be invited to give their views on what was proposed and needed in fire fighting equipment on the harbor.

The Metropolitan Life Insurance Company held a successful convention of British Columbia field representatives in Vancouver on September 7. The convention concluded with a banquet in the evening at which Haley Fisk, president of the company, acted as toastmaster and besides the field representatives of the company, the invited guests included Dominion, provincial and municipal government officials and heads of financial institutions, bankers and prominent business men. Amongst the other company officials present were: F. O. Ayres, R. L. Cox, Dr. L. K. Frankel, J. E. Kavanaugh, all vice-presidents and W. J. Tully, general solicitor. The Pacific Coast heads in attendance included E. H. Wilks, R. L. De Bolt, E. B. Ransehousen, and Miss Alice C. Bagley, supervisor of nursing service. The banquet arrangements were in the hands of Leslie D. Unger, Vancouver manager.

## BLUE GOOSE

The Quebec Pond of the Blue Goose at a meeting on August 28 elected the following new officers for the term of 1922-1923:—

(Mike Citulski) Montreal, $20,000; Municipal Realties, Ltd. (Chas. E. Taschereau) Quebec, $90,000; First Church of Christ, Scientist, Westmount. P.Q. (John L. Morrell) Westmount, $100,000; Villeray Cut Stone, Ltd. (Chas. J. E. Charbonneau) Montreal, $20,000; E. G. Vroom Co. Ltd. (Edwin G. Vroom) St. Lambert, $1,000.

## *New Industries*

The city of Guelph, Ont., has secured a new industry known as the Gilson Manufacturing Company, makers of warm air furnaces.

A new industry known as the Manganese and Steel Foundry, Limited, has been established at Sherbrooke, Que., where they are engaged in the manufacture of castings. The furnace is capable of handling one ton of steel at a heat, and three heats can be run in a day. The company has sufficient orders on hand to keep operating at capacity for some time.

A new company trading under the name of the Walker Company has been organized in St. Thomas, Ont., by several local men. The company will manufacture a liquid glass finish.

The town of Tillsonburg, Ont. has completed final arrangements with a fire engine and tractor company to build a factory in that town, providing that $25,000 of preferred stock of the company is disposed of in the town. Arrangements are also being made with another company from Michigan to start a branch factory for a staple article if given a building 100 by 50, the company having the necessary capital for machinery and equipment.

The Keystone Watch Company, of New York are contemplating the erection of a six-storey building in Toronto to be used as a factory and distributing a centre for the Canadian market.

## COBALT ORE SHIPMENTS

The following were the shipments of ore from Cobalt Station for the week ended September 15th:—Mining Corp. of Canada, 470,081; Nipissing Mining Co. 519,430; Dominion Reduction Co. 85,000; total, 1,074,511. The total since January 1st is 9,162,828 pounds or 4,581.4 tons.

## WILL NOT CUT WAGES.

A general reduction in the wages of Canadian cotton mill operatives is not expected in view of the developments in the New England States, where these plants which reduced wages last February are restoring the old rate, thus ending prolonged strikes in many centres.

At the annual meeting of a big Canadian cotton concern the president said that it depended on the outcome in New England whether the mills of his company would cut pay. As 100,000 operatives in New England have won their point, it is presumed that a cut in Canada will not be necessary to meet the competing mill schedule across the line.

## IMPERIAL AID FOR STEEL INDUSTRY.

### Basis of Which Assistance For Plant Will Be Forthcoming.

According to a cable which Premier Oliver received on September 6, from Agent-General F. C. Wade at London, England, a guarantee of one-third of the bonds of the Coast Range Steel Co., commencing operations in British Columbia, on conditions that the Province and the Dominion are satisfied with the commercial aspects of the scheme, and, after a full investigation, would do likewise, will be given by the Facilities Committee of the Imperial Board of Trade.

This information was in response to a request from Premier Oliver for information as to just what the Imperial authorities are prepared to do and was sent in consequence of assurances given to the provincial government by the promoters behind the Coast Range Steel Company that the Imperial and Dominion authorities would come forward with guarantees of one-third of the bonds of the proposed iron and steel industry and that with the province's aid the flotation of the enterprise was assured.

Having received the above assurances from London, Premier Oliver will now get into touch with the Federal Government to ascertain just how far the latter is prepared to go.

Already the province, basing its action upon the assurances that Dominion and Imperial support would be forthcoming, has promised to do its share upon its being shown that the claims of the promoters are substantiated as to aid and that, after full investigation of all phases by experts, the project is one that can reasonably be supposed to be successful. So far the province, the Premier explains, has committed itself to nothing. "I am considering every phase of the matter step by step," stated the Premier.

## IRON AND STEEL EMPLOYMENT.

### July Employment Report Shows 8 Per Cent. Increase Over June.

As the July report of the production of iron and steel in Canada contained the statement that the production showed an increase of 10.2 per cent., over the record for June, it is not surprising that the employment situation also shows a substantial increase.

### July Report.

As mentioned previously, says the July report of the Employment Service of Canada, the volume of employment in this group increased considerably during July, mainly on account of the resumption of operations in several of the railway car shops, which have been temporarily closed down at the end of June. In addition, noteworthy improvement was recorded in the crude, rolled and forged division, supplemented by increases in employment on a smaller scale in boiler, engine and hardware factories and in the production of structural iron and steel. On the other hand, steel shipyards were decidedly less fully employed. All provinces except British Columbia shared in the upward movement, but the expansion in Ontario was more pronounced than elsewhere. The 730 concerns making returns reported 110,130 persons on their payrolls as compared with 102,105 on June 30. There was, therefore, an increase of 8,025 persons or almost 8 per cent. Increased activity on a much smaller scale had been indicated in this group during July of last year, but the index numbers for the two periods were approximately the same.

## LAND PRICES DECLINE

Canadian Northern Prairie Lands Co. sold 160 acres during the month of July at an average of $15 per acre. The selling price of land has shown a steady decline during the early part of the year, sales in January and February being effected at $20 and $20.25 per acre, and in April at $18.07. The total acreage sold in the first seven months amounted to 965.03 acres, as compared with total sales during the year 1921 of 304.13 acres, which sold at an average rate of $16.27 per acre.

# Decline in Wholesale Prices

### August Returns Show Continuance of Movement, Index Number Being 222.8 Compared With 225.3 For July — Advance in Price of Coal Is Recorded

The index number of commodities during August, as compiled by the Department of Labor, showed a decline of about 3 points from the previous month. The index number during the current month stood at 222.8 as compared with 225.3 in July and 236.4 in August, 1921.

Decreases during the month were fairly general throughout the household necessity list, there being a decrease of twenty-six points in "other foods," and a decrease of eighteen points in animals and meats. Grains and fodders were also lower by seventeen points from the previous month.

Due to the continuation of the coal strike in the United States, and the scarcity of that commodity, the index number shows a considerable increase over July, being up forty-seven points. The August index number of that commodity is over one hundred points higher than last year.

Details of the August statement with comparisons are given herewith:

**INDEX NUMBERS OF WHOLESALE PRICES BY GROUPS OF COMMODITIES**

for August, 1922, July, 1922, August 1921, 1920, 1913
(Average prices 1890-1899—100)

a Number of commodities varies from month to month.

# Mining Production Increased

### Ontario Output for First Six Months is Higher, Due to Activity in Gold and Silver Properties—Very Little Metallic Nickel Produced, But Oxides Show Increase

Returns received by the Ontario Department of Mines from the metalliferous mines, smelters and refining works of the province for the six months ending June 30th, 1922, are tabulated below. For purposes of comparison the quantities and values are given for the corresponding period in 1921. Tons throughout are net tons of 2,000 pounds.

**Summary of Metalliferous Production—First Half of 1922**

| Product | | Quantity 6 mos.<br>1922 | 1921 | Value $ 6 mos.<br>1922 | 1921 |
|---|---|---|---|---|---|
| Gold | ounces | 476,338 | 286,018 | 9,845,910 | 5,761,504 |

## OPERATIONS HAMPERED

### Chemical Products Co. Progress Outlined.

In a letter to the shareholders of Chemical Products, Ltd., D. M. Sanson, president, outlines the progress made in the financing arrangements and the extent of industrial operations to date. He points out that, through the default of one group of underwriters on their undertaking, the board of directors has been grappling with the problem of obtaining payment of these monies. With regard to the company's operations, he adds that, through funds not being provided as undertaken by the underwriters in default, the company was not able to obtain a line of credit with the banks, and operations were very seriously hampered. In addition, a period of trade depression was entered some eighteen months ago, and the process of recovery has been slow.

### Conserve Resources.

"Under trade conditions, as they existed," Mr. Sanson writes, "we thought it best that we should proceed slowly in order to conserve our resources. The American manufacturers of acid phosphate, having enormous stocks on hand, in some instances were forced to write large amounts off their inventories, and they proceeded to dump their acid phosphate at practically any price they could get. We believe we are at the bottom of the market, as the large stocks carried over by the United States producers are about cleaned up, and products generally are now slightly on the up-grade, but we are frank to admit that we have, in our opinion, some way to go yet before we get back to normal."

### Stock Disposed Of.

"We have disposed of all sulphuric acid that we had in stock, and we are now asked to quote on many thousands of tons, but we shall have to proceed slowly in this connection. We have closed contracts for several thousand tons of fertilizer, and for several thousand tons of acid phosphate for fall and spring delivery."

---

## FORD COMPANY BUYS

The Ford Motor Car Company has purchased fifteen acres of land from the Grand Trunk Railway on the eastern border of Toronto, for $175,000, and will erect thereon a one-storey car-assembling plant, having 150,000 feet of floor space. This is the first property in Toronto or its vicinity sold by the Grand Trunk for more than forty years. This particular property has been owned by the railway for 36 years.

# *Municipal Finance*

**Winnipeg, Man.**—At a meeting of the housing commission on September 7, it was stated that a total of 584 houses have been built or are under way, and of this number, 502 are now being paid off. Only five loans are in arrears. Repayments for the month of August totalled $17,384.

**Brantford, Ont.**—At a meeting of the council on September 11, A. K. Bunnell, city treasurer, presented a statement of the city's finances for the period from January 1 to August 31. The statement showed that receipts amounted to $704.962, which included taxes of $611.683. Expenditures for the period totalled $670,677, out of an estimated total of $1,303,023 for the year. Tax arrears amount to $36,115.

**Vancouver B.C.**—A total of $4,021,130 was paid in at the city treasurer's office during the month of August, according to figures given out at the city hall. Of that amount the sum of $3,713,717 was paid in lieu of current taxes, or taxes due this year, while the balance, $307,413 represented the total amount paid in on arrears dating back to 1917.

**Hamilton, Ont.**—According to J. P. McLeod, assessment commissioner, the total actual value of land and buildings for 1922 is now $135.702,290, as compared with $130,801,950 in 1921, an increase of $4,900,340.

A substantial increase is also evident in the comparative figures of 1922 and 1921 in taxable real property. This year the value of such property is totalled at $117,662,860, whereas last year it was appraised at $113,608,110. Actual land values have soared to the extent of $1,197,350 during the course of the year, last year's computation being $53.274,300 as compared with the 1922 valuation of $54.471,650. To an even still greater extent have actual building values taken a jump since last year, the report showing an approximation of $81,230,640 for this year in comparison with $77,527,650 in 1921, indicating an increase of $3,702,990.

The increase in taxable value of land has practically kept pace with the increase in actual land values. Last year an appraisement of $45,811,350 was placed on taxable lands, whereas this year the department has approximated the value at $46,787,460, marking an increase of $976, 110. The taxable value of buildings has rocketed $3,078,640 since last year—1922 figures being $70,875,400 and the 1921 assessment being $67,796,760.

The comparative totals of taxable real property, business assessment and taxable income mark an increase of $4,939,700 over last year. The assessment in 1922 was $140,854,340 as against the 1921 assessment of $135,914,640.

In business assessment, this year's figures are much higher than those of 1921. The department levied $13,390,240 this year, as compared with an assessment for this purpose of $12,344,930, in 1921, showing an increase of $1,045,310.

The large decrease of $754,500 on business assessment exemptions was explained by the Commissioner as being due to the fact that the International Harvester Company, which formerly enjoyed a fixed assessment of $19,000, is this year compelled to pay the regular rate. Business assessment exemptions last year were $940,500 whereas this year the report shows only a total of $186,000. It was pointed out by Mr. McLeod that the International Harvester Company is responsible for the very evident decrease in exemptions in this instance.

The amount of taxable incomes has also suffered a decrease during the year. Last year assessable salaries totalled $9.961,600, as compared with 1922 figures of $9,801.240, marking a falling off of $160,360.

Real property exempt or liable for local improvement only totalled $18,038,240, as compared with the total of last year amounting to $16,785,240, marking an increase of $1,254,190. In this connection exemptions on land increased from $7,365,580 to $7,684,190. Exemptions on buildings increased from $9,419,660 to $10,355,240.

**Outremont Que.**—The city's budget for 1922 as presented to the council on September 13 calls for an appropriation of $533,650 from an estimated income of $534,000. The expenditure was $468,250 in 1922. The taxes in the city will remain the same as at preseut.

The chief appropriations are: $2,455,150 for loan charges; $119,000 for public works, $63,000 for police and fire department; $243,000 for general government, and $5,000 for the Metropolitan Commission. The estimated revenue is $243,000, from the general taxes, $24,000 from lighting taxes, $70,009 from police and fire taxes, and $47,000 from sundry interest.

**Mitchell, Ont**—The tax rate for the coming year was struck at 39 mills on the dollar, appropriated as follows: high and public schools 15.5 mills; county rate, 4.3 mills; debenture rate 6.4 mills; public improvement and general expenditure, 12.8 mills.

The revised assessment is now $1,005 463, which with a tax rate of 39 mills, will raise $39,445 for the expenditures of the town.

**Winnipeg, Man.**—For the period ending September 8 a total of $7,099,002 in taxes had been collected as compared with $6,183,109 for the same period last year.

Scarborough Township, Ont.—The half yearly statement for the period from January 1 to June 30 of receipts and expenditures showed that receipts, including taxes of $45,353, tax arrears of $6,642 amounted to $226.169. Expenditures amounted to $226,169, including bank overdraft of $112,935.

**Brandon, Man.**—The real property tax collection for the period ending August 31 was approximately $293,000, which is about half the amount expected for the year.

**Port Dover, Ont.**—The tax rate for the current year has been struck at 38 mills on the dollar, an increase of three mills over last year's rate.

**Saanich, B. C.**—At a recent tax sale the total charge against the land was $28,105, and the total receipts amounted to $13,270. Lands against which there is a total of $14,835 in charges reverted to the municipality.

## GRAND TRUNK OFFICIALS RESIGN

R. S. Logan, vice-president in charge of land tax and claims, and A. B. Atwater, assistant to the president, on the lines west of Detroit and St. Clair Rivers, have retired from active service with the Grand Trunk Railway system. At the meeting of the board of directors of the system held in Montreal on September 11 and at which Sir Joseph Flavelle presided, both the president and W. D. Robb, vice-president and general manager, announced the receipt of the resignations. Both will retire on September 30 on superannuation.

Mr. Logan, who has a railway service of 37 years, has been in the employ of the Grand Trunk system for the past 26 years and has been a vice-president of the company since 1911. He has seen service with the Wabash, St. Louis and Pacific Railway and was later vice-president and general manager of the Central Vermont.

Mr. Atwater has ha d a varied and lengthy career, particularly on American lines, where he entered as a railway clerk. After serving in a number of official positions on smaller Canadian lines, he became chief engineer of the Chicago and Grand Trunk Railway, being later promoted to be superintendent of the Grand Trunk lines west of Detroit and St. Clair Rivers. In July 1898, he became assistant general superintendent of the Michigan Central Railroad, resigning in 1902 to assume the post he now vacates.

## GRAND TRUNK CHANGES.

Further changes in the administrative personnel of the Grand Trunk Railway system are announced as follows in a circular issued by W. D. Robb, vice-president and general manager.

W. C. Chisholm, K.C., general solicitor, assumes jurisdiction over the Department of Land, Tax and Claims, formerly in charge of R. S. Logan. The office held by Logan is abolished.

The property commissioner will handle all matters connected with the sale and leasing of the company's lands.

The following new appointments are made: J. P. Pratt, assistant general solicitor; E. B. Donald, solicitor land and taxation division; H. A. Palmer, property commissioner. T. W. R. McCrae continues as chief claims agent.

## ONTARIO PROFITS FROM RACING

### Daily Tax and Tax on Wagers Will Bring Government About Three Million in Taxes

Wagers on horse racing in Ontario this year have totalled $36,882,244, according to returns made for purposes of taxation. The Ontario Government's profit from race tracks this year will, it is estimated reach $3,036,212.

The revenue wager tax will be about $2,226,212.

The daily impost tax on race tracks will total $770,000.

The Government by its amendment to the Corporations Tax Act last session placed an impost of 5 per cent. on all winning wagers at race tracks, and passed legislation compelling the mile tracks to pay a standard daily tax of $7,500 a day for each day's racing, and the half-mile tracks a similar tax of $2,500. With the exception of three fall meets that have not as yet been run, the figures are official. The Thorncliffe fall returns are not yet complete, and Woodbine and Kenilworth have not as yet, held their autumn racing.

There are seven mile tracks, each running 14 days of racing in the year at $7,500 per day, and one track with 14 days racing at $2,500 per day. Thus the $770,000 from impost.Dufferin Park is a half mile track.

The official (except where designated "estimated") figures on the wager tax revenue are:

| | Amt. Wagered | Tax Col. |
|---|---|---|
| **Ontario Jockey Club** | | |
| Spring meet.... .... .. | $4,365,802 | $218.290 |
| Fall (est).... .... .... .... ...... | | 200,000 |
| **Thorncliffe** | | |
| Spring Meet.... .. .... | $3,418,310 | $170.915 |
| Fall (est).... .. .... ........ | | 100.000 |
| **Hamilton Jockey Club** | | |
| Spring meet .... .... | $2,831,824 | $141.591 |
| Fall meeting .... .... | 2,873,999 | 143.699 |
| **Niagara Racing Association** | | |
| Spring Meet .. ....... | $2,572,753 | $128,637 |
| Fall meeting .... .... | 2,780,780 | 139,039 |
| **Dufferin Park** | | |
| Spring meet.... .... .. | $2,637,310 | $131.865 |
| Fall meeting.... .. .. | 1,962,104 | 98,105 |
| **Devonshire Park** | | |
| Spring meet.... ...... | $2,356,319 | $112,815 |
| Fall meeting.... ..... | 2,007,414 | 100,370 |
| **Windsor Jockey Club** | | |
| Spring meet.... ...... | $3,387,851 | $169,392 |
| Fall meeting.... ..... | 2,650,617 | 132,530 |
| **Kenilworth Jockey Club** | | |
| Spring meet .... ...... | $2,979,161 | $148,958 |
| Fall (est).... .. .. ........... | | 130,000 |

It will be noticed that the sum of $218,290 is included as tax on the Woodbine spring meeting, which was ordered by the courts to be paid over to the Government.

## B.C. REVENUE FROM RACES

Race track fans in British Columbia bet $4,058,865 through the pare-mutuel machines during the four weeks of racing at the two Vancouver race tracks—Brighouse and Hastings—according to figures compiled by Hon. John Hart, Minister of Finance,, and announced on September 14th. The Government through its five per cent. tax on all regularly placed bets, collected $205,795. Cost of collecting this tax amounted to $12,999. The remainder, $192,796, was divided by the Government among the municipalities of the Province according to population.

## NEW APPRAISAL BUREAU.

Charles Gagnon, Quebec, for the past twenty years engaged in the fire insurance business, announces the opening of an appraisal bureau, at 84 St. Peter St., Quebec. Mr. Gagnon will make a specialty of claim adjustments and valuations of buildings for the purpose of the co-insurance clause. He is well-known to various insurance companies.

## ROYAL BANK OFFICIALS ON VISIT.

E. L. Pease, managing director of the Royal Bank of Canada, accompanied by C. S. Wilcox and A. E. Dyment, directors; L. N. Hillary, supervisor of Ontario branches, and D. C. Rea, manager of the Toronto branch are visiting the Ontario branches of the bank.

## USE CANADIAN SEAPORTS

### Maritime Board of Trade Hold Annual Convention

The annual convention of the Maritime Board of Trade was held in St. John, N.B. on September 7 and there it was decided to employ the services of a permanent secretary with the assistance of the provincial governments of the Maritime provinces.

A per capita assessment also will be made on the various boards throughout the provinces to maintain this new office.

Capt. J. E. Masters, of Moncton, a former president of the Maritime Board, was elected president tor the ensuing year, with G. Fred Pearson, of Halifax, and Wallace L. Higgins, of Charlottetown, as vice-presidents.

Favorable action was taken on resolutions dealing with the establishment of a research bureau, and the utilization of Canadian seaports for Canadian trade. The board will exert its influence with the Department of Railways to change the system of handling automobiles on the car ferry to Prince Edward Island and also with the express companies to secure a rate for the Island fishermen as low as that granted from Halifax and Sydney to points west of Montreal.

Various matters pertaining to immigration and colonization were also discussed.

## WINNIPEG HYDRO-ELECTRIC

Through the courtesy of J. G. Glassco, the manager of the Winnipeg Hydro Electric System, we have received a copy of booklet recently issued with the object of illustrating and describing the power plant and lines. The first pages of the brochure is devoted to a history and description of the plant by Mr. Glassco himself, in which the particular features of construction as well as financial problems connected with the plant are given.

E. V. Caton, chief engineer, goes into a very careful and interesting detailed description of the plant itself dealing with the power house. the generating units, transmission lines and such other phases of the system as will be of more particular interest to the technically trained man. A re-capitulation of the annual statements shows that since the year 1913 to the present time, there has been a gradual increase in the total assets, total reserves, gross earnings, total expenses, number of customers and units generated. Only in the years 1913 and 1921 was there a decrease in yearly surplus.

## REDUCE STUMPAGE RATE

A temporary reduction in stumpage has been announced by the minister of lands and mines of New Brunswick, Hon. C. W. Robinson. It is to go into effect for the current year and end August 1, 1923. The rates show a reduction of approximately twenty per cent., on fir and thirty per cent., on railroad ties. Spool wood and hardwood logs remain as before at $2.00 and $1.25 respectively. Budworm killed timber and fire killed timber were reduced fifty percent.

The minister said that the reduction was only temporary and by no means permanent, as it was expected that lumber values would increase and the market show an improvement.

# Government and Municipal Bonds

With news from Europe that in all probability the world was again to be plunged in war, the government and municipal bond market underwent a somewhat sudden change of front and prices showed an inclination to weaken.

However, this situation was only temporary, and with the news that the allied powers have come to some agreement regarding the Balkan States and Turkey, the market showed a rapid recovery to its previous position. Prices again became firm and present indications point to a further rise in quotations.

It was rather disappointing to the bond dealers, from the financial point of view, that such a course, as taken by Great Britain in order to impress the Turks that discretion is the better part of valor. was necessary, as the market was all set for an active fall session. Indications pointed to heavy borrowing by several of the provinces, and also a number of municipalities had plans for financing their requirements. These plans, of course, have been laid aside until such time as conditions are more settled.

In view of the events during the week it was only natural that Ontario would postpone all tenders for the ten million issue, for which tenders were to be called up to September 19. In conversation with J. G. L. Jones, secretary to the provincial treasurer "The Monetary Times" was informed that should conditions in the bond market continue as at present, the province will, in all probability, call for tenders some time during next week, or perhaps during the proceeding week. Had the province accepted tenders as when called for they would have had. in all probability, to pay in the neighborhood of 5.50 per cent.. for their 5 per cent., bonds. This would have meant an excessive cost to the province, as had conditions been normal, the bonds could have been sold at a cost basis of from 5 to 5.20 per cent.

Notwithstanding present conditions bond sales during the week were fairly heavy and competition for the issues continued strong. The city of Quebec and the Kitchener issues created considerable interest and tenders for both these issues showed spirited bidding.

### Tenders Invited.

The followng is a list of debentures offered for sale, particulars of which are given in this or previous issues:

| Borrower | Amount | Tenders close |
|---|---|---|
| Three Rivers, Que. .. .... | $460,000 | Sept. 29 |
| North Vancouver, B.C. .... | 180,000 | Sept. 25 |
| Pointe Claire, Que. .. .. | 100,000 | Oct. 10 |
| Coaticook, Que. .... .... | 40,000 | Oct. 9 |
| St. Bernardin-de-Montreal, Que. ...... .... ..... .. | 36,000 | Oct. 2 |
| Acton-Vale, Que. .. .. .. | 18,900 | Oct. 3 |
| St. Joseph, Que. .... ... | 8,000 | Sept. 30 |
| Windsor, N.S. .... ..... | 35,000 | Sept. 23 |
| Hamilton, Ont. .... .... | 500.000 | Sept. 29 |
| Stormont, Dundas and Glengarry ...... .... | 150,000 | Sept. 29 |

## MINING PRODUCTS

(Continued from page 20)

Gold production for the first half of 1922 shows a marked increase over any similar period and gives promise of an output exceeding $20,000,000 for the full year as compared with $14,624,085 in 1921.

Porcupine, Kirkland Lake and newer gold areas are attracting the attention of the mining and investing public not only in Canada but throughout America and Great Britain. The Hollinger Consolidated has established its reputation as one of the greatest gold mines of the world. At present the milling capacity is 4,300 tons daily. When additional hydro-electric power is available the ore treated will be increased from 4,300 to 7,000 tons daily. The McIntyre mine has increased its milling capacity 500 tons per day beginning this month, and is sinking the central shaft to a depth of 2,500 feet. The Dome shaft has been stopped temporarily at a depth of 1,634 feet and a crusher station is being placed on the 12th level (1,450 feet). Producing mines at Porcupine and Kirkland Lake have a combined daily milling capacity at present of 7,000 tons approximately.

For 1921 the exchange premium averaged 11.61 per cent. By the end of August, 1922, Canada's currency had reached par. The exchange really amounted to a bonus for the gold mining industry. Canada is the first combatant country suffering currency depreciation as a result of the Great War to get back to normal.

### Silver

Silver production shows an increase over the corresponding period in 1921. Since the end of June the McKinley-Darragh and Dominion Reduction Company have been operating their mills. South Lorrain is attracting attention owing to the satisfactory developments on the Keeley and Frontier properties. Some very fine show samples of leaf silver have been found recently on the Frontier. The Castle mine at Gowganda is also meeting with encouraging results.

The average New York price for the period was 67.34 cents per ounce as compared with 59.9 cents in 1921 and $1.17 in 1920. Shipments over the T. & N. O. Railway from Cobalt of ore and concentrates totalled 474 tons to Ontario and 385 tons to points in the United States. Mines shipping over 200,000 ounces are given in order: Nipissing, 2,167,265; Mining Coroporation of Canada, 701,891; Conigas, 647,544; O'Brien, 539,768; Keeley, 298,806; La Rose, 244,224. A summary of output is given hereunder:

| | | |
|---|---|---|
| Shipments from Cobalt, South Lorrain and Gowganda ............ | 1,697,335 | $3,219,326 |
| Recovery from gold ores | 76,105 | 53,281 |
| Recovery from nickel-copper refining ....... | 926 | 637 |
| | 1,774,666 | $3,273,247 |

Refineries: The Coniagas plant at Thorold has been overhauled, the process changed and the company reorganized under the name of The Coniagas Alkali & Reduction Company, Limited. The new company did not receive any shipments for treatment during the period but marketed materials on hand. No residues were received by Southern Ontaio smelters during the half year, but subsequently, owing to reduced freight rates, shipments have been made both to Thorold and to the Deloro Smelting and Refining Company, Limited, at Deloro. Ontario Smelters and Refiners, Limited, with plant at Welland, went into the receivership of the Trusts and Guarantee Company of Toronto on May 30th.

**Will You Need Cash A Few Years Hence?**

If you are likely to require the use of your capital in a few years' time, invest in bonds of substantial Ontario Municipalities maturing within say two to six years.

Trustees desirous of having funds available to advance the interests of beneficiaries—parents and guardians faced with the providing of heavy educational expenses—for all of these, short term municipal bonds are an exceptionally desirable security.

# *Stock Markets*

The effect that the declaration of war, or rumors of approaching wars will have on the security markets, was clearly demonstrated on the Canadian and New York exchanges during last week, when there was a precipitation of a heavy liquidation in all kinds of stocks. Stock holders were clearly alarmed over the prospect of another war and all the unsettlement to securities which such events involve.

There is one consolation, however, and that is that the market did not take the same trend as it did eight years ago. when as a result of the European situation and other disturbing factors, the international stock markets collapsed. In London, Vienna, Paris, Berlin, New York, Montreal and Toronto, and other points, stock and grain markets became demoralized. Everybody wanted to sell stocks and their prices slid down at a record rate. Wheat prices went up. Canadian Pacific stock ,which suffered in all markets more than any, declined twenty points in one day. On July 28 the two Canadian exchanges followed the example set by the Vienna Bourse during the previous week, and closed their doors until further notice. Montreal did this after the morning session and Toronto closed fourteen minutes after the afternoon session had commenced. The action was required to prevent "the ruination of market values," and had been defended by the stock exchange officials and bankers.

### Market Shows Strength

That the war will be of short duration, or that the war clouds which hover over the Near East will be blown away, seems to be the view which the stock markets are taking in this regard. The break in prices over the week end was of a pronounced nature and heavy liquidation was the order of the day, with total transaction on Monday reaching a total of forty-five thousand shares, the highest record for a single day for some time past. However towards the latter part of the week under review there was a noticeable strengthening in most of the securities, although they will have to show further strengthening in order to equal their former quotations. The opinion amongst some of the financial men is that peace parleys will stave off the war, or failing that, should war be declared, it will be of short duration and the world will again try to settle down and reconstruct the parts which were devastated by the previous war. Latest advices from Europe tend to show that the war scare is dying down, and this situation is being reflected on the Canadian exchanges where gains are exceeding the losses. The gains in most cases range from fractional to three to five points, and in some exceptional instances to more than five points.

An issue of $400.000. 7 per cent. cumulative preferred shares of Bird & Sons, Ltd., was listed on the Toronto Stock Exchange on September 14. The par value of the stock is $100.

### Toronto Milling Co.

An issue of $250,000, 8 per cent, cumulative preferred stock of the Toronto Milling Co., is being offered by Stewart, McNair, Reid & Co., Toronto. at a price of $100. per share, with a bonus of one share of common stock per value $25.

The capitalization of the company comprises $35,000. 6 ¾ per cent. bonds maturing October 1st, 1924; $250,000 preferred stock; and $67,500 common stock. There is an amount of $82,500 held by the trustees in trust for the company.

The mill is located at Streetsville, Ont., and is engaged in the business of milling for both domestic and foreign markets. The flour mill has a capacity of 750 barrels per day, and the feed mill has a present capacity of 25 tons per day. Both these mills have ample space to double their capacity. The warehouse has sufficient space for 30 cars of flour, and the grain storage tanks will hold 100,000 bushels.

Directors of the company are as follows: F. L. Culver, president; F. D. Mercer, vice-president; W. M. Alexander. secretary-treasurer; and F. C. Finkenstaedt, Wm. Stewart, B. Neilly and J. F. Stewart directors.

### Bond Issue

H. C. Monk, & Co., of Ottawa are offering $100,000, 7 per cent. 20-year sinking fund first closed mortgage bonds of Grant-Holden-Graham Ltd., Ottawa at a price to yield 7 per cent.

The company has a plant at Ottawa, and one at Vancocver where they manufacture an extensive line of tents, awnings, clothing, lumbermen's and contractor's supplies. The Ottawa factory is a six-storey building of brick and cement with steel reinforcements, and is thoroughly up-to-date with a fire sprinkler system throughout. The company's plant at Vancouver is constructed along the same lines as the Ottawa plant, but is considerably smaller.

The directors of the company are: S. S. Holden, president; A. J. Hendrie, vice-president; George D. Kelly, D. H. McAndrew, and H. C. Monk.

## INVESTMENT FIRM

T. A. Richardson, formerly of Richardson, Sheppard and Co., and J. G. Singer, of W. A. Mackenzie and Co., have organized a new company under the name of Richardson, Singer and Co., to carry on the business of Richardson, Sheppard and Co., as dealers in government, municipal and corporation bonds, with office in Toronto.

## BROKER IS ACCUSED.

Norris P. Bryant of Bryant Bros., Limited, 84-86 St. Francoix Xavier street, Montreal, was arrested on September 14th, on a warrant issued on the information and complaint of Willard Elmer Brunson, manager of Logan & Bryan of Montreal.

The information sets forth fifteen separate charges for counselling and procuring John H. Roberts to publish defamatory libels against the members of the firm of Logan & Bryan, in Robert's paper, and also fifteen separate charges for aiding and abetting John H. Roberts in commission of the offense of publishing the libels.

Bryant was brought before Judge Cusson of the Court of Sessions of Peace and released on his personal bail in the sum of $1,500, to appear on September 20.

## NEW STANDARD MEMBERS

Two new members have been elected to the Standard Stock and Mining Exchange, Toronto. The new members are S. W. Gooderham and J. F. H. Ussher. This makes three new members within a short time, Fred. M. Fisher having been recently added. Both Mr. Ussher and Mr. Fisher were former members of the Exchange.

## OPEN MONTREAL OFFICE

Miller & Co., members of the New York Stock Exchange, announce that in order to afford a more complete service in the Canadian markets, the firm is opening a branch office in the Guardian Building, 160 St. James Street, Montreal, Canada. Direct communication will be maintained between Toronto, Montreal and the New York Office from which point the principal American markets are reached over the private wire system of Miller & Company.

## NEW COMPANY

A new company trading under the name of Chambers, Dixon & Co., has recently been formed to transact a general stock brokerage business, with offices at 502 Kent Bldg., Toronto.

The members of the firm are W. T. Chambers, who has had many years of experience in trading in mining shares; J. H. Dixon, who is interested in mining properties; Wm. Meen who is interested in the development of mineral properties; and B. S. Sheldon, who will have charge of the financial end of the business, has for the past twenty years been active in banking and financial circles.

In addition to their regular business of trading in the various mining and other securities, the company will underwrite and finance legitimate mining properties.

## MOVE OFFICES.

Waghorn, Gwynn & Co. Ltd., have removed their offices from 300 Pender St. W., to 517 Granville St., Vancouver.

# *Unlisted Securities*

In their comment on the unlisted market, A. J. Pattison Jr., & Co. say that steady advance in the market continued during the week just passed. The demand for investment issues continues to force prices slowly but steadily higher. It is worthy of note that the more active issues held their own or moved up, not one case being recorded of a decline. The anticipated reaction shows no sign of materializing, in fact every indication points to still higher quotations. It is quite apparent from the movements of some issues that the public are endeavoring to buy reliable dividend payers on a comparative yield basis. This was demonstrated qulte clearly during the last week in Nova Scotia Steel 6 % Debentures, which for some time held around 84-86. During the period just closed they moved to 87-89, with but few Debentures changing hands.

Howard Smith Paper 7's gained ½ point to 97-98. Spanish River 8's also moved up slightly to 103½-104. Ontario Pulp 6's record a 2 point advance to 103½-104½. Brompton 8's were in steady demand at 102 with no bonds offering. Imperial Oil showed improvement at 113-115, while International Petroleum was exceedinlg dull at 22½-22¾. Steady buying of Durant Motors moved the stock up one point to 10¼-11¼, a number of shares changing hands between these figures. Cockshutt Plow moved to 49 bid. this up 2½ points without changing hands. At the close, the only offering obtainable was at 51. Robert Simpson showed continued strength at 87-88, some stock changing hands between these figures. Whalen debentures recorded an advance of one point to 66 bid, with none offered. Dominion Iron and Steel 5's were bid up to 81½, without changing hands. Home and Sterling Bank both continued in steady demand at unchanged prices.

## CAPITALIZED IN GERMAN MARKS

### United European Investors, Ltd., Gets Unique Charter from Dominion Government.

To safely invest the billions of German marks now held in the United States and Canada in real estate, mortgages securities and other valuable assets in Germany, thereby protecting the American holders and bringing to them an actual interest return, is stated to be the object of United European Investors, Limited.

Franklin D. Roosevelt, formerly assistant-secretary U.S. Navy, has been elected president of the company; William Schall, head of Wm. Schall & Co. bankers, New York, is vice-president and chairman of the Executive Committee. The other directors include:—Almet F. Jenks, formerly presiding justice, Appellate Division of the Supreme Court of New York; Andrew Haydon, Ottawa, Canada, barrister and National Organizer of the Liberal Party.

The capital of the company consists of $60,000 preferred stock in dollar denomination and six hundred million marks common stock in shares of 10,000 German marks each.

### Ten Thousand Mark Shares.

A unique charter has been granted to the new Company by the Government of the Dominion of Canada. While it is a corporation under the laws of a British Dominion, the common stock is of German mark denomination. This enables all owners of German marks to acquire the shares at their par value of 10,000 marks each, regardless of exchange fluctuations.

William Schall, chairman of the executive committee is now in Germany on a special mission. After a careful survey of the German economic situation, in the course of which he conferred with the leading German financial authorities, Mr. Schall has selected as the German advisory committee of the company, Senator August Lattmann, Senator John von Berenberg Gossler, and Alfred Arnthal.

The company's executive offices are at 7 Pine Street, New York City.

The capital of the company will be invested in real estate, mortgages, securities and participation in industrial and commercial enterprises in Germany.

**Surplus Strength of the —Mutual of Canada—**

The Company's General Surplus, representing the excess of assets over liabilities, amounts to

**$5,790,520.70**

This fund has been assigned as follows:—

| | |
|---|---|
| First—Provision for dividends under Deferred Dividend policies issued prior to 1911 ........ | $3,688,146.75 |
| Second—Provision for interim dividends under Quinquennial policies. | 277,897.66 |
| Third—Provision for dividends payable in 1922. | 1,500,000.00 |
| Fourth — Provision for Mortality, fluctuations and other contingencies .. .. .. .. .. .. .. | 324,476.29 |
| | $5,790,520.70 |

The Financial Position of the Company is such and its dividend earning capacity continues to be so favorable that a **Further Increase In Dividends** has been decided upon for the year 1923.

## QUEBEC WILL NOT EXPORT POWER.

### Premier Taschereau Speaks at Twentieth Anniversary of Shawinigan.

In a banquet given at Shawinigan Falls on September 14 in honor of Julian C. Smith, vice-president and general manager of the Shawinigan Water & Power Co., on the occasion of his twentieth anniversary with the company, Prime Minister Taschereau, Hon. Jacques Bureau, Minister of Customs; Walter Mitchell, M.P.; Sir Lomer Gouin and several other prominent men were in attendance.

Speaking with regard to the development of the city Mr. Taschereau said: "It is a duty for me on behalf of the province to thank you for the work you have achieved. In my opinion, Quebec will and must develop with the close co-operation of agriculture and industry.

"If you wish to develop this province, I will tell you what the Government intends to do to help you. It is the man from the south to whom we are looking. Quebec is an agricultural province, —agriculture must be very extensively developed. We must create markets, large centres, but to develop these centres we must give protection to the industries in view of the further development of the province.

### Advantages.

"What may the Government do to help companies like yours is? First, we will give you a progressive and conservative province—conservative of tradition, of progress and all the good things that that contains.

"A population contented, satisfied, educated, highly cultured, having technical education, good roads and the best means to communicate with the markets of Canada without imposing heavy burdens on the farmers.

"We will give you good finance, and we will tell the old world to come and settle here and to carry the lightest burden of all the provinces in Canada.

"We will give you a province open to all progress, but which will not bend any knee to any movement before experience has proven its real value.

"We will give you a full development of our water powers and I am happy to seize the opportunity given me tonight to pay homage to the Government which has given the name Gouin dam to the greatest reservoir in the world. This reservoir may float the largest ships afloat which cross the Atlantic and Pacific."

"We will give you and to the company all the protection possible for our forests, which are one of our greatest assets of the province.

"It is our sacred duty to keep these forests for those who shall come after us in such a way as to preserve this great asset of ours.

"These are some of the few things we will do."

### Demands in Return.

"In return we will ask you to develop to the fullest extent the water powers of our province, create centres in Quebec.

"I dream of the day when railroads will be electrified and when our homes will be heated by electricity. Quebec has an enormous amount of power of which only six to seven per cent is developed.

"Shall we export our power to the United States, sell it as a merchandise or shall we tell our friends of the South if you want power come over here in Quebec and develop our water power. This is one of the great problems of the hour.

"It has been suggested to sell this power, but the policy we shall follow is that one laid by Sir Lomer Gouin, nothing should be exported except in a manufactured condition.

"We have unlimited energy in our province, and it is up to the business men to say if it is better to export the power or to tell the South to come to Quebec for we have the power, we have sane labor, a quiet and progressive province and sane laws."

Announcement is hereby made that the firm having been incorporated under the name of

**RENE-T. LECLERC**
**INCORPORATED**

will now include:

## FISHERIES COMMISSION

Better protection of the breeding grounds and the destruction of the natural enemies of the salmon was urged by W. H. Parker, president of the British Columbia Fishing and Packing Company, before the Federal Fisheries Commission, which opened its sessions in Vancouver on September 8.

The Government was right in seeking conservation, but in Mr. Parker's opinion at the same time he thought it had gone far enough in restrictive regulations on the fishermen. While greater conservation of the fishing resources was needed, he said, he was opposed to the closing of the Fraser River. The amount of the loss that such a closing would involve to the fishing companies and the canneries would be too serious. It was not the number of fish that was being caught by the fishermen that was bringing about a depletion of the salmon supplies so much as the depredation by the natural enemies of the salmon. Speaking in the interests of the Great War veterans, H. P. Jones argued that it was impossible for returned men to engage successfully at the present time, particularly in view of the competition they had to contend with from the Oriental fishermen.

## SALMON PRICES LOWER

The prices of canned sockeye salmon in Vancouver have dropped $1,50 per case, and are now selling at about $16.50 and $17.50 per case. These prices apply only to the domestic market, as the export prices stand at the opening figure.

There is very little sockeye salmon moving, but pink shipments have been heavy to France on almost every steamer for the past three weeks. The pink and chum pack is large this year, but the canners believe that they will be able to market these two grades better than the sockeye salmon at higher prices in the United Kingdom, where competition with Siberian red fish is keen.

Many markets ask for pinks and chums, but the sockeye selling field is limited almost entirely to Great Britain. As a consequence it is the intention of the canners to develop the trade for the less expensive grades of fish which are more plentiful in these waters.

## OUTPUT TO BE SAME AS LAST YEAR

### Granby Company Expects to Turn Out Thirty Million Pounds This Year

The Granby Consolidated Mining, Smelting and Power Co., expects to turn out 30,000,000 pounds of copper during 1922, practically unchanged from last year. The first half of this year scored a production of about 13,000,000 pounds, but since the end of June operations have speeded up somewhat.

Eventually the company will become a milling proposition. It is to have its own concentrator, plans for which have been outlined in the rough, but time and events are to govern the management's course in actually constructing it.

Aside from its production of copper, the company is rushing to completion before the end of the year, if possible, the hydro-electric installation by which a clean cut in production costs of from one-half to two-thirds of a cent per pound is estimated by the management.

Granby's coal properties are producing from 20,000 to 25,000 tons monthly, thereby supplying the company with its fuel requirements with a balance sold to commercial customers. Eventually it is to make its own coke for smelter use.

By routing its blister copper through the Panama Canal, the company ships its product a long distance to be refined and sold, but the saving in transportation costs is well worth the longer time necessitated in its transfer from Pacific to Atlantic seaboard.

## CREDIT MEN'S TRUST ASSN.

R. D. Taylor of Robert Taylor Co., Ltd., was elected chairman of the Nova Scotia Board of the Canadian Credit Men's Trust Association, Ltd., at the initial meeting of the new Nova Scotia Division held on September 14 at its offices in McCurdy Building, Halifax. E. J. Murphy, of J. & M. Murphy, Ltd., wholesale dry goods, was unanimously elected vice-chairman, and other members elected to the board were: F. Stanfield, of Stanfield's, Ltd., Truro, T. N. Campbell, of the Amherst Boot and Shoe Co., Amherst; W. Giffin, of Moir's, Ltd., Halifax; D. F. Harris, Imperial Oil, Ltd., Halifax; D. MacKinnon, Royal Print and Litho., Ltd. Halifax; L. L. McGuire, Goodyear Tire and Rubber Co., Halifax, and H. Kenty, Clayton & Sons, Halifax.

The whole of the Maritime Provinces were previously controlled from St. John, but, owing to the growth of membership in the eastern provinces and the desire for closer service, the Nova Scotia offices were recently opened under the management of H. E. Morton, who has had several years connection with the Association at their head office, Winnipeg.

## MONTREAL LUMBER

The liner Monteagle, formerly on the trans-pacific passenger run will carry British Columbia lumber to Montreal before the closing of the St. Lawrence navigation, according to advices from Vancouver Arrangements practically have been completed for the chartering of the line to load 2,500,000 feet of lumber about September 22nd next.

BENIAH BOWMAN.
Minister of Lands and Forests.
Toronto.
August 24th 1922.

N.B. No unauthorized publication of this Notice will be paid for.
41

# *Corporation Finance*

**British Columbia Electric Railway Co.**—Gross earnings for the month of July amounted to $834,772, as compared with $840,155 for July 1921. The monthly report shows a very considerable reduction in working expenses for the period, the operating costs amounting to $612,113, compared with $636,019, a decrease of $23,906. Net income, therefore shows a moderate advance at $242,659, compared with $204,136, an increase of $18,523.

**Western Canada Lumber Co.**—During the month of July, 11,493,300 feet of lumber was manufactured as against 8,391,507 feet in July 1921, an increase of 3,101,793 feet. During the month 11,192,094 feet were sold at $273,589 as compared with 9,956,175 feet in July, 1921, for which a price of $234,886 was realized.

Aggregate lumber manufactured from January 1 to July 31 amounted to 60,490,142 feet, as compared with 55,503,318 feet and lumber sold, 67,681.745 feet compared with 51,904,899 for the corresponding period in 1921. Aggregate price realized amounted to $1,549,853, compared with $1,440,481, an increase of $109,372.

**Ogilvie Flour Mills Co.**—At a meeting of the directors of the company on September 15 there was declared a bonus for this year of 10 per cent., as well as the regular quarterly 3 per cent. dividend.

The company has a record for liberal bonus distributions, last year being the first since 1918, that they did not make such presentation. In 1918, in addition to the regular 12 per cent. was added a bonus of 15 per cent.; in 1919 there was added to the regular 12 an extra distribution of 15 per cent. while in 1920 was given an extra 10 per cent, in addition to the regular 12 per cent.

Last year only the regular 12 per cent was paid.

The fiscal year of the company ended on August 31, and at the annual meeting to be held on October 12, the statement for that period will be presented.

**Massey-Harris Co.**—The Massey-Harris Co., Ltd., and Massey-Harris Harvester Co., Inc., have called by lot for payment on October 15, at 102½ and accrued interest, $246,000 of the ten year 8 per cent, sinking fund gold debentures, due October 15 1930. Holders of the bonds bearing the numbers called are requested to present them for payment at the office of the United States Mortgage & Trust Company of New York, on October 15.

---

## TALKING THINGS OVER

(From the Regina "Leader," September 15)

The conference that was held between the Saskatchewan Government and representatives for the farmers' creditors on Wednesday should have the effect of clearing the atmosphere and bringing debtors and creditors nearer together. The discussion that took place was frank and informative. There was no attempt on the part of the farmers' representatives to minimize the seriousness of the financial situation or the necsity for allowing the farmers reasonable opportunity to market their crop to the best advantage. At the same time there was no inclination to ask undue favors of the creditors. The attitude of the creditors' representatives was friendly.

As a result of the conference both parties understand each other better than they did before and to this extent the conference will be productive of good. The farmers, however, should not permit their expectations in this connection to carry them away. All that the conference could do was to reveal the situation as it exists and emphasize the necessity for allowing the farmers a chance to clear away their indebtedness without unnecessary hardship. The hopes which the farmers pinned to the wheat board were shattered and to the end that their morale may be sustained it is necessary to lend the men on the land every encouragement within reason. This does not mean that creditors should be lenient to the point of charity. The farmers no not want that . Where they can pay their debts in whole or in part, they should and undoubtedly expect to pay them. There are many cases, however, where it is patently impossible for farmers to square themselves this fall, and where they evince a willingness to do the best they can, they will more likely than not find their creditors prepared to meet them half way. This is all that the farmers are entitled to look for.

A debt is a debt, whether it is owed to the country storekeeper or to an implement company, or a loan company, or any other corporation. The creditor companies are entitled to fair treatment as to the farmers. They have made farming possible in Western Canada, on the scale on which it is carried out today. They have extended credit where it would have been impossible for men to become established on the land but for it. They are an essential factor in the agricultural industry and are entitled to be treated as such. The spirit which should animate both the creditor companies and the farmers who are under obligations to them should be that of hearty co-operation to the end that the basic industry of the country may be restored to a sound and profitable basis.

Such conferences as that called this week by Premier Dunning are of material assistance in creating and maintaining such a spirit. They offer an opportunity for both sides to get together around a table and state their cases. They clear up misunderstandings and make it possible for the creditor to get the debtor's point of view, and when misunderstandings are corrected, a long step has been taken toward a satisfactory solution of the problem pressing upon the farmers who are in financial difficulties. The rest is merely a matter of business practice. There is no question but that both the farmers and their creditors are imbued with a desire to play fair with each other, and if they act in keeping with that desire there should be no difficulty in eventually lessening the burden of indebtedness which the farmers are carrying.

## EXCHANGE ON RAILWAY RATES

The railway commission announces that in accordance with the judgment and order of the board dated January 14, 1921, the rate of exchange in connection with shipments of freight between points to Canada and the United States from Sepember 15 to September 30 inclusive, will be one thirty-second of one per cent. No surcharge will be collected on international business either passenger or freight.

## PURCHASES IN STATES CURTAILED

### Our Adverse Trade Balance Has Been Reduced—Banks Now Charge For Exchanging American Money

(Special to The Monetary Times)

New York, Sept. 18.—According to statistics just made public by the Department of Commerce, imports from Canada showed a further increase during the month of July as compared with July 1921. Total imports from Canada for the seven months ending July were however slightly less than they were during the same seven months of the previous year. American exports to Canada were also less in July of this year than they were in July 1921. The decrease was even more marked when the totals for the seven months ending July for the current year and for the year 1921 are compared. The decrease in total American exports to Canada during the seven months ending July 1922 totalled over $50,000,000. As the drop in imports from Canada was only $15,000,000, these figures obviously offer further evidence of the increasingly better trade position of Canada in the United States.

During the seven months ending July 1922, Canadian trade with the United States totalled 482.7 millions against 550.8 millions during the same seven months in 1921. Although total trade between the two countries was thus somewhat less this year than it was last, the fact that Canadian buying of American goods decreased faster than American buying of Canadian products brought the adverse trade balance against Canada down to 112.3 millions against 145.6 millions in 1921.

### Premium on Exchange

Canadian bankers in New York do not take very seriously the reports received here that the American dollar has been selling at a discount in Canada. For while many returning American tourists report that many shopkeepers in Canada are refusing to accept American money at par, even the tourists regard this more as an acknowledgement on the part of the shopkeepers that pre-war conditions must again govern the conduct of their American business, than as a change in the value of American dollar in Canada. As the banks are apparently determined to charge a small fee for the changing of American currency into Canadian dollars, there is nothing the shopkeepers can do but follow suit.

### Canadian Wheat

Canadian wheat continues to play an increasingly important part in the export grain market. The Canadian crop, according to local grain merchants with extensive Canadian connections, is beginning to move in earnest. Many of these merchants are making financial preparations both here and in Canada for the handling of large blocks of Canadian wheat and it is expected that vast quantities of Canadian wheat will be shipped from Canada to Europe direct by some of the larger American grain houses. While the immediate effect of the increasingly important interest American grain dealers in the export trade are taking in the sale abroad of Canadian grain will be to increase the traffic handled by the Port of Montreal and the various Canadian railroads, it will have an even more important outcome. As many of the grain houses are planning not only to ship their grain bought in Winnipeg over Canadian lines and from Canadian ports but to finance the whole operation in Canada, such profits as will accrue from the sale of the wheat, will probably be shared by many of the Canadian banks.

## MORTGAGE CERTIFICATES.

The Title Guarantee and Trust Corporation of Canada, Montreal, announce that they have concluded arrangements by which they will issue first mortgage certificates which will permit of the placing of small sums of money for investment on first mortgages.

These first mortgage certificates are shares in specific guaranteed first mortgages covering property in the city of Montreal and suburbs, the mortgaged properties being designated in the certificates.

Certificates, apart from the guarantee of the mortgage itself, bears the additional guarantee of refunding of capital and interest by The Title Guarantee and Trust Corporation of Canada.

BUILDING YOUR BUSINESS

In building a life agency business it is a most valuable asset for the underwriter to associate himself with a Company whose name is his "open-sesame" to the life insurance business in his district.

The North American Life is high in the esteem of the insuring public. Why?

Popular policies, liberal dividends and the great enthusiasm of all our agents is the answer.

Some good agency openings are available.

Correspond with
E. J. HARVEY, Supervisor of Agencies.

# Trade Boards Want Immigration Policy

## Ontario Convention Urges Dominion Government to Action—State Fire Insurance Proposal Is Voted Down—System of Consular Fees Like That of United States Is Favored — Municipalities Criticized For Being Too Liberal

A vigorous immigration policy was urged upon the Dominion Government by a resolution passed at the annual meeting of the Associated Boards of Trade of Ontario, held at Owen Sound, September 21 and 22. Several resolutions were presented and discussed, and after a special committee had drafted a new one, the following was adopted:—

"That, failing other action, the Dominion Government institute an aggressive immigration campaign to acquire: (1) Selected British settlers, and (2) settlers from other countries of Northern Europe and the United States as are desirable."

The meeting approved of the plans of the Canada Colonization Association, and suggested Federal co-operation. The association will be requested to enlarge its directorate to include representatives from each Provincial Association of Boards of Trade, and the motion concluded with the assertion that, failing all other methods, "the Dominion Government be urged to adopt an aggressive policy to secure such other immigrants as may be found desirable, who will go on the land, as it is not considered possible to populate the rural districts of this country with immigrants available from Britain alone."

Dr. Horace Brittain spoke to a resolution calling upon the provincial government to summon a conference for the purpose of securing uniformity of municipal assessment throughout Canada. This was concurred in.

The adoption of some uniform system of time during summer months in preference to daylight saving on a piecemeal basis was discussed, and also a resolution calling upon the federal government to "forbid the showing in Canada of questionable amusement orgies and carnivals of insanity and vice, of which the Dominion has a surfeit, and at which made for weeks an immense pollutive influence from the United States being focused up on and intensified in Canadian communities."

### Propose Consular Fees

A proposal which aims to let Canada get her share of all trade originating in foreign countries was brought up by the Brantford Chamber of Commerce. The suggestion which the Federal Government will be asked to put into effect was that funds should be raised for the extension of Canada's trade Consular service through the introduction of a fee charge of $2.50 in all foreign countries on invoices covering goods to the value of $100 or over consigned to Canada. G. B. Greene, of Ottawa, pointed out that while the United States have 93 Consular agents located in Canada, the Dominion, on the other hand, has only 20 such agents all over the world. That meant that Canadian Industries suffered when it came to searching out new markets for exportations, while the American Consular agents were so closely in touch with Canada's foreign markets that the moment big shipments started to go out of Canada to any port, Washington was immediately notified and there was a big movement put under way to capture those markets. Mr. Greene felt that under such conditions Canada could not hope to hold her own markets after she had got them, so the proper procedure would be for the Dominion to appoint more agents.

It was pointed out that the United States had followed out that system so effectively that they were not only able to pay for the Consular service, but have a surplus at the end of each year as well. Canada could raise $1,000,000 annually ,and there would be no danger of interfering with trade, as the fee was a small one. Right Hon. Mackenzie King will be asked to put the suggestion in force.

In a discussion on forests, K. J. Dunstan stated the forests were being depleted, and unless the Ontario Government took some firm stand the inevitable result would be that in a few years there would be a shortage of timber. The Ontario Government will, accordingly, be asked to keep a closer eye on the sale of timber limits, and will be requested at the same time to undertake a comprehensive policy of reforestation, with the aim of providing for the future.

### Municipal Taxes

An attack was made on the bill presented to the Legislature last session by Major Alex. Lewis of Toronto, the object of which is to permit municipalities to tax industries in new ways. Mr. Greene of Ottawa led the attack by quoting a number of statistics to show that, while the population of Ottawa city had gone up only slightly over 12 per cent. since 1913, the tax rate and assessment had gone up several times as much in percentage, while the debenture debt had increased by over 90 per cent.

Mr. Greene said the trouble was that too many towns and cities were engaged in "a spending spree." Toronto might be able to live through it, but the smaller centres could not, he said, and as a result of the spending sprees the municipalities must search about for new sources of taxation, and it was the industries which must pay. The industries would not stand for that forever, for some of them were already migrating to the province of Quebec, and when it came to the case of an industry picking out some new centre Quebec was much more likely to be picked than Ontario. Mayor Coppley of Hamilton supported Mr. Greene in his contention, declaring that he knew of industries in his home city which would pick up and go to Quebec if they only could get away.

As a result, the Associated Boards of Trade decided to take up the matter with the provincial government and ask that a limit be put on the extent to which municipalities can impose new taxations.

### Use of Electricity

Owen Sound brought forward a resolution urging the government to encourage research into the question of heating by electricity. This provoked a sharp reminder from several delegates that the commercial rewards open to anyone who could perfect an apparatus to bring electrical heating down to the same basis as coal offered a fortune beyond what any government could possibly give. K. J. Dunstan, past president, declared there were not enough water powers in the whole of Canada to provide sufficient electricity to heat half the homes of Ontario alone, and even if there were the cost of maintaining the amount of power that would be required for a few months during the year would be prohibitive.

Another resolution urging the electrification of steam railways was adopted after a clause declaring that the "supply of electric current throughout Ontario is practically unlimited," was deleted.

W. N. Morris of the Ontario Educational Association made an appeal for the support of the Associated Boards in the furtherance of education. The natural resources of the country, he said, were valueless unless invested with labor, and the child life of any country would be unproductive unless properly trained. The money spent wisely on education was an investment. He lamented that out of a membership of 15,000 teachers and trustees in the Province, only 1,000 attended the annual meetings of the association in Toronto.

A resolution from the Brantford Chamber of Commerce, asking the Government to proceed with the construction of highways running north and south was not adopted, the feeling of the meeting being that any such expression of opinion might run counter to plans already under way.

### Deep Waterways

F. H. Keefer of Port Arthur again brought up the matter of a deeper St. Lawrence in an amendment to a general resolution on Hydro development from the Belleville Chamber of Commerce, which provided for the deepening of the waterway to permit lake-to-ocean water haul. The motion and amendment were combined, and then adopted unanimously.

John Elliot of Belleville brought in a resolution having for its purpose the encouragement of university education, and referred to the remarkable growth of the University of Toronto. The resolution was adopted.

Fire prevention came in for a lot of discussion on a resolution by the Belleville delegates calling for Government fire insurance. There was considerable opposition to the resolution and it was withdrawn.

### New Cheque Tax

Denunciation of the recently increased stamp tax on cheques, notes, etc., on the ground that it was a deterrent to trade and would not produce a revenue commensurate with the labor and cost involved in its operation, was voiced in a Toronto resolution, moved by K. J. Dunstan, and adopted. While appreciating the necessity for increased Federal revenue, the resolution suggested that any loss caused by the repeal of the tax could be met by a well and carefully considered tax of sales. Geo. Wilson, Toronto, described the new tax as unscientific, and declared that the way cheques were posted with stamps was almost an insult to the King.

Another resolution from Toronto was adopted calling on the Dominion Government to repeal the Income War Tax Act respecting persons, corporations and joint stock companies, and to substitute a graduated income tax to be paid by all persons in Canada, except corporations and joint stock companies.

The Government was also requested to take necessary action to avoid duplication of taxation in connection with interprovincial trade and the incomes of individuals derived from various Provinces.

On motion of J. E. Keenan, Owen Sound, endorsation was given to ex-President Hanna's decision that employees of Canadian National Railways be not eligible for election to political offices or take any part in Dominion or Provincial elections.

The next year's gathering will be held at Hamilton.

### Officers Elected

The officers elected were: Honorary Presidents R. Home Smith, Toronto; Wm. Taylor, Owen Sound; John Elliott, Belleville; and Col. H. Brock, Toronto. President, C. C. Coppley, Hamilton. Vice-Presidents, M. P. Byrnes, Collingwood; J. G. Elliott, Kingston, and K. J. Dunstan, Toronto.

F. G. Morley was re-elected Secretary.

## NORTH AMERICAN LIFE

With the closing of the Nalaco Club year (North American Life Assurance Co's big writers' club) the announcement is made of the officers and members for the year ahead. The following won office in the club by their volume of production:—

Western Division: President, A. C. Lawrence, Nelson, B.C.; vice-president, J. A. Collins, Edmonton. These along with C. H. Wentz, made the $200,000 section.

Eastern Division: President, F. X. LeBlanc, Montreal; F. L. Cooper, St. John, N.B., who both made the $200,000 section.

## BETTER WEATHER IN THE WEST

### Signs Indicate Trade Improvement. Better Orders Being Placed. Collections also Improving

(Staff Special)

Winnipeg, Sept. 27. The outlook this week in the west is most encouraging. The weather, which was causing some alarm a week or ten days ago, has kept fine and threshing is in full swing in all parts of the country. Grain shipments are coming forward very rapidily, and often as high as two thousand cars a day and over are passing inspection at Winnipeg. The grade is also keeping up wonderfully well, and despite the wet weather experienced during the last few weeks only a small proportion of tough wheat is coming forward.

The trend of business can be said to be steadily improving. Wholesalers report larger orders, and they are extending credit more readily. In many circles, however, the business depression of the last few years is slow in leaving. Life Insurance Companies are reporting splendid business, and most of the western Companies are writing all the business that they can take care of. Collections on all sides are reported to be improving, and from now until the end of the year improvements should be steadily noticed week by week.

### Winnipeg as a Credit Centre

At a meeting last week of the Canadian Credit Men's Trust Association, Henry Detchon, manager, outlined to the members who comprise a very important element in the business life of Winnipeg, some of the history of the association since its inception. Mr. Detchon showed why the headquarters of the association remained in Winnipeg, pointing to the fact that this city was still the center of the credit movement. Mr. Detchon referred to Winnipeg also as the center of Canada, and as the receiving station for a large proportion of the new wealth which Canada produces, and referred to Winnipeg as the largest grain center of the whole of the universe, not even excepting the markets of Minneapolis and Chicago. He also stated that Winnipeg is the point where the heaviest credits are extended which are necessary for the carrylng on of the enormous farming operations which are required to produce this new wealth. Mr. Detchon referred to the growth of the Credit Men's Trust Association, which was formed in April 1910 with twelve Winnipeg members, which in the twelve years of its operation had increased to more than 1200 with offices in the principal centers througout the Dominion. Mr. Detchon pointed out the activities of the clearing house department, and its special information sheet, the adjustment bureau, and the changes affected in the federal and provincial legislation through the efforts of the association. In urging the credit men to co-operate to the uttermost, Mr. Detchon said he would guarantee that during the next twelve months losses will be very much less, and dividends larger.

### Mortgage Loan Business

Hume Cronyn, president of the Huron & Erie Mortgage Corporation, and general manager of the Canada Trust Company, has just completed a rather extensive trip covering western Canada, and on returing to Winnipeg, after travelling considerably in the three prairie provinces and British Columbia, he expressed himself as very well satisfied with the outlook. The Huron & Erie do considerable loaning in various centers of the West.

## MONTREAL FINANCE CORPORATION

The Montreal Finance Corporation, Limited, which was incorporated in December of last year, has just declared three quarterly dividends at the rate of 8 per cent. on the preferred stock. It is stated that payment of these dividends leaves the corporation with a substantial surplus. The company are employed in discounting mortgages and balances of sale price on residential property. The working capital is steadily increasing through the sale of its securities.

## B. C. AUTOMOBILE INSURANCE

### Slight Changes in Tariff Announced by Underwriters' Association

(Special to The Monetary Times)

Vancouver. B.C., Sept. 23—Minor revisions have been made in the tariff for automobile insurance as promulgated by the British Columbia Automobile Underwriters' Association. The most important changes are as follows:

Fire and theft—When it is impossible to trace the month of the year when a car was bought new, the age of the car must be figured from the first of July of the model year instead of Jan. 1st.

Reinstatement—When a loss occurs under the fire and theft cover, the amount of insurance shall be reduced by the amount of the loss paid and an additional pro rata premium paid for reinstatement to original amount of insurance. Heretofore no reinstatement premuim was required.

Bumpers—A ten per cent discount has been granted from collision premiums on private passenger or pleasure cars for the attachment of an approved front bumper and 2½ per cent for approved rear bumpers. This reduction applies to full cover and all deductibles. Previously no discounts for bumpers were allowed. A minimum annual premium of $5 must be charged for each individual car. The changes became effective September 18.

The increase in collision rates which became effective on January 1st, 1922, has resulted in a great many car owners dropping this form of coverage in B. C. The loss experience this year over all classes of coverage is generally understood to he more favorable than last year, which was one of the worst in the history of the business.

## *Exchange Quotations*

Closing rates in Toronto on Wednesday, compared with the preceding week, were as follows:—

| | | |
|---|---|---|
| Sterling | 443.50 | 4.40 |
| France | 7.66¼ | 7.59 |
| British W. I. | .92½ | .91⅝ |
| Jamaica | 4.45¼ | 4.41¾ |
| Belgium | 7.24¼ | 7.16½ |
| Denmark | 20.85½ | 20.73 |
| Germany | .07⅛ | .06 |
| Greece | 2.15 | 2.30 |
| Holland | 38.77¼ | 38.77 |
| Italy | 4.23¼ | 4.25½ |
| New York | 1/32d. | 1/32d. |

## MASSIE AND RENWICK, LTD.

With the capital stock of $50,000 the insurance firm of Massie & Renwick, Limited, has been incorporated to take over and carry on the business of Massie & Renwick, Toronto, insurance managers, agents and brokers, also to transact the business of stock and bond brokers, financial agents, etc.

## *Bank Clearings*

The following are the bank clearings for the week ended September 21, compared with the corresponding week of 1921:—

**Eastern Bank Clearings**

| | Wk. ending Sept. 21 | Increase over 1921 |
|---|---|---|
| Montreal | $ 94,485,507 | $ *9,808,442 |
| Toronto | 86,872,927 | 1,155,318 |
| Ottawa | 6,712,835 | *869,612 |
| Hamilton | 5,901,640 | 179,464 |
| Quebec | 5,847,185 | 85,579 |
| Windsor | 3,217,162 | 365,699 |
| London | 2,853,611 | *52,162 |
| Halifax | 2,593,463 | 47,766 |
| St. John | 2,496,910 | *429,774 |
| Brantford | 1,948,691 | 1,956 |
| Moncton | 1,189,590 | 121,696 |
| Kitchener | 910,963 | *15,626 |
| Sherbrooke | 754,254 | *191,044 |
| Kingston | 739,193 | *29,415 |
| Peterboro | 692,624 | *107,887 |
| Total | $216,316,555 | $ *9,546,484 |

**Western Bank Clearings**

| | Wk. ending Sept. 21 | Increase over 1921 |
|---|---|---|
| Winnipeg | $ 56,813,237 | $ *3,615,886 |
| Vancouver | 13,642,809 | *60,805 |
| Calgary | 4,860,300 | *1,995,440 |
| Edmonton | 4,104,402 | *1,234,163 |
| Regina | 3,854,876 | *748,883 |
| Victoria | 2,065,431 | *238,095 |
| Saskatoon | 1,765,753 | *368,614 |
| Moose Jaw | 1,239,908 | *380,131 |

| Medicine Hat | 345,234 | *75,637 |
| Total | $ 91,335,825 | $ *9,077,596 |
| Eastern total | $216,316,555 | $ *9,546,484 |
| Grand total | $307,652,380 | $*18,624,080 |
| Prince Albert | 297,301 | |

*—Decrease.

## *Canadian Failures*

The number of failures in the Dominion, as reported by R. G. Dun & Co. during the week ended Sept. 22, in provinces, as compared with those of previous weeks, and corresponding week of last year, are as follows:—

| | Sept. 22 | Sept. 15 | Sept. 8 | Sept. 1 |
|---|---|---|---|---|
| Ontario | 17 | 15 | 11 | 14 |
| Quebec | 27 | 21 | 29 | 26 |
| Manitoba | 8 | 5 | 6 | 15 |
| Alberta | 3 | 7 | 6 | 2 |
| Saskatchewan | 3 | 3 | 1 | 3 |
| British Columbia | 2 | 6 | 3 | 3 |
| Nova Scotia | 4 | 0 | 0 | 2 |
| New Brunswick | 3 | 0 | 3 | 2 |
| Prince Edward Is. | 1 | 0 | 0 | 0 |
| Newfoundland | 2 | 1 | 0 | 0 |
| Total | 70 | 58 | 59 | 67 |
| 1921 | 40 | 41 | 42 | 50 |

## *Railroad Earnings*

The following are the approximate gross earnings of Canada's transcontinental railways for the first three periods in September:—

| | 1922 | 1921 |
|---|---|---|
| **Canadian Pacific Railway** | | |
| September 7th | $3,455,000 | $3,951,000 |
| September 14th | 3,774,000 | 4,334,000 |
| September 21st | 4,290,000 | 4,980,000 |
| **Canadian National Railway** | | |
| September 7th | 2,355,137 | 2,688,428 |
| September 14th | 2,547,982 | 2,688,428 |
| September 21st | 2,918,687 | 2,688,428 |
| **Grand Trunk Railway** | | |
| September 7th | 2,147,745 | 2,416,740 |
| September 14th | 2,130,939 | 2,316,356 |
| September 21st | 2,158,601 | 2,277,977 |

## TRUSTEES APPOINTED

The following authorized trustees have been appointed under the Bankruptcy Act:

Ontario—William D. Cuthbertson, Ottawa; Clarence C. Bragg, Chatham; Walter D. Inrig, Kitchener, and Robert L. O'Gorman, Cobalt.

# Railways Burdened by Fixed Charges

## Results of Operation Improve, But Increase in Fixed Charges Has Been Still Greater—Rate Reductions Make Serious Inroad on Earnings—Little Prospect of Improvement With Present Volume of Traffic

(Special to The Monetary Times)

Ottawa, Sept. 27.—Public attention has been directed to the Government Railways by the statement of their operating returns recently issued by the Transportation branch of the Bureau of Statistics, and public expectation has been raised by the report that the Canadian National Railways had reduced their operating deficit during this time by $7,230,452. Expectations were raised even higher by the additional report that the Grand Trunk, during the same period, had a net operating revenue of $4,200,946, as against $1,326,734 for the same months, in 1921.

These statements are correct, but they do not represent the actual state of affairs on these roads as set forth in the report, nor do they warrant the confident conclusion that the situation on the whole year's operations will be as much improved as the operating returns for the first six months might seem to indicate. It is further assumed the business public desires to know the facts.

### Fixed Charges Increased

In the first place, it may be explained that the report recently issued deals only with the operating end of the railways. It does not take into account any portion of the fixed charges, which last year amounted to a total of $60,000,000, of which $40,777,000 was on the Canadian National and $19,245,000 on the Grand Trunk. As these increased during 1921 to the extent of $12,700,000 over those for 1920, it is quite evident that, in this respect alone, there is a setoff to be taken into account that probably will eat up nearly all that has been saved in operating to date this year.

In order to get a correct idea of how the Government roads are doing it is necessary to combine the figures for the Canadian National and the Grand Trunk. These show that on the first six months this year they made a better showing than they did in 1921 to the extent of $10,074,000, the Canadian National having reduced its operating deficit by $7,230,452 while the Grand Trunk increased its net operating revenue by $2,774,000.

So far so good, but those in touch with the facts of the situation will quite generally agree that these months represent about all the cream that is likely to be had this year. July may not have been such a bad month, but when the returns beginning August 1st, when the Crow's Nest Pass rate and other rate reductions begin to be reflected, there is little likelihood of continued improvement in the figures as compared with those for 1921.

### Recovery Last Fall

Now it was in these Fall months last year that things began to look up on the Canadian National. Wages had been reduced somewhat, and there had only been a general 5 per cent. rate reduction from the peak of the preceding year. So in his annual statement to Parliament last session the Minister of Railways said: "It was not until half way through August that any pronounced upward tendency was shown. That month a surplus of $47,231 on operation was recorded. In September it grew to $504,174, in October to $1,036,130 and in November it was $734,149. In December the loss was $1,114,794."

The reason why the Government Railways made such a good showing during these months was that up until the end of November they had the benefit of three months hauling of grain at the high rates granted in August, 1920. But in December there was a general reduction in rates of 10 per cent., and it is to be observed that as soon as this came into effect the surplus of $734,000 in November was converted into a surplus of $1,114,000 in December. The lower rates were not alone the cause, winter being responsible for some of the difference; but the lower rates were an important factor.

### Rate Reduction Effective

It is up against an even worse rate reduction that the Government Railways are now going, which the Canadian National officials told the Transportation Committee of the House of Commons would probably mean a loss to them of over $8,000,000. It is this that is skimming the cream that they otherwise might hope to get.

A glance at the operating records of the Canadian National for the latter part of last year shows that good work was done in reducing the operating deficit. In July it was cut by $1,133,000, as compared with the same month in 1920; in August there was a further cut of $1,902,000; in September another one of $1,066,000; in October another of $1,642,000 and still another of $1,154,000 in November. This was made possible by a large volume of traffic handled at very satisfactory rates from the railway standpoint.

It looks as though on the Canadian National proper the possibility of making important further savings through operating economies, that is if adequate service is to be maintained, had been much reduced until the growth of the country creates a much greater volume of business. In March of this year there was a reduction of $1,433,000 in the operating deficit as compared with the same month last year; in April there was a further cut of $1,300,000; in May the cut was actually $2,407,000; but in June it was only $631,268, which of itself is a pretty good indication that the possibility of further savings is being much reduced.

In the meantime the fixed charges are growing like a snowball. And one can quite believe that they will be $45,000,000 on the Canadian National this year as against $40,000,000 last. This is nothing more than a mere statement of fact.

It is the Grand Trunk that is very largely responsible for the much better showing that the Government lines as a whole are making, it having shown a net operating revenue $2,700,000 greater than that for the first six months of 1921. Moreover, its earnings will not be much affected by the lower grain rates, its officials having told the Parliamentary committee that the Crow's Nest Pass rate would hardly make more than $100,000 a year difference to them.

## CONTRACTION IN CIRCULATION

### Three Million Decline in Note Circulation—Gold Held for Redemption Increases

During the month of August the note circulation of the Dominion Government showed a further contraction from the previous month, being lower by three million dollars from July. The August circulation is considerably lower than last year, when it reached a total of $262,137,315.

Gold held for redemption of notes again shows a further increase of two million dollars over the previous month, and also shows a decided improvement over August, 1921, when the total was $36,530,561. The percentage of gold held for redemption against notes shows a further increase during the month, standing at 39.11, as against 37.91 in July.

The position as at August 31 was as follows:—

| | |
|---|---|
| Provincial | $ 27,710 |
| Fractional | 1,241,055 |
| $1 | 16,775,779 |
| $2 | 12,283,825 |
| $4 | 36,255 |
| $5 | 2,885,580 |
| $50 | 4,650 |
| $500 | 2,955,500 |
| $1,000 | 5,479,000 |
| **Bank Specials—** | |
| $500 | 4,500 |
| $1,000 | 941,000 |
| $5,000 | 126,005,000 |
| $50,000 | 60,000,000 |
| | $228,638,955 |
| Gold held 31st August, 1922, by the Minister of Finance | $ 92,690,747 |
| Gold reserve to be held on Savings Banks Deposits—<br>10 p.c. on $32,690,682.55 under The Savings Banks Act | 3,269,068 |
| Gold held for redemption of Dominion Notes | $ 89,421,679 |
| Dominion Notes outstanding against deposits of approved securities, under Finance Act, 1914, and Chapter 4, Acts 1915 | $105,939,715 |

## A NEW INVESTORS' MANUAL

The Canadian Investors' Manual Company, 504 Royal Bank Building, Toronto, has issued the first edition of its publication, dated September, 1922. The manual is published as a handy reference for the investor, giving the more important data about companies whose securities are dealt in daily. It comprises 96 pages, and the publishers have provided space on the cover for printing the names of brokers who may wish to distribute copies to their clients.

## COBALT ORE SHIPMENTS

The following are the shipments of ore from Cobalt station for the week ending September 22nd:—Nipissing Mine, 70,480; Mining Corp. of Canada, 417,852; O'Brien Mine, 60,000; total, 1,181,932. The total since January 1st is 10,344,760 pounds or 5,172.3 tons.

## LIFE INSURANCE BROKERS

For the purpose of handling life insurance policies, selling, surveying, adjusting and rewriting life policies and reinstating and rewriting lapsed life insurance policies with and for the various companies, as agents and brokers, a company has been formed by London and Chicago men, with a capitalization of $100,000, divided into 1,000 shares of $100 each. The head office of the company will be in Toronto. Donald Duncan Lethbridge and William Wanless Purdom, London insurance brokers, and Trevor Kenneth Holm, accountant, London, with Otis Hann and Edwin Charles McDonald, of Chicago, are named in the official notice of the letters patent being granted. The company will be known as The Otis Hann Company of Canada, Limited.

## REFUSE INJUNCTION AGAINST SALE

N. W. Rowell, K.C., and E. W. Wright, acting for H. B. Muir, shareholder and managing director of the London Advertiser, appeared before Justice Middleton in the Ontario Courts on September 23 asking for an injunction to restrain T. H. Purdom, K.C., and W. F. Herman from acting upon or carrying out an agreement for the sale to Mr. Herman of the London Advertiser for $175,000. Mr. Muir was himself a possible purchaser and said he had understood that the price was to be $200,000. He objects that his interests had not been consulted.

Justice Middleton refused the injunction on the understanding that if the defendants proceeded they did so at their own risk.

## FOREST FIRES IN QUEBEC

Numerous forest fires have been reported to the Quebec Forestry Branch, and though the loss is said to be small, due to the fact that recent outbreaks have occurred in territories already devastated, Gustave Piche, Chief Forestry Engineer, warned hunters and settlers that unless more prudence was shown, even villages might soon be reached by the spreading flames.

Near Tadousac, on the North Shore, the situation is said to be very serious, and fires have broken out around the whole parish, keeping, however, at a distance. On the South Shore the situation is very bad, and boats are having difficulties on account of the heavy smoke, and the train service may be affected if conditions do not improve. At Paskington, 4,000 cords of wood were destroyed over the week-end, and this region seems to be affected more than others by lack of water.

## NEW YORK LIFE.

The Winnipeg branch of the New York Life Insurance company, held a convention last week, the guest of honor being assistant superintendent of agencies Chas. H. Langmuir, of New York City. There was a luncheon and meeting in the afternoon and also a dinner, after which addresses were given by Mr. Langmuir, agency organizer W. G. Muir, and also Messrs. Clough and Clark, of Wilwaukee, Wisconsin.

The western division $100,000 club of the company held a convention at Victoria, B.C., Sept. 19-20. Officials who took part were, Thomas A. Buckner, vice-president, Dr. Oscar Rogers, medical adviser, and A. S. Elford, inspector of agencies for the western division.

# Another Decline in Canada's Net Debt

### Gross Debt Higher By Two Million, But Net Debt Declines Five Million from Previous Month—Slight Decrease in Revenue For August—Expenditures Lower By Half a Million Dollars

Although the Dominion Government revenue and expenditure statement for the month of August shows that the gross debt has increased by two million over the previous month, this is offset by an increase in active assets, making a decrease of five million dollars in the net debt of the Dominion at the end of August, as compared with the previous month.

The recent increase in war tax revenues and customs revenue is shown in the revenue statement for the month, which, while lower by two million from July, shows an increase of three million over August, 1921. The total revenue to the end of August shows a slight increase over the same period last year, with very little variation in each revenue producing item.

Expenditures are again on the decline, there being a decrease or half a million dollars from July, and five million from August last year. Total expenditures to the end of August are also lower than last year by about eight million dollars, "pensions, and other expenditure accounts" showing the largest decrease.

The August statement with comparisons is given herewith:—

STATEMENT

OF THE PUBLIC DEBT AND THE REVENUE AND EXPENDITURE of the Dominion of Canada, as by Returns furnished to the Finance Department to the night of the 31st August, 1921 and 1922.

| PUBLIC DEBT | | | 1921 | 1922 |
|---|---|---|---|---|
| | | | $ cts. | $ cts. |
| LIABILITIES | | | | |
| FUNDED DEBT— | | | | |
| Payable in Canada | | | 2,084,474,571 10 | 1,998,851,486 48 |

## CROPS WILL HELP PAY DEBTS.

### Large Yield is Beneficial, Though Prices Are Low—Manitoba Savings Bank Gets Many New Accounts.

(Staff Special.)

Winnipeg, Sept. 25.—Threshing operations are fairly well advanced all over western Canada, but some delay has been caused in various parts of the country on account of wet weather. The weather seems to have settled now, and the balance of threshing to be done in Manitoba will soon be completed. From Alberta points good progress is reported, and in some sections from 50% to 80% of the threshing is completed. Business everywhere is reported to be picking up. More merchandise is moving now than for several years at this season.

Money has not begun to move quite as freely as was expected, and it may be some weeks before the real benefit of the crop movement is felt. However, both wholesalers and retailers report an increased volume of business. The new wheat that is coming forward is grading up exceedingly well, the great majority of it being No. 1 northern. Out of 512 cars of new wheat received in one day recently, only sixteen were graded below No. 2 northern. The one drawback so far as the crops are concerned appears to be the fact that prices to the farmers are apt to go too low. The farmer this year should really have had dollar wheat to show a reasonable margin of profit. This year's crop in the west will be a debt paying crop, but unless the farmer of the west is able to get a fair price, he will not be able to meet the great proportion of his past obligations. However, there will undoubtedly be tremendous strides made in this respect.

### Immigration Work.

Considerable effort is being put forth just now by the immigration authorities and other organizations to induce new immigration to western Canada. This movement has the support of local and federal governments. also the railroads and large financial interests of the country are giving it support. New immigration is undoubtedly needed before any great progress can be made in the west. Manitoba alone has twenty-five million acres suitable for cultivation, of which only six million are being cultivated. Its population is a little over six hundred and ten thousand, where it could sustain a population of one million, nine hundred and fifty thousand.

As an evidence of a better outlook in western Canada, L. B. Beale, H. M. Trade Commissioner, who has just returned to Winnipeg after a two months tour of the prairie provinces and British Columbia, is greatly impressed with the rapid strides being made towards trade recovery. Foreign trade from Pacific ports is being greatly increased. Mr. Beale stated that during the first six months of this year more tonnage entered the ports of Vancouver and Victoria than during the whole of 1920 and that the total number of vessels which entered Vancouver up to the end of June was four hundred and twenty-three. Mr. Beale states that exports from Vancouver and Victoria which two years ago were of merchandise from the United States for the Orient, consist today primarily of lumber, pulp-paper, wheat, canned and cured fish, and copper. Prospects for the mining industry in British Columbia, he stated, were good, and much better than they were a year ago. Prices of metal have improved, and considerable greater activity is assured. The total tonnage on deep sea export vessels entering Vancouver has reached a proportion never before equalled.

That there will be greater activity for some time to come throughout the whole of the west, which will affect every line of business, is the firm belief of Mr. Beale, who is most optimistic as to the future of western Canada.

The Manitoba Provincial Savings Bank continues to do an ever increasing business. During the month of August, 774 new savings accounts were opened. This is the largest number of new accounts started in any one month since the bank opened slightly over two years ago.

# The Monetary Times

Trade Review and Insurance Chronicle
OF CANADA

The Monetary Times was established in 1867, the year of Confederation. It absorbed in 1869 The Intercolonial Journal of Commerce, of Montreal; in 1870 The Trade Review, of Montreal; and the Toronto Journal of Commerce.

## THE BUSINESS OUTLOOK.

The foremost question of the moment is whether the remarkable activity of the midsummer months will be followed by a period of gradually and conservatively increased business or whether it is the forerunner of a period of secondary inflation. The indications point clearly to the conclusion that good business based primarily on domestic requirements is ahead for the autumn months but that inflation in the generally accepted sense will not occur.

Manufacture is on a satisfactory basis, excepting in so far as some industries have suffered from lack of coal and inadequate transportation facilities. Crop yields are excellent for practically all crops, according to September estimates, and the forecast is for a cotton crop in the United States more than two million bales above that of last year. Unemployment is practically non-existent. Retail and wholesale business in the United States during the autumn will show considerable expansion over that of the corresponding period of 1921.

It must nevertheless be recognized that even though crops are large, dollar wheat, a considerable decline in the price of hogs since the first of June, and relatively low prices of other agricultural products have reduced the purchasing power of the farmer. The situation is similar in respect to other important classes of raw materials. These conditions and the fact that not far from one million men were continuously out of work in the States as a result of strikes during the greater part of the summer, are major factors which have effectively blocked inflation at this time. Business is being booked for requirements of the immediate future and forward buying is cautious. Good business is assured but it is not reasonable to expect a boom.

Conditions abroad and the state of the exchanges are not such as to encourage any idea that there is to be any large increase in European business in the near future. Exports to countries where general business shows improvement, such as Australia, the leading South American countries, Central America and the West Indies will probably increase somewhat but these countries are primarily dependent on conditions in the international market for raw materials, chiefly agricultural, and their inhabitants are therefore in a position differing in no important way from that of the Canadian farmer. They will unquestionably buy more freely than they bought last year but not extravagantly.

It may well be that prices in some lines may continue to tend upward as price and wage readjustment proceeds but any rapid general upward tendency in the prices of goods ready for the ultimate consumer would be checked by unwillingness and inability on the part of purchasers throughout the world to follow up the market. Manufacturers and merchants will still find it essential to pursue a policy of careful and economical operation, for the best prospect of profits lies not in rapidly rising prices but in operating efficiency and gradually expanding volume of business.

## DOES IT PAY TO HOLD WHEAT?

The big question for many farmers today is "Does it pay to hold wheat?" Much has been said on this subject, a great deal based on theory and a much smaller amount based on fact. If we are to rely on the experiences of the past to be our guide to the future, then there is one answer and it is very plain. "It does not pay to hold wheat," as a general rule. When Dr. Magill, secretary of the Winnipeg Grain Exchange, appeared before a special committee of the House of Commons at Ottawa, some months ago, he included in his evidence given under oath a formidable array of charts and statistics which prove this statement conclusively. This state of affairs is not confined to Canada, for the Federal Reserve Bank at Minneapolis, has compiled statistics showing plainly that it does not pay the American farmer to hold his wheat.

Dr. Magill's evidence shows that in 1908-09 it would have paid to hold wheat, as a result of a shortage of wheat in the United States and the famous "Pattern Corner." These two abnormal circumstances caused prices to rise. In 1909-10 it did not pay to hold wheat. In November 1909 the cash prize was 100⅛ and in May 1910, 100¼. In the 1910-11 period wheat sold in September at 106¼, dropped to 91½ in December, rose to 95¾ in February and in May sold at 96¼. This was a bad year to hold wheat. In 1911-12 the farmer who held his wheat lost money, the prices fluctuating as follows: September 103½, December 96¼, March 99¾, May 105. The 1912-13 period was much the same, prices ranging from 105¾ in September to 95 in May. In 1913-14 period the farmer would have to hold his wheat until August to make a profit—and it is obvious that if all the farmers had held until then the price would not have risen so abruptly.

The foregoing gives a brief sketch of prewar experiences and it should be noted that each month a farmer holds his wheat adds to cost of that wheat to him.

## CUBA'S FINANCIAL RECOVERY.

Canada has a substantial interest in Cuba, being back of several enterprises there. The chief of these are enumerated in the latest number of "Investment Items," issued by the Royal Securities Corporation, as the Cuba Railroad, organized by the late Sir William Van Horne, operating over 700 miles of track, with a capital of about $48,000,000; the Royal Bank of Canada, doing an important share of Cuba's financial business through its 57 branches in the island; several public utility corporations such as the Camaguey Company and the Guantanamo Electric Company; and Cuban Canadian Sugar Company.

The world war by destroying the greater part of the beet sugar production of Europe, and by further increasing the price of sugar through worldwide currency inflation, brought an era of unparalleled prosperity for Cuba.

Sugar was one of the earliest articles to break in price in the readjustment of 1920. But the break was preceded by an abnormal advance in raw sugar prices in the American market—the market which under ordinary circumstances absorbs 85% of all the island's exports—and this advance attracted to the United States a flood of sugar from all parts of the world and caused an accumulation of supplies far beyond the current requirements. Cuban raw sugar became a drug in the market, the price fell to a low of 1¾ cents, and Cuba experienced a colossal shrinkage of speculative securities and commercial paper of all sorts. The National Bank of Cuba was forced to close its doors, and subsequently a moratorium was declared by the Government and a commission was appointed to control all operations relating to the sale and shipment of the 1920-21 crop.

Notwithstanding this situation, Cuban sugar production continued in 1921 to be abnormally large. Cane sugar plantations cannot be converted to any other crop, and in an industry of this kind the restoration of a balance in the market must be effected by the adjustment of demand rather than of supply. This readjustment has been gradually effecting itself since the beginning of 1922. At the end of 1921 there was still 30% of the year's crop, or 1,200,000 tons, unsold; but by August 1st the whole of the carry-over from 1921 had been absorbed and all but 900,000 tons of the 1922 crop, with every prospect that the entire crop will be exhausted before the end of December. This is due to increased demand in the United States, consequent on cheaper prices, and a diminished output of beet sugar in that country.

Cuban raws have recently been as high as 2¾ cents, at which figure they are well in excess of the present deflated cost of production on the better estates. Europe is becoming a fairly free buyer at prices in this vicinity, European and other non-American countries have taken during the first half of 1922 more than twice as much as during the whole of 1921. The Cuban cane crop will gradually respond to market conditions; it is 3,800,000 tons this year, compared with about 3,950,000 tons in 1921, but next year it is not expected to exceed greatly the figure of 3,500,000 tons. Those Cuban corporations, both industrial and financial, which have been able to withstand the strain on their credit caused by collapsing prices and unsaleable stocks during the year 1921 should be in an improved position by the end of 1922.

## FIRE HAZARDS OF THE FUEL SHORTAGE

Many new fire hazards are being introduced by the fuel shortage. Much soft coal is being stored in the basements of dwellings, apartment houses and mercantile buildings and on the premises of factories. Spontaneous combustion in this is likely to start fires, and great care should be shown in the selection of coal and in its storage and use.

Canada will not receive it usual amount of anthracite this year, and soft coal must be used in stoves and furnaces constructed for other fuel. The large amount of soot deposited by soft coal is apt to clog the smoke pipes and chimneys and cause forcing of the furnaces, while the fumes and gases from soft coal will have a deteriorating effect upon the mortar in chimneys and thus lead to defective flue fires.

A number of householders are investigating the possibility of using fuel oil and kerosene burners in their furnaces, because of the difficulty in securing hard coal and their unwillingness to use soft coal because of the dirt and soot. This also will introduce serious fire hazards, because of the storage of oil on the premises, and the danger of feed pipes bursting and starting fires. No such appliance should be considered without ascertaining whether it complies with the underwriters' requirements.

Fire hazards which endanger the homes should be watched with special care, as the mothers and children run the greatest risk. All heating appliances should be installed and operated with constant attention to the unusual risks due to the changes in fuel, as well as to their ordinary dangers. Careful inspection should be made of all stoves, furnaces and flues before using them in the fall.

### HOW TO CALCULATE TURNOVER.

Every man engaged in an executive capacity in a commercial business knows the importance of Turnover in relation to the other factors which enter into the conduct of such a business. Turnover, like many other technical terms is interpreted in various ways. When one merchant speaks of Turnover he may mean something quite different to that which another merchant understands by the term. It is interesting, therefore, to study the interpretation which expert accountants place on the term, Turnover. Henry C. McGee, C.P.A., says that the rate of turnover is calculated by various standards.

"First by dividing the average stock at retail price for a stated period into the sales at a retail price for the same period.

"Second, by dividing the average stock at cost price for the period into the cost of net sales for the same period.

"Third, by dividing the average stock at cost into the amount of net sales at retail prices for a stated period.

"Fourth, by dividing the average of two inventories, at the beginning and end of the period, by the sales for the period.

"This last is not true turnover unless it should happen that the average of the inventories is identical with the average stock which it rarely is."

R. H. Montgomery, one of the leading accountants in America, says:

"That to ascertain the turnover, take the starting inventory, add the purchases or cost of manufacturing goods and deduct the inventory at the end, dividing the total by the starting inventory. Calculations are based upon a normal inventory. The result will be the number of times the capital invested in stock in trade has been turned over during the period. The capital invested in the stock and the physical stock itself may be used synonymously in referring to the turnover of a business."

---

The importance of the discovery of anthracite coal in northern Ontario, reported by A. F. A. Coyne, geologist, will not be fully appreciated until the product is placed upon the market. Last year Mr. Coyne was equally confident regarding oil prospects north of Edmonton, but the westerners who supplied the money did not find the investment profitable.

### ADDRESS CHANGED.

The Royal Financial Corporation, Ltd., have moved their offices to rooms 8 and 9, Winch Building, Victoria.

## Personal

CLARENCE F. SMITH, prominent Montreal financier, has taken over the active management for Canada of the National Surety Company as the managing director. It will be recalled that at the outbreak of the War, Mr. Smith resigned his offices of vice-president and general manager of the Ames-Holden-McCready Limited, as well as a number of other directorates, and offered his services to his country. He was the first chairman of the relief committee of the Montreal branch of Canadian Patriotic Fund and also a member of the Board of Military Hospitals Commission, Ottawa, organized for the taking in hand the returned soldier, with a view to his reinstatement as a civilian. During the period of the War and up to the present, Mr. Smith has given up his entire time to this work. In appreciation of this work, he was appointed Hon. Lieut.-Col. by the Militia Department in 1915. Mr. Smith also holds the following directorates: Montreal City & District Savings Bank; Home Bank of Canada; Prudential Trust Co.; Goodwin's Limited, etc.

F. D. L. SMITH, director and secretary-treasurer of the Canada Colonization Association, has been closely associated with the Western Canada Colonization Association since its inception, and played an important part in the recent negotiations with the Imperial and Canadian governments in elaborating the National Land Settlement plan.

Commander SIR THOMAS FISHER, K.B.E., R.N., of London, general manager of the Canadian Pacific Steamships, Limited, a notable figure in the steamship world, arrived in Montreal on Sept. 23 for a visit of several weeks. Sir Thomas Fisher was born in Birmingham, England, starting his naval career at Dartmouth as a cadet on the old wooden battleship Britannia.

W. B. WIEGAND, has been appointed general manager of the Ames-Holden-McCready, Limited, Montreal.

ALD. WALTER HARTTUNG has been appointed manager of the Kitchener Finance Corporation. Mr. Harttung has been associated with the Waterloo Trust and Savings Co., for eight years, latterly as manager of the Kitchener branch.

ROBT. HOBSON, president of the Steel Company of Canada, has returned from a pleasure trip to Europe, his tour covering England, France and Belgium.

HENRY A. LITTLE has been appointed manager of the Oxford County branch of the Canada Permanent Mortgage Corporation. At the same time becomes manager for the Canada Permanent Trust Company, a subsidiary company.

FRED MIDGLEY has been appointed inspector for Western Ontario of the London Guarantee and Accident Company, Limited, and the North Empire Fire Insurance Company, succeeding Wm. R. Bulloch, who is now in charge of the Montreal branch office of the London Guarantee & Accident Company, Limited.

R. A. NEVITT, formerly of Toronto, has been appointed manager of the Canadian bond department of the New York financial firm of Paine, Webber & Co.

ARTHUR PIERSON has been elected president of the Calgary Grain Exchange and E. J. Munson elected vice-president.

J. P. PRATT has been appointed assistant general solicitor of the Grand Trunk Railway.

J. M. QUEEN, of St. John, N.B., has been promoted to be manager of the British Columbia division of the Canada Life Insurance Co.

T. O. ANDERSON, who has been retired from business for a number of years, has been elected a member of the Standard Mining Exchange, Toronto.

RONALD COTTRELL has joined the Municipal Bankers' Corporation, Toronto, as institutional salesman. Mr. Cottrell was with the Canada Bond Corporation for three years and was previously with the Bank of Montreal in New York.

A. W. JOHNSTON, M.A., F.A.S., has been appointed assistant actuary of the Excelsior Life Insurance Company. Mr. Johnston is an honor graduate of the University of Toronto, where he was Fellow in Mathematics for one year after graduation. For the past six years he has been associated with the Excelsior Life Insurance Company.

CHARLES R. N. JONES, of the statistics branch of the Saskatchewan department of agriculture, has been appointed acting secretary of statistics.

ALLAN D. LAMONT has been appointed assistant manager in the Montreal office of the National Surety Co. of New York.

CLARK BROWN, has resigned his position as general manager of Canadian United Theatres, Limited, Montreal, and will shortly enter upon other theatrical employment in New York.

WILLIAM MACINNES, assistant manager for Canada of the Motor Union Insurance Company, Limited, has been appointed manager for the Dominion for the Motor Union and its allied company, the United British Insurance Company. He succeeds Frederick Williams, who has recently been appointed foreign agency manager at the head office, London, England

## Obituary

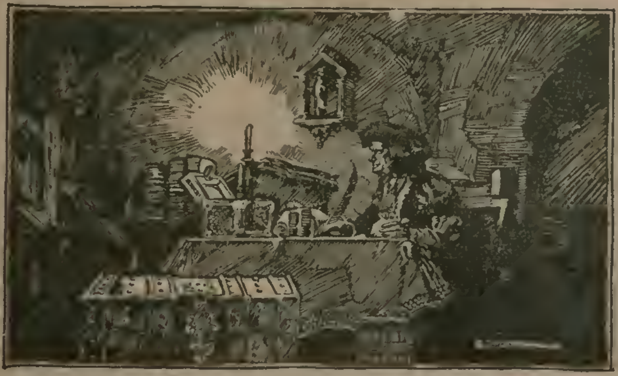
WILLIAM FARRELL, head of the British Columbia Telephone Company, died on September 12th.

BERNARD McNALLY, a member of the Montreal Board of Trade party visiting the Coast, died in Vancouver on September 23rd. Mr. McNally was vice-president of the St. Lawrence Sugar Refinery, Montreal, with which he had been connected for forty-five years.

BERNARD McNALLY, of Montreal, died in Vancouver on September 23, while on the centenary excursion of the Montreal Board of Trade. Mr. McNally had been secretary-treasurer of St. Lawrence Sugar Refineries for twenty years, recently retiring but still keeping in close touch with its affairs. He was in his 63rd year.

FRANK CHUTE, formerly manager of the Royal Bank of Canada at Yarmouth, N. S., committed suicide on September 18th, at Nasonworth, York County.

F. G. HAMILTON, manager of the Royal Bank at Bluesky, Alta., committed suicide recently.



## Investment

In the middle ages money was hoarded in strong-boxes, where it was kept idle and unproductive.

In modern times money is actively employed through Investment. And among the various forms of investment the Bond stands pre-eminent.

Bonds, at present price levels. afford an unusual opportunity to obtain a liberal income during future years.

Thirty years' experience enables us to advise you in the selection of an investment in which the principal is absolutely safe.

**REWARDS FOR CAPABLE SALESMEN**

Crown Life Agency Contracts offer rich rewards to the right man. If you have a talent for salesmanship, it will pay you to examine the possibilities of the proposition we have to offer. It is second to none in liberality. Write to-day. Correspondence confidential.

**CROWN LIFE INSURANCE CO., TORONTO**

## Don't Spare Your Wife

—only to leave trouble for your widow. Most men look upon it as an imperative duty in life to keep their wives free from financial cares and business worries. But what of the estate eventually left behind? Is it or any portion of it readily convertible into cash? Is it such that no worry is entailed in its preservation and investment? No man should leave trouble of this kind to his widow.

A Great-West Life Insurance Policy, payable in instalments to the beneficiary, under one or other of our income instalment plans, is about the safest and most care-free estate that you can leave. We will send you full particulars of these policies upon request.

| Call loans in Canada | 99,939,844 | 96,770,236 | 106,115.117 | — 5.82 | +1.81 |
| Call loans elsewhere | 176,838,615 | 175,219,091 | 157,757 835 | +12.11 | + 92 |
| Circulation | 158,086,569 | 161,887,327 | 197,461,372 | —19.98 | —2.36 |

The August statement of the chartered banks of Canada shows but little variation from the previous month's report, there being only three items showing an advance over the preceding month, and the remainder of the items showing minus signs.

As the bank statement is usually considered a good index to business conditions throughout the Dominion, it is not surprising that current accounts have again declined from the previous month, and call loans in Canada show a noticeably increase of almost two points over July.

**Increase in Call Loans**

It is not necessary to state that the month of August witnessed an active session on the stock markets, as a glance at the column "call loans in Canada," will show that there was an increase of slightly over a million and a half over July, and also a decided increase of nineteen million over August of last year. Whether the bank statement for the month of September will show an increase in call loans in Canada, is rather doubtful, as this was the month when the trouble in the Near East commenced, and, of course, the stock markets experienced a decided reaction for part of the month.

Current loans in Canada again show a contraction from the previous month, being lower by about two million from July. The decline, however, is not very large and can be perhaps explained that some corproations have been repaying their loans. The September bank statement will be awaited with interest as this is the month that the banks are extending credits for the movement of the crops. Last September there was an increase of thirteen million in current loans in Canada, but since that time they have been steadily declining. August's total is the lowest since September, 1919, when the total was $1,058,572,202.

The following table illustrates the trend of the current and call loan accounts in Canada since August a year ago:—

| Loans | Current in Canada | Call in Canada |
|---|---|---|
| 1921 | | |
| August | 1,226,467,704 | 106,115,117 |
| September | 1,239,637,351 | 106.729.270 |
| October | 1.243.748.818 | 105.362.186 |
| November | 1,210,101,634 | 104,392.115 |
| December | 1,174,053,434 | 113.071,089 |
| 1922 | | |
| January | 1,138,151,455 | 102.630,461 |
| February | 1,143,538,489 | 100,379,637 |
| March | 1,149,187,869 | 103,638,801 |
| April | 1,162,975,332 | 102,005,932 |
| May | 1,140,425,500 | 101.239,898 |
| June | 1,117,844,707 | 99,804,892 |
| July | 1,104,122,176 | 96,770,236 |
| August | 1,102,446,692 | 99,939,844 |

**Gold Holdings Increase**

The following is a comparison of changes in holdings of coin and notes during the months of July and August:—

| | |
|---|---|
| Gold and sub-coin in Canada | +$ 129,901 |
| Gold and sub-coin elsewhere | — 1,518,797 |
| Total changes | —$1,388,896 |
| Dominion notes in Canada | —$2,817,738 |
| Dominion notes elsewhere | + 1,987 |
| Total changes | —$2,815,751 |

Due to reductions in the quick assets column, the ratio of quick assets to total liabilities shows a slight decline from the previous month, standing at 23.09 per cent., as against 24.65 per cent. in July.

Although the ratio of liquid assets has been increasing steadily during the past few months, there was a slight decrease during the month of August, due to several minor changes in some of the banks' holdings. The ratio during the month stood at 49.5 per cent., as compared with 50.11 per cent. during July.

**Deposits Decline**

Deposits on demand have reached the lowest total since September, 1917, when the total was $451,749,532. The August total shows a decline of seventeen million from the previous month, and a decline of fifty-two million from last year. Deposits after notice are also lower from the previous month, being down by eleven million. They are also lower by one hundred and fifteen million from the same month last year. The following table is a record of deposits for the past thirteen months:—

| | Deposits on demand | Deposits after notice |
|---|---|---|
| 1921 | | |
| August | 527,362,713 | 1,279,830,731 |
| September | 534,307,452 | 1,263,763,852 |
| October | 565,650,636 | 1,251,323,839 |
| November | 555,901,712 | 1,252,227,394 |
| December | 540,942,522 | 1,240,807,268 |
| 1922 | | |
| January | 487,153,169 | 1,233,208,401 |
| February | 488,079,674 | 1,231,349,001 |
| March | 484,233,074 | 1,230,628,840 |
| April | 502,370,799 | 1,218,195,262 |
| May | 494,185,496 | 1,197,789,747 |
| June | 505,757,856 | 1,181,404,188 |
| July | 492,442,491 | 1,175,781,711 |
| August | 475,415,834 | 1,164,069,400 |

As this period of the year is usually the redemption of taxes, it is not surprising that loans to municipalities have dropped two million dollars from July. Of course there are other factors entering into this decline, such as bond flotations made by municipalities in order to pay off their debts to the banks. The August total is considerably lower than for the same month last year, showing a decline of over nine million dollars.

**Call Loans Increase**

As has already been pointed out that the stock markets enjoyed a busy month it can be expected that call loans abroad again show an increase, this month the increase amounting to slightly over a million and a half. The August total is also higher than last year, being up by nineteen million dollars.

Circulation during the month again showed a decrease, the decline amounting to slightly over three million dollars. The circulation of the banks has also decreased from last year by thirty-nine million dollars, although this can partly be explained by the fact that the purchasing power of the dollar has been considerably lengthened during the year, so that there is not the need for as much money to be circulated.

With the exception of minor changes in several of the assets and liabilities, the August bank statement shows little variation from the previous month.

Details of the August bank statement are given elsewhere in this issue.

## CHINESE BANK MAY OPEN BRANCH

H. L. Along, overseas manager of the Industrial and Commercial Bank of Hong Kong, was in Toronto on September 20 and announced their intention of opening a local branch. Exchange business is conducted almost exclusively.

# *Bank Branch Notes*

A new branch of the Banque Nationale will be opened in a few weeks in the Grand Allee Apartments, corner of Grand Allee and Lachevrotire street, Quebec.

Joseph Pratte, manager of the Provincial Bank at Riviere du Loup, Que., has been appointed manager of the branch of the Bank Nationale at that point, replacing Roland Dion, who has been placed at the head of another important branch of the bank.

In our issue of September 15th, the report that Gordon G. Laird, manager of the main Halifax office of the Canadian Bank of Commerce, has been appointed manager of the Bank of Hamilton, is incorrect. Mr. Laird has been appointed manager of the Canadian Bank of Commerce at Hamilton, Ont.

The branch of the Dominion Bank, at Portage Ave. and Kennedy St., Winnipeg, Man., will be closed on September 23rd.

La Banque Nationale have opened a branch at Notre Dame de Graces, 5623 Sherbrooke Street, west Montreal.

During the month of August the following seven branches of Canadian banks were opened: Commerce, Saskatchewan; Hochelaga, Beauceville, St. Prosper, (sub-agency) Quebec; Nationale, St. Eugene-le-Prescott, Que.; Provincial, Grand Mere, Que; Royal, Trinidad, Cuba; Standard, Danforth Ave. Toronto.

The following branches were closed:—Commerce, British Columbia; Nationale, Martineville, Luskville, Notre-dame-de-Rimouske, Que.; Provincial, St. Louis de Blandford, Que.; Royal, Thornhill, Ont., Sherbrooke, Belvidere and Drummond; Sterling, Newtonbrook, Ont.

## DOMINION GOVERNMENT SAVINGS BANKS

A further contraction in deposits is shown in the August statement of the Dominion Government Savings Banks. Withdrawals also show a decided decline from the previous month.

During August the deposits declined from $99,365 in July to $87,632 during the month under review. Withdrawals have also declined from $184,821 to $158,127.

The following is a comparison of balances as at the end of July and August:—

| | July 31 | August 31 |
|---|---|---|
| Victoria | $1,048,431 | $1,044,276 |
| Charlottetown | 1,703,881 | 1,681,178 |
| St. John | 4,198,931 | 4,175,843 |
| Barrington | 61,303 | 61,305 |
| Halifax | 2,223,209 | 2,202,828 |
| Kentville | 222,843 | 222,646 |
| Sherbrooke | 54,624 | 54,451 |
| | $9,513,224 | $9,442,530 |

## NEWSPAPER SOLD.

A transaction developing from the purchase of the Dominion Savings and Investment Society by the Hudson and Erie, is the sale of the London daily "Advertiser" to W. F. Herman, proprietor of the "Border Cities Star," Windsor. T. H. Purdons, K.C., who was president of the Dominion Savings, was president and publisher of the newspaper.

## BANK MANAGER IS SENTENCED.

Maurice Duncan, former Manager of the Bank of Toronto, at Yorkton, Sask., was sentenced on September 15th, to three years in the penitentiary on each of nine charges of uttering and two years on each of six charges of theft, the terms to run concurrently. A long sentence was unnecessary to a person of Duncan's education, said Judge Taylor of the Court of King's Bench, but in the interests of the community it was impossible to impose a punishment altogether disproportionate to the offenses committed.

Duncan was on Sep'ember 13 found guilty His defalcations totalled $72,000, of which restitution to the exent of $30,000 was made. The money was used for speculation on grain on the Winnipeg market, according to an admission made at the time the shortage was discovered.

# To Holders of Five Year 5½ per cent Canada's Victory Bonds

**Issued in 1917 and Maturing 1st December, 1922.**

---

## CONVERSION PROPOSALS

---

THE MINISTER OF FINANCE offers to holders of these bonds who desire to continue their investment in Dominion of Canada securities the privilege of exchanging the maturing bonds for new bonds bearing 5½ per cent interest, payable half yearly, of either of the following classes:—

(a) Five year bonds, dated 1st November, 1922, to mature 1st November, 1927.

(b) Ten year bonds, dated 1st November, 1922, to mature 1st November, 1932.

While the maturing bonds will carry interest to 1st December, 1922, the new bonds will commence to earn interest from 1st November, 1922, GIVING A BONUS OF A FULL MONTH'S INTEREST TO THOSE AVAILING THEMSELVES OF THE CONVERSION PRIVILEGE.

This offer is made to holders of the maturing bonds and is not open to other investors. The bonds to be issued under this proposal will be substantially of the same character as those which are maturing, except that the exemption from taxation does not apply to the new issue.

Holders of the maturing bonds who wish to avail themselves of this conversion privilege should take their bonds AS EARLY AS POSSIBLE, BUT NOT LATER THAN SEPTEMBER 30th, to a Branch of any Chartered Bank in Canada and receive in exchange an official receipt for the bonds surrendered, containing an undertaking to deliver the corresponding bonds of the new issue.

Holders of maturing fully registered bonds, interest payable by cheque from Ottawa, will receive their December 1 interest cheque as usual. Holders of coupon bonds will detach and retain the last unmatured coupon before surrendering the bond itself for conversion purposes.

The surrendered bonds will be forwarded by banks to the Minister of Finance at Ottawa, where they will be exchanged for bonds of the new issue, in fully registered, or coupon registered or coupon bearer form carrying interest payable 1st May and 1st November of each year of the duration of the loan, the first interest payment accruing and payable 1st May, 1923. Bonds of the new issue will be sent to the banks for delivery immediately after the receipt of the surrendered bonds.

The bonds of the maturing issue which are not converted under this proposal will be paid off in cash on the 1st December, 1922.

W. S. FIELDING,
Minister of Finance.

Dated at Ottawa, 8th August, 1922.

# Canada's August Trade Shows Increase

### Nine Million Increase in Total Trade Over Previous Month—Imports Show Seven Million Increase, and Exports Are Up By Three Million—Five Months' Total Slightly Lower, But Duty Collected Shows Improvement

That Canada is holding her own, as regards to trade, can be judged from the trade figures for the month of August which show that trade during the month is considerably higher than the previous month, and also shows a substantial increase over the same month of last year. Imports are up by seven million from the previous month, as also are exports. which have increased by three million from July.

There was very little variation in the imports, the total for each item during the month, showing a slight increase over the preceeding month. The largest increase during August was in iron and its products, which is up by about two million dollars. Fibres, textiles and textile products also show an increase of two million dollars over July, and the total is also higher than last year. The total trade for the five months ending August shows a reduction of sixteen million dollars from the same period of last year, but on the other hand, due to increased custom duties, the amount of duty collected shows a substantial increase over 1921.

Exports during the month show an improvement over the previous month, and are also considerably higher than for last year. The largest increases during August occurred in agricultural and vegetable products, which are up by three million from July, and wood, wood products and paper, which are also up by two million from the previous month.

Details of the August statement with comparisons are given herewith:—

## IMPORTS ENTERED FOR HOME CONSUMPTION

| | Month of August | | | | Five Months ending August | | | |
|---|---|---|---|---|---|---|---|---|
| | 1921 | | 1922 | | 1921 | | 1922 | |

**Toronto, Ont.** Sept. 27. Home of Daniel Olsen. Cause, unknown. Damage $1,200.

Home of Frank Lorcett. Cause, defective stovepipes.

**Windsor, Ont.** Sept. 25. Home of A. Tremblay. Cause, unknown. Damage $1,000.

Clothes cleaning establishment of L. Warren. Damage $50.

**Westfield, N.S.** Sept. 15. Barn on the farm of George Mansfield. Cause, lightning.

**Winnipeg, Man.** Sept. 21. Building occupied by W. J. Boyd Mfg. Co. Cause, unknown. Loss $40,000. Covered by insurance.

## EMPIRE FIRE INSURANCE CO.

Four of the former senior officers of the Merchants Fire Insuance Company, control of which recently passed to the London and Lancashire, are the proposed officers of the Empire Fire Insurance Company which is being organized. Harold W. McGee is slated as manager, George A. Gordon, as secretary, Alan Coatsworth as treasurer, and Wilfred I. Magee is inspector.

It is proposed to have $400,000 of the $500,000 authorized stock subscribed, with a cash payment of $25 per share and $5 premium. The company plans to write fire insurance only in Ontario, along strictly non-tariff lines.

## LECLERC INCORPORATION

Letters patent have been granted to Rene T. Leclerc for the incorporation of his investment banking firm which since 1901 has been carrying on business under his name. The firm will be known as: Rene T. Leclerc, Inc. Four members of the staff are taken in as partners; Lt. Col. Hugues L. de Martigny, J. Ernest Savard, Henri Turgeon and Georges Q. Soucie. Mr. Savard has been called to Montreal to take charge of the sales organization. Mr. Turgeon will become manager of the Quebec branch in his place.

## PRINCE RUPERT PULP AND PAPER

Unopposed judgment was entered by Justice W. A. Macdonald on September 19 in the foreclosure suit instituted by the J. S. Emerson estate against the Prince Rupert Pulp and Paper Company Limited. The Emerson estate is suing as holder of $650,000 of the $770,000 first mortgage bond issue. A sale of the assets already has been directed for October 13.

## ALBERTA CREDITORS ASSURED

Alberta will not likely follow the example of the other two prairie provinces in regard to the passing of a moratorium, which is now being considered by both Saskatchewan and Manitoba. Attorney-General Brownlee, under whose department are administered the debtor and creditor laws of the province, is authority for the statement that such a step will be resorted to only as a last resort, and that there is at present no thought of moving in that direction.

## REPRESENTS DUTCH CAPITAL

With the object of examining Western Canada as a field for Dutch investment and immigration, Dr. Vincent Van Peski, a prominent Dutch banker and director of investment companies, was in Regina on September 15, accompanied by L. Drogleever-Fortuyn, president of the Netherlands Investment Company of Canada, with headquarters in Winnipeg. Capital is waiting in Holland for investment in the Canadian west, according to Dr. Van Peski. He is much impressed with the country and will go back to Rotterdam advising exploitation by the various interests he represents.

The United Transatlantic Mortgage Company of Rotterdam, of which he is a director, has ten million dollars invested in Western Canada first mortgages through the Netherlands Investment Company of Canada. Dr. Van Peski consulted with McKenzie Brown & Company, and the McCallum and Hill Company, who are their legal and financial agents.

Speaking of immigration, Dr. Van Peski said that Baron Sandberg, a representative of the Government of Holland, was now in Canada to probe immigration possibilities and would soon start on a tour of the West to view lands that might be farmed by the new settlers.

# Insurance Licenses and Agency Notes

The Globe Indemnity Company of Canada has been granted a license authorizing it to transact in Canada the business of insurance against damage to property of any kind caused by the explosion of natural or other gas, in addition to the classes for which it is already licensed.

The Travelers Indemnity Company has been licensed to transact in Canada the business of insurance against damage to property, and liability for damage to the property or person of others, caused by the breakdown of any electrical machinery, in addition to the classes for which it is already licensed.

The Reliance Insurance Company of Canada has been granted a license authorizing it to transact in Canada the business of insurance against damage to property of any kind caused by the explosion of natural or other gas, in addition to the classes for which it is already licensed.

A license has been granted the Equitable Fire and Marine Insurance Company, authorizing it to transact in Canada the business of insurance against dmge to property of ny kind caused by the explosion of natural or other gas, in addition to the classes for which it is already licensed.

The Phoenix Insurance Company of Hartford, Conn., has been granted a license, authorizing it to transact in Canada the business of insurance against damage to property of any kind caused by the explosion of natural or other gas, in addition to the classes for which it is already licensed.

G. H. Eaton has been made district manager at Calgary for the North American Life Insurance Company. F. J. Whalley has been appointed district manager of the North American Life at Moose Jaw.

Walter G. Frisby, who has been secretary of the Ontario Mothers' Allowances Commission, has joined the Toronto city agency of the Manufacturers' Life.

H. N. Muldoon was recently appointed district manager for Eastern Ontario for the Travellers' Life.

## CANADIANS EQUALLED AMERICANS

Regarding the joint life underwriters' convention recently held in Toronto, the "Life Underwriters' News" says:—

"From the standpoint of attendance it set a world's record. There were over 1665 paid registrations. These were nearly equally divided among Americans and Canadians, ther being 800 Canadians registered. This establishes also a record for the Canadian Association. It is nearly 100 per cent. greater than any other convention of the Life Underwriters Association of Canada, Calgary (1919) holding the record of 457. The attendance at the first session was so large as to more than fill the big convention hall at the King Edward Hotel to capacity. It was not anticipated that there would be more than 1,200 delegates at the most and accordingly the Committee had to secure a new meeting place. They bought out the Allen Theatre and the afternoon session moved up there and the delegation had grown so large as to fill even the Allen Theatre clear through to the back seats."

## WORKMEN'S COMPENSATION BOARDS

Workmen's Compensation Boards of the provinces were represented at a convention held in Edmonton, Alta., Sept. 11-14. J. A. Sinclair, chairman of the New Brunswick Board, is president of the associated boards, while J. Sugrue, commissioner of the New Brunswick board, is secretary. Every province was represented except Quebec, which as yet has no system of public workmen's compensation.

## MANITOBA TREASURER

In our issue of September 8th, a personal item appeared referring to Hon. F. M. Black's appointment to the provincial treasurership of Manitoba; it stated that "Mr. Black associated himself with the firm of P. Burns & Co., Limited, of California." This should have read "Associated himself with the firm of P. Burns & Co., Limited, of Calgary."

# *New Incorporations*

Authorized capital of $12,073,975 is represented by companies whose incorporations were reported to The Monetary Times during the week ended September 23, compared with $9,152,250 the previous week. A comparative summary by provinces is as follows:—

| | Wk. end. Sept. 16 | Wk. end. Sept. 23 |
|---|---|---|
| Dom. | $4,835,750 | $ 1,875,000 |
| Alberta | ............. | 3,189,000 |
| B. C. | 740,000 | 145,000 |
| Man. | 194,000 | 20,000 |
| N. B. | 89,000 | ............. |
| Ont. | 2,993,500 | 6,570,000 |
| Que. | 300,000 | 154,975 |
| Sask. | ............. | 120,000 |
| Totals | $9,152,250 | $12,073,975 |

The following is a list of companies incorporated under Dominion charter with head office, authorized capital and the name of one of the directors:—Castrian Steamship Co. Ltd. (John E. Grivell) Montreal, $200,000; Baumert Co. Ltd. (Shas. A. Hale, Huntingdon, $150,000; United Holding Co. Ltd. (Stuart H. Brown) Toronto, $500,000; Signet Manufacturing Corp. Ltd. (Richard S. Finn) Montreal, $550,000; H. B. Mussen & Co. Ltd. (Harold B. Mussen) Montreal, $75,000; General Brokers, Ltd. (John L. Bourque) Montreal, $50,000; Otis Hann Co. of Canada, Ltd. (Otis Hann) Toronto, $100,000; Excelsior Ladies' Wear Ltd. (Wm. Rivenovich) Montreal, $50,000; Lamoreux-Kelly, Ltd. (Don P. Lamoreux) Montreal, $50,000; Rosenbaum Brothers of Canada, Ltd. (Wm. A. Brant) Winnipeg, $50,000; Welding Engineers, Ltd. (Henry N. Chauvin) Montreal, $50,000; Never Rip Clothing Co. Ltd. (Morris Cooperberg) Montreal, $50,000.

### Provincial Charters

**Alberta**—R. P. Graves Lumber Co. Ltd. Edmonton, $20,000; Palisade Coal Sales Co. Ltd. Calgary, $4,000; General Agencies, Ltd. Edmonton, $20,000; W. E. Chadsey & Son, Ltd. Shaver) Toronto, $2,000,000; Dominion Upholstering Co. Ltd. (Israel Agulnik) Ottawa, $40,000; Dundas Bowling Club, Ltd. (Joseph Singer) Toronto, $40,000; Erie Downs Golf and Countrp Club Ltd. (Caroline Brennan) Township of Bertie) $200,000; Riverdale Brick Co. Ltd. Archibald C. Macnaughton) Toronto, $40,000 Stratford Sanitarium Co. Ltd. (Michael Steele) Stratford, $60,000; Toronto Leases Ltd. (Walter H. Colere) Toronto, $40,000; York Coal Co. Ltd. (Jas. Franceschini) Toronto, $100,000; Graham-Rite, Ltd. (Alexander D. Crooks) Toronto, $150,000; Lake Erie Brick & Tile Co. Ltd. (Earl C. Avery) Leamington, $100,000; Lowry Contractors, Ltd. (James H. Campbell) St. Catharines, $40,000; Northern Ontario Mining and Development Co. Ltd. (Lawrence O'Connor) Sudbury, $250,000; Armour Heights, Ltd. (Wm. Mu-Lock) Toronto, $300,000; British-American Coal and Ice Co. Ltd. (Morris Shapero) Ford City, $40,000; A. Cope & Sons, Ltd. (Arthur Cope) Hamilton, $40,000; Royal Brush Co. Ltd. (Geo. H. Lovatt) Hamilton, $40,000; Soo House Furnishings, Ltd. (Isadore Goldenberg) Sault Ste. Marie, $40,000; Sterling Sales and Service Co. Ltd. (Zachriach T. Hill) North Bay, $50,000.

**Quebec**—Maison I. Pieltain, Ltd. (Alexander P. Mathieu) Montreal, $6,000; La Canadienne Publishing Co. Ltd. (Mary Lawlor) Montreal, $49,000; La Roue Valois, Ltd. (Jos. O. Rivard) Three Rivers, $99,975.

**Saskatchewan** — Western Cycle and Motor Co. Ltd. Regina, $25,000; Will Grant Grain Co. Ltd. Craik, $20,000; Palace of Sweets, Ltd. Prince Alpert, $25,000; McLean Trading Co. Ltd. McLean, $20,000; Chee Kong Tong Society, Saskatoon, $10,000; Craven Elevator Co. Ltd. Craven, $20,000.

## NEW MACHINERY

The Premier Paper & Power Co. is preparing to install a standard newsprint machine in its plant at Hartville, N.S. The machine will have a capacity of 15.000 tons per year. In order to provide the necessary power, the company is making an additional development of 5,000 horse-power on the river.

## CUSTOMS REGULATIONS

On and after November first, printed and lithographed matter of all kinds, including books and pictures and also wooden or fibre lead pencils, imported into Canada, must be stamped in such a manner as to indicate the country of their origin. Regulations to this effect have been passed by the Government, as provided for in the last session amendment to the Customs Tariff Act.

Surplus Strength of the
—Mutual of Canada—
The Company's General Surplus, representing the excess of assets over liabilities, amounts to
$5,790,520.70
This fund has been assigned as follows:—
First—Provision for dividends under Deferred Dividend policies issued prior to 1911 ........$3,688,146.75
Second—Provision for interim dividends under Quinquennial policies. 277,897.66
Third—Provision for dividends payable in 1922. 1,500,000.00
Fourth — Provision for Mortality, fluctuations and other contingencies .. .. .. .. .. .. 324,476.29
$5,790,520.70
The Financial Position of the Company is such and its dividend earning capacity continues to be so favorable that a Further Increase In Dividends has been decided upon for the year 1923.

## ONTARIO MINING PRODUCTION

### Nickel, Copper, Lead, Non-Metallic Minerals and Structural Materials.

With reference to Ontario's mining production for the first half of 1921, reviewed in part in these columns last week, the following facts are available:

Owing to the continued overstocked condition of the copper and nickel markets mining, smelting and refining operations have been greatly curtailed. The Mond Nickel Company was the only smelter operated, treating 93,148 tons of ore and producing 4,535 tons of nickel-copper matte, the two other smelters remaining closed. The International Nickel Company of Canada reopened its Port Colborne refinery on May 1 and treated 1,269 tons of matte. Nickel-copper matte on hand at Bayonne, N. J. (1,094 tons) was reshipped to Port Colborne, where oil refining operations will be conducted hereafter. The Bayonne plant has been scrapped, and some of the equipment shipped to Port Colborne. During the dull priod new uses and new markets have been found for nickel, and as a result the Copper Cliff smelter was restarted on September 1st, two converters being placed in commission. The Creighton mine was reopened a week previously. All mining and smelting operations by this company were suspended in August, 1921. The average price of electrolytic copper for the period was 13.02 cents per pound.

**Iron Ore and Pig Iron**

Moose Mountain, Limited, shipped benficiated magnetite in the form of briquettes to Electro-Metals, Limited, at Welland, makers of ferro-silicon.

Only three iron furnaces were in blast during the period, two operated by the Algoma Steel Corporation and one by the Steel Company of Canada. Of a total of 337,637 tons of ore smelted only 19,843 tons or 5.88 per cent. was of Ontario origin. In addition to the pig iron product mentioned in the table 164,616 tons of steel worth $5,567,256 were produced.

Ontario's only operating lead mine and smelter, situated at Galetta on the Ottawa river, are operated by the Kingdon Mining, Smelting and Manufacturing Company. The recovery noted in the table was made from 22,770 tons of ore. A blast furnace is being installed to treat the slag and flue dust which have accumulated from the Scotch hearth. A small recovery of lead is made from Cobalt silver ores by certain refineries in the United States, returns of which are received at the end of the calendar year. The average New York price of lead for the half year was 5.07 cents per pound.

**Non-metallic Minerals**

Heretofore data has been compiled annually for non-metallic minearls, hence the returns of output for the first six months of 1922 cannot be compared with a similar period in 1921 and for that reason the figures for the full year 1921 are given. It will be noted that in 1922 arsenic, graphite, gypsum, mica, peat, salt and talc show an increase in output over half the total figures for 1921. Arsenic is in good demand and an insecticide plant is in operation at Doloro to use part of the product there recovered from the refining of silver-cobalt-nickel arsenides. There is little activity in mica mining except in scrap mica, the prices for thumb-trimmed not being sufficiently high for profitable operation.

No statistics were received from producers, the estimate being based on the relative activity in construction in 25 Ontario cities as revealed by a comparison of the value of building permits issued for corresponding half-yearly periods in 1921 and 1922. The figures respectively are $24,421,333 and $34,685,905 or an increase in value of 42 per cent. in 1922.

## WINNIPEG GRAIN EXCHANGE ANNUAL MEETING.

### C. H. Leaman Expresses Optimism Concerning Present Year's Crop.

The annual meeting of the Winnipeg Grain Exchange was held on September 13 and there C. H. Leaman, retiring president outlined the past year's activities of the exchange. The officers for the ensuing year are as follows:—

President, J. B. Craig; vice-president, J. A. Richardson; secretary-treasurer, Robt. Magill; executive board, F. J. Anderson, J. E. Botterell, R. T. Evans, C. C. Fields, J. C. Gage, A. K. Godfrey, C. H. Leamon, D. C. Maclachlan, Donald Morrison, D. N. Potter, C. Tilt; committee of arbitration, Thos. Brodie, G. N. Heimbecker, D. N. Potter, A. Thomson, J. T. Hickman D. C. Maclachlan, A. P. White; committee of appeals, F. J. Anderson, C. E. Eggleston, R. R. Dobell, R. T. Evans, J. C. Gage, A. K. Godfrey, H. E. Sellers.

### Europe's Condition.

"The greatest difficulty in the marketing of the grain this year is the financial condition of Europe," declared Mr. Leaman in his address. "Germany in pre-war days was one of the most important buyers of North American wheat. The pre-war value of the German mark was about 24 cents Canadian money; today the Canadian dollar will buy over a thousand marks; and Canadian wheat delivered at Hamburg for $1.50 Canadian currency, would cost the Hamburg buyer over $300 a bushel, based on the pre-war value of the mark. It is not easy to sell wheat to Germany at the present time; indeed it is a puzzle how Germany is able to buy any North American wheat; but presumably as long as Germany is able to persuade any outsider to accept her marks—and the statement has been made that 40 per cent of the marks issued are held by foreigners—she will buy some wheat.

"The fact is obvious enough to us that the greatest difficulty in the marketing of any product of which we depend upon the overseas market is the ability of the buyers to pay. The depreciation of the currencies, the appalling burden of debts in Europe, the political uncertainty, the fear on the part of the United States that if she accepts goods in payment of the debts owing to her she will handicap her own industries—all these things result in this, that overseas buyers of wheat buy from hand to mouth, buy only what they must buy, buy only for the immediate and near future, and buy, not according to what they need, but according to what they can afford.

### Needs Surplus Food.

"There is no doubt that Europe needs all the surplus food which this continent will have; but there is no doubt that Europe cannot at present pay for what she needs. This is the one difficulty in selling our surplus supplies at satisfactory prices, and it is a difficulty which cannot be removed by any wheat board or by any change in the method of marketing."

In referring to the wheat board, the retiring president repudiated the charge that its collapse was brought about by the grain exchange. "As the grain exchange issued a public statement on the matter," he said, "I only wish to say this, that the grain trade exercised no influence whatever over Messrs. McFarland and Murray in the matter, and that the trade simply stood by the evidence given under oath before the committee of the House of Commons. I, for one, do not believe that the collapse of the wheat board proposal was due to anything the grain trade did, or did not do, in the matter of the personnel of the board.

Further, I do not believe that the collapse of the wheat board plan was due to any lack of powers given in the legislation to the proposed board. So far as western wheat is concerned, those powers were drastic, so drastic, indeed, that there is a doubt in the minds of some men competent to express an opinion, whether the powers would be confirmed in the courts in case of their being tested.

### Board Collapses.

"My belief is that the wheat board collapsed simply because men who know what international trading in grain is, that is to say, men who are competent to form an opinion on the matter, do not believe that a wheat board would be a more economical or a more efficient method of marketing grain than exists under private trading, or would justify the extravagant hopes of its advocates. The men who most loudly demanded a wheat board are men who never sold a cargo of wheat overseas, who are almost totally devoid of experience in grain trading. Men who have had such experience know that grain is marketed through existing commercial channels with a very small percentage of profit. They know that the main factors that determine wheat price levels in the world's markets, and they know that selling through a government agency would not modify those factors. They know that such an agency could neither raise those levels nor reduce the costs of marketing. And they believe that selling through a government agency is a fair-weather method that would be tolerated so long as there was a rising market and a high price, but is not a method that would long stand the test of adverse selling conditions.

### Crop Estimates.

"We have all read with deep interest the Free Press estimate of our prairie crop—over 371,000,000 bushels of wheat. This estimate assumes the official estimate of acreage published by the Dominion government. If it be correct, Canada will have over 400,000,000 bushels of wheat. Naturally, we are all delighted that the farmers' labor has resulted in such a bountiful crop. It is worth noting in passing, however, that it is not an easy matter to hold wheat off the market in the sense of preventing it having an effect upon prices, whether it be on the farm, in a country elevator, or at the lakefront. The Dominion government estimate of acreage is as well-known in the countries that buy our wheat, and to buyers there, as in Canada. For weeks past Boomhall's Corn Trade News has been publishing an estimate of our wheat crop not very far short of that of the Manitoba Free Press. Overseas buyers know that if Canada possesses that quantity of wheat, she can consume only about 100,000,000 bushels, and must export the balance of it in the form of wheat or flour, and must export it within the next twelve months. This has its effect on the price-level of wheat, whether the wheat is held on the farm or not. It is the effective demand for wheat in the importing countries, on the one hand, by effective demand I mean that which is backed by ability to pay—and the total available and prospective supply, on the other, that controls the price level of wheat; it is that and nothing else. The mere existence of that quantity of wheat on the farms of western Canada has its effect on the price-level. It is to be hoped that the estimate has not been exaggerated. There is a question about the government acreage figures, and I, for one, do not know of any service that the Dominion government could perform that would be of greater advantage to our producers than the publication of accurate figures of acreage and yield. While it will be a difficult matter for the grain trade to market this huge quantity of wheat under existing conditions, there is no doubt that the success of the producers this year will do a great deal to encourage the people generally."

---

## TRADE CONDITIONS IN CENTRAL AMERICA.

In a report appearing in the current issue of the Commercial Intelligence Journal, G. R. Stevens, Canadian Trade Commissioner in the West Indies, gives an interesting summary of trade conditions in the Central American republics, dealing in detail with Guatemala, Honduras, Salvador, Nicaragua, Costa Rica and Panama.

It is interesting to note that, in spite of the fact that these six republics represent a population of some 5½ millions, and import some $80,000,000 worth of goods per annum, this area seems to have been overlooked by the great majority of Canadian exporters. Mr. Stevens points out, in this connection that foodstuffs are the most important items of import, and that Canada should be able to compete against the world. Transportation facilities are available without trans-shipment through American ports, and especially to Guatemala, Costa Rica and Salvador, and the present time, in Mr. Stevens opinion, is auspicious for entry into these markets by aggressive Canadian exporters.

---

## DEEP WATERWAYS CONVENTION

The third annual convention of the Canadian Deep Waterways and Power Association was held in Welland on September 19. Over 100 prominent men interested in this movement were in attendance. Hon. Dr. R. J. Manion, Fort William; W. M. German, K.C., M.P., Welland; F. H. Keefer, ex-M.P., Port Arthur; Joseph Harris, M.P., East York; Mayor Wilson, Windsor; Mayor Paul, Woodstock; Mayor Stacey, Oshawa; Ald. Summerville and Burgess, Toronto; Controllers Jutten and Morrison, Hamilton, were among those who were in attendance.

Under the auspices of the Welland Board of Trade, the party visited the new Welland Canal and were shown the gigantic locks, 80 by 30 feet. It is proposed to put locks of similar size in the St. Lawrence, which will open the pathway from the locks to the sea.

## MONTREAL GETS COAL.

### British Empire Steel Corporation Shipping Large Amount to the Port.

Up to the time of the strike in the Nova Scotia coal pits the British Empire Steel Corporation had carried to Montreal port about 770,000 tons of bituminous coal as compared with 1,000,000 tons for the entire season of 1921.

Inquiries made at the head offices of the company showed that the Black Diamond fleet is still in full commission but that the officials of the company were in session trying to determine what the output would be for the balance of the season.

"Our output will not be up to the estimate we first made," said a prominent official. "We figured at the beginning of the season on bringing up 1,750,000 tons of coal to Montreal. I cannot even tell you if we will reach the big total of last year or exceed it. It would be a mistake to raise any false hopes or mislead the big buyers as to the amount which will eventually be brought here."

In pre-war days the average of the Black Diamond fleet of the Dominion Coal Company was 2,000,000 tons and the mark set this year by the company was a very promising one. It is certain, however, that the mines have been hurt by the recent labor trouble and it was further stated today that some mines at present cannot produce at all.

## NEW CUSTOMS RULING

The new Customs ruling, requiring that clearance papers only be issued to shippers when accompanied by a proper bond to insure the delivery of beer or "hard" liquor at its legitimate destination, was put into effect at Windsor, Ont., on Sept. 26. No clearance will be issued other than during regular office hours of the department, and proof must be furnished of the arrival of the consignment at its destination.

## TO CLOSE PLANT.

Just as soon as the present stock of raw materials is exhausted, which will be some time during this month, Baldwin's Canadian Steel Corporation will close their Toronto plant. Two reasons advanced by the management for the closing down are the inability to get a further supply of material, as well as a supply of coke.

Two other reasons advanced are, "the high tax charges which the company must meet, freight, duty, exchange and sales tax, while the plants in the United States generally enjoy free taxation until they are established and also a certain amount of protection by a protective tariff."

## ACTIVITY IN LOGGING.

Great logging activity is now under way in the Cowichan and Nitinat Lake district, which is the richest timber belt on the British Columbia coast. The output of logs from Cowichan Lake has now jumped to one million feet a day. This is just twice the former daily shipments.

The
National Surety Company
announces the appointment of
Mr. Clarence F. Smith,
as MANAGING DIRECTOR
of this Company for the Dominion of Canada.

This Company is the largest Guarantee Company in the World, transacting no casualty insurance.

Licensed in Canada to write Guarantee, Forgery and Burglary Insurance.

# Provinces' Expenditures Have Increased

### Total for 1921, Was Far Ahead of 1920, and Exceeded Ordinary Revenues—Per Capita Expenditures Were Highest in British Columbia—This Year's Estimates Show Some Improvements

Ordinary expenditures of the provincial governments in 1921 exceeded their ordinary receipts, according to figures compiled by the Canadian Bank of Commerce. New Brunswick and the four western provinces all spent more than they received. In commenting on the figures the bank says:—

"It has been our custom to refer from year to year to the annual statements of revenue and expenditure of the different provinces. We give below the latest figures as to date, together with a calculation which indicates the extent to which provincial governments as a whole have adjusted their expenditures to the needs of the times. The percentages at the foot of the third table art concerned with the "commodity" or ("service") value of ordinary expenditure per head for all the provinces and may be regarded as in some measure showing the ability of governments, during a national emergency, to reduce their purchases of services and commodities almost to half the normal amount, and their tendency to revert, as soon as the pressure is relieved, to their former scale of expenditure. It should be remembered that our calculations of the commodity value of these expenditures refers to the calendar year, whereas the statements for the provinces reter to fiscal years; the percentage of 111 given for 1921 will therefore cover a period of monetary deflation which affected to a comparatively small extent those provinces with fiscal years ending early in the calendar year. Even with this taken into account, however, it is obvious that the present tendency is to increase rather than to curb government expenditure per head of population."

* Estimated.

### Population and Per Capita Expenditures of Provincial Governments

(The yearly increases in population have been estimated from the census returns of 1911 and 1912, and in the case of the three prairie provinces from the additional census returns of 1916. The expenditure figures are calculated from those in the preceding table. The percentages used in comparing the expenditure per head in all the provinces for the years 1915 to 1921 with those for 1914 have been estimated on the average commodity value of the dollar in the years in question as calculated from the bank's monthly index number of wholesale prices in Canada. 1914 is taken as 100 per cent.

# *Municipal Finance*

**Toronto, Ont.**—The city has received to date this year taxes for 1922 amounting to $18,270,536 or 70.11 per cent. of the total $26,057,471, according to a statement on the collection of the second instalment of taxes issued by Finance Commissioner Ross on September 22.

The report submitted on July 5th giving the receipts on the first instalment showed that the amount received was no less than $14,788,625, or 56.75 per cent. of the total collectible, while the amount of the second instalment collection is $3,481,911, or 13.36 per cent., making the total amount received to date $18,270,536, or 70.11 per cent.

The total amount of taxes collected in 1921 amounted to $24,998,154, the amount paid by the end of the second instalment period was $18,308,439, or 73.24 per cent.

At the present time the overdne taxes (exclusive of those of 1922) amount to $2,250,622, of which amount $1,905,181 was due in 1921 and the balance, $345,441, previous to that year.

In addition to the amount received for the first and second instalment periods, there was also received this year the sum of $744,163 for arrears prior to 1920, and $1,611,979, for the year 1921, making a total of $20,626,678, leaving an aggregate amount outstanding of $10,037,557.

**Winnipeg, Man.**—For seven months ending July 31 the expenditures of the city amounted to $1,657,750 out of an estimate of $1,702,574, and against an actual expenditure of $1,907,734 for the same period last year.

**Hamilton, Ont.**—For the period ending September 18 total tax collections amounted to $3,371,798, as compared with $3,511,093 for the same period last year.

**Grimsby, Ont.**—The general tax rate for the year has been fixed at 43 mills on the dollar which, with the addition of the school rate of 16½ mills, will make a grand total of 59½ mills.

**Esquimalt, B.C.**—At the tax sale on September 11 thirty-two parcels of land were offered for sale, of which thirteen were sold and realized $1,236. The remaining forty-nine lots, for which no bids were received, were taken over by the corporation, the taxes and costs on which amounted to $7,343.

**St. Catherines, Ont.**—According to the assessment roll the population of the city now stands at 21,192, an increase of 291 over last year. The total assessment now stands at $22,958,650, an increase of $6.662,190 over last year.

**Levis, Que.**—At a meeting of the council on September 19 the budget for 1922-23 was submitted which showed that the estimated revenue for the year was $111,526, and expenditures were estimated at $111,526. The waterworks revenues are set at $68,037.

**Guelph, Ont.**—The assessment figures for the present year as compiled by Assessment Commisioner Hastings show that there has been an increase in the assessment over that of last year of $339,993, which at the present tax rate will bring into the city treasury next year close to $13,000. The total assessment of the city is now $13,912,477. The amount of fixed assessment for this year is $319,100, as compared with $467,600 last year. The total assessment for school rates amounts to $590,700, as against $919,800 last year. There was an increase of 393 in the population during the year.

**Moosomin, Sask.**—The tax rate for the year has been struck at 46 mills on the dollar, made up as follows: General rate, 13.5 mills; debentures, 9.6 mills; public school, 12.7 mills; collegiate institute, 8.2 mills; public revenue, 2 mills. The new rate is 2 mills higher than last year.

**Winnipeg, Man.**—Out of a total levy of $500,000 for business taxes, an amount of $481,884 had been paid up to September 15.

## WRITE TO BOND HOLDERS.

Communications were recently sent by the finance Department to 100,000 registered holders of 1922 Victory bonds drawing their attention to the conversion privileges announced by the Minister of Finance. Replies were not called for. But holders of the 1922 bonds were asked to surrender them to any branch of any chartered bank, signifying the maturity of the new bonds desired and obtaining receipt on the official form provided.

## BUSINESS LOOKS FOR IMMIGRANTS.

### Should be Stimulus, According to Views Expressed at Toronto Meeting.

That business regards a sane immigration policy as a panacea for many of its ills,, was indicated on September 8 when representatives of boards of trade in all parts of Ontario met in conference in the Toronto Board of Trade rooms and endorsed the principle of importing into this country all the farm labor that could be secured and of encouraging the supply by advertising and by representatives abroad. By this policy, it was reasoned, the country's unemployment could be solved, the increased population causing a brisker demand for the manufactured goods produced by Canadian industries.

### British Settlers.

The meeting was undertaken at the instance of the Hamilton Chamber of Commerce, with the assistance of the Toronto Board of Trade, to arouse interest throughout the province and the country generally in the subject of immigration. The provincial Minister Agriculture, the Hon. Manning Doherty, and W. C. Noxon, Agent-General for Ontario in London, were present, and outlined fully the presnt policy of the provincial Government in this respect.

While all those present were in favor of doing everything possible to secure the proper type of immigrant from Great Britain, at the same time it was considered that it would be difficult to fill Canada with settlers from there alone, and in addition, it was considered that the Government should give careful consideration to the selection of settlers from certain countries of northern Europe and United States. The whole trend of the discussion was along the lines of securing farm laborers with families and British boys.

---

## FUR PRICES HIGHER

Three days sessions of the Canadian Fur Auction Sales Company. Ltd., ending on September 14 in Montreal, served to demonstrate a considerably higher tendency in fur prices as compared with prices last May. The total sales were over $1,500,000. The auction drew buyers from a number of foreign countries, specially from the United States. The results of the auction were very satisfactory, 90 per cent., of all the skins offered being bought, and the shippers were very well satisfied with the results.

Considering the season the offerings as a whole were small, which is one of the reasons for the higher prices, and another factor is that there is a very urgent immediate demand for what was offered.

---

## KIRKWOOD LINE, LTD.

The Kirkwood Line, Ltd., have put the steel steamer "Greypoint," carrying 1,200 tons d.w. on the Montreal - Toronto route. The boat will make one round trip per week, sailing from Toronto every Saturday at 4.00 p.m. and from Montreal every Wednesday at 6.00 p.m. The company has freight sheds at Toronto, Montreal, Three Rivers, and Quebec.

# Government and Municipal Bonds

Although conditions in the Near East appear to have had some effect upon the stock market, they do not seem to have embarrassed the government and municipal bond market. Prices have remained firm with an inclination to advance in some issues, and sales during the week were fairly heavy and very good prices were received in the majority of the sales.

The two western issues, the three million Alberta issue, and the one hundred and fourteen thousand Regina issue, created considerable interest among the dealers, the bidding for both these issues showing a very narrow margin between the highest and lowest tenders. Several Ontario municipalities floated loans during the week with evident success, the prices in most cases being around par.

The prices paid by bond dealers during the past week is evidence that the market is in a healthy condition to absorb all the future offerings. Should the market continue in this way there are several municipalties which are coming into the market to finance their requirements. The city of Winnipeg will borrow one million; Toronto will require an unstated amount; Ottawa will probably borrow several million, and the Metropolitan Commission of Montreal will be floating a loan of $3,100,000 for various purposes. The one issue which the dealers are waiting for is the ten million Ontario loan, and if the market is in a receptive mood, there is no doubt that the loan will be floated within the next week or so.

### Tenders Invited

The following is a list of debentures offered for sale, particulars of which are given in this or previous issues:—

| Borrower | Amount | Tenders Close |
|---|---|---|
| Hamilton, Ont. | $500,000 | Sept. 29 |
| Three Rivers, Que. | 46,000 | Sept. 29 |
| Hull, Que. | 331,500 | Oct. 2 |
| Vancouver | 250,000 | Oct. 9 |
| Stormont, Dundas and Glengarry Counties | 150,000 | Sept. 29 |
| Pointe Claire, Que. | 100,00 | Oct. 10 |
| Dryden, Ont. | 50,000 | Oct. 3 |
| Coaticook, Que. | 40,000 | Oct. 9 |
| St. Bernardin-de-Montreal, Que. | 36,000 | Oct. 2 |
| Renfrew County, Ont. | 20,000 | Oct. 2 |
| Acton-Vale, Que. | 18,900 | Oct. 3 |
| Thorold, Ont. | 15,500 | Oct. 9 |
| McGillivray Twp., Ont. | 12,505 | Oct. 9 |
| St. Joseph, Que. | 8,000 | Sept. 30 |
| Richmond Twp., B.C. | 7,500 | Oct. 2 |

**Dryden, Ont.**—Tenders will be received up to 6 p.m. October 3, 1922, for the purchase of $50,000, 6 per cent., 30-instalment debentures, dated October 1, 1922, and guaranteed by the province of Ontario. J. E. Gibson, town treasurer.

**Renfrew County, Ont.**—Tenders are invited up to 12 o'clock noon, October 2, 1922, for the purchase of $20,000, 5½ per cent., 10-year debentures, dated October 1, 1922. R. J. Roney, county clerk, Pembroke.

**Hull, Que.**—Tenders will be received up to 4 p.m. October 2, 1922, for the purchase of the following debentures: $100,500, 5½ per cent., due May 1, 1962, $99,000, 5½ per cent., due May 1, 1952; $5,000, 5½ per cent., due May 1, 1942; $34,000, 5½ per cent., due May 1, 1937; and $93,000, 5½ per cent. due May 1, 1947. With the exception of the first lot of bonds, which are in denominations of $500, the remainder of the debentures are in denominations of $1,000. Interest payable May 1 and November 1. H. Boulay, city clerk.

**Thorold, Ont.**—Tenders will be received up to 8 p.m. October 2, 1922, for the purchase of $15,500, 6 per cent., 20-annual instalment waterworks debentures. D. J. C. Munro, town treasurer.

**Vancouver, B.C.**—Tenders will be received up to 12 o'clock noon, October 9, 1922, for the purchase of $250,000, 5½ per cent., 30-year waterworks debentures. Alternative bids are asked for bonds payable in Canada only, and bonds payable in Canada and United States. A. J. Pilkington, city comptroller. See official advertisement in this issue.

**McGillivray Township, Ont.**—Tenders will be received up to 12 o'clock noon, October 9, 1922, for the purchase of $12,505, 6 per cent., 10-instalment debentures. Oliver Amos, township clerk, Parkhill, Ont.

**Richmond Twp., B.C.**—Tenders will be received up to October 2, 1922, for the purchase of $7,500, 6 per cent., 25-year debentures. S. Sheppard, clerk and treasurer, Ebrune, B.C.

### Bond Sales

**Alberta.**—National City Co. was the successful bidder for the $3,000,000, 5 per cent., 20-year debentures paying a price of 97.334, the money costing the province about 5.22 per cent. Alternative bids were asked for bonds payable at 5 and 5½ per cent. The following is a list of bids:

| | | |
|---|---|---|
| National City Co. | 97.334 | 101.698 |
| A. Jarvis & Co., Brown Bros., and Minnesota Loan Co. | 97.31 | 103.13 |
| Miller & Co., and Brandon, Gordon & Waddell | 97.177 | 102.777 |
| Seaboard National Bank; Rutter & Co.; Payne, Webber & Co.; McKinley & Morris; Clarke, Williams Co.; Post & Flagg; and J. E. Price & Co. | 97.03 | 102.03 |
| A. E. Ames & Co.; Continental & Commercial Trust & Savings Bank; Guaranty Co.; and Blythe, Witter & Co. | 97.013 | 101.506 |
| Dominion Securities Corp., Wood, Gundy & Co.; and Dillon, Read & Co. | 96.715 | 101.311 |
| R. A. Daly & Co. | 96.65 | |
| R. C. Matthews & Co.; Wells, Dickey & Co.; Halsey, Stuart & Co.; and Blair & Co. | 96.56 | 101.56 |

**Nepean Township, Ont.**—Bell, Gouinlock & Co. have purchased $90,000, 5½ per cent., 30-instalment school debentures at a price of 99.25, the money costing the township approximately 5.57 per cent.

**Mundare S.D., Alta.**—An issue of $7,000, 8 per cent., 15-year debentures has been sold to Wilkie, Hunt & Kilburn at a price of 104.50, the money costing the municipality about 7.39 per cent.

**Teck Township, Ont.**—The Township has disposed of locally, $60,000, 6 per cent., 15-instalment debentures at par.

**Fredericton, N. B.**—An issue of $34,000, 5 per cent., debentures due serially from 1932 to 1946 has been purchased by A. Jarvis & Co., at a price of 95.66. Tenders for the issue were as follows:

| | |
|---|---|
| A. Jarvis, & Co. | 95.66 |
| Bell, Gouinlock & Co. | 95.52 |
| Wood Gundy & Co. | 95.178 |
| J. M. Robinson & Sons, Ltd. | 94.60 |
| Eastern Securities Co. | 94.151 |
| A. E. Ames & Co. | 94.09 |
| National City Co. | 94.05 |
| R. A. Daly & Co. | 94.03 |
| Thomas, Armstrong & Bell Co. | 92.43 |

**Yorkton, Sask.**—The town has sold $86,500, 5½ per cent., serial bonds to the Bonds & Debenture Corp., at a price of 99.07.

**Quebec, Que.**—A syndicate headed by Rene T. Leclerc was the successful tender for the $495,000, 5½ per cent., 10-year debentures, paying a price of 99.77, which means that the cost to the city will be about 5.53 per cent. Alternative bids were asked for bonds payable at 5½ per cent., and repayable in 10-years, or bonds payable at 5 per cent., and repayable in 20-years. This issue created considerable interest, there being very little variation in the offers. The following is a list of tenders:

| | 5½ p.c. | 5 p.c. |
|---|---|---|
| Rene T. Leclerc | 99.77 | 94.05 |
| Wood, Gundy & Co. | 99.68 | 95.21 |
| R. A. Daly & Co., and Hanson Bros. | 99.56 | 94.275 |
| Dominion Securities Corp. | 99.56 | 94.835 |
| A E. Ames & Co., and Canadian and Foreign Securities Corp. | 99.4139 | 94.1559 |
| MacKenzie & Kingman, and Paine, Webber & Co. | 99.35 | 94.08 |
| Nesbitt, Thomson & Co., and Gairdner, Clarke & Co. | 99.33 | 95.11 |
| McLeod, Young, Weir & Co., L. G. Beaubien & Co., and Comptoir Financier Canadien | 99.32 | 94.27 |

### AMHERST BUSY.

#### Robb Engineering Works Have Received Several Large Orders.

According to a recent despatch from Amherst, N.S., the Robb Engineering Works have received a goodly number of orders and the outlook for the future continues bright. Orders have been received from Montreal for ten boilers, some of which are Victoria boilers for heating large buildings, and other steam boilers for power purposes.

Orders have also been received for two large engines for a large paper company in Fort William, Ont. The engines are Robb Armstrong automatic cut off of 250 horse power each. In addition to these, orders are expected for four large boilers seventy eight inches in diameter from two large factories in the Maritime Provinces.

Orders also have been received for a number of buoys from Department of Marine and Fisheries. These will be built as soon as material is received.

These orders will mean much work for the boiler shop and foundry and also considerable work for the engine dept., and pattern shop.

### PULP MILLS RE-OPEN

The pulp mill at Campbellford, Ont., owned by the Hydro-Electric resumed operations this week with a full staff, after being closed since March, 1921.

### MARITIME TRADE BOARDS

Decision to employ the services of a permanent secretary with the assistance of the provincial governments of the Maritime Provinces was reached at the concluding session of the 1922 convention of the Maritime Boards of Trade in St. John on September 8.

A per capita assessment also will be made on the various boards throughout the provinces to maintain this new office.

Captain J. E. Masters, of Moncton, a former president of the Maritime board, was elected president for the ensuing year with G. Fred Pearson, of Halifax, and Wallace L. Higgins, of Charlottetown as vice-presidents.

Favorable action was taken on resolutions dealing with the establishment of a research bureau, and the utilization of Canadian seaports for Canadian trade. The board will exert its influence with the Department of Railways to change the system of handling automobiles on the car ferry to Prince Edward Island and also with the express companies to secure a rate for the island fishermen as low as that granted from Halifax and Sydney to points west of Montreal.

### CANADIAN MILLERS' ASSN.

The announcement is made that the Canadian National Millers' Association will hold its annual general meeting in Montreal on September 22nd. Representatives from practically every large mill in the country are expected to be present. This is the first time that Canadian millers have held a convention in the city of Montreal. During the day, while the millers are in convention, a report of last year's activities and policies for the coming ye will be discussed.

Careful Investing

Safety of principal, prompt interest payment and "marketability" are requisites of a satisfactory investment.

Our offering of City of Toronto 5% bonds possesses all three.

You may purchase bonds due in any year from 1927 to 1933. At present prices, (which are below par) the interest return is 5.40% —an attractive yield from a security of so high a grade.

# *Stock Markets*

With the war clouds still hanging over the Near East, the past week on the securities markets was marked by further influential occurrences. Trading continued to be almost as heavy as the previous week and sellers outnumbered the buyers. Prices continued on somewhat the same level as formerly, although, on the whole, there was a slight strengthening towards the latter part of the week under review.

The market continued on the same trend up until Friday, when, while there persisted a weak feeling in the trading the net result was considerably better than that of the previous day. This movement gained considerable momentum during the following days and the trading was marked by a decided show of strength, with the paper group leading the advance, and every issue of importance in that section regaining the ground which was lost during the preceding week. Practically every security of any importance was traded in during the latter part of the week under review, and, although gains were shown in quite a number of places, the securities have a long way to go yet before they can regain their former positions held before the pronounced break last week following the announcement that Canada might again be called to war.

### Paper Prices Advance

Announcement of an advance in the prices of high grade pulp products is regarded by the market as a step of the greatest importance to an outstanding Canadian industry. Prices have been seriously depressed ever since the sharp deflation which followed very rapidly several years ago after the end of the war and had a serious effect on the financial position of many companies. From recent advices it appears that the trade is now coming into its own again with the result that there will be a better business and more satisfactory profits. While the lower grades of pulp have not yet been directly affected it is generally expected that they will soon feel the influence of the better situation and advance in price. Some brokers claim that they have been selling out of line for some time past.

Whether the markets will continue the same trend as exhibited during the latter part of the week is a matter of doubt. Cables from Europe contain conflicting reports of the situation there, which in turn have an effect upon the markets on this side of the water. However, it is generally anticipated that European conditions will improve and Canada will again be able to settle down and enjoy her prosperity.

### Mathews Steamship Co.

R. A. Daly & Co. are offering a new issue of $400,000, 7 per cent., 10-instalment mortgage bonds of the Mathews Steamship Co. Ltd., at a price of 100 and interest, yielding 7 per cent.

The bonds are dated September 15, 1922, with principal and interest payable at Toronto, Montreal or New York at the holder's option. Bonds are in denominations of $1,000 with privilege of registration as to principal only, and are callable in whole or in part on any interest date at the option of the company on sixty days notice at 102½ and accrued interest. The bonds mature at the rate of $40,000 annually.

The capitalization of the company is $2,000,000 common stock, of which $600.000 has been issued, and $700,000 in bonds, which have been issued for the construction of steamships.

The Mathews Steamship Co. was incorporated in 1905 and is one of the largest transportation companies on the Great Lakes, owning and operating a fleet of steamers having a dead weight tonnage of 63,000 tons engaging almost entirely in the carrying of grain from the head of the lakes to Montreal. The total carrying capacity of the fleet is about 2,300,000 bushels of wheat.

The bonds are secured by the covenant of the company which has a combined capital and surplus of approximately $2,000,000, in addition to a direct mortgage on the two largest and finest of the company's steamers, viz., the "Mathewston" and the "Berryton." The former boat was built at a cost of $800,000 and the latter at $375,000, thus making the actual cost of the security behind the bond issue, at depreciated prices prevailing this year, of $1,175,000, or almost three times the amount of the present bond issue. The two boats are covered by full marine insurance of $1,300,000.

## FAILURES AHEAD OF LAST YEAR

### Total for Second Quarter Was 805, Compared With 467 Last Year—Both Assets and Liabilities Higher

Failures in Canada are much more numerous this year than last, according to records of R. G. Dun and Co. Below is given a tabulation of their figures by weeks for 1921 and for 1922:

| 1921 week ended | | 1922 week ended | |
|---|---|---|---|
| Jan. 7 | 40 | Jan. 6 | 73 |

## EDWARDS AND AMES

The financial firm of Edwards & Ames have moved from the Williams Building, Vancouver, to large and commodious offices in the Pacific Building.

## ALLEN THEATRES LTD.

Following the argument before the Ontario Courts on September 19, the court refused to approve the time extension scheme submitted by the Allen Theatres, Limited, but the suggestion was made that the business could be continued in bankruptcy under the control of the trustees and inspectors. This will likely be done.

At a meeting of the creditors, a resolution had been passed extending the time for payment of the debts for an indeterminate period. At that time a committee was appointed with power to compromise claims and mortgage assets for funds but as certain creditors representing some $60,000 objected and maintained that the terms of extension asked for were not in accord with the provisions or intentions of the bankruptcy act, the court refused to approve the plan of extension as submitted and passed by creditors holding claims of more than $500,000.

The point was raised during the argument that, if the extension of time were approved, the assets might pass out of the control of the trustees. In this connection it was stated that it was never the intention of the creditors that this should happen.

# *Unlisted Securities*

The report on the unlisted market, issued by A. J. Pattison Jr. & Co., states that the depression which occurred in the listed market following the European news was not reflected in the unlisted market. Taken over the whole week but few declines occurred and these were only fractional, with the exception of the oil stocks, which were weak. Investment demand still continues in good volume, many of the better issues showing signs of reaching higher figures than those at present obtainable.

Nova Scotia Steel 6% Debentures under steady demand moved up to 89½ bid. Abitibi General Mortgage 6's at 94½ bid show a gain of 1 point. It was impossible to obtain offerings on either of the above issues up to the close of the market. Brompton 8's at 103, Spanish 8's at 104 bid, and Provincial Paper 6's at 96½ bid all show a gain of 1 point for the week.

Canadian Westinghouse on small offerings eased to offered at 115 without creating interest. Small lots of Famous Players Preferred changed hands at 54½. Alberta Pacific Grain Preferred was slightly stronger at 89-90. B. A. Oil moved from 34 to 35⅝ within one hour. The stock closed after this high sale at 34½-35½.

Imperial Oil which has been very dull lately, closed 3 points off at 110-112. King Edward Construction Preferred with a bonus of common was somewhat active at 91-94. Mattagami Debentures at 42½-45 show a gain of 2¼ points for the week. On the whole the market has proved itself to be in excellent condition and should move higher.

## CANADIAN MARKET IN SOUTH AMERICA.

### Movement on Foot to Aid Trade Between Continent and Canada.

According to R. W. Gould, secretary of the Canadian Export Club, of Montreal, South America offers as good an export market for Canadian natural products as any other country in the world, especially as in that country, United States funds are at a discount.

Mr. Gould stated that there is a movement on foot to bring about better export trade with South America and to change the present system of imports into Canada by way of New York, thereby creating direct import trade.

Dried codfish formed the chief Canadian export to Brazil up to the end of the fiscal year March 31, 1920, 99,349 cwts., to the value of $1,379,771 being exported. Pollock came next with 7,005 cwts., valued at $77,284.

Over 2,900 barrels of flour went from this country to Brazil, valued at $30,434. Malt, 1,863 bushels, valued at $4,989 was exported and pneumatic tires valued at $66,914 and other tires to the value of $9,447.

Locomotives and parts held a good place on the export list, $245,385 being the value. A few other exports were sewing machines, $285,214; autos $181,304; coal, 1,587 tons, $19,837; glass, $21,280 and calcium carbide, $13,334.

A comparison of Canadian exports to South America since 1916 shows $1,059,700 in that year; in 1917, $1,028,163; 1918, $974,378; 1919, $4,088,534, and 1920, $2,703,488.

The one drawback to a much more extensive export trade is the 20 to 30 per cent. off duty allowed to the United States, said Mr. Gould.

## DRYDEN CO. EXPANDS

Advices from Dryden, Ont., indicate that good progress is being made in the development and expansion of the Dryden Paper Company. The firm is developing a further 1,200 h.p. electric power, and the paper plant is being enlarged with a view to doubling the company's production of wrapping paper. A small groundwood mill is also being established. The company will then produce finished and machine-glazed krafts, manillas, and fibre papers, together with lightweight lines.

## CANADIAN ANNUAL REBIEW

The 1921 edition of the "Canadian Annual Review," by J. Castell Hopkins, has just been issued making the 21st number. It is larger than its predecessors, having over 1,000 pages. Special sections relate to financial and other economic affairs. The Review is published at 2 College Street, Toronto.

## CANADA TO TAKE LEAD IN PAPER PRODUCTION

### Edward Beck Delivers Address Before Paper Men At Groveton, N. H.

Speaking before an audience of practical paper men on the "Past, Present and Future of the Paper Industry" at Groveton, N. H., on September 14, Edward Beck, manager of the Canadian Pulp and Paper Association declared that we are living in a "paper age" and that paper is its most essential commodity, and that Canada is destined soon to outstrip all other countries in the production of woodpulp, newsprint and the coarser grades of paper, in which she is fast overtaking the United States, her chief rival, as well as to become an increasingly important factor in the production of fine and miscellaneous papers.

Mr. Beck traced the orgin and growth of the industry and its gradual development in Canada and showed that during the past 40 years the number of Canadian concerns making pulp and paper had increased from five to over 100, the invested capital from $92,000 to close upon $400,000,000, the number of persons employed from 1,000 to more than 30,000, and the annual value of the products from $63,000 to more than $200,000,000. Exports from Canada of pulp and paper had risen from $122 in 1890 to $163,655,344 in 1921.

Canada, it was stated, has the largest single newsprint mill in the world, the Abibiti Power & Paper Company's mill at Iroquois Falls, Ont.; the fastest newsprint machines in the Laurentide Company's mill at Grand Mere, Que.; the largest groundwood pulp mill, owned by the Chicoutimi Pulp Co. Ltd. at Chicoutimi, Que., and the largest kraft mill, owned by the Wayagamack Pulp & Paper Co. at Three Rivers, Que.

### Production Tripled.

Canada's production of newsprint had about tripled since 1913 while that of the United States had virtually stood still. In the first seven months of the current year Canadan newsprint mills had produced 643,858 tons, a larger amount than had been produced in any single year prior to 1917. The year's output will run well over 1,000,000 tons.

There are now under construction, it was stated, two new newsprint mills, one at Three Rivers, Que., and one at Fort William, Ont., each of which will add 120 tons a day to the producing capacity. The Bathurst Company, Ltd., are about to build a 50-ton newsprint mill at Bathurst, N.B., which will later be increased to 100 tons. Contracts have been awarded for the first unit of a new $13,000,000 plant at Elko, B.C., which, when completed, will give an additional 100 tons and ultimately probably three times that amount. Two of the older mills are adding new paper machines and a new two-machine book paper mill is under construction at Port Arthur, Ont. A 20-ton light weight specialty mill is under construction at New Westminister, B. C. These developments indicate a potential output of 1,500,000 tons of newsprint by Canadian Mills in 1924, it was stated, or about 60 per cent. of the present total consumption of that class of paper used on the North American continent, and as much as was produced in the United States and Canada combined prior to 1912.

The common interest of Canada and the United States in these developments was pointed out and a plea made for a mutual understanding of what each country should mean to the other in this respect. Many of the Canadian Mills, it was stated, are financed by American capital, Americans owning more than one-fourth of all the stocks, bonds and other securities represented in the total investment. The United States, with its annual per capita consumption of 40 pounds of newsprint and of 60 pounds of other grades of paper, was totally unable to supply its full requirements of these commodities but had in Canada a near-by and favorable source of supply. Canada, on the other hand, recognized the advantage of the American market and was entirely willing to cooperate in the common interest.

### Conservation.

The question of raw material was touched upon and it was said that Canada is now consuming over 3,000,000 cords of pulpwood yearly and exporting 1,000,000 cords additional. Consumption of pulpwood was increasing at the rate of over 150,000 cords a year. A great deal is being destroyed by fire and other means. It was a serious question how much longer the supply would last unless greater consideration was given to its conservation and renewal, subjects in which the Canadian authorities were only just now beginning to show a lively interest.

Groveton is a paper mill town and the site of one of a group of mills on both sides of the line owned and operated jointly by the Brompton Pulp & Paper Co., Ltd., with headquarters at East Angus, Que., and with mills at that point and Bromptonville in Canada and at Groveton and Claremont in the United States.

---

## SOUTHERN CANADA POWER

A tour of inspection of the territory served by Southern Canada Power was made on September 15 by a party of about forty, under the auspices of Nesbitt, Thomson & Co. The first stop was St. Hyacinthe, where the plant of the Canadian Manhasset Cotton Co., proved a source of interest. At Drummondville the power plant of the Southern Canada Co. on the St. Francis River was visited, and here also were visited the plants of the Butterfly Hosiery Co., the Gossard Corset Co., and the Jenks Spinning Co.

---

## CANADA STEAMSHIP LINES

The keen demand for vessels to carry coal to Canada from England and Wales has provided cargoes for four of the ocean vessels of Canada Steamship Lines that otherwise would have been idle. This will prove a considerable factor in earnings this year if the demand for tonnage continues for a couple of months more. Rates have advanced from about 7s to around 18s a ton.

---

The total amount of electrical power exported from Canada to the United States during the fiscal year ending March 31 was 861,567,183 kilowatt hours being a decrease of 157,996,828 kilowatt hours as compared with the previous year.

# DIVIDEND NOTICES

## PROVINCIAL PAPER MILLS LIMITED

### Dividend Notice

Notice is hereby given that Dividends have been declared by Provincial Paper Mills, Limited, as follows:

Regular Quarterly Dividend 1¾% on Preferred Stock

Regular Quarterly Dividend 1½% on Common Stock.

All payable on October 2nd, 1922, to shareholders of record at close of business September 15th, 1922.

(Signed) S. F. DUNCAN,
Secretary.
28

---

## DOMINION TEXTILE COMPANY LIMITED

### Notice of Dividend

A dividend of three per cent. (3%) on the Common Stock of the DOMINION TEXTILE COMPANY, LIMITED, has been declared for the quarter ending 30th September, 1922, payable October 2nd, to shareholders of record 15th September, 1922.

By order of the Board,

JAS. H. WEBB,
Secretary-Treasurer.

Montreal, 7th Sept., 1922. 32

---

## DOMINION TEXTILE COMPANY LIMITED

### Notice of Dividend

A dividend of one and three quarter per cent., (1¾%) on the Preferred Stock of the Dominion Textile Company, Limited, has been declared for the quarter ending September 30th, payable October 16th, to shareholders of record September 30th, 1922.

By order of the Board,

JAS. H. WEBB,
Secretary-Treasurer.

Montreal, 7th Sept. 1922. 33

---

## TIGER TIRE & RUBBER CO., LIMITED

### Preferred Dividend No. 2

Notice is hereby given that the regular quarterly dividend of 2% (two per cent.), being at the rate of 8% per annum, on the preferred shares of stock has been declared. Payable October 15, 1922, to shareholders of record September 22, 1922.

By order of the Board.

HARRY C. MOORE,
Secretary.

Toronto, Sept. 22, 1922. 46

---

## BUYS TIMBER LIMIT

Kust Justin, contractor, Port Arthur, was the successful bidder for the Jellicoe Timber Limit, comprising seventy-seven square miles of territory, at a point east of Jellicoe Station on the Canadian National. Three hundred men will be employed there this winter, taking out pulp and ties.

---

## CANADA CEMENT COMPANY LIMITED

### Ordinary Shareholders Dividend No. 26

NOTICE IS HEREBY GIVEN that a dividend of 1½% for the three months ending September 30th, 1922, being at the rate of 6% per annum on the paid up Ordinary Stock of this Company has been declared, and that the same will be paid on the 16th day of October next to Ordinary Shareholders of record at the close of business September 30th, 1922.

H. L. DOBLE,
Secretary.

Montreal, Sept. 19th, 1922. 45

---

## PENMANS LIMITED

Notice is hereby given that the following Dividends have been declared this day for the quarter ending 31st October, 1922;

On the Preferred Stock, one and one-half per cent. (1½%) payable on the 1st day of November to Shareholders of record of the 21st day of October 1922.

On the Common Stock, two per cent. (2%) payable on the 15th day of November to Shareholders of record of the 4th day of November 1922.

By Order of the Board.

C. B. ROBINSON,
Secretary-Treasurer.

Montreal, Que.,
18th September 1922. 42

# DEBENTURES FOR SALE

## CITY OF VANCOUVER, B.C.

### Debentures for Sale

Sealed tenders will be received by the undersigned up to 12 Noon on Monday, 9th October 1922, for $250,000.00 City of Vancouver 5½% Debentures, dated the 1st day of February 1922, due the 1st day of February 1952, bearing interest at the rate of 5½% per annum payable half-yearly on the first days of February and August.

These debentures are issued for Waterworks purposes and are a direct obligation of the City at large. Provision can be made for registration of principal.

Alternative offers on the basis of interest and principal payable in Canada only, and in Canada and the United States, are asked for.

Parties tendering are required to state the net price for Vancouver payment and delivery of the Securities.

A certified cheque payable to the City Treasurer for 2% of the par value of the Debentures, must accompany each tender.

The highest or any tender not necessarily accepted.

A. J. PILKINGTON,
City Comptroller.

City Hall, Vancouver, B.C.,
26th September 1922.
48

# Corporation Finance

**Cuba Railroad Co.**—The annual report for the year ended June 30 last shows that the gross receipts were less than in the previous year, but the operating expenses were reduced to a greater extent than the receipts, so that the net earnings were larger than for the year ended June 30, 1921. The business depression noted in the previous year continued during the past year, and accounts for about half the reduction in gross earnings, the remaining half being due to the fact that the Cuban Congress in December, 1921, passed a law materially reducing rates. The ratio of operating expenses to gross earnings was 71.68 per cent. as against 89.12 per cent. for the previous fiscal year.

The stagnation in general business is illustrated by the statement of operations of the company's three hotels. In the year ended June 30, 1921, they did a gross business of $591,857. During the past year their total business amounted to only $342,904, a decrease of 42 per cent. and the profits fell from $62,302.96 to $724.64. On the other hand, the results of good management are shown in the operation of the buffet, which was formerly operated under contract and the laundry.

An addition of $809,299 was made to the profit and loss surplus, which now aggregates $8,622,126. The property investment has increased from $57,439,752 to $58,444,574.

Important changes appear in the statements of current assets and current liabilities in the balance sheet. There is a decided increase in cash on hand and a decrease of over $1,000,000 in materials and supplies. There is an increase of about $1,700,000 in the amounts due from individuals and companies, but of the total amount, the sum of $2,950,693 was due from Compania Cubana for services and advances. Since June 30 this has been reduced to $1,979,000, and Compana Cubana has in the form of raw sugar ample current assets to pay off the entire amount before the end of the calendar year. The total current assets at June 30, 1922, amounted to $6,541,050.

The current liabilities at the end of the fiscal year were $2,598,850, a normal amount. A special reserve of $300,000 and equipment during the dull period has been set up for maintenance of way from July 1 to December 31. This is a new departure for the company. A similar item of $225,000 appears in the balance sheet of the Camaguey & Nuevitas Railway.

During the last fiscal year the sugar mills rented fewer locomotives and cars than usual but they are this year applying for more motive power and car equipment than ever before, and the work of repairing locomotives and cars is progressing speedily in response to this demand. Simultaneously, the work of converting the locomotives for the use of fuel oil instead of coal is being advanced and at the present time practically all the locomotives that are in actual use burn fuel oil. It is no longer found nceessary to send any locomotives away for overhauling, as the new shops are able to meet all requirements.

Gross earnings were $11,722,971, operating expenses $8,644,593, net $3,078,378, other revenue $153,907, gross revenue $3,232,286. After interest and other charges of $1,685,812 net income of $1,546,443 was transferred to profit and loss. The past year's gross compares with $15,853,958 and net of $1,643,397 for the preceding year.

**Canadian Woollens, Ltd.**—At a meeting of the shareholders at the head office of the company on Sept 19 the reports were submitted and unanimously confirmed. The old board was reelected as follows: A. O. Dawson, president; W. K. George, first vice-president and chairman of the board; F. B. Hayes, second vice-president; F. R. Sweeney, G. D. Perry, Wm. Hanson, 1. Bonner.

Subsequently at a meeting of directors it was decided to postpone the dividends on preferred shares and the following letter is being addressed to the shareholders:

"Your directors have carefully considered the question of a declaration of a dividend on the preferred stock for the current quarter. While the dividend requirements have been fully earned it has been deemed advisable in the interests of the shareholders that the company should strengthen its cash position by conserving and increasing its liquid resources. This is particularly desirable at the present time on account of the world's unrest. Accordingly at a meeting of the directors held to-day, it was decided to withhold the preferred dividends for the present.

"Your directors would point out, however, that dividends on the preferred stock are cumulative and that in withholding dividends at the present time they are simply deferring payment until the future situation is less obscure. The expectations expressed in the annual report with regard to the improvement in business have been realized in the two months of the current fiscial year and your directors expect that this will continue. It is hoped that the shareholders will recognize that the conservative policy heretofore maintained and continued by the action now taken is in the best interests of the company. (Signed) A. O. Dawson, president."

**Laurentide Co.**—At the annual meeting of the company on September 19 the board of directors were re-elected, F. E. McNally, assistant secreatry, being chosen to fill the vacancy created by the death of R. B. Angus. George Cahoon, jr., president, was chairman.

Speaking of conditions in the pulp and paper industry, Mr. Cahoon said that the situation had been stabilized to a large degree, and that losses due to deflation had been balanced by suitable measures. The outlook for the industry was, therefore, good.

The following resolution on the death of Mr. Angus was passed:—

"Resolved that the shareholders of the Laurentide Co., Ltd., assembled in annual general meeting, desire to place on record their deep regret at the death of Mr. R. B. Angus, former president and a director of this company since its inception. By Mr. Angus' death, this company, as well as the community in general, has suffered an irreparable loss, and we desire that the proper officers of the company convey to the members of Mr. Angus' family our deep sympathy on this occasion."

**Montreal Tramways Co.**—Despite a decrease of about $60,000 in gross earnings, there was an increase of nearly $62,947 in net earnings for the year ended June 30, 1922. This outstanding feature of the reports was due to a reduction in the operating expenses from 75.63 per cent. of gross in 1921 to 71.69 per cent. for the past year.

The statement shows revenue as allowed by contract, "and other revenue" to be $2,441,478 contrasted with $2,411,329 in 1921. After deducting fixed charges of $1,917,475, there remains a net income of $529,003, as compared with $461,056 last year, being an increase of $67,947.

After the payment of 10 per cent. dividends, the surplus for the year amounted to $126,571, which, with the surplus of $916,709 brought forward, makes a total profit and loss surplus of $1,042,281. From this were taken two deferred dividends, aggregating 5 per cent. of the capital, leaving a general surplus of $844,898 to be carried forward to profit and loss account.

Gross revenue received by the company, after providing for all operating charges under the provisions of the contract, amounted to $2,377,417, which, added to the other revenue received outside the contract of $64,061, makes a total gross revenue for the year of $2,441,478. The expenses amounted to $1,917,475, leaving a net income of $524,003, from which there has been declared four quarterly dividends of 2½ per cent. each, amounting to $397,432, leaving a balance carried to the credit of the general surplus account of $126,571, which, added to the amount of $916,709 at the credit of this account last year, makes a total of $1,048,281, from which there has been appropriated the sum of $198,388 on account of the two remaining deferred dividends paid during the year, leaving a balance at the credit of the general surplus account of $844,893.

E. A. Roberts, president, in his report to the shareholders, says in part: "Your directors desire to point out that for the first time since the coming into force of the contract, viz., February 19th, 1918, the revenue has been sufficient to meet the requirements of the said contract for the year and to provide a surplus of $187,947, as shown by statements of operations under the contract. Said surplus has been applied to the reduction of the shortage accruing from previous years, which amounted to $1,967,834, leaving an accrued shortage amounting to $1,779,886 at the close of this year, which consists of accruals for city rental and the contingent reserve fund as provided under the terms of the contract, which amounts are payable only when the revenue received by the company is sufficient to pay these charges after payment of all prior charges.

"During the year the company disposed of $1,750,000 of its 5 per cent. 30-year gold bonds, one million dollars of which were bonds issued last year and held in the treasury and $750,000 representing bonds issued against capital expenditures made from November 1, 1920, to October 31, 1921, in conformity with the trust deed, which provides that bonds can only be issued to the extent of 75 per cent. of the capital expenditures.

"During the year the company redeemed the balance outstanding of two issues of its 4½ per cent. underlying bonds maturing on May 1, aggregating $2,688,953. Of this amount $763,700 was for the balance outstanding of the issue of $1,500,000 Canadian currency bonds and $1,925,253 for the balance outstanding of the issue of $460,000.

"Under the terms of the contract the company has to provide from its own funds a guarantee fund amounting to $500,000 in amounts of not less than $100,000 per year. Your directors beg to report that the sum of $100,000 has been paid into the guarantee fund since the close of the company's fiscal year, making $400,000 now in said fund, according to the terms of the contract."

**Algoma Eastern Railway Co.**—Announcement is made that the instalment of interest on the 5 per cent. first mortgage 50-year gold bonds which fell due on March 1 last, payment of which had been deferred, will be discharged in full on October 1 through the Bank of Montreal.

This resumption of interest payment will be gratifying to bond holders, and is rendered possible through steadily improving traffic returns. In the annual statement of the Lake Superior Corporation published some weeks ago, it was announced that because of the complete cessation of operations of the International Nickel Co. in 1921, and other industrial concerns upon which the railway was dependent for its principal traffic, revenue was so reduced that the company was not then in a position to pay the half year's interest which fell due on March 31 last.

# INVESTMENT FOR OCTOBER FUNDS

The abundant harvest returns reported from coast to coast are resulting in cash distribution or credits to our agricultural community the total of which will, in all probability equal, if not surpass, the previous record. This will set into circulation vast funds, approximating $2,000,000,000, and will undoubtedly have a marked effect on every line of business.

Important amounts will undoubtedly be set aside and directed to investment channels. No better investments can be offered than the bonds of Canadian Governments and Municipalities. Their security is unquestionable. They are readily marketable and interest return are good. Store up some of this year's abundance in such securities.

Investors will find in the October Investment List a wide choice of Government and Municipal securities with varied maturities, prices and yields, only a few of which are mentioned below:

BANKING INVESTMENT INSURANCE INDUSTRY

# Back-ground of the Branch Bank Question

## New Movement, Characterized by Opponents As Contrary to United States System, Is Supported By National Banks As a Necessity—Establishment of Federal Reserve System Was One Step in This Direction—Canadian System Described As Inferior

(Special to the Monetary Times)

New York, October 5.—To Canadians not in close touch with banking conditions in the United States, the bitterness of feeling exhibited during the discussion of the branch banking question at the Wednesday session of the convention of the American Bankers' Association must have come as a surprise. Canada has had a branch banking system for a great many years now and whatever its faults may be——and few even of its most earnest supporters will claim that it is faultless——to Canadians it must be difficult to see why so many apparently level headed members of the American Bankers Association literally regard a branch bank as a highly objectionable institution and likely if it is permitted to exist to effect so seriously American banking as a whole. Nor is it easy from the purely Canadian point of view to understand why the supporters of the branch bank in the United States apparently regard the right to establish branches as a privilege without which the national banks of the country cannot hope to survive. Presumably the national banking system of the United States has survived for a great many years without branches similar to those so plentiful in all parts of Canada: why then all this heated advocacy of the right of the national bank to establish branches? To sketch briefly the background of the discussion which took place this week at the convention is no simple matter; for even a partial description of this background involves the consideration of traditional beliefs which have many ramifications and involve in one way or another the fundamentals of the American politics, government and political economy. To attempt such a task would make this article far transcend the bounds which must be assigned to it. Space permits only the consideration of the high points of this background and a brief description of the situation as it exists today.

### Branches Recently Opened

As was revealed in the discussion Wednesday, the immediate cause of the debate, and the happening which threatens to disrupt the American banking world, was a ruling made by Comptroller of the Currency Crissinger that national banks were to be permitted to establish branches in those states which permitted banks chartered by the states to do likewise. A contributing cause was the decision which the First National Bank of St. Louis made on advice of its attorneys late in June that it would be acting quite within its rights if it established two branches within the limits of St. Louis; this latter decision being made in spite of the fact that the banking laws of the state of Missouri did not permit state banks to establish branches. These two happenings and the alacrity with which national banks in all parts of the United States have taken advantage of this opportunity to do something which they had wanted to do for years but had hesitated to do because such action would have been untenable legally roused the opponents of the branch bank as they had never been roused before. The Comptroller's action had pushed the branch bank question out of the realm of the academic into the realm where it seemed to be one which would likely sooner or later affect the profits, if not the very existence of thousands of small banks in all parts of the country. While for years back the branch bank and the system of banking for which it was generally believed to stand had been the butt of every country banker who felt that something must be "denounced," the action of the Comptroller and the First National of St. Louis during the early part of the summer gave the whole question a new importance. The branch bank was no longer a mere bugaboo to be conjured up at bankers conventions to terrify the timorous, but a very real danger. And the cohorts of the "anti-branch bankers" as they call themselves sprang to arms.

The "menace" of the branch bank, as they see it can perhaps be made clear by a quotation or two from recent utterances of leaders of the "anti-branch bankers."

### Centralizing Effect

For instance here is what the president of the South Side Trust Company of St. Louis, Mo. says in the October issue of the Northwestern Banker;

"Branch banking kills competition. It puts the banking power in the hands of a few people. It enables these few people to control business by controlling the lending power of the community. Such banks with competition killed off can lend money to favored persons of concerns and refuse to lend money to others. Thus the banks can build up business monopolies and can make or break a man or concern as they please.

"Branch banking makes it hard for the small borrower. It would favor the big business man at the expense of the small. "With a branch banking system, we would eventually bring about a system as bad as that in Canada where only seventeen banks have control of the banking power of the Dominion, in this connection remember that our independent banking system in the United States has proved itself five times as safe as the branch banking system in Canada!"

### Does Not Serve Locally

Then this from Iowa, the richest agricultural state in the Union. The cashier of the Citizens National Bank of Chareles City has this to say regarding the branch bank;

"We believe the branch bank to be an evil to the banking system of our country. If allowed to exist branch banks will eventually undermine the present banking system and lend to monopolize it. Eventually they will place the whole banking system of our country in the hands of a few men.

"The branch bank cannot serve a locality well because all loans of any size must be referred to the home bank. We believe that the branch banking system must not be allowed to extend further if our financial system is to be saved."

To these statements may be added a resolution passed by the Connecticut Bankers Association of State Banks and Trust Companies at a joint meeting held in New Haven on September 22.:

"Whereas branch banking is detrimental to the best interests of the people and contrary to the American system of banking;

"Be it resolved that each of the above associations go on record as being unalterably opposed to the establishment of branch banks in the State of Connecticut."

### Would Eliminate Small Banks

Similar quotations could be multiplied. But these being typical will suffice. It need only be said here that the anti-branch bankers almost to a man regard the branch bank as the fore-runner of a closely integrated national banking system which in the course of its growth would eliminate slowly but none the less surely the thousands of small independent bankers who form such characteristic units in the present American banking system. While one and all they express concern over what will happen to the people of the United States if they allow the branch bank to multiply, between the lines of their statements, it is clear that fear for themselves actuates much of what they say.

### Views of National Banks

So far as the supporters of the branch bank are concerned almost the same statement can be made. For the national banks are demanding the right to establish branches to enable them to meet the competition of the state banks. While the state banks regard the branch bank as a menace, the national banks apparently regard it as a "life saver."

The situation from the point of view of the national bank is admirably put in a letter recently written by the Comptroller of the Currency to Congressman Dyer of Missouri who had written protesting the action of the First National of St. Louis in establishing branches. In part the Comptroller said:

"I have ruled that no branch bank or agency would be authorized by me in states where state institutions did not have like privileges. It ought to be clear and fair and there is no reason for anyone misunderstanding it.

"I have on the other hand permitted national banks in the large cities of the states that permit state banks to have agencies or offices the privilege to have like agencies or offices and is I believe authorized under the national bank act.

"If it had been my duty to make the laws of the various states of the union I should not have permitted branch banking but unfortunately twenty-two states do permit, agencies, offices or branch banks. This has brought about a condition which threatens the national banking system in these states. To illustrate; "In my own State of Ohio we have a bank in Cleveland operating under a state charter, with forty-six branches in that city, and is now extending its operations throughout the state and has absorbed—practically put out of business—all the big national banks in Cleveland, and we have, I think, four small national banks left.

"Take the City of Detroit, with only th national banks, with a population of 900 the rest having been put out of business b state banks and branches.

"There are two very serious sides t proposition, and if the backbone of the tional finance is to be preserved we have go to preserve the national banking system in order to accomplish it, so I say to you if I had originally been passing the laws of the various states I would not have permitted branch banking. But it is not a theory—it is a condition—that has got to be met now if we are to preserve the system which has been the backbone of the country since 1865."

### State vs. National Banks

As one can surmise on the basis of the opposing statements of the Comptroller and the "Anti branch bankers" the struggle of which the discussion Wednesday was one outcome, is one between the state banks on one hand and the national banks on the other. At bottom it is the outcome of the traditional division of American opinion regarding the respective advantages of centralization and de-centralization, of Hamiltonian Federalism and Jeffersonian democracy, of state rights and Federal rights, the question which has caused most of the crisis in American history since the Revolution and precipitated the Civil War. Economically, it is a struggle for power between the thousands of small so-called "country banks" and the larger national banks. It is in a sense a direct outcome of the victory won by the supporters of a centralized banking system when they established the Federal Reserve System. For it must be remembered that the stability of the Federal Reserve System rests upon the national banks of the country: they are the only banks in the country which are compelled to become members of the Federal Reserve System. Should the national bank fail to grow and keep pace with the needs of the country the integrity of the central bank of re-discount is undoubtedly threatened. And should their ability to compete with the state chartered banks be jeopardized by their retention of their national charters they will not hestitate to leave the national system and become state banks. Many of them have already taken this step and hundred of others would have followed had the Comptroller not come to their assistance by giving them the right to establish branches.

### Branches Have Come to Stay

Whatever the American Bankers Association may do or say for or against the branch bank, impartial observers are one in believing that it has come to stay so far as the United States is concerned. While legal battles are impending in a number of states and will probably be fought to a finish, the trend for years back has been in the direction of closer integration of the American banking system. The formation and extension of the Federal Reserve system was the first big step in this direction. The second was the wave of mergers which has swept over the country since the culimination of the post war boom. The inflation and expansion of the war period increased the number of banks of its kind operating in the United States; the contraction which has occurred since the slump of 1919 has not only forced hundreds of them out of business but forced a great many others to merge with other and stronger institutions.

The branch bank is a symbol and an indication of the change which has come over American economy since 1914; no matter how loud the "anti branch bankers" may protest, its existence as an essential part of the American banking system seems definitely assured.

## FIRE DESTRUCTION IN NORTHERN ONTARIO

### Several Towns, Including Haileybury, Destroyed This Week—Fire's Progress Was Rapid

Telegraphic reports received in Toronto on Wednesday night and Thursday indicated that an immense forest fire in Northern Ontario had destroyed a large area, including the following towns:—Haileybury, North Cobalt, Heaslip, Brentha, Elk Lake, Charlton, Earlton Junction, Thorneloe, Uno Park and Englehart. With one eption every point on the line between Dane Cobalt has suffered severely. Dane is 160 north of North Bay.

### Statement by T. & N.O.

At midnight on Wednesday George W. Lee, Chairman of the T. & N.O. Commission, issued the following statement:

"The towns of Haileybury, North Cobalt, Charlton and Heaslip have been totally destroyed. Englehart is partially destroyed. That part of New Liskeard west of the T. & N.O. tracks has been destroyed. We are unable to secure communication with Uno Park or Earlton.

"The situation at Cobalt is clear. There is a small fire one mile away, with a mild southwest wind blowing. Everything seems safe for the night. Three trains of an aggregate of twenty-four cars containing approximate 1400 people have left Cobalt for North Bay. Other trains are being prepared.

"The reported loss of life is considerable and is mounting. Further than that we are unprepared to say.

"The property loss will obviously run into millions of dollars.

"At midnight the fire is still burning briskly, fanned by a subsiding wind. There is no prospect of rain, and it apparently remains for the fires to burn themselves out.

"T. & N.O. tracks fronting the stations at Haileybury, North Cobalt and Heaslip were destroyed, the ties burned, and tracks warped. Impossible to maintain traffic.

"It is the hardest blow the north country has yet r

## *Business Conditions*

Generally favorable reports continue to be received by Dun's Review from branch offices of R. G. Dun in the principal cities regarding business conditions in the Dominion of Canada, although occasional complaints are heard in connection with the continuance of conservative buying in some lines. Retail distribution is showing steady improvement in most sections, being stimulated by the approach of cold weather, by increasing crop returns, and by the well employed condition of labor, and in wholesale departments more liberal orders for seasonable necessities reflect a widespread revival of confidence in the future. Encouragement is also derived from the prevalence of practically normal activity in the lumber, mining, and paper and pulp industries, further recovery in the iron and steel trade, an improved financial situation, and a tendency towards better collections.

Montreal reports that business conditions grow steadily more satisfactory; buying in both wholesale and retail lines is being stimulated by the approach of cold weather, the marketing of generally good crops, and increasing industrial activity. Collections are somewhat better.

Buying of Fall and Winter staples show moderate improvement at Quebec, and business in most lines is now fairly satisfactory. Collections are fair.

Business conditions show no material change at Toronto, although retail trade is fairly active for this period, and wholesalers report a steady run of orders for dry goods, notions, millinery, clothing, footwear, furnishings, stationery, drugs, furniture, and other seasonable staples. Collections are about fair.

A more cheerful feeling generally prevails in the Far West and Northwest, but, while the retail trade is slightly better and wholesalers report that orders for immediate and future delivery are increasing, most buyers still practice marked conservatism in their operations. Advices from Winnipeg, Calgary, Saskatoon and other centres state that wholesalers are receiving a fair volume of sorting orders, and, since threshing returns are turning out to be more satisfactory in most districts than was expected, country merchants are disposed to purchase more liberally. Collections are beginning to improve, and sentiment is much more optimistic than it was a month or two ago.

## COBALT ORE SHIPMENTS

The following are the shipments of ore from Cobalt Station for the week ended September 29th:—Nipissing Mining Co., 719,147; Mining Corp. of Canada, 588,390; O'Brien Mine, 116,910; Coniagas Mines, Ltd., 87,923; Dominion Reduction, 80,760; total, 1,593,130. The total since January 1st is 11,937,890 pounds or 5,968.9 tons.

## *Bank Clearings*

The following are the bank clearing for the week ended September 28, compared with the corresponding week of 1921:—

Eastern Bank Clearings

| | Week ending Sept. 28 | Increase over '21 |
|---|---|---|
| Toronto | $90,762,327 | x$4,695,385 |
| Montreal | 88,200,700 | x2,953,644 |
| Ottawa | 5,635,491 | 150,555 |
| Hamilton | 5,455,791 | 727,261 |
| Quebec | 5,070,171 | 264,782 |
| Halifax | 2,611,591 | x396,453 |
| Windsor | 3,599,764 | 588,195 |
| London | 2,569,168 | 122,568 |
| St. John | 2,467,773 | x65,349 |
| Moncton | 1,019,711 | 37,276 |
| Brantford | 925,755 | x59,356 |
| N. Westminster | 553,196 | 7,629 |
| Kitchener | 861,759 | x14,129 |
| Peterboro' | 732,729 | x57,562 |
| Sherbrooke | 690.656 | x78,487 |
| Kingston | 559,050 | x130,461 |
| Total | $211,162,436 | x$6,560,189 |

Western Bank Clearings

| | Week ending Sept. 28. | Increase over '21 |
|---|---|---|
| Winnipeg | $62,567,049 | $4,591,877 |
| Vancouver | 12,378,458 | x276,167 |
| Calgary | 4,862,577 | x1,286,524 |
| Edmonton | 4,134,077 | x2,421,749 |
| Regina | 3,808,935 | 471,693 |
| Victoria | 1,901,044 | x11,931 |
| Saskatoon | 1,810,567 | x27,204 |

## *Canadian Failures*

The number of failures in the Dominion, as reported by R. G. Dun & Co. during the past week, in provinces, as compared with those of previous weeks, and corresponding week of last year, are as follows:—

| | Sept. 29 | Sept. 22 | Sept. 15 | Sept. 8 |
|---|---|---|---|---|
| Ontario | 26 | 17 | 15 | 11 |
| Quebec | 19 | 27 | 21 | 29 |
| Manitoba | 7 | 8 | 5 | 6 |
| Alberta | 6 | 3 | 7 | 6 |
| Saskatchewan | 6 | 3 | 3 | 1 |
| British Columbia | 2 | 2 | 6 | 3 |
| Nova Scotia | 1 | 4 | 0 | 0 |
| New Brunswick | 1 | 3 | 0 | 0 |
| Prince Edw. Is. | 0 | 1 | 0 | 0 |
| Newfoundland | 3 | 2 | 1 | 0 |
| Total | 71 | 70 | 58 | 59 |
| 1921 | 52 | 40 | 41 | 42 |

## *Railroad Earnings*

The following are the approximate gross earnings of Canada's transcontinental railways for the month of September:—

Canadian Pacific Railway

| | 1922. | 1921. |
|---|---|---|
| September 7th | $3,455,000 | $3,951,000 |
| September 14th | 3,774,000 | 4,334,000 |
| September 21st | 4,290,000 | 4,980,000 |
| September 30th | 6,311,000 | 5,915,000 |
| Totals | $17,830,000 | $19,180,000 |

Canadian National Railways

| | 1922. | 1921. |
|---|---|---|
| September 7th | $2,355,137 | $2,688,428 |
| September 14th | 2,547,982 | 2,688,428 |
| September 21st | 2,918,687 | 2,688,428 |
| September 30th | 4,121,602 | 3,456,552 |
| Totals | $11,943,408 | $11,521,836 |

Grand Trunk Railway

| | 1922. | 1921. |
|---|---|---|
| September 7th | $2,147,745 | $2,416,740 |
| September 14th | 2,130,939 | 2,316,356 |
| September 21st | 2,158,601 | 2,277,977 |
| September 30th | 2,947,699 | 2,940,151 |
| Totals | $9,384,984 | $9,951,224 |

# Conversion Loan Regarded as Success

## Estimated That Over $130,000,000 Has Been Converted—Further Borrowing Will Be Necessary—National Revenue Is Increasing, Due to New Taxes, While Expenditures Show Reduction

(Special to The Monetary Times)

Ottawa, Oct. 4.—The success of the Conversion loan to an even greater extent than had been expected, shows that in spite of general liquidation and reduced savings deposits, "there is still much corn in Egypt." At present it is impossible to give more than an estimate of the proportion of the $178,000,000 that has been converted, but it is probable that the total conversion will exceed $130,000,000. The amounts turned in show that the big as well as the little took advantage of the offer.

This means that the amount to be borrowed by the Government this year will be considerably reduced as compared with the amount that seemed probable a copule of months ago. The capital requirements for the government railways are considerably less than they were a year ago, which reduces the demand for cash. In this respect any reduction in the operating loss is a real gain. In official circles the increase in fixed charges, if it is confined to amounts due to the government, does not add to the problem. But, of course, money from whatever source it may be obtained, should be paid for.

It will probably be found that among the proposals in connection with the financial reorganization of the government railways will be one providing for the writing off of the interest charges on all cash advances, made by the government. In the case of the Canadian Northern this would reduce the 1921 fixed charges by over $13,000,000; it would reduce those on the Grand Trunk Pacific by $6,000,000, and by over $3,000,000 those on the Grand Trunk. This is one way of making the burden at least seem lighter.

### Revenues Increasing

Mr. Fielding must be highly gratified over the way that revenue increases, the increase in customs and excise during September, as compared with the figures for the same month last year being $4,712,256. For the first six months the increase over the same period last year is in excess of $16,000,000, the figures being $131,256,570 as compared with $115,636,186. From this it is quite apparent that if this advance can be maintained, the decrease in income and excess profits tax collections will be more than offset.

The increase in customs collections during the month, as compared with September, 1921, was only $481,664. The volume of imports is larger than it was a year ago, more so than the trade returns indicate; for it must be taken into account that during August the shipments of coal received were only about 25 per cent. of those during the same month last year. Imports from the United States during August were $2,500,000 below those for August, 1921; but if the same quantity of coal had been imported this year, they would have totalled $5,000,000 more. Imports from the United Kingdom were $4,500,000 greater than during August, 1921, but this hardly brought in more revenue, for the increase in the British Preference undoubtedly has stimulated buying.

### Taxes on Sales and Cheques

The higher sales tax and the tax on cheques are chiefly responsible for the higher revenue collections, they having contributed about $4,000,000. During the first six months they brought in over $10,000,000 more than during the same period last year. This increase will be maintained in proportion as business improves. An increase in prices, by increasing the aggregate value of sales, would still further boost this source or revenue. Incidentally the income tax is bringing in more money than many had thought probable, the receipts up to the end of July having been only $8,274,000 below those for the same months last year.

On the whole, however, it would be a mistake to jump to the conclusion that the Treasury is a great deal better off this year than it was a year ago. The figures for the first six months are not yet available; but at the end of the first five months they showed an improvement of a little over $13,000,000,000, as compared with a year ago. While revenue has increased by $3,000,000, expenditure has only decreased by a little over $10,000,000.

### Great Britain's Finances

In comparision with Canada, Great Britain is making a much better showing; for while her revenue has fallen off £52,000,000, as compared with the returns for the first six months of 1921, there has been a decrease in expenditure of £150,000,000; in other words the British Treasury is about £100,000,000 better off than it was a year ago.

These comparative figures may be a surprise to some who imagine that, in a per capita sense, the burdens of Great Britain are very much greater than those of Canada. Business is reported as coming back rather slowly in Britain, but the national finances are certainly being much more quickly improved than in Canada. Sir William Schooling, a British economist of standing, put quite a new light on things here the other day when, addressing the Canadian Club, he said that Britain could pay off her debt to the United States with ease; yes would hardly feel it.

### Government Banks

That the public is less inclined to leave its money in the Government and Post Office Savings Banks than it used to be, is seen in the fact that these deposits are about $4,000,000 below what they were a year ago. Of course, this decrease is not more marked than it is in the savings deposits in chartered banks. The higher rate of interest paid by the provinces that receive deposits and by trust companies is undoubtedly having effect in drawing off savings.

The Post Office Department, which during the past year has been one of the really live wires of the administration, is endeavoring to still further increase efficiency through the promoting of cooperation among the leading officials through a conference. There is good reason for saying that the public to-day is probably getting more for the money spent on the P.O. Department than it has ever got before. In the old days it was looked on as one of the most prolific sources of patronage; it probably still provides considerable, but undoubtedly it is rendering much more efficient service.

---

## NEW LIFE INSURANCE COMPANY

A new life insurance company is being formed in Toronto by M. P. Langstaff and W. B. Peace. The company has an authorized capital of two million dollars, and at the present time is obtaining a subscribed capital of one million dollars. This stock is being sold at the price of $125.00 a share, upon which the premium of $25 and $10 on par value, that is, $35 in all, is to be paid on allotment. The company has already some two hundred thousand of the stock subscribed and expects to be writing business some time in November.

Mr. Langstaff and Mr. Peace are both experienced insurance men. Mr. Langstaff is a Fellow of the Acturial Society of America, and an Associate of the Institute of Actuaries of Great Britain. He received his early acturial training in the Imperial Life, and later was assistant actuary of the Continental Life, and actuary and advertising manager of the Dominion Life, for eleven years. Mr. Langstaff then went into agency organization work, returning to Toronto as superintendent for centre Ontario of the Crown Life, whose volume of business for that district, he succeeded in quadrupling.

W. B. Peace, recently inspector for Toronto of the Manufacturers' Life, has been in the organizing and selling end of the business for eighteen years. He was for many years city manager of one of the big Canadian companies. For thirty-two consecutive months Mr. Peace ranked on the honor roll in production for the Manufacturers' Life. Mr. Peace is past president and honorary president of the Toronto Life Underwriters' Association.

The solicitors of the company are to be Rowell, Reid, Wood, Wright & McMillan. S. Casey Wood, K.C., will be one of the directors.

The "Empire Life" is the proposed name of the new company. An Ontario charter is being applied for.

---

## BRANCH BANKING IS CONDEMNED

### American Bankers' Association Passes Resolution After Keen Debate—National Banks Want More Scope

(Special to The Monetary Times)

New York, Oct. 4.—Speaking at today's session of American Bankers' Association convention, Reginald McKenna declared that Germany can now pay in reparations only what she has in foreign balances. England alone of the European nations can pay her external debt in full.

### Opposing Resolution

Neither the supporters of branch banks nor the "anti-branch bankers" waited for Wednesday to make their views known. The "antis" were most vociferous as usual and organized a special meeting of protest Sunday afternoon at which a resolution was passed calling upon the American Bankers Convention to pass a resolution disapproving of branch banking in principle and in practice, as un-American and likely to result in the concentration of the wealth of the country in a few hands.

R. S. Hecht and Andrew J. Frame of Waukesha, Wis., were the principal speakers at this preliminary meeting. Mr. Hecht, who is president of the Hibernia Trust and Savings Bank of New Orleans, while in general opposed to branch banking, felt that national banks should be permitted to establish branches in states where a similar privilege was granted state banks. He expressed himself as being opposed to the "antis" attempting any organized attempt to fight branch banking or to introduce any resolution expressing disapproval of the branch bank at the Wednesday session. He said that while he believed that the majority of the members of the Association were opposed to branch banks, he felt that the minority in favor of granting national banks the right to establish branches was so strong financially that its opponents had little chance of winning over the association as a whole.

### Canada a "Horrible Example"

Mr. Frame, as Canadians who have read and listened to similar outbursts on his part, will expect, in supporting the suggestion that the A.B.A. go on record as being opposed to the branch bank, used Canada as the "horrible example." He drew a comparison between the banking system in Canada and in the United States. In Canada he said the whole banking system centered in Montreal and Toronto. The banks and bankers in these two centers are prosperous, he declared, but the rest of Canada was dead, because the wealth of Canada was feeding these two centers. Among the Canadians who attended the convention were:

Sir John Aird, Canadian Bank of Commerce, Toronto; Lady Aird, and Miss Aird; W. M. Davies, Bank of Nova Scotia, Chicago; W. C. James and Mrs. James, Canadian Bank of Commerce, Brockville, Ont.; O. C. Jones and Mrs. Jones, Home Bank of Canada, Toronto; F. H. Logan and Mrs. Logan, Canadian Bank of Commerce, Toronto; F. H. Monk, Royal Bank of Canada, New York; J. McEachern and Mrs. McEachern, Bank of Montreal, Winnipeg, Canada; E. L. S. Patterson, Canadian Bank of Commerce, Toronto; Miss Virtue, Home Bank of Canada, Toronto; H. B. Walker, Canadian Bank of Commerce, Montreal; Sir F. B. Williams-Taylor, Bank of Montreal, Montreal.

### State Bankers Opposed

The State Bank Division of the Association met on Monday, and after a long discussion adopted the following resolution:—

"Be it resolved, that the State Bank Division of the American Bankers' Association views with alarm the establishment of branch banking in the United States and the attempt to permit and legalize branch banking; that we hereby express our disapproval of and opposition to branch banking in any form in our nation.

"Resolved, That we regard branch banking or the establishment of additional offices by banks as detrimental to the best interests of the people of the United States. Branch banking is contrary to public policy and violates basic principles of our government, as it concentrates the credits of the nation and the power of money in the hands of a few."

## WORKMEN'S COMPENSATION BOARDS

### Accident Prevention Work Should be Centralized Under Their Authority, Says Resolution Passed

Three resolutions were considered at the fourth annual meeting of the Association of Workmen's Compensation Boards of Canada, held at Edmonton, September 11-13. These resolutions are as follows:—

Resolved that in all provinces where there is a workmen's compensation board, it is advisable that all accident prevention measures should be centralized and enforced by such board. Moved by Mr. Winn, secondéd by Mr. Price. Mótion carried.

Moved by Mr. Fletcher, seconded by Mr. Paton "That in the opinion of this Association there should be no clerical exclusions under the Workmen's Compensation Act and that no separate rate should be applied to Clerical Workers."

Moved by Mr. Price, seconded by Mr. Winn, "That it is expedient that every Workmen's Compensation Act should make provision for Rehabilitation of crippled workmen."

The following officers were elected:—President—John T. Stirling, Alberta; vice-pres.—V. J. Paton, Nova Scotia; secy.-treas.—W. R. Rose, Alberta; add. member of executive—J. A. Sinclair, New Brunswick.

It was arranged that the next convention be held at Halifax, N.S. opening the second Monday of September.

The delegates present were:—British Columbia—E. H. S. Winn, F. W. Hinsdale; Alberta—John T. Sterling, W. F. Neill, J. A. Kinney, Dr. A. Forin; Manitoba—N. Fletcher, R. S. Ward, P. V. E. Jones.

Ontario—Samuel Price, Norman T. Dean, N. Miller.

Nova Scotia—V. J. Paton.

New Brunswick—J. A. Sinclair, President; J. L. Sugrue, Secretary.

John A. Sinclair, president of the Association, presided at the convention.

### Subjects Dismissed

Other subjects considered were:—

1. Limitation of time for filing claims and for re-opening cases.
2. How earnings should be computed in case of concurrent employment or part time service.
3. Compensation to dependents living in other countries.
4. Method of dealing with protested decisions, and requests and communications from outside persons.
5. Relation of Accident Prevention and Accident Prevention Association to the Act.
6. Medical practitioners in relation to the Act, including:—(a) Securing efficient services and whether panels of doctors should be selected. (b) Securing candid and reliable reports and dealing with default or delay in reporting. (c) Whether reports of doctors or medical referees should be given out to claimants or others. (d) Functions of medical referees. (e) Schedule of fees. (f) Osteopaths, chiropractors, etc.
7. First Aid Regulations and First Aid Kits and First Aid Rooms. (a) Allowance to employees who make sincere efforts. (b) Who obtain good results.
8. Method of dealing with delinquency of employer. (a) Not furnishing Payroll Statements. (b) Giving no estimate or too low an estimate. (c) Default in paying assessments. (d) Where employer has no assets, but is continuing business.
9. Relation of solicitors and agents to act.
10. Method of dealing with uncashed cheques.
11. Compensation to executive officers, partners and members of family not included in Payroll Statement.
12. Accidents due to lightning, accidents due to smoking at work; hernias and back strain cases.
13. Superimposed Permanent Disability of a relatively trifling character, causing Permanent Total Disability to a workman of advanced age.
14. Schedule of rating for Permanent Partial Disabilities.
15. Angular measurement of joint limitations.
16. The multiple factor in hand disabilities of permanent nature.

## EFFECTS OF NEW TARIFF

### Will Reduce United States Trade, While Canada May Progress in Other Markets

(Special to The Monetary Times)

New York, October 2.—Now that the much discussed Fordney McCumber Tariff Bill has become law, and all hopes of Canadian trade with this country escaping the effects of the measure has to be abandoned, local Canadians are beginning to see that while directly the new tariff will probably cut American Canadian trade indirectly, in the long run it will benefit not only Canada but Great Britain as well. Many Canadians with whom The Monetary Times has discussed the possible effect of the new tariff on Canadian American trade relations now feel that eventually the trade which the United States will lose through the operation of the Fordney McCumber Tariff will go to Canada and Great Britain. For it is being repeatedly pointed out that the United States cannot continue to receive orders from either Canada or Great Britain, if it is almost impossible for Canada and Great Britain to pay their bills in the United States in imports. This fact has already been demonstrated by the course of foreign trade during the past twelve months; in spite of the steady improvement of the Canadian exchange market in New York, Canadian buying in the United States has grown steadily smaller, largely as a result of the enactment of the Emergency Tariff. Now that the Emergency Tariff has been superceded by the more drastic provisions of the Fordney McCumber Act, the effects will obviously be greater so far as Canadian American trade is concerned.

### Must Seek Other Markets

As one Canadian banker pointed out to The Monetary Times, the first effect of the new tariff will be to force Canada to continue her efforts to develop larger foreign markets outside the United States for her products. What success she can expect to meet with may be guaged from the success of the efforts Canadian exporters have been making ever since the Emergency Tariff was enacted. If one may judge from trade statistics very fair progress has been made by Canada in finding a substitute for the lost American market. This particular banker had complete faith in the ability of the Canadian business man to continue to build up his foreign markets.

This man believed that Great Britain would during the next twelve months increase very materially her trade with Canada, as a result of the enactment of the Fordney McCumber Tariff. The first result of the enactment of the new tariff will probably be that this fall Great Britain will buy in Canada the wheat which she ordinarily buys in such large quantities in the United States. British merchants know quite well that they cannot hope to sell goods in the United States as they can in Canada; they may be relied upon to exert all their influence to the encouragement of British buying in Canada.

It is also believed here that the coming year will witness the loss by the United States of a very substantial part of the meat business she has been doing with Great Britain. This loss will benefit Canada and the Argentine; they will receive the business which the United States is expected to lose.

## WHOLESALE PRICES

The index number of wholesale prices constructed by Professor H. Michell of McMaster University, Toronto, stood at 162.9 at the close of September, thus registering a decline of 1.1 per cent. from the previous figure of 164.7 at the end of August. This compares with 172.9 for September, 1921; 247.4 for September, 1920, and 116.6 for September, 1914.

The index for the twenty foodstuffs included stood at 171.5, thus registering a decline from the previous figure of 175.7. This figure compares with 187.6 for September,1921, 281.4 for September, 1920, and 131.4 for September, 1914. Pork bacon, lard, sugar, flour, potatoes and canned tomatoes declined; cheese, eggs and currants advanced.

The index for twenty manufacturer's goods stood at 154.6, thus registering an advance of .6 per cent. over the previous figure of 153.8 at the end of August. This compares with 158.2 for September, 1921, 213.4 for September, 1920, and 102.9 for September, 1914. Wool, hides, iron, galvanized sheets, copper and tin advanced, while raw cotton and silver declined.

## ROBBERY PREVENTION.

Convinced that the series of bank robberies that have terrorized Western Canada during the last few weeks were originated and planned by United States crooks, and determined that all undesirable citizens shall be scrutinized closely at the border, Col. J. G. Rattray, Commissioner of Provincial Police; Superintendent R. S. Knight, of the Royal Canadian Mounted Police, and John Allen, K.C., Deputy Attorney-General, were in conference in Winnipeg on September 29 discussing ways and means of strengthening the hands of both forces and working out a system of co-operation.

Strong demands from individual banks and the Canadian Bankers' Association led to the hasty conference.

## UNDERWRITERS' LABORATORIES

At a meeting of the Board of Directors of the Underwriters Laboratories of Canada, held in Montreal on September 25, the following officers were elected: John B. Laidlaw, Toronto, Chairman of the Board; W. E. Baldwin, Montreal; W. H. Merritt, Chicago; A. G. Dougan, Chicago; E. F. Garrow, Toronto; C. W. Higley, Chicago; John Jenkins, Montreal; W. R. Mallalieu, New York; F. L. Morrisey, Montreal; O. E. Schaefer, New York, and Alfred Wright, Toronto directors.

## LISTING OF NEW BONDS

Steps have been taken by the Department of Finance to secure the immediate listing on the Stock Exchanges of the new bonds which are being issued in exchange for those maturing December 1, 1922, under the conversion proposals of the Minister of Finance, which were open until September 30.

Under the arrangement the maturing bonds were forwarded through the agency of the various chartered banks to Ottawa, whereupon the new bonds for a corresponding amount of the maturity desired were despatched to the banks for delivery to the owner. The new bonds went forward from day to day.

In order to differentiate them from existing issues, the new bonds will probably be known as "renewal" bonds.

## NEW INVESTMENT HOUSE

A new investment house, bearing the name of Athol, Murray & Co., has been opened in Toronto. Associated with Mr. Murray is J. J. Fitzpatrick, recently connected with a large financial institution in New York.

## RAISE INTEREST RATE.

Interest rates on money held by the Ontario Courts have been raised from 5 to 6 per cent. This change dates from October 1. The increase will figure out to a large amount of money, as there is more than $8,000,000 in the court's hands awaiting disposition to suitors.

# The Monetary Times

Trade Review and Insurance Chronicle

OF CANADA

The Monetary Times was established in 1867, the year of Confederation. It absorbed in 1869 The Intercolonial Journal of Commerce, of Montreal; in 1870 The Trade Review, of Montreal; and the Toronto Journal of Commerce.

TORONTO, FRIDAY, OCTOBER 6, 1922

## COAL SUPPLIES

The coal shortage is nearly over, judging by reports of anthracite and semi-anthracite coming into the country. True enough it will be many months, before there are normal supplies in Canadian cellars, now practically empty when they are usually well stocked, but very soon sales should be up to normal. Last Friday the city council of Montreal opened tenders which had been invited for 60,000 tons, no less than sixteen having been received. One firm offered 50,000 tons of American anthracite at $13.65 for pea, 10,000 gross tons; $14.25 for range, 10,000 gross tons; $14.50 for run of mine, 10,000 gross tons; $17.25 for egg, stove or nut, 20,000 gross tons. Another firm offered Pensylvania buckwheat anthracite and bituminous, lump, egg or nut, with 50 per cent anthracite and domestic fuel, at $11.20. The other offers were Welsh coal, at from $8.50 to around $19 per ton, according to the grade.

While, therefore, all requirements will not be met by anthracite coal it is at least evident that fair substitutes should be available at once. Moreover, there is no ground for the exorbitant prices that a few dealers have attempted to exact. In this respect J. A. Ellis, Ontario fuel controller, said a few days ago:—

"Taking last year's figures, sixty per cent. of our coal importation for the season would be 1,657,800 tons, leaving a shortage of 1,105,200 tons this winter. When you take into consideration the fact that we cannot expect any large quantities of coal at any given period, you will see why I felt that both rationing and price fixing, as adopted in the United States, were necessary.

"I must emphasize the fact that the 1,657,800 tons which Ontario will probably get includes the entire season up to April, 1923. This makes the necessity of rationing even more apparent. Furthermore, if retail prices were not fixed, the more prosperous people would probably get in their full supply of American anthracite from the first shipments whilst those less fortunate would be forced to go without.

"The price which I have fixed for the City of Toronto has been so fixed only after full enquiry and consideration. The freight charges that dealers are forced to pay this year are slightly less and there is no exchange to pay this season, such as there was last.

"Against this they are forced to pay higher prices for their coal at the mines and are not able to get what is known as discount coal. Also, because of the rationing orders which I have made, they will be forced to make delivery in smaller lots, and the overhead will be higher.

"Although in the orders I have only fixed a price for the city of Tornoto, I wish to explain to all municipal councils that if they request me by resolution to do so, I will enquire into the matter with a view to fixing the retail price in the municipality whose council has passed the resolution. Practically the same price should prevail in all the Ontario municipalities as prevailed there last winter. This does not mean, however, that last year's price will be allowed in any municipality if it appears to be an unreasonable one. The arrangement made by the Dominion Advisory Fuel Committee, whereby Ontario receives this winter 60 per cent. of her importations of last season, is conditional on dealers in the province not attempting to bid up prices of coal from the independent dealers. The reports today are that very little anthracite is coming in, that more coal is being mined than there are cars to carry it away, and that a few collieries have had to close down."

## MUNICIPAL REFUNDING

With the recovery of Canadian exchange in New York and the gradual strengthening of sterling, the speculative opportunities of the investments markets have been curtailed. However, another way in which a municipality might reap immediate profit was shown at a meeting of the Quebec Rotary Club on September 27 by H. J. Pinsonnault.

He pointed out that the city could raise money by long-term bonds, on which only an interest rate of 5.10 per cent would need be paid out. With the money thus raised, he stated, bonds could be bought in London, which would yield 5.45 per cent. The treasury department would be paying out the lower rate and reaping in the higher interest, and the difference, said Mr. Pinsonnault, would be all velvet for Quebec. But the city, he showed, had not authority from the legislature to thus reduce its debt, and he advocated that the city fathers apply to the provincial body for this right, and then enter the buying and selling market as an investor.

As a case in point, Mr. Pinsonnault told how the Province of Alberta had sold 20-year bonds in New York recently to pay 5.22 per cent. The City of Quebec had sold 10-year bonds at 5.52 per cent interest. Here, the western province could have bought in Quebec bonds, and made the difference between 5.22 and 5.52 per cent. Such deals were often transacted, said the speaker. This could be done without interfering with the sinking fund and without increasing the annual amount of interest.

Mr. Pinsonnault took the case of one hundred thousand dollars, obtained at a small sacrifice of interest and placed to the best possible advantage. He showed conclusively that on an issue due in 1962, forty years hence, 29 per cent of the hundred thousand dollars provided could be gained by this system of placing.

The scheme proposed, however, is not one that is "all velvet," for there are good reasons for the difference in return on long and short term bonds. In fact Quebec might in the long run make a better deal in selling 10 year bonds at 5.52 per cent bonds than did Alberta in selling 20 year bonds to pay 5.22 per cent. Interest rates are undoubtedly falling, and by renewing at the end of the ten year period at a lower rate Quebec might save more than what was previously lost. Investors at the present time favor long term securities, because of their expectation of lower interest rates, and are willing to pay more for them, thinking they may receive more in the end than if they had to reinvest in a few years when conditions were changed. Looking at it from the borrower's point of view, it may easily prove better to borrow for a short term, even at a higher cost.

## FIRE PREVENTION WEEK

During the past few years a great deal of time and money has been spent in Canada on educational work to prevent fires. The intentions are good but the results not yet appreciable. In fact in the face of these efforts our losses continue to mount still higher. While therefore insurance men and others interested in the work are co-operating as best they can in the observance of "Fire Prevention Week," October 2 to 9, they do not feel optimistic regarding the results. It is stated in the Governor-General's proclamation that over three thousand lives have been lost and insurable property in excess of $250,000,000 has been destroyed during the last ten years. For the year 1921 alone the loss amounted to 350 lives and property to the extent of $45,000.000.

It will probably be realized during the next few years that legislation is the best means of counteracting the fire losses, if anything at all is to be done in this direction. One or two steps in this direction have already been taken, and inquiries are being made in some provinces into suspicious fires. These are comparatively new and therefore considerable publicity is obtained in the newspapers, which will soon impress upon the public the danger of crime and carelessness.

## IMPORTANCE OF THE GRAIN CROP

As the wheat crop moves eastward at the rate of nearly two million bushels per day, a wide variation still exists in the estimates of the actual yield, the Royal Bank points out. These estimates gradually mounted as the harvest drew to a close, and some authorities have placed the yield above the 393 million bushel crop of 1915, which was the largest in the history of the country. Although the acreage sown to wheat this year is considerably greater than that of 1915, the average yield per acre will be somewhat lower. At the beginning of September, the Dominion Bureau of Statistics published a preliminary estimate of the yield of cereals, placing the wheat crop for all of Canada at 388,733,000 bushels from a sown acreage of 22,630,900. This is an average of 17.25 bushels to the acre in comparison with 13 bushels to the acre last year when the total yield was 300,858,100 bushels from an acreage of 23,261,224.

The visible supply of wheat in Canada on the 9th of September was 3,865,000 bushels greater than at the same time a year ago. The American visible supply on the same date showed a decrease of 10,934,000 bushels from that of September, 1921. According to Broomhall's estimate, the world surplus at the first of September was 776,000,000 bushels, and of this amount North America had 488,000,000 bushels.

During the third quarter of the year the Canadian dollar gradually improved its position in New York until late in August when it reached par for the first time since November, 1917. This movement is attributed to a number of factors. The recent flotation of the $100,000,000 loan in New York was of prime importance, and the greatly improved condition of Canadian trade cannot but have played a vital part.

Trade balances in favor of the United States during the latter part of 1921 have turned in favor of the Dominion, owing to the decline in imports from the United States. Another important influence in the situation was the fact that large shipments of Canadian wheat created a demand for Canadian funds, at the same time that the normal movement of coal from the United States to Canada, for this time of the year, was impeded by the American coal strike.

## HOW A TARIFF REACTS

The effects of the new United States tariff will be felt most keenly by the United States itself. Canada, as her nearest neighbour, will also be greatly affected, but some in this country are already pointing out that it may be the United States that is the more greatly injured. Few of them take this lesson to heart, however, and conclude that our own tariff, which is not by any means a trifling one, may be injuring us in just the same way.

As many products will no longer be available in the United States at previous prices, the general level of prices there will be raised. The cost of production will be increased, and still another handicap placed upon American export trade. This fact belies the argument that a protective tariff helps maintain a favorable balance of trade, or reduce an unfavorable one. Its precise effects in this respect cannot be foretold, but it can at least be expected that exports as well as imports will fall off greatly.

The new United States tariff will however be a revenue-producer, according to Frederick Hudd, Canadian Trade Commisioner in New York; he states that $400,000,000 per annum is expected, of which $87,000,000 will come from sugar imports, $60,000,000 from raw wool, and $35,000,000 from tobacco. Mr. Hudd states that the method of valuation on imports for duty purposes remains unchanged, the proposal to establish so-called American valuation for duty purposes having been abandoned. The value for duty purposes must either be the foreign value or the export value, whichever is higher. If neither the foreign or export value can be ascertained, the duty will be assessed on the so-called United States value.

The Canadian Commissioner refers to the provisions of the new act granting the president power to increase rates of duty. The president, he says, is empowered to increase the rates of duty up to fifty per cent. on articles, the product of foreign competing countries, where investigation ascertains that differences in the cost of production of the articles in the United States and of like articles in competing foreign countries are not equalized by the duties fixed in the act.

The Northern Ontario disaster is an uncalled for celebration of Fire Prevention week.

Republic of Haiti bonds are, it is stated, to be offered in Canada. If Haiti can look here for financial aid then we can very well look after our own requirements.

## ALLAN TRIAL

Sir Montagu Allan, President of the Merchants Bank of Canada, will be tried on October 12 next. On September 21, with his counsel, F. E. Meredith, K.C., he appeared before Chief Justice Decarie and was remanded. The delay in the trial is due to the fact that ten days are necessary to produce exhibits.

# *Personal*

HONOURABLE RICHARD W. CRAIG, K.C., the new attorney-general for the Province of Manitoba, was born in Underwood, Ontario, 1877 and educated at the High School Port Elgin, Collegiate Institute, Winnipeg and Manitoba University; went to Manitoba in 1892, served as principal in several public and high schools in that province and was called to the Manitoba bar in 1905. Mr. Craig is also vice-president of The Western Empire Life Assurance Company, Winnipeg. He has been member of the present firm since 1914 and was appointed King's Counsel in 1916.

G. J. S. LOYNES, manager of the Sterling Bank at Goderich and Supervisor of that district, has resigned.

C. J. STOVER has been appointed manager of the Consolidated Asbestos Company, replacing Major-General Sir John Carson, K.C.B., who is retiring on account of illness.

WILLIAM MACINNES, formerly assistant manager for Canada, has been appointed manager for Canada of the Motor Union Insurance Co., Ltd., and of the United British Insurance Co., Ltd. He succeeds Frederick Williams, who becomes foreign agency manager for the companies.

EDWARD EVERETT BECK, who has been acting manager of the Vancouver Hotel for the Canadian Pacific Railway, has been appointed manager. Mr. Beck has been connected with this hotel ever since he entered the service in 1907, first as clerk, then as rooming clerk, and since June 16th, 1920, as assistant manager.

## ADMINISTRATION OF THE NATIONAL RAILWAYS

(From the "Mail and Empire," Toronto)

Public ownership is efficient and economical only if the men entrusted with it are capable, honest and strictly independent. Under men who are thus qualified to serve the people as administrators of public ownership undertakings the best results are obtained. Such men will be aboveboard in their accounting. They will be frank with the public, covering up nothing, and providing for renewal and every other requirement of the business. There will be no graft of any kind. Favors will be granted to no one. There will be no slippery work, such as masking a given payment or contract by deceitful entries.

Public ownership enterprises must be so carried on if they are not to prove extremely disappointing to the people. As a rule, the public do not scrutinize very closely the accounts of public ownership commissions, and are sometimes kept in the dark as to the real state of their property, until they are suddenly made aware of the need for large capital expenditures and for the issuing of bonds on that account. They are simply told with a grand air that plant and equipment cannot be expected to last for ever, and that anyhow provision must be made for expansion. Thus the property, for whose upkeep or renewal sufficient provision has not been made out of earnings, is put deeper and deeper into debt, and the people do not learn until too late that extravagance and mismanagement and possibly jobbery have brought their property to such a pass that the service obtainable from it is more costly than that for which a private corporation could afford it. Of course, private ownership is not free from like faults, and many a good business has been brought to ruin because the directors or managers have failed in their duty.

The Canadian National Railways are an example of how a public ownership undertaking ought to be carried on. The Government that framed the legislation creating the Canadian National Railway Company and that appointed its directors was scrupulously regardful of the public interest. It left the directors absolutely independent of the Cabinet and of all that kind of influence to which the word "politics" is applied in a sinister sense. There was no chance for patronage. The late Government lived up to its high purpose in the matter. It trusted to the directors it had deemed fit for the trust, and the directors proved themselves worthy of the trust. Not only did they keep the system free from graft and party favoritism, but in all other respects they administered this business of the people's on the soundest lines. They made a great railway system of the several roads that were put on their hands. They have shown that public ownership in honest and capable hands is economical, and that it is unnecessary to allow parasites to prey upon it.

Is that resented by the present Government? Does that Government not want economy and purity in the administration of the people's system? We know that it does not want the directors who have obtained those excellent results for the public. It has their resignations, because it was its pleasure that those resignations should be handed in. The most masterful of the members of the present Cabinet and the most self-willed of the Government's supporters in the House are against public ownership of the National Railways. We admit that the administration of these railways by the present Board is not of a kind that would be fancied by politicians who have an eye to patronage, but it has been highly satisfactory to the Canadian people. That is the true test. It is not by what you call a thing, but by its fruits you must judge it.

# *Obituary*

JOHN R. BINNING, Canadian general manager of Furness Withy Co., died on September 30th., in Montreal. The late Mr. Binning was born in Hamilton, in Lanarkshire, Scotland, on August 16, 1866.

EDWARD L. McARTHUR, Montreal advertising representative of the Toronto "Mail and Empire" died suddenly on September 29 while making a business call in the office of Dickinson and Wallbank, stock brokers. Mr. McArthur had been connected with newspapers most of his life, but for four years was secretary-treasurer of the Dominion Bond Company, Vancouver.

## "A Venture in Trade"

An ancient method of investment was a "venture in trade"—a ship loaded and despatched to trade in the seven seas—to return in months or years and sometimes, never.

The modern investor buys bonds in which the principal is absolutely safe and the income certain.

The experience of thirty years enables the house of Æmilius Jarvis & Co., Limited, to guide their clients in the selection of bonds in which the principal is absolutely safe.

## The Danger Line

The forty-fifth year of a man's life marks the danger period of his ability to achieve material well-being. Statistics show that at this age only four out of every hundred men have accumulated anything—and kept it. After fifty not one in a hundred recovers his financial footing.

Can you toe the line with confidence, born of the surety that whatever may happen after forty-five, your own old age or the welfare of your dependents has been safely provided for? A sound policy of Life Insurance in the Great-West Life will give you that surety. Send us your name and age (nearest birthday) and we will send you rates and particulars of policies to meet your requirements.

# The Recovery of Canadian Exchange

BY A. B. BARKER

Judging from the press despatches there is wild delight in Montreal at being able to charge American tourists on their currency though why this should be a matter of congratulation is not very clear. One account tells how annoyed one tourist was that his money should be subject to discount, as he said it always had been worth more than Canadian money, and the Canadian is made to reply that, "we have been paying you high exchange and now it is your turn," both laboring under the delusion that the discount charged is profit. When American funds were at a high premium in Canada, it was surprising how many people thought the Americans were making a profit out of the premium. As a matter of fact it was a source of much worry to them, as, while it lasted, it had the effect of cutting down their sales to Canadians. Many concerns, in their anxiety to hold their Canadian trade, sold their wares over here at the old Canadian price and lodged the funds in Canadian banks in the hope that exchange would return to normal. For a time it looked as if they were going to be faced with a heavy loss but owing to the sales of Canadian securities in the United States and curtailment of buying by Canadians in that market, a supply of American funds has been accumulated sufficient for the demand.

### The Currency Factor.

Part of the heavy discount on our funds in the United States last year was due to the depreciation of our currency, or as it is sometimes called, inflation. Canadian currency is supposedly redeemable in gold on demand, but this has not been the case for some years as owing to the war, chiefly, the gold reserve of the countries, which was 64 per cent., of the notes issued in 1914, is now 48 per cent., an improvement, however, of 3 per cent., since last year. The improvement in the exchange situation is due chiefly to the heavy borrowings by Canadians in the United States. During the last four months the various Canadian Governments and municipalities have it is stated floated on that market $273,000,000 in bonds and debentures, and it is estimated that the total of American investments in Canada, in the shape of these securities, as well as in industrial plants, is over $1,000,000,000.

### Effect of Borrowing.

In this connection it must be remembered that this investment came to Canada, not in money but in goods, and this is true whether the goods come in after the issue of securities has been sold in the United States, or whether the proceeds are used to pay for goods already shipped. When, therefore, a bond issue is made by the Government or by a manuafcturing firm, and sold out of the country, it simply means that goods must be imported into Canada to the amount of the proceeds. This, however, is as it should be, because trade consists in the exchange of goods for other goods or services, and money is only used to facilitate the exchange. Also, the currency of one country is no use in another as money, it has no equal status, it is merely a promise to pay money and must be sent to the country of issue for redemption, and then its only use is to exchange for goods or services.

### Fixing Exchange Rates.

Canadian currency in the United States, like American currency in Canada, is in reality bought and sold like any other commodity and the price in local currency will vary according to the supply and demand. As a matter of business it is best that the rate of exchange should be steady. If it could be arranged that there would be no change in the rate either way for a definite term the benefit to trade between the two countries would be very great as an element of uncertainty would be removed and dealers could make contracts with a certainty that the medium of settlement would have the same value at the completion of the contract as at the beginning.

---

## SIX MONTHS' RAILWAY OPERATIONS.

### Rate Reduction Lowers Receipts Per Ton Mile —June Revenues Show Decrease From May.

A review of six months' results is included in the report of the Dominion Bureau of Statistics covering railway operations in June. Regarding the month of June, revenues of the railways as a whole showed a decrease from May of $449,058. Compared with June 1921 the decrease was $1,026,711 or 3 per cent with expenses reduced $1,606,963 or 4.9 per cent., the operating ratio being 92.61 per cent as against 94.52 per cent for June 1921. Freight traffic decreased 12.5 per cent with a decrease of 3.1 per cent in freight revenues, while passenger traffic increased slightly but passenger revenues, due to lower rates, decreased 11.3 per cent. The net load of freight trains showed a small increase but the average load per car decreased 7 tons.

During March this year there was a heavy movement of grain causing an accumulation for Fort William and Port Arthur also for Vancouver. An embargo was placed reducing the April movement and when lifted, boosting the May traffic. This was one factor in the rise and fall of revenues for March, April and May. These fluctuations were still more pronounced on the Canadian Pacific and Canadian Northern Railways.

The receipts of grain at Fort William and Port Arthur were as follows:

| | | | | | |
|---|---|---|---|---|---|
| Jan. | 10,999,000 | bushels | May | 18,840,000 | bu. |
| Feb. | 6,687,000 | " | June | 7,991,000 | " |
| Mar. | 14,940,000 | " | July | 8,854,000 | " |
| April | 10,322,000 | " | | | |

### National Railways.

**Canadian National Railways** freight traffic showed a sharp decline from May with a decrease in freight revenues of 23 per cent. The seasonal increase in passenger traffic offset this somewhat but the total revenues showed a decrease of 15 per cent. Operating expenses also increased causing operating deficit to increase to $1,963,988 and the operating ratio to 123.85 per cent. This, however, was an improvement over June 1921 when the deficit was $2,595,256 and operating ratio was 131.32 per cent. Compared with June 1921 freight traffic showed an increase of 44,179,105 tons miles or 9.8 per cent, but lower rates produced freight revenues only 3.5 per cent above last year's. Passenger traffic decreased 2.9 per cent with a decrease in revenues of 9.2 per cent. Freight train loading increased from 444.4 to 454.6 net tons while the average car loading decreased .3 tons.

### Canadian Pacific.

**Canadian Pacific Railways** freight revenues showed little change from last year although the revenue ton miles increased 7.5 per cent. Passenger revenues decreased 13 per cent with a decrease of 4.6 per cent in passenger miles. Total revenues showed a decrease of $709,995 or 4.8 per cent and with an increase of .7 per cent in operating expenses the operating ratio rose from 78.38 per cent to 82.91 per cent. Both car loading and the average net load of freight trains showed decreases from last year and also from May 1922. Compared with May the decrease in freight revenues of 8 per cent due to decline of freight traffic was more than offset by increases in passenger revenues the passenger receipts increasing over 21 per cent, increasing the total revenues to slightly above those for May, while the expenses showed an increase of about 1.4 per cent.

**Grand Trunk Railway** showed an increase in freight revenues of $465,668 or 10.8 per cent but passenger train revenues fell off causing total revenues to decrease $187,402 or 2.8 per cent. Operating expenses were reduced $459,895 or 7.7 per cent giving an operating ratio of 84.86 per cent as against 89.36 per cent for June 1921. Train loading showed a marked improvement averaging 111.7 net tons per train over June 1921 while car loading also increased 2.4 tons per car.

### Six Months' Results.

The report of this month contains a summary of the reports for the six months January to June inclusive. The general reduction of 10 per cent in passenger rates effective July 1, 1921, and reduction in freight and in parlour and sleeping car rates effective December 1, 1921, with the variations in classes of traffic handled, produced an average receipt per ton mile 10 per cent below the average for the first six months of 1921 and an average receipt per passenger per mile 8 per cent less.

Freight traffic increased 541,657,248 ton miles or 4.8 per cent, but due to heavier loading of trains, was handled with a decrease in freight train miles of 2.7 per cent although the average car loading decreased 1.0 ton per car. With the lower rates, however, freight revenues decreased $7,945,506 or 5.6 per cent.

Passenger traffic decreased 13.6 per cent. with less people travelling also a reduction in the average length of journey and with lower rates produced revenues $8,626,685 or 20.5 per cent less than for the same period in 1921. Total revenues showed a decrease of $18,764,173 or 9.1 per cent.

Wages were cut July 16, 1921 between 10 and 12 per cent and with less train mileage and other reductions, operating expenses were reduced $26.533,331 or 13 per cent, thereby increasing the net operating revenues $7,769,158 and the operating ratio from 98.78 per cent to 94.52 per cent. The total pay roll was reduced $15,421,293 or 12.7 per cent with a reduction in the average number of employees of 3 per cent.

### Results by Railways.

**Canadian National Railways** showed considerable improvement in operations for the six months. Although with reduced rates and lighter passenger traffic, revenues fell off $6,371, 806 or 11.1 per cent, the pay roll was reduced $7,409,270 or 16.5 per cent, the average number of employees was reduced 4,097 or 7.1 per cent, average train loading was increased 63.4 net tons or 14 per cent, the number of cars was increased 2.3 per train and car loading was increased .3 tons per car, thereby, reducing freight train mileage 13.3 per cent with reduced total ton miles of only .9 per cent. The total expenses were reduced $13,602,259 or 18.5 per cent causing the operating deficit to diminish $7,230,452.

**Canadian Pacific Railways** showed a decrease in total revenues of $8,169,461 or 9.5 per cent, and a reduction in operating expenses of -4,965,663 or 6.9 per cent which reduced the net operating revenues $3.203,798 and increased the operating ratio from 84.53 per cent to 87.03 per cent. The total pay roll was reduced $2,900,618 or 7 per cent with an increase of 2.3 per cent in the average number of employees. There was practically no change in net train loading except revenue freight increased and non revenue freight decreased, but the number of empty and loaded cars increase slightly with lighter loading of cars.

**Grand Trunk Railway** showed an increase in freight traffic of 8.4 per cent but a decrease in passenger traffic of 7.9 per cent. Lower rates produced freight revenues 2 per cent below last year's and passenger revenues 15.7 per cent less. Total revenues decreased $2,000,151 or 5.5 per cent but operating expenses were reduced $4,874,362 or 13.9 per cent giving a net operating revenue of $4,200,946 as against $1,326,734 in 1921 and reducing the operating ratio from 96.34 per cent to 87.77 per cent. The net loading of freight trains increased slightly also the number of cars per train but the loading of cars was lighter by 1.9 tons per car.

---

## SELL STOCK BY COURT ORDER.

Two shares of stock in the Hartt Boot and Shoe Company, Limited, Fredericton, N.B., were sold on September 19 under an order from the King's Bench division of the Supreme Court of New Brunswick. The shares had been the property of Moses Fickler, formerly of Fredericton but late of Montreal, and were sold a result of alleged violation of a bond which had been given that he would not continue to interfere with the management of the company's affairs, the company's management having instituted proceedings against him upon charges to that effect, after he had caused a newspaper interview to be published stating that he (Fickler) was going to have the company's factory removed from Fredericton to Halifax.

The shares had a par value of $100 each, but they were bid in at $80 for the two by C. D. Richards, M.L.A., who has been solicitor for the company in the matter.

## Exclusively Canadian

**We take pride in the fact that this is an exclusively Canadian Bank, with every effort concentrated on the development of domestic interests. For forty-five years our organization and capacities have been gradually broadening to cope with the increasing demands of industrious Canada.**

**Consult our local manager regarding your plans for development.**

## NEW TRUST BUSINESS IN AUGUST

### Three Corporation Issues During the Month—Individual Estates Show Decrease and Mostly for Small Amounts

The Montreal Trust Co. was appointed trustee for the bond issue of Holt, Renfrew & Co., Ltd., amounting to $600,000.

The Canadian Financiers Trust Co. was appointed trustee for the $300,000, 6 per cent. 10-instalment bond issue of the Sisters of Charity of Providence in British Columbia.

For the bond issue of the Roman Catholic Archbishop of Vancouver, amounting to $200,000, payable at 6 per cent. in 10-instalments. the Canadian Financiers Trust Co. was appointed trustee.

### Individual Estates

Under the terms of the will of Dr. J. F. White of Ottawa, the Capital Trust Corporation was appointed administrator. The estate amounted to $49,809.

The Toronto General Trusts Corporation has been granted probate of the will of Mrs. Anna C. Kennedy, Toronto, who left an estate valued at $45,815.

The National Trust Company has been granted probate of the will of Mrs. Laurence E. M. Watson, Toronto, who left an estate valued at $52,032.

Application for the probate of the will of Sir James A. Grant, of Ottawa, has been granted to the Royal Trust Company. The estate is valued at $61,239.

The Royal Trust Company has been granted administration of the Ontario estate of Harry E. Talbot, of Van Buren Township, Ohio, who died leaving an estate of $2,914,034. The Ontario estate is valued at $546,723.

The Trusts and Guarantee Company has been appointed executor of the will of Mrs. Agnes G. Love, of Toronto, who died leaving an estate of $4,089.

## INTEREST ACCRUED ON LEGACY

### Estate of Late Hon. T. W. Crowthers Gives Rise to Action in Court

In an application as to the construction to be placed on the will of the late Hon. Thos. W. Crowthers, Justice Orde, in a written judgment said that a question had been raised as to the right, if any, of W. G. Crowthers to interest from the date of the testator's death until the date of actual payment of the $40,000 held to be vested in the legatee. The legatee contended that he was entitled to interest from the testator's death. The contention of the executors was, that as upon the interpretation which had been placed upon the will, the gift of the capital at the end of the period of 5 years from the testators' death, coupled with the gift of income during that period, caused an immediate vesting of the $40,000, the gift must be construed exactly as if it had been a general pecuniary legacy of $40,000 and that consequently the legatee could not have both the capital at the expiry of that year and also a year's interest.

A careful analysis of the terms of the gift shewed the fallacy of that argument. The executors were directed to set aside or to procure investments to the extent of $40,000 and to pay the interest therefrom to the legatee annually for a period of 5 years "after my decease." Altho the executors would have a year in which to set aside or procure the investments, the interest upon the $40,000 would on the principle governing the payment of annuities, run from the death of the testator. The testator set apart in effect as from his death $40,000 for the purpose of this gift. While payment of capital was suspended, the interest was to belong wholly to the legatee. The combined effect of the two gifts was to accelerate the payment of the capital, which by virtue of the gift of the income ceased to be contingent. But the fact that there were two gifts, one of capital and the other of income upon his capital as from the testator's death, could not be ignored. The complete setting apart of the capital and of the income from the testator's death took that wholly out of the residue. To deprive this legatee of any part of the income earned by the $40,000 from the testator's death would augment the residue to that extent and upon any construction of the will the testator could not have intended that.

W. G. Crowthers was therefore entitled to the interest on the $40,000 from the date of the testator's death until payment of the capital.

# *Bank Branch Notes*

G. G. Laird, late manager of the Halifax branch of the Canadian Bank of Commerce, has taken over the management of the main Hamilton branch of that bank, succeeding D. B. Dewar, who has been retired under the bank's pension system.

The Bank of Nova Scotia has moved from its office in the Hammond Building on Fairford street west, Moose Jaw, to the former Bank of Montreal building, 303 Main street north.

The Sterling Bank announce the follow:—S. Ransom, recently of College street branch, Toronto, has been promoted to West Toronto office as Teller, replacing B. P. Williams, who has been appointed to Sudbury, as Accountant. W. E. Ward, Teller at Goderich branch, has been promoted to the Accountant's duties in that office, succeeding G. M. McKenzie. H. C. Roberts, who recently joined the Western staff, at Winnipeg, has been appointed manager at Wadena, Sask., succeeding Mr. Smyth, the latter having been transferred to Winnipeg.

The Royal Bank announce the following:—Geo. Capstick, manager of the branch at Sherbrooke, has been appointed manager of the branch at Lockeport, N.S., R. St. C. Hopgood, manager of Almon & Agricola branch, Halifax, has been appointed manager at Baddeck. He will be succeeded by J. H. Edsall, formerly at Lockeport; J. L. Snook, manager of Imperial branch has been appointed manager at Sherbrooke, N.S. M.H. Curll, manager at Inverness, will succeed him; H. G. Bowes, at present manager at Baddeck, has been appointed to a position on the staff of Main Office.

## J. B. CAINE CO., LTD.

The J. B. Caine Co., Ltd., Montreal, has secured a Dominion charter with authorized capital of $575,000. Associated with Mr. Caine will be Harry D. Bayne and Heriot K. Ferguson. J. B. Caine, has for many years been associated with the P. Lyall and Sons Construction Company,, Limited, as vice-president and treasurer. Mr. Caine is the president and general manager of the new organization. Harry Bayne has been identified with the Westinghouse Electric Company, and the Canadian General Electric Company for several years, and during the war acted as controller of metals for the Dominion Government. Mr. Bayne will be the contact man for the new Caine company throughout eastern Canada, in addition to serving as secretary and director of the company. Mr. Ferguson has been associated with Ross and Macdonald, architects, for more than twelve years, and has been in charge of such works as the Toronto Union Station, Chateau Laurier, and the Grand Trunk station at Ottawa.

Mr. Caine, in discussing the company's plans, pointed out that the new organization would perform a service in the construction field not now afforded by any Canadian company. "An expert survey of conditions in Canada," said Mr. Caine, "shows the need of a purely Canadian organization equipped to do a general contracting and construction business, and at the same time be able to handle not only the primary but also the secondary financing of building projects. There is no doubt but that a tremendous amount of construction work has been held back because there was no market in Canada for second mortgage bonds, and if an organization could accept and dispose of such securities, that organization would be in an exceptional position and could secure a great amount of profitable construction work.

"With this object in view, I have organized our company and have secured a personnel in both the construction and the finance departments of outstanding ability. We will present a new avenue for Canadian development, our object being to build in Canada and finance such construction through our own organization operating in the United States. On the construction now in view, many millions of dollars of American funds will be brought into Canada, and I believe that a large amount of building will be initiated because we can provide for property owners a service not now offered in the Dominion."

The company's notice of incorporation mentions contracts for the erection of two buildings in Montreal, of 2,900,000 and 2,600,000 cubic feet, which it is empowered to acquire from J. B. Caine.

The company has temporary offices in the new Birks Building.

## MONTREAL AND QUEBEC BANKS

Although the August statement of theMontreal City and District Savings Bank and La Caisse D'Economic de Quebec shows numerous minus signs, these are only fractional and do not in any way affect the financial standing of the banks. There were only two items showing an increase and both these occurred in La Caisse de Economic. Loans on bank stocks are up by $391 from July, and loans on other securities are also up from the previous month, increasing by $80,882. The following is the statement for the month of July and August.

### Montreal City and District

## FINANCIAL CO-OPERATION WITH CANADA

J. Arthur House, president of the Guardian Savings & Trust Company of Cleveland and president of the Trust Company Division of the American Bankers' Association, recently returned from Canada where he was a member of the American Bankers' Association delegation which met with the Canadian Bankers' Association in Montreal recently. At this meeting practical subjects were discussed as to closer co-operation between bankers of the United States and of Canada. Speaking of the results of the meeting Mr. House said:

"Our visit in Canada was a success in every way. It now seems certain that committees or commissions representing the Canadian Bankers' Association and the American Bankers' Association, appointed to study international financial and commercial conditions, will iron out the various vexations, difficulties and differences that arise. These committees would consider such matters as exchange rates, trade arrangements, and so on. A formal statement will be forthcoming from the A. B. A. in the near future."

## REPUBLIC OF HAITI BONDS.

Offering will shortly be made in the United States and Canada of $16,000,000, Republic of Haiti, 30-year 6 per cent bonds, which have been purchased by the National City Company. When this financing is completed the issue will constitute the sole external debt of the Republic, part of the proceeds being required to retire obligations now held in France. The Republic agrees not to increase the external debt further except by agreement with the president of the United States.

## BRITISH INVESTORS.

Sir James Hope Simpson, director and general manager of the Bank of Liverpool and Martina, Ltd., Liverpool, arrived in Victoria on September 27 in the course of a visit to Canada. In an interview he said:—

"Eligible Canadian investments can be placed in the London market at no disadvantage as compared with securities of other British Dominions. There was for a time some disposition to criticize Canadian investments in view of the Grand Trunk railroad controversy, but the decision given by the Judicial Committee of the Privy Council in favor of the Government of Canada has removed any feeling that the Grand Trunk shareholders were unfairly treated. On the other hand any would-be Canadian borrowers must remember that there is not so much money in Great Britain available for investment as there was before the war, and that a higher price had to be paid for it."

## NEW CONTRACTS SECURED

### Quebec Railway, Light Heat & Power Co. Signs Large Contracts

Announcement is made that the Quebec Railway, Light, Heat & Power Co. has signed two contracts for the supply of power.

The first contract is with Denaston Breakey, president of John Breakey, for the supply of power for a period of twenty years for the operation of the plant at Breakeyville, Que. This contract is for a minimum of five hundred horse-power. The Breakey Co. will extend their own transmission line to the company's plant at Breakeyville on the Chaudiere river, and the power will be taken as soon as the work is completed, possibly within the next few weeks.

The other contract is with the Canadian Pacific Railway to furnish the Chateau Frontenac with about 400 horse-power in excess of the present requirements. The extension to the Chateau Frontenac is now under way, and on completion in the near future, the hotel will be the largest under the operation of the C.P.R., and one of the largest in Canada.

Plans for extending the capacity of the company's power plants are now under consideration, and will be announced in the near future

## IMPORTANCE OF MANUFACTURES

### Create More Freight Traffic than Field Crops Do, Says John R. Shaw

That the freight traffic in raw products for Canadian factories and the finished products of these factories exceeds in volume the traffic of the entire field crops of Canada, was the contention of John R. Shaw, president of the Canadian Manufacturers' Association, in an address to the Edmonton branch of that organization on September 15. Mr. Shaw pleaded for a more general recognition of the place of industry in the life of the Dominion, and the importance of developing Canadian industry as a means of solving railway and other national problems.

Touching upon taxation, Mr. Shaw said the present system places Canadian manufacturers under a disadvantage in competition for Canadian business with the manufacturers of the United States. The system prevailing, he said, is based upon the principle of taxing goods at their source and concealing the taxes in the price the consumer pays for the finished product, thus making that price seem high, in some cases, in comparison with the price which manufacturers in other countries, where this principle is not followed, are obliged to charge.

Mr. Shaw said the Canadian Manufacturers' Association is not backing any political party, but is supporting strongly the principle of a protective tariff. The boundary between Canada and the United States is, for the most part, a political rather than a natural line, and the transcontinental railways had been built with a view to the continuance of that boundary and the direction trade east and west, rather than north and south. Mr. Shaw argued that, if Canada were to continue to be a separate nation and if sufficient traffic were to be developed to make her national railway pay, the present principle of a protective tariff must be maintained.

*New Issue* $3,000,000

**British National Assurance Company**

Incorporated by Special Act of Parliament of the Dominion of Canada and assented to May 19th, 1922.

**HEAD OFFICE, - TORONTO**

The Company may make Contracts of the following Classes of Insurance:

(1) Fire insurance.
(2) Automobile insurance
(3) Burglary insurance.
(4) Explosion insurance.
(5) Guarantee insurance.
(6) Hail insurance.
(7) Inland transportation insurance.
(8) Plate glass insurance.
(9) Sprinkler Leakage insurance.
10) Tornado insurance.

**CAPITAL STOCK**—The Capital Stock of the British National Assurance Company is Three **Million Dollars**, divided into 30,000 ordinary shares of $100 each. **There is no Preference Stock**; just one class of shareholders, all on the same footing. **No Stock has been given for promotion or organization. Every share must be paid for in cash.**

**MANAGEMENT**—The Company is fortunate in having among its Directors men who have had a successful experience in the Insurance business. Some of them, for many years, have been actively interested as Directors and Officers in Insurance Companies, and have an intimate knowledge of Company and Agency organization.

**FIRE PREMIUMS 1920**—Our Canadian people paid in Fire premiums in 1920, to Companies holding Dominion licenses, the sum of **$50,527,937**, out of which **$42,524,481**, or **84%** went to British **and Foreign Companies, leaving only 16% to our Canadian Companies.** The British National, with its Head Office in Canada, has an exceptional field in which to secure a large and profitable business.

**SECURITY—No part of the Capital Stock of a Canadian Insurance Company may be represented by goodwill or organization expenses.** The capital of Canadian Companies must be paid in cash and invested principally in Government and Municipal Bonds and first mortgages, as required by The Insurance Act. **It is generally conceded that no other class of Company Shares offers a more safe and profitable investment than Insurance.**

**EARNINGS**—The trading profits of Insurance Companies from Fire business, only, in Canada, have been most favorable for a long period of years. A combined statement of Receipts and Expenditures, as taken from pages XIX, XX and XXI of the Government Blue Books, is as follows:—

**Business in Canada of British and Foreign Companies for the two years 1919 and 1920:**

| | |
|---|---|
| **Paid for losses** | **$32,699,112** |
| **Paid for general expenses** | **26,712,934** |
| **Total payments** | **$59,412,046** |
| **Received for premiums** | **76,140,119** |
| **Balance in favor of the Companies** | **$16,728,073** |

Interest earnings on the invested assets of Insurance Companies which are usually many times the paid-up capital, add materially to the trading profits. **The income of Canadian Fire Companies for 1920, from interest and rent alone, was equivalent to over 10 per cent. of their total paid-up capital.**

**DIVIDENDS**—The cash dividends actually paid by some of the leading Fire Companies are surprising. A **Canadian Fire Company paid its shareholders 50% in 1918, 80% in 1919, 100% in 1920, and 100% in 1921.** Several American Companies have paid 25% for a number of years, and another has paid **60%** for each of the years **1919, 1920,** and **1921.** While a new Company cannot hope to earn such large dividends, the British National Assurance Company has every reason to anticipate a profitable business and make satisfactory returns to shareholders.

**MARKET QUOTATIONS**—The actual sales and quotations on the London (Eng.) Stock Exchange and of the New York Brokers show sales of Insurance Stock at remarkable premiums, some **at 18 times their paid-in value.** Shares of several Canadian Fire Companies have recently sold at a handsome premium.

**INCORPORATORS AND PROVISIONAL DIRECTORS:**

## INCREASE IN INSURANCE CARRIED

### Western Canada Mutual Fire Association Also Reports Higher Losses And Increased Assessment

The semi-annual meeting of the Western Canada Mutual Fire Association was held last week in Winnipeg with the following representatives present:

Stratton Whitaker, manager, and A. H. Thorpe, treasurer, of the Portage la Prairie Mutual Fire Insurance Company; H. R. Earl, president, and John Cameron, manager, of the Saskatchewan Farmers' Mutual Fire Insurance Company, of Saskatoon; H. E. Hemans, manager, Miniota Mutual, Beulah, Manitoba; R. H. Cook, manager, Farmers' Mutual Fire Insurance Company, Regina, Saskatchewan; Dr. C. M. Vanstone, manager, Wawanesa Mutual Insurance Company of Wawanesa, Man.; M. G. Doyle, manager Royal Victoria Mutual Fire Insurance Company, of Winnipeg; R. H. M. Pratt, manager, Urban Mutual Fire Insurance Company, of Portage la Prairie.

R. H. Cook, president of the Association, stated that one of the purposes of the meeting was to consider the advisability of collecting an advance assessment in future with every fire application instead of the present method of carrying all new applications until the regular annual assessment came due in the fall. The meeting decided that for the present no change would be made as it would in too many cases prove a hardship on members during the summer season when money is usually scarce. The total insurance carried by the mutuals in Western Canada is approximately $420,000,000, being a gain of about $50,000,000 over the same time last year.

**Losses are Higher**

The losses to date were approximately $600,000, which is slightly higher than at the same time last year. The largest losses of the season were caused by the windstorm of June 23rd, which totalled nearly $200,000, about $125,000 of this being payable by the Portage Mutual. This storm started near the Alberta boundary and taking an easterly direction passed through the well settled Portage district where most of the damage was done. The Portage Mutual had six gangs on all summer repairing and rebuilding many of the losses in Manitoba.

The assessments for 1922 have been slightly increased over the average for several years for the purpose of taking care of the excessive loss ratio for the past two seasons and also for the purpose of creating larger cash reserves.

The experience of most of the companies represented pointed to the increasing hazard of careless smoking around farm buildings and threshing outfits. At least one-quarter of the losses in 1921 and 1922 can be directly or indirectly attributed to the careless smoker and careless handling of matches.

## TORONTO LIFE UNDERWRITERS.

The opening meeting and dinner for the season of the Life Underwriters' Association of Toronto, was held on Sept., 29. Wm. May, Jr., the president, introduced the members who had been honored with official positions at the recent conference in Toronto of the Life Underwriters Association of Canada.

J. G. Stephenson, honorary president of the Life Underwriters' Association of Canada, gave a talk on "Personal Factors in Selling of Life Insurance." Mr. Stephenson dealt with the preparations and academic training necessary to make a man selling life insurance a success. He believed the successful underwriter was the man who hitched up his mind to idealism. It was an avocation of life which required energy, tenacity and tact. He offered some timely hints to the man launching into the business and the methods necessary to obtain results with prospective clients.

## EXCHANGE ON FREIGHT.

Notice is given by the Board of Railway Commissioners that the rate of exchange in connection with the shipment of freight between points in Canada and the United States from October 1 to October 14, inclusive, will be 1-32 of 1 per cent. discount. No surcharge will be collected on international business either freight or passenger.

## FIRE COMPANIES WERE NEGLIGENT

### Did Not Discover That Property Was Pledged Before Assuring Risk.

The United Manufacturers Sales, a partnership trading in London, Ontario, insured a stock of merchandise with seven insurance companies and recently brought action to recover loss caused by a fire which occurred in a building containing the stock in London on 28th December 1920.

The action was tried at Toronto and Justice Middleton in a written judgment said after stating the facts that one Jackson, who was the agent for all the insurance companies arranged the insurances and issued the policies. The learned Judge found that Jackson's authority was merely to place the insurance, and that, as soon as the policies were issued, he had no further authority to act in any way for or to represent the insured.

The claims of all the firms and companies represented by the partnership, whose goods were covered by the policies, amounted to $32,784. The learned Judge was of the opinion that there had been an overvaluation and that the amount should be reduced to $25,000. This overvaluation he did not find to be fraudulent or dishonest to such an extent as to avoid the liability upon the policies.

It appeared that the goods of several of the firms were subject to bank securities and it was said that the nondisclosure of this vitiated the policies; and further that, inasmuch as the insurance was only upon the interest of the assured in the goods, the plaintiffs were not entitled to recover. But this was not the true situation. The goods remained the property of the assured. They were hypothecated but that did not prevent the assured still remaining the beneficial owners. No details were asked for when the insurance was applied for, the insurance companies through their agent Jackson, being apparently willing to take things as they were and to assume the responsibility of the fire risk without first obtaining particulars that might well be regarded as material to the risk.

His Lordship consequently decided that the plaintiffs should recover $25,000.

## TWO BANK ROBBERIES.

Two gangs of bank robbers were in action in Saskatchewan on September 27, and between the hours of two and three the Moosomin branch of the Union Bank of Canada and the Ceylon branch of the Bank of Montreal were robbed of their cash on hand. Eight or ten men were engaged in the Moosomin operation and their booty amounted to $8,000. It is not known how many took part in the Ceylon affair, but they secured about $6,500.

In both instances the robbers escaped in motor cars, presumably in the direction of the United States border, and no arrests have been made. Securities of unknown value were stolen, but it is thought that they will not run into high figures, as the epidemic of bank robberies in the West during recent weeks has induced certain precautions in the matter of negotiable papers.

## PROTECTION AGAINST ROBBERS.

Urging citizens of small towns within easy distance of the international border to organize vigilance committees, C. W. Chesterton, superintendent of Saskatchewan branches of the Bank of Montreal, in an interview on September 27, declared that such action would have to be taken if a stop is to be put to the looting forays by gangs from across the line. Vigilance committees have already been organized in many of the towns along the Souris line of the Canadian Pacific Railway.

## DAYLIGHT ROBBERY.

The most spectacular robbery in Vancouver's history occurred on September 24, when three men held up Robert Armstrong and F. P. Schooley of the city hall staff and robbed them of cash amounting to $75,000.

Armstrong and Schooley had been to the Bank of Montreal, Hastings and Richards sreets, to get the civic payroll. They returned on a street car and had just alighted at Main and Pender, in front of the City Hall, when three men stepped from an automobile, seized the satchel, leaped into their car again and sped away.

## ASSIGNMENT OF LIFE POLICY

### Verbal Statement to Future Wife Did not Change Beneficiary, Court Holds.

In the case of Curtis v. Langrack, recently before the Appellate Division of the Alberta Supreme Court, one of the questions for decision was as to the validity of a verbal assignment of a life insurance policy.

The deceased took out a policy of insurance on his life expressed to be payable to his "executors or administrators or assigns." A premium was to be paid yearly for a period of 20 years from the date of the policy if he should live so long; the insured was accidentally killed a few months afterwards and the plaintiff claimed the insurance moneys on the ground that the policy had been verbally assigned to her.

The Court held that if the assignment was in view of the intended marriage between the insured and the plaintiff, it must be held void because of failure of consideration, the marriage not having taken place prior to the death of the insured. Neither could it be upheld as a gift, because the donor had failed to divest himself of the legal title to the policy which he might have done by instrument in writing and the gift was therefore incomplete.

**Future Wife's Benefit.**

Chief Justice Scott in his written decision says: "Subsection 7 of section 9 of the Life Insurance Beneficiaries Act provides that, where an unmarried man effects the contract of insurance or declares it to be for the benefit of his future wife, but at the maturity of the contract the assured is still unmarried, the insurance money shall be for the benefit of the assured or shall form part of his estate, as the case may be.

"In my view, the effect of this provision is that the intention of the assured in effecting the insurance must govern and it is clear from the plaintiff's evidence that the policy was intended by the deceased to be for the plaintiff's benefit only in the event of her becoming his wife, and that it was delivered to her solely with that intention. I. therefore, cannot see any reason why it should not be deemed to be an insurance within the meaning of that provision or why, in the event of the assured dying unmarried, the moneys payable under it should not form part of his estate.

## NEW INSURANCE STOCK.

C. R. Clapp & Company, investment bankers. Toronto, are offering a new issue of $3,000,000 of the British National Assurance Company, incorporated May 19, 1922. The capital stock is divided into 30,000 ordinary shares of $100 each, and the price to the public is $115 per share. The company will engage in the business of writing various forms of insurance, such as fire, automobile, burglary, hail, etc., ten classes in all. Incorporators and provisional directors are the following: Brig.-Gen. V. W. Odlum, Vancouver; Ernest Roy, Quebec; John R. Shaw, Woodstock; Peter White, Toronto; Frank H. Patten, London, Ont.; Robert B. Young and C. R. Clapp, both of Toronto. The Head Office of the company is located at Toronto.

The company is incorporated by special Act of the last session of Parliament. Application was made for the name "British Empire Assurance Company," but it was changed as above.

## INSURANCE AGENT ACCUSED.

John D. Kennedy, of Montreal, formerly of Sherbrooke, was arrested on September 26 on a charge of theft by conversion, and taken to the local jail, pending the hearing of his case before Judge J. H. Lemay, in the District Magistrate's Court. It is understood that the complaint has been laid by Mr. Henry Veilleux and is in connection with the recent decision rendered in the Superior Court when Kennedy and Veilleux were jointly held responsible for the payment of a sum of $763.23 to the Firemen's Insurance Company, with headquarters at San Francisco. Kennedy, formerly the company's agent, was held responsible for not turning over certain amounts to the company, and on his refusal to make good the company took action against Henry Veilleux, who had signed a bond for $1,000 in favor of Kennedy. Veilleux is now taking action against Kennedy, and has charged him with theft by conversion.

# Recent Fires

Fire losses in Canada during the week ended October 4 are estimated by The Monetary Times at $843,500, compared with $294,460 the previous week. This does not include any estimate on account of the Northern Ontario conflagration, figures not being as yet available. Details are given below:—

**Alvinston, Ont.**—Oct 2nd. Alvinston flax mill. Loss, $12,000.

**Arnprior, Ont.**—Sept. 30th. Barns, stable and implement shed belonging to William Dillon in McNab township.

**Asbestos, Que.**—Oct. 2nd. Store belonging to O. Bergeron.

**Ashburn, Ont.**—Sept. 24th. Barn belonging to Walker Bros. of Whitby. Loss, $6,000.

**Avonlea, Sask.**—Sept. 27th. Residence owned by Wm. Shrami. Loss $10,000 with no insurance.

**Aylmer, Ont.**—Sept. 29th. Cottage belonging to Rev. Father Gauvreau, O.M.I., at The Cedars. Loss $3,000, partially covered by insurance.

**Berton, Man.**—Sept. 29th. Barn on the farm of J. L. Brautgan. 1 fatality.

**Britannia, Ont.**—Sept. 28th. Three cottages on Kehoe street. Loss $20,000, insurance $10,000.

**Brockville, Ont.**—Oct. 1st. Barn owned by George C. Merkley, National Valley. Cause, matches.

**Caledon, Ont.**—Oct. 3rd. Barn belonging to H. A. Patten, on the Centre road.

**Ceylon, Ont.**—Sept. 29th. Barn belonging to Richard Whittaker. Cause, sparks. Loss is covered by $3,500 insurance.

**Dauphin, Man.**—Oct. 1st. Pavilions and three cottages at Dauphin Beach belonging to Ros and Nelles and Thos. Scott. Loss $17,000.

**Delaware, Ont.**—Sept. 27th. Stanley Blosdale's garage, a barber shop, Eichenberger's hotel, and the Home Bank. Loss, $25,000.

**Dixville, Que.**—Sept. 24th. Barn belonging to A. Byron,

**Fredericton, N.B.**—Sept. 28th. Residence on Killarney Lake road occupied by Mrs. Andrew McCoy.

**Heathcote, Ont.**—Sept. 22nd. Barn of W. Fields.

**Jonquires, Que.**—Oct. 1st. Barn and stable belonging to Jos. Levesque. Loss $5,000.

**Lyon's Brook, N.S.**—Sept. 30th. Barns and tannery owned by Robt. McDonald.

**Meaford, Ont.**—Oct. 1st. Deegan and Hurd's barber shop and poolroom. Loss $3,000.

**Montreal, Que.**—Oct. 1st. Cellar of R. N. Tayloe & Co. Ltd., 522 St. Catherine street west.

Sept. 26th. Six homes at 3854 to 3864 Casgrain street were destroyed. Marie Rose Academy, 250 Rachel street east.

Oct. 4th. St. Jean Hospital for the Insane at Longue Pointe.

**Nanaimo, B.C.**—Sept. 21st. Building on Wallace street used as a storage warehouse by the Weeks Motor Co.

**Nordin, N.B.**—Sept. 29th. Mill of J. D. Buckley estate. Loss $150,000 partly covered by insurance.

**Ottawa, Ont.**—Sept. 25th. Plaza Cafe, near Sparks and Bank streets. Loss $10,000.

Oct. 2nd. Premises of P. J. Berrigan, of Hogs Back.

**Owen Sound, Ont.**—Sept. 27th. Warehouse of the Keenan Wooden Ware Manufacturing Company, Ltd. Loss $50,000.

**Pembroke, Ont.**—Sept. 24th. Log house on the farm of Mr. Wilson. Loss $1,000.

**Port Arthur, Ont.**—Sept. 26th. Home occupied by Mrs. Wm. Selders, 60 Kenogami avenue. Loss $1,000.

**Regina, Sask.**—Sept. 24th. Farm residence of C. W. Williams in the South Regina district. Loss $25,000 with no insurance.

**St. Charles, Que.**—Sept. 25th. Parish church Loss $100,000.

**Ste. Marguerite, Que.**—Sept. 26th. Factory owned by Eugene Metivier and five residences. Loss $15,000.

**St. Victorie, Que.**—Sept. 24th. Several big stores destroyed. Loss $100,000.

**Sherbrooke, Que.**—Sept. 25th. Main building of l'Hotel Dieu Hospital.

**Sioux Lookout, Ont.**—Sept. 27th. Home of Alderman J. W. Walsh. Loss $7,000 partially covered by insurance.

**Smith's Falls, Ont.**—Sept. 26th. Home of B. Hawkins on Lorne street.

**Strasbourg, Sask.**—Sept. 26th. Farm buildings belonging to Philips Scharle. There was no insurance.

**Swift Current, Sask.**—Sept. 30th. Barn on the farm of John Washington. 1 fatality.

**Tavistock, Ont.**—Oct. 1st. Buildings of the Tavistock Milling Co., owned by Ratz & Sons. Loss $200,000.

**Toronto, Ont.**—Oct. 4th. Factory of the Adjustable Dress Form Company, 14 Millstone lane. Loss $40,000 covered by insurance.

**Vermilion, Alta.**—Sept. 28th. Barn and residence of B. Inverson. Loss $10,000 partly covered by insurance.

**Waterloo, Ont.**—Oct. 2nd. Garage of Liphardt Bros., on Erb street. Loss $4,000.

**West Lorne, Ont.**—Sept. 28th. Barn of Wm. Franks, 4th concession of Alborough. Loss $10,000 partly covered by insurance.

**Wiarton, Ont.**—Oct. 3rd. Barn of Fred Taylor at Greig's Settlement. Loss $4,000, insurance $2,200.

**Winnipeg, Man.**—Sept. 26th. Shipping shed of the Overland House Furnishing Company, 400 Portage avenue. Loss $10,000.

**Woodstock, Ont.**—Sept. 29th. Barns on the farm of Hugh Ireland, Lot 12, Con., 7, East Oxford. Loss is partly covered by insurance.

## INSURANCE INSTITUTE OF TORONTO

The Insurance Institute of Toronto has just announced its program for the coming season. The meetings and addresses are scheduled as follows:—

October 17, president's inaugural address, G. Cecil Moore, and address on "The History of Money," by professor C. T. Currelly, curator, Royal Ontario Museum; November 16, "Court and Contract Bonds," by A. E. Kirkpatrick, manager for Canada, United States Fidelity and Guaranty Co.; January 18, "Some Unusual Lines of Fire Insurance Protection," by Samuel McAdam, general agent, St. Paul Fire and Marine Insurance Co.; February 15, "Automobile Insurance—the Basis and Principles of Rate-making," by F. G. Haynes, manager, Ontario branch, Canadian Surety Co., "Life Insurance Book-keeping," by W. G. Reburn, manager, audit department, Imperial Life Assurance Company; March 15, "Life Assurance Company Investments," by J. B. McKechnie, general manager, Manufacturers' Life Insurance Co., and president of the Dominion Mortgage and Investments Association.

## DESTROY HAZARDOUS BUILDINGS

### Fire Marshall's Act Becoming Effective—Companies Join B.C. Fire Underwriters' Association

(Special to The Monetary Times)

Vancouver, October 2:—The wide powers given to fire marshall J. A. Thomas under the Fire Marshall's Act passed at the last session of the British Columbia legislature are being put to practical effect in reducing fire hazards throughout the province. The latest instance occurs in the city of New Westminster where Mr. Thomas has marked for destruction another list of old frame buildings in the Chinatown section and notices calling for their demolition will be issued shortly. For years the civic authorities of New Westminster have sought to have these buildings destroyed but were prevented by legal technicalities. The Fire Marshall's Act has at last given the necessary authority.

The following companies have been admitted to full membership in the British Columbia Fire Underwriters' Association: American Insurance Company of Newark, N.Y., General Agents for B. C. Balfour, Guthrie & Co.; Franklin Fire Insurance Co. of Philadelphia; Security Insurance Company of New Haven, Conn. with head office for Canada at Montreal and general agent for B.C., T. W. Greer of Vancouver.

Illustrated lectures on fire prevention will be given during Fire Prevention Week in all the schools of Greater Vancouver under the auspices of the Parent Teacher Association by Charles R. Orchard of the staff of the B.C. Fire Underwriters.

## DIFFICULTY IN COLLECTING CLAIMS.

### Insurance Department Calls Attention to Cases Where No Deposit is Made in Canada.

An announcement of the Insurance Department, Ottawa, dated October 3, Says:—

"The Department has received during the past few months many complaints from persons insured in companies unlicensed in Canada as to the failure of these companies to pay losses incurred under their policies.

"These policies have been in most cases effected as a result of solicitation and correspondence by mail and the insured in many cases are inclined to criticise the regulations which permit the mails to be used for this purpose by insurers whose protection has been found to be unreliable."

### Transact Business by Mail.

"The Department thinks it desirable therefore that the public should be warned that there is nothing in the statutes preventing unlicensed insurance companies from communicating with persons in Canada by mail for the solicitation of business or the collection of premiums or otherwise in connection with insurance. It should also be carefully noted that in respect of this insurance no protection is given to the insured by way of Canadian deposits.

"In several of the cases recently brought to the Department's attention it has been found on enquiry that the companies have been placed in liquidation and the liquidators take the position that action must be instituted, by Canadian claimants, in the courts of the companies' native state. This attitude has also been taken by some companies still carrying on business.

"In all these cases this Department is unable to enforce the claims of Canadian policyholders by reason of the fact that the companies do not maintain assets in Canada for their protection.

"Persons desiring information as to the status of insurers soliciting their business can obtain the same promptly by communicating with the Department."

## PROTECTION OF REINSURANCES.

Commenting on losses which have been sustained by Canadian companies through the failure of re-insurance Companies outside of Canada, the Insurance Department, Ottawa, says in a "Memorandum to Fire Insurance Companies," dated October 3:—

"Recent events in the treaty reinsurance world have impressed the Department with the necessity of Canadian companies securing additional protection from their treaty companies in respect of reinsurance ceded to such companies. The failure of several of these companies has involved some of the Canadian companies in losses of varying amounts, notwithstanding the security provided under the provisions of the present treaties by way of deposit of securities and retention of a portion of the premiums ceded.

"Following the Department's suggestion in 1914, most of the existing treaties were revised and amended to provide for a deposit with the Canadian company by the treaty company of fifty per cent of the current premiums. While this deposit is sufficient, under normal circumstances, to fully secure the companies in cases in which the business ceded is one-year business and where the amount of premium ceded is fairly uniform from month to month, it is an inadequate protection when the business ceded is substantially three-year business, or when the business is ceded, of whatever class, is rapidly increasing.

"The events above referred to have shown that it is necessary for the companies to amend their treaties to provide for the retention by them of an amount equal at all times to the full reserve of unearned premiums on the business ceded, calculated pro rata for the time unexpired.

"The Department would suggest that the companies concerned take up negotiations with their treaty companies with a view to having this basis of security incorporated in their existing treaties and that in the case of new treaties being negotiated such a provision be included."

## IMPORTING LESS COAL

### Only About One-third of Last Year's Amount of Anthracite Has Come into Canada

Comparative figures, showing that Canada imported only one-third of the amount of anthracite and one-half the amount of bituminous coal this year that it did last, are given in an advance summary of the coal situation, issued by the Dominion Bureau of Statistics. Last year, three million tons of anthracite came into the country, and this year only one million, while three and one-half million tons of bituminous have been imported this year as against nearly seven millions last year.

Ontario this year has received only eight hundred thousand tons of foreign anthracite as against two million last year, while its bituminous import this year was three million tons, and last year five and one-half million.

Against these import figures the summary shows that Canada has exported about one million one hundred thousand tons of coal, while last year its exports amounted to one million four hundred and fifty thousand tons. Manitoba seems to be one of the fortunate provinces. Its imports of both anthracite and bituminous coal are in excess of last year, while British Columbia has been successful in getting about its same amount. New Brunswick is behind in its anthracite importation, but makes up the deficiency in bituminous. Quebec is away behind in its share.

---

## GETS OIL REFINERY.

On September 13 Calgary taxpayers by a vote of 3,906 for, to 26 against, ratified the agreement with the Imperial Oil Company, Limited, under which a $2,500,000 oil refinery will be built in Calgary. The only concession which the company asked was that the assessment be fixed at $250,000 for a period of twenty years. It is said that the construction of the project will be started at once.

## MUST LOOK FOR NEW MARKETS

### American Tariff Only Temporary Disturbance to Canadian Trade

Speaking at a luncheon of the directors of the Central Canada Exhibition at Ottawa on September 16, Hon. J. A. Robb, Minister of Trade and Commerce, stated that the policy of the present administration, is, in so far as is possible, to remove trade obstacles, encourage trade routes, and to spread the knowledge of what Canada has to offer at home and abroad. But the department, stated Mr. Robb, would have to leave to the commercial travellers the work they can do so much better to pick out the customer and push the goods.

### Good Crops

If the manufacturers and salesmen of the country, with the department of trade and commerce, will work together, they will be greatly helpful to Canadian trade, and the extension of Canadian commerce. Providence is with Canada, said the minister. Throughout all the provinces this year, Canada has a fair crop, in some provinces not a bumper crop, but generally speaking a good, fair crop. The eastern provinces have had a good season, production has been increased at reduced cost. Prairie provinces are so satisfied with their crop that they are advertising widely, and well-posted men say they are depressing the price of their own product by so doing.

### Sale Prices Up

Declaring that he did not believe such a result of the advertising of the western crops was intended, Mr. Bobb thought that all that is possible should be done to keep prices for products sold on the foreign markets up, then everybody in Canada will benefit.

"The more money the farmer receives for his crop, the more money he has to spend on the product of the factories. This would materially help to solve the unemployment problem, and prepare the field for the immigration we want and must have in the years to come," declared Mr. Robb.

### American Tariff

Speaking of the recent revisions in the American tariff, Mr. Robb said it had been done apparently with a view of reducing the trade of their own best customers. This may temporarily disturb Canadian trade, but it cannot discourage nor destroy Canadian enterprise. When a country puts up extreme barriers, hindering necessary purchases, that country places a stumbling block against its own trade, and fosters discontent among its own people.

"We in Canada will have to try and find other markets for the produce of the country, and give the preference to those who give preference to us," Mr. Robb concluded.

## NASHWAAK LUMBER CUT

The Nashwaak Pulp and Paper Company's cut of lumber on the Nashwaak river during the coming winter will not exceed 10,000,000 feet. Last winter the company's cut was not more than five or six million feet, but there was a great quantity of old lumber for their mill on the streams, and the result has been that they now have a considerable surplus stock of logs on hand at their plant at St. John. The river and all the streams were cleared of logs this year for the first time in a number of years.

## CLOSED SEASON FOR FISHERIES

A closed season in the British Columbia halibut and cod fisheries will be recommended to the Federal Government by the Parliamentary Commission which has just concluded an investigation of fisheries' conditions in British Columbia. In an interview, Wm. Duff, M.P., chairman of the commission, indicated that the commission is prepared to make such a recommendation.

The commission will also recommend, it is said, the creation of a separate portfolio and Department of Fisheries at Ottawa, assistance to white fisherman, with a view to making their occupation an all the year round one, and will suggest a curtailment of the number of licenses issued to Japanese.

### NEW C.M.A. BRANCH

A new branch of the Canadian Manufacturers' Association has been opened at St. Johns, Que., to serve St. Johns, Iberville, Chambly, Canton and other surrounding towns. The organization meeting was held in the offices of the Singer Manufacturing Company, St. Johns, where many leading manufacturers of the district had assembled. Among those present were F. W. Stewart, chairman of the Quebec division of the C.M.A.: C. A. Reynolds, representative of the divisional executive of the city of St. Johns, and R. W. Gould, secretary of the Canadian Manufacturers' Association, Montreal.

The following officers were elected for the new branch: C. T. Trotter, of the Standard Clay Products Company, as chairman; W. A. Davidson, Singer Manufacturing Company, vice-chairman; and Franklin Tait, of the Canadian Potteries, Limited, honorary secretary. It was decided that the branch will hold a meeting on the first Friday of each month, and that at the next meeting an executive committee will be formed.

The C.M.A. now has five branches in the Quebec division, Montreal, Quebec, Sherbrooke, Three Rivers and St. Johns.

### WILL FEEL EFFECT OF U. S. DUMPING DUTY

The Department of Trade and Commerce has been informed by Frederic Hudd, Canadian trade commissioner at New York, that sole leather from Ontario and exide of iron from Quebec have been placed on the list of articles coming within the provisions of the United States anti-dumping regulations. This is in pursuant to the latest decision affecting Canada of the Division of Customs of the United States treasury department.

The anti-dumping legislation provides that in case of imported merchandise, whether dutiable or free, if the purchase price or the exporter's sale price is less than the foreign market value (or, in the absence of such value, than the cost of production) there shall be levied, in addition to the duties already imposed, a special dumping duty in an amount equal to the difference.

### FAVORS COLONIZATION PLAN

Interviewed in Calgary on Sept. 21, E. W. Beatty, president of the Canadian Pacific Railway, expressed the view that the theory behind the establishment of the Western Canada Colonization Association is sound. He added:— "The essential thing is that the Western Canada Colonization Association should be thoroughly well organized, and secure the confidence and support of those in the West and the East, from whom such support, financial and otherwise, must be received. The Canadian Pacific has been in touch with the project from its beginning," he added, "and is hopeful that the activities of the Association will accomplish the results aimed at, but having its own colonization organization it can only work in harmony and co-operation with the Western Canada Colonization Association, and this it should be able to do with great benefit to Western Canada."

## LUMBER TRADE WILL CENTRE IN NORTHWEST.

### Dealers Getting Fair Prices—American Continent Entering Upon Five-Year Period of Prosperity

Representing the American Wholesale Lumber Association, four of the largest wholesale lumber dealers in the United States arrived in Vancouver recently and went into executive session with Vancouver wholesale and retail lumber dealers.

"The lumber industry is in good shape on the American continent," said President Ben S. Woodhead. "Lumber dealers are getting a price which is fair to all concerned without being out of proportion to the value of other commodities." A natural car shortage in the United States, due to the big crop which has to be moved, is interfering with shipments in that territory.

The party which has completed a tour of the whole of the United States, with President Woodhead also taking in the West Indies, is of the opinion that the American continent is entering upon a five-year period of general prosperity. The party consists of Mr. Woodhead, who is president and general manager of the Beaumont Lumber Co., of Beaumont, Texas; Joseph E. Davies of Washington, D.C., former commissioner of corporations and chairman of the federal trade commission under President Wilson; L. R. Putnam, head of the largest wholesale lumber firm in Chicago, and Dwight Hinckley, founder and first president of the Yellow Pine Association of the South.

All the lumbermen are of the opinion that in the future the lumber industry of the American continent will centre around British Columbia, Washington and Oregon, as the production in the eastern and southern parts of the continent has already decreased considerably and is still taking a downward direction.

---

## WILL GET SHARE OF COAL

### Canada Allotted on Same Basis as Various States

Canada is to get 60 per cent of its coal consumption of 1921, according to an arrangement arrived at by the Canadian Fuel Administrators with the Pennsylvania Fuel Commission, states a report of a conference in the coal State. The share apportioned to Canada is the same as that to the various States. The Canadians at the conference were C. A. Magrath, Fred McCourt and Major G. A. Bell. There will not be above 60 per cent. of last year's supply unless there is a tremendous increase in production at the mines.

Steps were taken against "raiding," says the Philadelphia report of the conference. In the case of Canada its representatives were told that they would get 60 per cent., assuming that it could be delivered, so long as their retailers made no attempt to buy coal from United States dealers over the border at enhanced prices. During the war period it was claimed that when cold weather threatened Canadian dealers offered as high as $20 a ton to coal merchants, who were held to a fixed price within their own country. As a result, some communities suffered because their supply was shipped to Canada.

The shipments now are being made to places that must get coal by water transport. The conference also exhorted dealers to buy buckwheat coal, which would make several million tons more available.

**It Belongs To You!**

That **"the business belongs to the local agent who worked it up"** is a principle first enunciated by the founder of this institution. That principle has been an article in our business creed for more than fifty years.

Another principle equally old in our practice is that we shall write no business in the territory of a local agent except through that local agent. To appoint an agent and thereafter leave him entirely to his own resources or to fail to protect his territory would be unfair both to him and to ourselves. By helping him in every practicable way we work to the end of mutual advantage.

Our SPECIAL RISK DEPARTMENT is a service bureau fully equipped to render valuable aid to agents in all details of insurance engineering and fire protection work. We have trained engineers in every field whose services are at agents' command.

Our BROKERAGE and SERVICE DEPARTMENT is a connecting link between agents and brokers. Business thus secured is invariably sent to local agents to write if they approve—and only if they approve. Many mutually valuable business connections have been arranged through this medium.

Branch Offices are maintained at Chicago, Atlanta, Kansas City, San Francisco and Toronto, Canada.

Send us a record of all risks located in your territory with the name of the broker placing them. Lines for your account will be promptly solicited.

**Montreal, Que.**—Up to the period ending September 28 the total tax collections amounted to $1,509,592. This compares with $1,260,664 for the same period last year.

**Ottawa, Ont.**—According to the annual preliminary report of the city commissioner, the population of the city is now 116,205, which represents an increase of 3,406 over 1921. In the last five years, 1917 to 1921, the average increase was 2,270, compared with 3,406 this year. The total increase in income derived from the realty and business assessment for 1922, was $2,146,020, this despite an increase this year on income assessment of $1,175,793.

**Edmonton, Alta.**—The net profit in the operation of the city's public utilities for the month of August was $11,307 as compared with $7.492 for the corresponding period of last year, according to a monthly report issued by the city commissioners. Taking the period from the first of January to the end of August of the present year, the report shows that the net revenue for the utilities for six months this year aggregates $223,743 as compared with $125,823 in 1921.

With the prediction that the end of the present year would find the street railway department showing a credit balance in operation, providing present fares are continued, Commissioner Yorath makes the announcement that the deficit of the radial railway system for the for the first six months of 1922 will be but $3.471 as compared with a deficit of $41,898 for the corresponding period of 1921. In 1920, taking the operation of the street cars for the entire twelve months, the deficit totalled over $200,000. The commissioner this year hopes to have the system revenue producing or at least hopes to show a report that the entire department makes an even break in revenue and expenses.

The monthly report for the utilities for August reveals that the telephone department produced a profit of $7,132 as compared with $8,060 last year. The waterworks furnished a surplus of $5,741 as compared with $4,109 last year, the electric light and power department a profit of $202, as compared with $4,927, the street railway had a deficit of $7,554 as against $12,876 last year, the power plant gave profits of $5,786 as against $3,272.

**Westmount, Que.**—At a meeting of the council on September 26 the tax rate for the year commencing October 31 was struck at 12½ mills on the dollar, the same rate as prevailed during the previous year. The new rate includes ½ mill for the memorial fund which is being raised to defray the cost of a soldiers' memorial.

**Winnipeg, Man.**—Tax collections for the period ending September 21 amounted to $7,200,345, as compared with $6,324,536 for the same period last year.

## ACCEPT QUEBEC GAS CHARGE

The city of Quebec through the civic finance committee, on September 19 decided to accept until the 11th of March, 1923, the reduction in the rate of gas from $1.75 to $1.55 per thousand cubic feet, offered by the Quebec Railway, Light, Heat and Power Company.

A report was received from the Quebec Railway Company showing that the gross earnings of the railway for the months of April, May and June were $204,847, as compared with $214,807 for the corresponding months of 1921.

## INVESTMENT HOUSE OPENS

The business formerly carried on by the Canadian & Foreign Securities Corporation, Limited, of Quebec city, has been taken over by G. S. Gourdeau and Captain Raymond Garneau, and will operate in future under the name of Gourdeau, Garneau, Inc. Mr. Gourdeau, the president of the new company, has had considerable experience in the financial world, having been connected with D. McGie & Son and Harris, Forbes & Co., previous to the incorporation of the Canadian & Foreign Securities, of which he was managing director. Captain Garneau, the vice-president, has been actively engaged in the bond business since his return from overseas

## NEW BRUNSWICK FINANCES

### Topic of Address by Professor W. C. Keirstead Before Moncton Canadian Club

Dr. W. C. Keirstead, professor of economics at the University of New Brunswick, addressed the Moncton Canadian Club on September 18, dealing with New Brunswick's revenues and expenditures. At the outset the speaker quoted at some length many statistics showing the comparison between the various expenditures and revenues in the province of New Brunswick and between those of the various provinces of the Dominion. The data was given as applicable to the years generally from 1914 onwards and showed the increases of each by years and for the whole period on a percentage basis. The facts went to show that cost of living had increased considerably in advance of salaries and wages and pointed out that the increase of salaries and wages shown included additional employees.

Referring to the expenditures for schools Dr. Keirstead stated that although this expenditure had been fairly large he was convinced that any fair-minded student of the matter would admit that more should be given to further our educational system. In showing how the educational system is supported he called attention to the fact that our education is supported almost entirely by the school district. He would like to make the statement that this system was the worst possible. The British Government had come to that decision long ago. His suggestion to better the system would be instead of a school district tax and instead of a city or a community Board of School Trustees to have a tax of the county tax for school purposes based on an equalized rate from the whole province and to have a Board of Trustees administering a much larger area. The expenditure should be borne 50 per cent. by the community and 50 per cent. by the provincial government. The promotion of the educational welfare of the people is a provincial care.

### Broaden Provincial Duties

In regard to other expenditures the speaker said the roads expenditures of the province are heavy. Without going into the merits of the expenditure he showed that the interest burden on this account is heavy and said that provision must be made for this and for the establishment of a large sinking fund. "In my judgment," said the speaker, "the time has come when the province should undertake a great many of the duties now handled by the municipalities, such as for instance the better care of the poor, care of children, and of defectives. Perhaps no province in the Dominion is more destitute of the means of taking care of the unfortunates than this province and the time has come to give them better care, and this is a provincial matter."

Dr. Keirstead criticized unfavorably our parish system and said that to make the parish the unit of administration was a travesty. The unit should be higher up. If he were a politician he would like to make his government the biggest thing in the province and would want enough money to run tthe province properly. The government should look after the poor and one of the greatest needs of today is improvement in our ways of caring for our prisoners. A modern prison farm is needed where the returns from the work of the prisoners can be turned to the care and support of the families of the prisoners.

### Revenue

In the matter of revenues he spoke adversely of the system of federal grants. He didn't think it was a good system for one government to provide money for another government to spend. However, the system exists and we are entitled to our share of the benefits. They had a right to expect that the government take over the Valley Railway and that fisheries and resources which contribute to the welfare of the Dominion should get their fair share of the Dominion subsidy. He was doubtful, however, if the maritime provinces would get any increase in the subsidy with the present attitude of the west.

Should the province get revenue as Quebec and British Columbia are getting from the sale of liquor? In discussing the Quebec liquor law the speaker said that to get a revenue of a million and a half from a law which controlled and tended to cut out the bootlegger, so as to have that amount available for roads, education and charity, was a great inducement to adopt their system. On the other hand why should New Brunswick not have a system whereby it could sell the stuff under control and make revenue out of it? The answer is this. If the province is to make a million and a half out of liquor it must sell $7,500,000 worth of liquor. Supposing $2,500,000 of the amount was sold to outsiders that would leave a sum of $5,000,000 to come out of the people of New Brunswick; that is to say that with a population of 800,000 one-fifteenth to one-twentieth of the whole income of the people of the province would go for liquor. He wondered if it would be better to take the $5,000,000 from the incomes of the people by selling them liquor or to take the same amount otherwise and to put it in some sound industry. He preferred the system of Saskatchewan to that of Quebec; in the former province there was a common and equalized system of taxation taking from the man able to pay to go for the education and general welfare of the people. Liquor has been accepted as a luxury, a habit that in the long run injures the workman and destroys happiness. We want control of the traffic but legislation must be for regulation purposes and not for revenue purposes.

### Must Come to Direct Taxation

In connection with the revenues needed by the province the speaker said that New Brunswick must come to honest direct taxation of the people for the needs of the people. According to law and the Constitution under the B.N.A. Act the province cannot impose indirect taxation. In spite of that nearly all the taxation is indirect, in fact such is the case in the whole Dominion.

In conclusion the speaker said that the road tax and the county school tax should be handled by the government, increased if possible, with the addition of a proper income tax, and the whole to be used by the provincial government and used wisely, thereby relieving the municipality and promoting the better welfare of the people.

## SHORTAGE IN TOWNSHIP ACCOUNTS

Following an investigation, Clarkson, Gordon & Dilworth, chartered accountants, reported to the Council of York Township, Ont, a shortage of $4,437 in the accounts. This amount represents, it is said, the taxes of 66 taxpayers, two payments for houses purchased from the township, as well as one ratepayer's payment of water rates. For these receipts, no corresponding entries could be found in the books.

In each of these cases, the parties who made the payments had produced receipts, leaving no doubt that they had paid. In addition to the aforementioned, there are forty other taxpayers who state that they have paid their taxes, but cannot produce the receipts, having mislaid them. The total of their payments amounts to $1,880, which would increase the shortage by that amount. Nearly all the shortages occurred between November, 1921, and April last. Notices were sent to those whose taxes were in arrears, 10,500 in all. In 5,000 cases no replies have yet been received.

The Council passed a resolution instructing the solicitor to consult the County Crown Attorney in regard to the shortage, and to take steps for the prosecution of those who may be responsible for it. Since the investigation was started, a new system for the handling of cash receipts has been devised, which, it is thought, should eliminate all future shortage. It will be put into operation as soon as the necessary permission can be secured.

## PROTECT RURAL BANKS

Officials of the various banks operating in Saskatchewan have formed themselves into a committee to co-operate with the Saskatchewan Provincial Police in efforts to extend more protection to rural branch banks in the southern part of the province, and prevent, if possible, a repetition of the robberies which have occurred recently throughout the prairie provinces.

A conference attended by representatives of the various banks operating branches throughout the province, has been held. Hon. J. A. Cross, Attorney-General and Commissioner C. A. Mahoney, also attended.

## BUSINESS SHOWS AN IMPROVEMENT

### E. M. Trowern Finds Trend is for a General Improvement

E. M. Trowern, Dominion secretary of the Retail Merchants' Association of Canada, who has just returned to his office in Ottawa from a trip to Montreal, expressed the opinion that there are indications all over the Dominion that good times are speedily coming to Canada again and that business is picking up to an extraordinary extent.

Mr. Trowern on his trip had been in touch with business circles connected with the organization and he had exceptional opportunities for gathering an indication of improvement in trade conditions from every province in the Dominion.

In speaking of the movement throughout the country for the extension of trade in Canadian manufactured goods, Mr. Trowern said there was no doubt that the buying of Canadian made goods would greatly help to bring industrial prosperity to the country, and, provided that all things were equal, such a movement should be encouraged.

### Misunderstanding

There is much misunderstanding, however, on the part of the manufacturers, he thought. The manufacturers are in competition with the goods from other places and outside countries on a basis of quality. If the Canadian manufacturers will place on the market goods that are equal, or better than those from other sources, both in quality and in price, there is no question that the retailers will recommend them. The retailers are in business to care for the requirements of their customers and give them the very best kind of service.

The retailer stands as an arbitrator between tlhe manufacturers and the public, and he can push those goods that are the best. It is not to be expected that he wilt recommend goods to his customers that are not up to standard in any respect, no matter where they are manufactured. It is unreasonable to expect the public to buy goods simply because they are made in Canada, if they are not of the same quality as others made in other countries.

### Tariff Changes

The retailer is in business just as long as he can satisfy his customers and give them value for their cash. As soon as he cannot do that he might as well get out of business. Nothing will sell Canadian manufactured goods like putting the quality into them, and making them the equal of the best that are produced anywhere else. Mr. Trowern said.

In referring to the recent tariff legislation in the United States and its probable effect on Canadian trade, Mr. Trowern said there is no question but that it will eventually react on the Americans, and that it would in no way injure the trade of this country. Canada will simply have to find other and better markets for her produce and manufactures.

---

## GRAIN SHIPMENTS

Indications that grain shipments through the port of Vancouver this year will exceed all previous records are contained in the announcement of the Merchant's Exchange that more than twenty-seven thousand tons of grains have already been booked for the United Kingdom. Total grain shipments last year were 7,500,000 bushels, a record.

# Government and Municipal Bonds

Although sales were fairly heavy during the week, there was a noticeable decline in the number of bidders and also in the offers. Formerly when an issue of 5½ per cent bonds for a substantial amount was offered, tendering was very keen, with very little variation between the highest and lowest bid, and in the majority of the issues a price of par and over was received. This compares with this week when tendering showed a considerable falling off, and prices also weakened, most of the issues being sold below par, with the exception of the 6 per cent., bonds.

### Tenders Invited

The following is a list of debentures offered for sale, particulars of which are given in this or previous issues:

| Borrower | Amount | Tenders Close |
|---|---|---|
| Ontario .. .. .. .. ... | $20,000,000 | Oct. 10 |
| Montreal, Que. .. . | 3,100,000 | Oct. 18 |
| Ottawa, Ont. | 2,639,883 | Oct. 20 |
| Vancouver, B.C. .... | 250,000 | Oct. 9 |
| Pointe Claire, Que. .. | 100,000 | Oct. 10 |
| Montmorency, Que .. | 60,000 | Oct. 17 |
| Fort Erie, Ont. .... | 40,000 | Oct. 17 |
| Coaticook, Que. .... | 40,000 | Oct. 9 |
| McGillivray Twp. Ont. | 12,505 | Oct. 9 |

**Fort Erie, Ont.**—Tenders will be received up to 12 o'clock noon, October 17, 1922 for the purchase of $40,000, 5½ per cent., 20-annual instalment debentures payable at Fort Erie. A. E. Seaton, village clerk.

**Montmorency, Que.**—Tenders will be received up to 12 o'clock noon, October 17, 1922 for the purchase of $60,000, 5½ per cent., debentures payable by series from May 1, 1925 to May 1, 1947. The bonds are dated May 1, 1922 and are in denominations of $100 and $500 with interest payable semi-annually. Bonds are issued for school purposes. Edmond Pouliot, secretary-treasurer.

**Montreal, Que.**—The Montreal Metropolitan Commission will receive tenders up to noon October 18, 1922, for the purchase of $3,100,000, 5 per cent., 20-year debentures. Alternative bids are asked for bonds payable in Montreal only, and payable in Montreal and New York. E. T. Sampson, secretary-treasurer. See official advertisement in this issue.

**Ontario.**—The province is calling for tenders for $20,000,000, 20-year 5 per cent. bonds, due October 1, 1942, payable in Toronto, Montreal and New York. Denominations, $1,000. Tenders close October 10th. See official advertisement elsewhere in this issue.

**Ottawa, Ont.**—Tenders will be received up to 3 p.m. October 20, 1922 for the purchase of $2,639,883, 5½ per cent., 10, 15, 20, and 30-instalment debentures. Alternative bids are asked for bonds payable in Canada only, and bonds payable in Canada and United States. Interest is payable January 1 and July 1. Frank H. Plant, Mayor. See official advertisement in this issue.

### Bond Sales

**Alexandria, Ont.**—C. H. Burgess & Co., have purchased $4,832, 6 per cent., 30-instalment, and $11.325, 6 per cent., 20-instalment debentures.

**Three Rivers, Que.**—The city has awarded an issue of $460,000, 5½ per cent., 25-annual instalment bonds to the Municipal Debentures Corp., at a price of 96.98, the money costing the city about 5.81 per cent. The tenders were as follows:

| | |
|---|---|
| Municipal Debentures Corp. ..... .. | 96.98 |
| Rene T. Leclerc .... ...... .... | 96.77 |
| L. G. Beaubien & Co. .... .... .. | 96.27 |
| Provincial Securities Ltd. .... ..... | 96.20 |
| Versailles, Vidricaire & Boulais, Ltd.. | 93.01 |

## DEBENTURES FOR SALE

(See also page 29)

### $2,639,883.86
### CITY OF OTTAWA, ONT.
### Debentures for Sale

Sealed tenders addressed to the "Chairman of the Board of Control," and marked "Tender for Debentures," will be received by the City of Ottawa up to 3 p.m. standard time, on Friday, the 20th day of October, 1922, for the purchase of Debentures of the following amounts and terms:—

| | |
|---|---|
| $216,753.11 .... .... .... | 10 years |
| 247,864.85 .... .... .... | 15 years |
| 400,265.90 .... .... .... | 20 years |
| 1,775,000.00 .... .... .... | 30 years |

$2,639,883.86

All Debentures bear interest at the rate of 5½%, and are issued on the instalment plan. That is to say, each issue is repaid in such annual amounts that the aggregate amounts paid on principal and interest each year are equal. Each Debenture is, however, for a definite amount payable at the end of some year with interest coupons attached payable semi-annually. Interest is payable 1st January and 1st July.

The Debentures are an obligation of the City at large, are issued in coupon form, with provision for registration of principal, bear date 1st July, 1922, and are in denominations of $1,000.00, $500.00 and odd amounts.

The City will make these Bonds payable either in Canada alone, or both in the United States and Canada, as may be decided.

Debentures will be paid at the branches of the Bank of Nova Scotia at Ottawa, Toronto, and Montreal, and, if payable in the United States, at the National Bank of Commerce, New York.

Tenders will be received as follows:—

(1) Bonds payable as to principal and interest in Canada.

(2) Bonds payable both in Canada and the United States.

All tenders must be on the official form.

Accrued interest from the 1st July, 1922, must be paid in addition to the price tendered.

Tenders specifying for Debentures other than those herein described, or containing conditions varying from the above, will not be considered.

Delivery of the Debentures will be made as soon as the Debentures are printed and signed, upon payment of the purchase money.

A certified cheque payable to the City Treasurer for the sum of $10,000.00 must accompany the tender.

The highest or any tender not necessarily accepted.

Full particulars, together with further conditions and official forms of tender, can be obtained on application to the City Treasurer, City Hall, Ottawa, Ont.

FRANK H. PLANT,
Mayor.

KEEN APPRECIATION of bonds and well protected investment securities is held by the readers of

THE MONETARY TIMES OF CANADA
*"Will Favorably Introduce Your Name to Investors."*

# *Stock Markets*

With the threat of war in the Near East being partially dispelled, the stock market showed a slight improvement towards the latter part of the week, although during the first part of the week the European situation was very dark and the market was very unsettled. Prices showed considerable weakness and sellers continued to outnumber the buyers.

Although conditions in the Near East are not such as would warrant the market to continue the bull movement, which was interrupted by the European tangle, there is, nevertheless, a general feeling among brokers that as soon as public confidence is re-established, the upward trend will be resumed. The present situation of the market is such that should further scares arise, they are less likely to upset the market seriously, as the technical position is considerably better, the weak holders having largely disappeared. Judging from present appearances the market is now down to a trading basis which will actuate buying or selling largely as the news from Europe ebbs and flows in favor of war or peace.

During the week, two of the leading securities, notably Brazilian and Steel of Canada, showed a pronounced break but later partially regained their lost position. Under heavy selling Brazilian moved down to 40¾, the lowest point since the first part of April, and 8½ points under the high for the year of 50, established in June. Several factors entered into this break, notably the weakness in the milreis, partly due to the coffee valorization scheme of the Brazilian government, and also to the heavy distribution of paper currency that this scheme involves. The value of the milreis is now about 12 cents, as compared with 13.75 cents last June.

Although no definite announcement has been made regarding the break in Steel of Canada, there has been a persistent rumor that the board of directors are contemplating the cutting of the dividend from 7 to 5 or perhaps 4 per cent. The 7 per cent. rate paid on the $11,500,000 par value of common stock calls for an expenditure of $805,000 per annum, whereas a dividend rate of 4 per cent. would require $460,000. Last year the dividend was not earned, the net income representing 3.15 per cent. on the common stock. However, with business showing an improvement during the year it is expected that the company will show an increase in their earnings, and the dividend will be continued at the present rate.

The general trend of the market towards the latter part of the week seems to point to the fact that the public are discounting the rumors of another war, and are preparing for an aggressive market for the winter session.

### British National Assurance Co.

C. R. Clapp & Co., of Toronto, are offering $3,000,000 stock of the British National Assurance Company at $115 per share, the par value of the shares being $100.

The company was incorporated by special act of parliament of the Dominion of Canada and assented o on May 19, 1922, with head office at Toronto. The capital stock of the company is $3,000,000, divided into 30,000 ordinary shares of $100 each. There is no preference stock and no stock has been given for promotion or organization.

Under the terms of the incorporation the company may make contracts of the following classes of insurance: Fire, automobile, burglary, explosion, guarantee, hail, inland transportation, plate glass, sprinkler, leakage and tornado.

The board of directors include men who are prominent in the insurance and financial world, and include, Brig.-Gen. V. M. Odlum, insurance and financial broker, Vancouver; Ernest Roy, president, Credit Industrial, Ltd.; John R. Shaw, president, Canadian Manufacturers' Association; Peter White, H.C., Toronto; Frank H. Pratten, M.B., medical superintendent, London; Robert B. Young, financial agent, Toronto; and Chas. R. Clapp, of Toronto.

### Increase Capital

The Shevlin-Clarke Co. have taken out supplementary letters patent to increase their capital stock from $2,000,000 to $4.000,000 by the creation of 18,000 shares of $100 each.

# Rescinding Contract to Buy Shares

(Contributed)

The purchase of shares in a company is a matter largely regulated by the general law of contracts and like an ordinary contract it can be rescinded when the purchaser or subscriber has purchased through a misrepresentation either contained in the company's prospectus or made by its officers or duly authorized agents. Like ordinary contracts the purchase of shares depends on the making of an offer and the acceptance of that offer. The contract with the company is usually constituted by an application being made by the intending shareholder to the company for an allotment to him of so many shares, and by an allotment being made and notified to him. A binding contract is constituted to take and to issue the shares when and not before the acceptance is notified to the applicant.

If a subscription for shares, not being those which are subscribed for by the original incorporators, is obtained by a material misrepresentation of facts, the contract is voidable at the option of the person deceived and the court will in an action by the subscriber rescind the contract to take the shares and order restitution of the moneys paid under the contract with interest.

### How Right Is Lost.

But, though misrepresentation of a material fact has formed the basis of the inducement whereby the applicant subscribed for shares, he must in order to rescind his contract, act promptly upon the discovery of the misrepresentation, and a short delay has been held by the Courts as sufficient to deprive him of the right to rescind. Further, means of knowledge, as distinguished from actual knowledge, has been held sufficient to debar him. He may also lose his right of rescission by conduct such as attending or voting at a shareholders' meeting or by attempting to dispose of his shares or executing a transfer of them or by making a payment on account of their price. Each particular case depends of course, upon its own particular circumstances and general rules are rather difficult to enunciate.

### What Constitutes Misrepresentation.

To obtain rescission the untrue statement need not be fraudulent or made with intent to deceive but the untrue statement must be material, that is to say, of some importance and the subscriber must be materially influenced by it. The omission of material facts from statements made in the prospectus is not a ground for rescission unless it is of such a nature as to make what is actually stated misleading.

Instances of what the Courts have held to be material misrepresentations are numerous, some of them being for example, a misstatement of the names of the directors, a statement that stock has been subscribed when in reality it has been or is to be allowed in paid up shares. On the other hand, a statement of intention or that something will be done is not regarded as a statement of fact. Where the statement is ambiguous the applicant is entitled to put any reasonable construction on it and the company will be bound by such construction. A statement that the company's project is a commercial success has been held to be a statement of fact and not a mere expression of opinion. If the effect of a document is stated and it is also stated that it may be inspected at a certain place, the subscriber is entitled to accept the statement as to the effect of the document and he is not bound to go and examine the documents for himself. A statement made recklessly by the company's agent in order to obtain a subscription for company shares, without any reasonable basis for his opinion, that the company would earn twenty per cent. on its shares, has been held to be a misrepresentation avoiding the subscription. A statement in a prospectus that thousands were interested in a company, which guaranteed its financial success, when, as a fact, there were only a few over one hundred shareholders, has been held to be a false representation sufficient to invalidate a subscription for shares made in reliance thereon.

### The Companies Acts.

The Ontario Companies Act requires every public company to file and issue a prospectus. It further provides that every purchaser of shares is to receive a copy of the prospectus and that every purchase of shares is to be deemed to be induced by the prospectus. A prospectus may be not only a pamphlet but is in many cases a newspaper advertisement. The other Companies Acts have provisions to all intents and purposes similar to those of the Ontario Act, which are practically similar to those of the English Companies Act of 1908. Consequently, in purchasing shares of a company the subscriber is largely protected but is also dependent on his own judgment—for the facts are set before him in the prospectus and it is for him personally to decide if the facts are of sufficient weight to induce the investment of his money in the company's enterprise. The company or its agents lays the facts before him —he then has to exercise his own discretion and if he invests and then, as shown above, finds that material misstatements or even omissions of facts which colourably affect the positive statements, have been made, such will give him for a reasonable time, the right to rescind his contract with the company and to get back his money with interest. The best and the only advice thus is "Read the prospectus."

## HOERNER, SMITH & CO.

R. G. Hoerner, Montreal, manager of Jenks, Gwynne and Co., has resigned from that organization and has formed a new investment banking firm under the name of Hoerner, Smith & Co.

Associated with Mr. Hoerner are W. Hart Smith and V. Barry Smith. Mr. Hoerner has been known on the "street" the past 16 years, being with Sir E. Mackay Edgar when that gentleman was a member of the Montreal Stock Exchange. His experience has been varied and extensive during that period covering local, New York and London markets and foreign exchanges.

## EQUITABLE SECURITIES CORPORATION.

The formation of the Equitable Securities Corporation, Limited, which has recently been effected, marks the extension of the investment firm of J. L. McSweeney & Co., which was established in Montreal in 1920. J. L. McSweeney will be president of the Equitable and has associated with him in the new firm some important Montreal interests. Before coming to Montreal he was with the financial house of Hayden, Stone & Co., New York, for several years.

# *Unlisted Securities*

In their report issued on the unlisted market of last week, A. J. Pattison Jr. & Co. say that while the listed market was under pressure practically the whole of the time and prices moved down very considerably, the unlisted market held exceedingly well, the absorbing power being sufficient to take care of the selling which occurred. At the close, all weak holdings appear to have been marketed, and prices were steady. Investment buying from the rural communities still continues, and is of excellent volume when compared with that of last year for the same period. It is worthy of note that at a time such as this, the amount of selling of regular dividend payers is practically negligible, while the more speculative issues are rapidly thrown over by the public with a view no doubt of putting their funds in shape for any emergency which may occur.

Algoma Steel Bonds, which have been offered quite freely for many weeks at 49, were absorbed, and the market moved to 49 bid with none offered. Spanish River 8's at 104½ bid and Fraser 8's at 102¼ bid were both in demand at these slightly improved figures. Nova Scotia Steel Debentures sold at 89, and closed at this figure bid with none offered. Durant Motors were firmer at 10¼-11¼, many lots changing hands between 10½-and 11, though at the close the quotation widened slightly. Canadian Westinghouse was asked for at 115. No stock was offered in this market. Famous Players Preferred was slightly weaker at 54-56. Cockshutt Plow, after selling at 49½, widened to 48½-50 on offerings of stock from London. Trust & Guarantee eased slightly to 68-70. The Insurance Stocks, particularly National Life and Excelsior Life, were in demand, but offerings were not forthcoming.

## DECLINE IN IRON OUTPUT

### Coal Shortage Curtails August Production—Prices Advancing

Steel production in the Dominion declined to 59,201 long tons in August, as compared with an output of 62,767 tons during the previous month. The decrease is equivalent to 3,566 tons, or 5.68 per cent. The output in August is also less than that of the corresponding month last year by 12,822 tons, representing a decrease of 17.8 per cent.

The cumulative production for the first eight months of the present year was 299,048 tons, involving a decrease from the output during the same period of 1921 by 122,093 tons, or 29 per cent. The absolute quantity produced in the eight-month period last year was 421,141 tons. The average production in August for the three-year period from 1919 to 1922 was 76,964 tons, which is in excess of the output of the month under review by 30 per cent.

The 56,997 tons of ingots were open hearth basic steel intended for further use. The production of ingots in August was 56,997 tons, or 6.9 per cent. less than the output in the previous month, when 61,243 tons were reported. In August, 1921, 70,339 tons were produced, comprising an excess of 13,342 tons or 23.4 per cent. over the output of the month under review.

### Castings Increase

The output of direct castings increased from a production of 1,519 tons in July to 2,204 tons in the following month. The increase represented 685 tons or 45 per cent. The total production of castings for the last eight months was 13,044 tons, as compared with an output of 17,628 tons during the corresponding period of the previous year The decline comprises 4,584 tons, or 26 per cent . The principal grade produced in August was 1,128 tons of bessemer castings, of which 1,118 tons were made for sale. Castings made in electrical furnaces for sale were reported to the amount of 738 tons, and 130 tons were manufactured for further use.

The production of pig iron suffered a decline of 14.45 per cent. in August, as compared with the record of the previous month. The output in the month under review was 27,123 gross tons, as compared with a production of 31,705 tons in July, involving a decrease of 4,582 tons. The August output represents an increase of 16.09 per cent. over the record for May, constituting the minimum production of the present year. The principal grades produced in August were 20,494 tons of basic pig for further use, and 6,296 tons of foundry iron intended for sale. Fifty-two tons of foundry iron were made for further use, and 281 tons of malleable iron were manufactured for sale.

### Quiet Tone Remains

A comparison with the statistics of last year indicates the quiet tone from which the industry has not yet emerged. The pig iron output in August, 1921, was 50,156 tons. comprising an excess of 23,033 tons or 45.9 per cent over the record for the corresponding months of this year. The cumulative production during the first eight months of last year was 413,448 tons, as compared with a total of 251,015 tons during the corresponding period of 1922. The difference represents a decline of 39.28 per cent.

Notwithstanding advancing prices and favorable marketing conditions, production slackened perceptibly during August. The fuel shortage was the principal cause of the recession bearing specially hard on the industry in. question.

---

## MARKED INCREASE IN METAL PRODUCTION

### Non-Metal Minerals Show Decrease —Gold Production Active

The total estimated value of mineral production during the first six months of 1922 was $57,682,944 of which $26.475,544 represented the value of the metal production and $31,207,400 the non-metals, according to a survey made by the Dominion Bureau of Statistics. As compared with the same period in 1921 the value of the metals has increased by about two million dollars or 9.1 per cent.

The standing of the different provinces in the Dominion, according to the returns for the half-year was as follows: Ontario, $18,833,577; British Columbia, $16,153,307; Alberta, $10,062,318; Nova Scotia, $8,792,799; Quebec, $2,054,455; Yukon, $714,652; New Brunswick, $590,456; Saskatchewan, $266,041; Manitoba, $215,339.

### Principal Products

The ten principal products of the mineral industry in Canada during the period in order of the values assigned were: Coal, $24,346,956; gold, $12,110,242; silver, $5,997,199; lead, $2,882,047; natural gas, $2,448,829; copper, $2,337,093; asbestos, $1,894,232; nickel, $1,401,820; zinc, $1,370,406. and salt, $849,133.

Excluding the value of natural gas, the total value of the production of these commodities during the period was $52,340,052, as against $59,615,309 during the first six months of 1921. The decrease amounted to 12.2 per cent., and was due largely to the slackness in shipments of coal and the weakness of the nickel and copper production.

### Prices Increased

The outstanding feature of the metal production was the excellent gains made in the output of gold by the two important producing provinces, Ontario and British Columbia The total for Canada during the period amounted to about 63 per cent. of the whole 1921 production and an increase of 42 per cent. over the production during the six months of that year. The increased prices and the lively markets for silver and lead were reflected in excellent gains in production over the half-year of 1921. The zinc production remained about the same, cobalt increased slightly, while copper and nickel, as might have been expected, fell off considerably.

---

## NEW WATERWAY PLANNED

A federal charter has been secured for the Transportation and Power Corporation, Ltd., with a capital of $15,000,000. The new company has purchased the assets of the Great Lakes and Atlantic Canal and Power Co. The scheme for a St. Lawrence-Great Lakes waterway for ocean navigation which is being consistently agitated here and in the States is well known. Ottawa has no place on its map, however. The present plan contemplates a waterway from Montreal up the Ottawa to the capital, then by a canal across country to Prescott and thence up the St. Lawrence to the Great Lakes. One feature of it is a cut-off canal between Lakes Huron and Erie.

ON GUARD

Why a Lawyer Should Draw Your Will

There is nothing very formidable about drawing a will. But it needs experience, knowledge of the legal requirements, and exact use of language. Many people who attempt to draw their own wills fail in one or more of these respects. The wills they make, written throughout by themselves or with the doubtful aid of a printed form, are subject to dispute or delay in interpretation and in danger of being disallowed by the Court as not being wills at all. So these suffer to whom the will-maker intended the estate to pass.

Everyone should make a will. Make yours, but have your lawyer draw it up.

A will implies an executor. We act as executor.

# Stock Exchange Record

## SUMMARY OF SALES

The following is a summary of sales on the Montreal and Toronto exchanges for the weeks ending September 27 and October 4:—

|  | Week ended Sept. 27 | Week ended Oct. 4 |
|---|---|---|
| Stocks |  |  |
| Montreal | 66,208 | 94,601 |
| Toronto | 16,648 | 27,975 |
| Total | 82,856 | 122,576 |
| Bonds |  |  |
| Montreal | $1,607,200 | $894,250 |
| Toronto | 169,200 | 340,950 |
| Total | $1,776,400 | $1,235,200 |

### Montreal

|  | Stocks | Bonds |
|---|---|---|
| Thursday | 13,443 | $128,100 |
| Friday | 23,378 | 108,200 |
| Saturday | 5,500 | 70,100 |
| Monday | 16,323 | 295,100 |
| Tuesday | 18,323 | 179,300 |
| Wednesday | 17,634 | 113,450 |
| Total | 94,601 | $894,250 |

### Toronto

|  | Stocks | Bonds |
|---|---|---|
| Thursday | 7,783 | $129.150 |
| Friday | 4,141 | 13,050 |
| Saturday | 1,828 | 5,500 |
| Monday | 6,401 | 69,950 |
| Tuesday | 4,043 | 76,650 |
| Wednesday | 3,779 | 46,650 |
| Total | 27,975 | $340,950 |

# DEBENTURES FOR SALE

(See also page 25)

## $20,000,000 PROVINCE OF ONTARIO

### 20 Year 5% Bonds

The government of the province of Ontario will receive tenders up to 12 o'clock noon of Tuesday the 10th day of October, 1922, for $20,000,000, Province of Ontario 5% Bonds, dated the 2nd day of October, 1922. Due 1st day October, 1942, bearing interest at the rate of 5% per annum, payable half yearly on the 1st of October and 1st of April. Principal and interest payable in gold coin of lawful money of Canada at the office of the Treasurer of Ontario, Toronto, or at the Bank of Montreal, Montreal, Canada, or in gold coin of the United States of America of the present standard of weight and fineness at the agency of the Bank of Montreal in the City of New York, U.S.A., at the holder's option.

Bonds to be in the denomination of $1,000 each with coupons attached and may be registered as to principal only.

Payments for bonds and delivery thereof to be made at the agency of the Bank of Montreal in the City of New York, U.S.A., on or before the 16th day of October, 1922. Less the amount of the deposit. Interim debentures will be issued on payment of the money to be exchanged for definitive bonds on completion by the engraver.

Sealed tenders endorsed "Tenders for Province of Ontario Debentures" should be addressed to the Honorable P. Smith, Treasurer of Ontario, Parliament Buildings, Toronto.

Tenders must be for the whole amount offered and must be accompanied by a marked cheque for $200,000 to be applied in case of the successful tenderer in part payment for bonds.

The above bonds will be issued under the authority of 12-13 Geo. V. (Ontario) Chap. 8.

The highest or any tender not necessarily accepted.

P. SMITH.
Treasurer of Ontario

Toronto, October 6, 1922. 56

# The Island of Montreal Metropolitan Commission

## Province of Quebec

## Sale of $3,100,000 20 year 5 P.C. Bonds of denominations to suit purchaser

### Maturing 1st November, 1942—Interest Payable 1st May and November

Tenders will be received for a loan payable in capital and interest in Montreal, or for a loan payable in capital and interest in Montreal and in New York.

Sealed tenders will be received by the above Commission until noon, on Wednesday the 18th day of October 1922.

Tenders must be marked "Tender for Bonds," and must be accompanied by a deposit of cash or a certified cheque to the amount of 1% of the loan drawn upon any Chartered Bank doing business in Montreal.

Tenderers must state whether the price offered includes or does not include accrued interest.

The right is reserved to reject any or all proposals or to accept in whole or in part any one of them.

Tenders will be opened at a public meeting of the Commission to be held at noon, at the City Hall, Montreal, Wednesday the 18th day of October 1922.

This loan is fully secured by the immoveable properties of the following municipalities of the district of the Metropolitan Commission, viz:—

Cities of Montreal, Westmount, Outremont, Verdun, Lachine.

Towns of Montreal West, Hampstead, Lasalle, St-Pierre-aux-Liens, St.-Laurent, Mount Royal, Montreal East, Montreal North, La Pointe-aux-Trembles, Laval-de-Montreal, St. Michel.

# *Corporation Finance*

**Canadian Pacific Railway Co.**—Net earnings for the month of August show, for the first time since September, 1921, an increase over those of the corresponding month a year previous.

This increase comes as a result of gross earnings being highest by a million and a half dollars of any month this year to date, together with a resumption of the heavy reductions in operating expenses, which were noted early in the year. In the latter respect the showing is the most favorable displayed by any month since January, 1922, the practice of operating economies having resulted in a reduction of more than one and half millions, as compared with August, 1921.

Gross earnings for August, 1922, amounted to $15,918,049, the greatest since November, 1921. This total has been exceeded only four times by any month since 1920, and only in two instances in the history of the company has August resulted in a higher gross, the exceptions being August of 1920 and 1921. As compared with August, 1921, gross is down $1,146,216, but this decrease is more than offset by a decline of $1,516,513 in operating expenses, which are shown at $12,971,613.

This leaves net earnings at $2,946,436, the best showing since November, 1921, with the one exception of March of this year. Net shows an increase over that of August, 1921, of $370,297.

The figures for the eight months of the year ending with August show the fourth largest gross earnings in the history of the company for this period. While net for that period is shown at its lowest in 13 years, it is noted that the road is catching up on its 1921 result, net at $14,722,416 for the eight months being only $2,858,205 less than for the first eight months of the previous year.

**Spanish River Pulp & Paper Mills, Ltd.**—The annual meeting of the shareholders was held on September 28 and was of a routine character only. Geo. H. Mead, president occupied the chair, and announced that about 83 per cent. of the shareholders were represented by proxy. The attendance was small and the satisfaction of the shareholders with the manner in which the company's business has been managed was indicated by the entire lack of questioning. The present board of directors was re-elected without change, and at a subsequent meeting of the board the following officers were elected: President, George H. Mead; vice-presidents, Thomas Gibson and P. B. Wilson; secretary, J. A. Gibson, and treasurer, A. H. Chitty.

**Brazilian Traction, L. & P. Co.**—Both gross and net earnings for the month of August show a further increase over previous months, the gross revenue touching a high figure at 17,168,000 milreis, which is well ahead of the gross return for the month of July or for any month, in fact, in the present year, and exceeds the gross return for August, 1921, by 1,424,000 milreis. A reduction in operating expenses is shown from 6,305,000 milreis to 6,144,000 this year leaving net earnings at 11,024,000 milreis as compared with 9,439,000, an increase of 1,585,000.

Aggregate gross earnings from January 1 to the end of August amount to 126,338,000, compared with 111,420,000, a gain of 14,918,000 over the preceding period. There is a more than corresponding increase in net earnings, effected through the lower cost of operation, net for August, 1922, standing at 78,379,000, compared with 59,136,000 being an increase of 19,243,000.

**Twin City Rapid Transit Co.**—The comparative income statement for the month of August is as follows:

| | 1922 | 1921 |
|---|---|---|
| Total railway operating income .... .... ........... | $1,067,514.24 | $1,095,452.64 |
| Total railway operating expenses and taxes | 931,891.15 | 994,807.47 |
| Operating income .... | 135,623.09 | 100,645.17 |
| Total non-operating income .... .... ............... | 3,677.65 | 7,823.90 |
| Gross income .... .... | 139,300.74 | 108,469.07 |
| Interest on funded debt, etc. .... .... ............... | 93,479.29 | 91,757.75 |
| Net income .... .......... | 45,821.45 | 16,711.32 |

**Ames-Holden Tire Co.**—The committee representing the bondholders is sending out circulars embodying a plan for the reorganization of the company which will be submitted at a meeting to be held on October 23. After a few introductory remarks, the committee outlined in plan as follows:

First—That all connection, save such selling connection as has been mentioned above, with the Ames-Holden-McCready Company, or its successor, be severed.

Second—To that end, that the Tire company secure the return of the 150,000 shares ($1,500-000 par value) of Tire company common stock. representing control owned by the Ames-Holden-McCready Company, in consideration of the release of the McCready company from the guarantee of your bonds. As this guarantee has now no intrinsic value, its release in exchange for control on your behalf is advisable. For the release of this guarantee, the Tire company would also secure certain tire trade marks now held by the McCready Company.

Third—That the present Tire company be reorganized and carried on under a new directorate to be chosen and approved by the bondholders, and that, under such reorganization, the present bondholders be given the entire equity in the new company with prior mortgage rights, subject to such exceptions as may be necessary to secure the new working capital or make other arrangements in the interests of the bondholders.

"The capitalization of the company at the present time is: First mortgage 7% bonds, $980,000; 8% cumulative preferred stock, $205,200; common stock, $2,200,000. Your committee recommends that the Tire company sell its property and assets to a new company capitalized as follows:

| | To be issued | Authorized |
|---|---|---|
| First Mortgage 7% bonds .. | $ 250,000 | $ 500,000 |
| 7% cumulative income bonds ........ .... ........... | 1.015.000 | 1,015,000 |
| 7% cumulative preferred stock, approximately ........ | 225,000 | 225,000 |
| Common stock .... .... .... ........ | 15,000 shares<br>no par value | 20,000 |

Additional first mortgage bonds over the 250,000 only to be issued under proper restrictions, for future extensions.

The committee recommend: That the present holders of $980,000 first mortgage 7's, who also hold $35,000 unpaid coupons, take in exchange for their bonds and matured, unpaid coupons, $1,015,000. 7% cumulative income bonds, plus 2,500 shares of common stock. The latter represents the 25% bonus in common stock which went to the bondholders on the original issue.

Offer the unsecured creditors 100% of their claims or about $225,000 in 7% cumulative preferred stock. The committee representing the creditors of the Tire company have agreed to recommend to the creditors the acceptance of this offer.

Give present holders of preferred stock of old company 125% of their present holdings in common stock in the new company amounting to 2,565 shares of new common stock.

For the securing of the new money, authorize the sale of the $250,000 first mortgage 7% bonds at par, with a bonus of 5,000 shares in common stock, this to be offered, first, for subscription to the present bondholders in proportion to their holdings.

Dispose of the balance of the common stock, i.e., 4,935 shares, as required for the company's purposes.

Under this plan the company's ordinary creditors remain secondary to the present first mortgage bondholders, and their acceptance of preferred stock relieves the working capital position by an equal amount.

The bond holders maintain their mortgage rights on the property and assets subject only to a small first mortgage, in which they may participate.

All the company's future earnings, subject only to the comparatively small amount of $17,500 per annum, are available for payment of the 7% interest to the income bondholders. As these income bonds are cumulative, you are assured of the eventual payment of the 7% on the money you have invested in this company before any other disbursements can be made, subject only to the exception above mentioned.

The fixed charges are at a minimum necessary to secure the additional working capital, but are so small as to make it highly improbable that the new company will ever find itself in financial difficulties.

All the equity in the property and its earnings are allocated to the original bondholders, save where it is necessary in your interests to be distributed otherwise.

**Abitibi Power & Paper Co.**—At a meeting of the board of directors on September 26 a dividend of $1 per share on the common stock of the company was declared, payable October 30 to shareholders of record of October 10. This dividend will be the first distribution on common stock which the company has made since that for the quarter ended March 31, 1921, or over eighteen months ago.

**Montreal Tramways Co.**—At the annual meeting of shareholders on September 26 the board of directors was re elected.

Commenting on the annual reoprt E. A. Robert, president, said that the company has passed through its troublous days and that with business now almost back to normal its future is assured.

"The coming year," he said, "will show an improved position to put before the shareholders. Our contract is working well for ourselves. the city and the shareholders, although, as the pioneer contract of its kind in America, it has required time to operate satisfactorily. It is a good thing that it went through when it did, as it was then an absolute necessity. Its nature is such that it will keep pace with the requirements of the company.

"Financial conditions are improving. Our costs of operations are lessened by the growing cheapness of money.

"In the last few years the revenue from passenger traffic decreased, but the turning point has been reached. I believe that the public has had a square deal. Our contract is unique in that it is guaranteed by the community in which it operates, and with ordinary prudence and care shareholders need have no worry for their holdings. The worrying stage is past."

**Northern Ontario Light & Power Co.**—The report for the month of July shows gross earnings of $72,390, being an increase of $10,345, over July, 1921. The balance, after charges, stood at $27,019, an increase of $24,990, and the balance applicable to common dividends, $15,103.

For the seven months ended July 31 last, gross was $502,151, an increase of $86,263. The balance applicable to common dividends amounted to $106,325, equivalent to $2.34 a share on the $4,585,000 common stock outstanding.

**Barcelona Traction, L. & P. Co.**—During the month of August gross earnings totalled 3,599,168 pesetas, as compared with 2.923,804 for the month of August, 1921. Operating expenses at 1,401,833 compare with 1,250,859, and net earnings at 2,197,335, with 1,672,945 pesetas.

Aggregate gross earnings from January 1 to the end of August totalled 29,822,896, as compared with 23, 868,776, and aggregate net earnings at 18,011,547, as against 15,013,758 for the corresponding period of 1921, being an increase in net of 2,997,789 pesetas.

**Kerr Lake Mines, Ltd.**—The annual statement for the year ended August 31, 1922 shows that total receipts amounted to $450,181, as compared with $610,243 for the previous year. Net profit, after taxes, was $413,870, as against $478,979 during 1921.

Dividends paid amounted to $300,000, the same as in 1921, and after these disbursements to stockholders, surplus earnings was $113,870 compared to $178,979 in 1921. Profit and loss surplus, as of Aug. 31, 1922, is given as $1,228,085. Last year it was $1,114,214.

Net profits of $413,870 is equal to 68 cents a share, against 79 cents a share in the previous year. At the annual meeting the directors were re-elected.

**Marconi Wireless Telegraph Co.**—The annual meeting of the company will be held on October 19 in Montreal.

BUILDING YOUR BUSINESS

In building a life agency business it is a most valuable asset for the underwriter to associate himself with a Company whose name is his "open-sesame" to the life insurance business in his district

The North American Life is high in the esteem of the insuring public. Why?

Popular policies, liberal dividends and the great enthusiasm of all our agents is the answer.

Some good agency openings are available.

Correspond with
E. J. HARVEY, Supervisor of Agencies.

## INVESTMENTS FOR OCTOBER FUNDS

Canada's abundant harvest, as reported from coast to coast, is resulting in cash distribution or credits which will, in all probability, equal, if not surpass, the previous record. This will set into circulation vast funds, approximating $2,000,000,000, and will inevitably have a marked effect on every line of business.

Important amounts will undoubtedly be set aside and directed to investment channels. No better investments can be offered than the bonds of Canadian Governments and Municipalities.

*Store up some of this year's abundance in such securities.*

# Fire Destruction Nearly Eight Million

### Premier's Estimate of Property Loss in Northern Ontario Conflagration of Last Week—Haileybury, Englehart, North Cobalt and Other Towns Wiped Out — District Was An Agricultural Not a Forest Area

A large district in Northern Ontario was swept by fire last week. A high wind which rose on Wednesday, October 4, spread small forest fires which had been burning, and by Wednesday night it had assumed the proportions of a conflagration, destroying several towns in the district between Porcupine and Cobalt. On Thursday morning it was still raging, but rains on that day quenched it, at least in the most dangerous zones. The fire appeared to have followed the lines of the T. and N.O. Railway, though it may also have covered a considerable breadth which was not so thickly populated and from which reports have not come in.

On October 6 the following summary of the damage was made by local newspaper correspondents: North Cobalt, wiped out, 1,000 homeless; Haileybury, wiped out, 3,000 homeless; New Liskeard, partly burned, 200 homeless; Thornloe, wiped out, 300 homeless; Heaslip, wiped out, 100 homeless; South Englehart, wiped out, 300 homeless; Carlton, wiped out, 500 homeless; Englehart, partly burned; Uno Park, burned; Earlton, partly burned; North Temiskaming, burned. Much farm property in the district was also destroyed.

The mines in the district are reported as having escaped, though some buildings on the Hudson Bay property were burned, and the Shamrock mine went up in flames.

The death list was reported on October 6 as forty-four, as follows:—Haileybury, seven; Swastika, ten; Heaslip, four; Charlton, five; Englehart, and district, sixteen; elsewhere, two.

Haileybury was the scene of the greatest loss. Its assessed value was around $2,250,000, of which probably $2,000,000 is a total loss, and in addition there were consideable stocks of merchandise. Including other districts, the total property loss was estimated at $4,000,000, that of North Cobalt being estimated at $500,000, and $1.500,000 allowed for the other places. A total population of about 5,000 is affected. The district covered is about 38 miles in length.

#### Premier Drury's Statement

Premier Drury of Ontario, who went north immediately on hearing of the disaster Wednesday night, issued the following statement on October 6:—

"I have just returned from a comprehensive trip through the burned territories. So far as we can learn, the conditions are rather more serious than at first anticipated. The town of North Cobalt is wiped out. Haileybury is largely destroyed, though some residences are left, and it is gratifying to know that the registry office with the important title deeds of the entire district is saved. New Liskeard has suffered slight losses, these being confined to the district west of the track. Further north the destruction is widespread and the conditions more serious. Thornloe, Heaslip and Charlton are completely destroyed; also Uno Park. Englehart has suffered considerable losses. Through the farming districts the damage is widespread. It is probable that there are at least 150 to 200 farms burned out completely. The money loss will probably amount to between seven and eight million dollars. It is impossible at the present moment to definitely give the loss of life, but, considering the magnitude of the disaster, it is comparatively slight, amounting in all probability to between 30 and 40. The number of injured is amazingly small.

"The relief organization has been completed practically through the district. Last night and today five car loads of emergency supplies, consisting of about 500 tents, 10,000 pairs of blankets, and a large quantity of foodstuffs, were distributed throughout the entire area, and it is believed that there is no actual suffering from hunger or exposure to-night. A relief organization has been arranged which it is hoped will satisfactorily meet the needs of the situation. The organization consists first of a number of centres for the distribution of supplies. These centres are distributed throughout the entire territory. Each centre is in charge of a detachment of provincial police, the whole being under the command of Sergeant Inspector Paxton. At each of these centres the provincial police have charge of the relief supplies and are distributing to sufferers as requisitioned by local committees formed in each locality. At the same time an accurate registry of the sufferers is being carried on, by which means we will know definitely within a comparatively few hours the actual number of those requiring relief, and what is needed in each case. The requisitioning of supplies to be distributed at these centres has been placed in the hands of the central committee, of which Mr. A. J. Young, of North Bay, is chairman. Geo. W. Lee, chairman of the T. & N. O. Railway, was first suggested as chairman, but it was found that he could not give the necessary time to the work. Hon. Beniah Bowman, Mr. Warren, M.P.P., of Renfrew; A. R. Fennell, representing the Canadian Red Cross, and Geo. W. Lee, together with the chairman of the local committee, constitute the other members of the supply committee. Supplies for the district must all pass through the hands of this committee for distribution. The committee have been given a car for office purposes and the services of an engine and train crew for the moving of supplies through the fire area. By means of this organization it is expected that the needs of the sufferers will be adequately met, and that everything will be done in a careful and efficient manner, and that duplication of relief and consequent confusion will be avoided.

#### Need of Supplies

"The need of relief supplies is great, while the Government will do everything in its power to look after the needs of the district, contributions from those who feel disposed to help the sufferers will be greatly welcomed. The Toronto Board of Trade has already done a great deal, and is prepared to do much more in providing for the needs of the emergency. We also desire to acknowledge gratefully the contributions from other sources, including the Cochrane Board of Trade; the Timmins Board of Trade; Iroquois Falls Board of Trade; the T. Eaton Company, Limited; Kiwanis Club of Sault Ste. Marie, and other places. The need of relief is, however, so great that much further help will be needed and contributions from associations and individuals will find a ready use. Contributions should be made either directly to the relief committee through its chairman, Mr. Young, or to Arthur Hewitt, who is in charge of the relief activities of the Toronto Board of Trade and of the northern relief fund. There is urgent need for large quantities of women's and children's clothing. These supplies should be sent to the Canadian Red Cross Society at 410 Shelbourne street, Toronto, or through any of the branches of the Red Cross Society throughout the province.

"Too much cannot be said in praise of the fortitude and helpfulness of the northern people. Throughout the fire area, while the losses have been tremendous, there has been no despondency and I find everywhere a brave determination to rebuild on a better and surer basis. The northern towns also have shown the most commendable spirit of helpfulness. Nearly a thousand refugees have been cared for in the kindest possible manner by the town of North Bay, through its mayor, Mr. John Ferguson; Mr. Patton, chairman of the contingent committee, and its various church and women's organizations. North of the fire areas the towns have come to the relief of the afflicted with promptitude and energy. Everywhere there is shown such a spirit of helpfulness and kindness that, coupled with the courage shown in the devastated areas, cannot but gain the speedy restoration of the destroyed territory and its progress to better and surer prosperity."

#### Not a Forest Area

Officials of the Ontario Department of Lands pointed out that this could not be properly termed a "forest" fire, as it was a settled area. One official said:—

"That territory is in the south clay belt, an area that has been settled for 20 years, and contains some of the finest farming land in Ontario. There is no forest there in the sense one speaks of forest fires. What bothers us is how the fire could have swept on as it is said to have done. It appears to us to have been a series of new fires in the limits of these towns."

In regard to the absence of firerangers, Deputy Minister of Lands Cane said that the fire-rangers were taken off last spring from some of the townships, practically all of which are organized municipalities. The townships themselves, he said, were asked for their opinions and wishes in the matter, and stated fire-ranging to be unnecessary.

#### Insurance Loss

Complete figures regarding the insurance loss are not yet available, but the following estimates for a number of companies have been made:—Northern, $227,000; London and Lancashire, $200,000; Yorkshire, $160,000; North British and Mercantile, $150,000; Commercial Union, $146,000; Atlas, $135,000; Norwich Union, $125,000; Guardian, $115,000; Caledonian, $105,000; Phœnix of London, $100,000; Sun, $100,000; Alliance, $88,000; Employers' Liability, $62,000; Western, $50,000; Globe and Rutgers, $38,500; Niagara, $37,000; Union of Paris, $30,000; British Colonial, $21,000; Union of London, $18,000; Queensland, $10,000; National Provincial, $9,000; North America, $6,000; Continental of New York, $5,000; Scottish Metropolitan, $5,000.

#### T. and N. O. Loss

Property loss to the T. & N. O. will total at least $500,000, according to the Chairman, Geo. W. Lee. Stations have been destroyed at North Cobalt, Haileybury, Thornloe, Charlton and Heaslip, while almost 30 miles of track was put out of commission for an entire day. All relief trains are being carried free of charge, the cost of this being $1.60 per train per mile. This means an addition of $200 to the expense sheet for every train reaching Cobalt.

The loss was estimated on October 8 as 47 dead, property valued at $8,000,000, 850 homes destroyed, and 8,000 homeless. The fire was found to have extended further east than had at first been thought. The fire spread over the border into Quebec for a considerable distance and swept in its course over the town of North Timiskaming, which had a population of about 600, and the village of Nedelec, where approximately 110 had their homes. So far only one life is known to have been lost in the North Timiskaming district.

---

## PEEL COUNTY FIRE LOSSES

Fire losses in Peel County, Ont., have decreased very materially during the past year, very few barn fires having occurred in the county during the past Summer. For the three years just prior to 1922, the losses of the Peel Farmers' Mutual Fire Insurance Company were $33,000, $33,000 and $27,000, respectively. During the past year the company's losses have been $12,000, or 44 per cent. of last year's losses to date.

## OUTLOOK IN BRANDON DISTRICT

### Threshing Proceeding Rapidly—Plans of Western Canada Colonization Explained—Brandon Likely to Have City Manager

(Staff Special)

Brandon, Oct. 6—A splendid crop has been harvested on the Brandon plains, possibly the best since 1915, as the last few years the crops have been rather light, but this year the Brandon district, which really has never known a crop failure, has produced one of the best crops in its history. Threshing is proceeding rapidly, and, with the present ideal weather, should be completed in the next week.

The West is experiencing wonderful weather for this season of the year, at this writing, and with the crops moving forward so rapidly, sometimes at the rate of over 2,000 cars a day, the wealth indicated by such a movement is already making itself felt in business circles. The outlook in Brandon district is encouraging. While there has not been a great deal of building or any new work of any extent undertaken this year, business in the city is quite satisfactory.

### City Manager Plan

The Brandon city council has definitely committed itself to submit the matter of the manager form of government to the people, which, in all likelihood, will carry. If it does Brandon will have a city manager to look after its affairs. C. J. Yorath, city commissioner of Edmonton, had an informal discussion with the Brandon city council on this matter last week, and gave a great deal of valuable information.

The city of Brandon will hold its annual tax sale on Oct. 31st. City Treasurer George F. Sykes reports that up to their special discount date on Aug. 31st, when a 6 per cent. discount was allowed on taxes, over 50 per cent. of all taxes had been paid, which seems a splendid showing.

### Immigration Plan

The plans of the Western Canada Colonization Association, which have been discussed in detail by the officers of the Association in many of the western centres during the past few weeks, before representative bodies of men, were explained to the Winnipeg business men last week by the president of the organization, Sir John Willison, also M. A. Brown, vice-president, and Howard Everett, general manager, at a 'dinner given by Jas. Stewart, where about 300 of the most representative business men in Winnipeg were his guests. The plans of the Association were outlined fully by the above speakers.

Mr. Stewart, who acted as chairman, stated that the two most serious problems facing Canada today are "the Railways and Colonization and Immigration." He stated that they really are one, because the two will not succeed unless we have thrifty settlers, and that this need was now being brought to the attention of westerners by the Canada Colonization Association, which, he explained, was an organization composed of business men from one end of Canada to the other.

In his opening remarks, Sir John Willison explained that the Association was not looking for financial support, the only desire being that its aims and objects be properly understood, and that the situation in Canada was never as favorable for immigration, as far as other countries were concerned, as it is today. He pointed out that the United States had closed its doors to immigrants, and that Canada would need to be very careful in the selection of new settlers, as many would want to come to this country who would be refused admission to the United States.

## IMMIGRATION LOWER

The following is a comparison of immigration for the first five months of the fiscal year, compared with last year:—

1921-22

| | British | From U.S.A. | Other Countries | Totals |
|---|---|---|---|---|
| April | 8,476 | 5,035 | 1,541 | 15,052 |
| May | 7,083 | 3,710 | 3,350 | 14,143 |
| June | 6,899 | 3,086 | 2,292 | 12,277 |
| July | 3,772 | 2,388 | 2,294 | 8,454 |
| August | 3,174 | 3,016 | 2,297 | 8,847 |
| Totals | 29,404 | 17,235 | 11,774 | 58,413 |

1922-23

| | British | From U.S.A. | Other Countries | Totals |
|---|---|---|---|---|
| April | 2,048 | 3,268 | 1,282 | 6,598 |
| May | 5,972 | 2,866 | 2,361 | 11,199 |
| June | 3,675 | 2,291 | 1,329 | 7,295 |
| July | 4,305 | 2,024 | 1,428 | 7,757 |
| August | 2,833 | 2,559 | 1,236 | 6,628 |
| Totals | 18,833 | 13,008 | 7,636 | 39,477 |

## *Business Conditions*

Despatches to Dun's Review from branch offices of R. G. Dun & Co, in the principal cities of the Dominion of Canada, say that the movement of merchandise is slowly increasing and most reports from the leading wholesale centres are favorable. Although disappointment is expressed in some lines over the rate of recovery, and buying, in the main, is confined to moderate-sized amounts, yet the influence of generally good crops and improvements in the iron and steel, lumber ,mining, paper and pulp, and other important industries is becoming steadily more perceptible, and a quite satisfactory volume of orders is being placed for dry goods, clothing, footwear, furnishings, hardware, groceries, provisions, and other seasonable staples. Sentiment in most quarters is noticeably confident and collections tend to improve.

Montreal reports that reduced retail stocks in most parts of the country are reflected in the growing volume of orders for seasonable staples, and most wholesalers are optimistic regarding prospects for the immediate future. Collections are somewhat better.

Business at Quebec is showing the usual increase in activity that precedes the advent of cold weather, and prospects for the coming winter are thought to be fairly encouraging. Collections still drag.

Generally favorable reports are received from Toronto, where retail trade has been stimulated by weather conditions, and wholesalers are receiving numerous orders in moderate-sized amounts for dry goods, clothing, footwear, and other fall and winter supplies, from both country and city dealers. Labor is well employed, and the outlook is regarded as favorable for a brisk fall and winter trade.

Business conditions in the Far West and Northwest are slowly improving, and retail trade at Winnipeg, Saskatoon, Calgary and other centres is reflecting an increasing demand for seasonable commodities, while wholesalers report that more numerous orders for fall and winter staples are being received from country merchants, whose confidence in the future has been strengthened by the harvesting of generally good crops. Collections, as yet, display little improvement.

Vancouver reports that fall trade is in satisfactory volume, with the outlook for the remainder of the year decidedly encouraging. Local retail distribution is fairly active, and wholesalers are receiving an increasing number of orders from country merchants, who are now operating with more confidence on account of the large crops that have been harvested in most sections. The mining and other industries are busy, and collections are better .

## *Bank Clearings*

The following are the bank clearings for the week ended October 5, compared with the corresponding week of 1921:—

### Eastern Bank Clearings

| | Week ending October 5 | Increase over 1921 |
|---|---|---|
| Toronto | $120,517,870 | *$9,037,895 |
| Montreal | 110,314,539 | *14,539,325 |
| Ottawa | 7,318,101 | *367,782 |
| Hamilton | 6,995,059 | 457,632 |
| Quebec | 6,300,065 | 68,614 |
| Halifax | 3,633,967 | 128,137 |
| London | 3,185,814 | *637,778 |
| St. John | 2,736,969 | *239,788 |
| Kitchener | 1,261,891 | 200,600 |
| Moncton | 1,146,566 | *55,440 |
| Sherbrooke | 860,897 | *108,893 |
| Kingston | 808,009 | *186,939 |
| Peterboro | 800,133 | *75,135 |
| Total | $265,879,880 | *$24,393,992 |
| Brantford | 1,326,689 | .......... |

### Western Bank Clearings

| | Week ending October 5 | Increase over 1921 |
|---|---|---|
| Winnipeg | $68,040,812 | $102,320 |
| Vancouver | 14,644,240 | *135,268 |
| Edmonton | 4,886,446 | *2,237,428 |
| Calgary | 4,495,972 | *3,148,890 |
| Regina | 4,488,519 | 318,868 |
| Saskatoon | 2,419,763 | 192,380 |
| Victoria | 2,353,193 | *92,047 |
| Moose Jaw | 1,679,936 | *102,908 |
| Fort William | 1,028,764 | *55,398 |
| Brandon | 824,554 | *88,362 |
| Lethbridge | 757,221 | *52,211 |
| New Westminster | 647,155 | *90,641 |
| Medicine Hat | 455,485 | *54,343 |
| Total | $106,722,120 | *$5,143,928 |
| Eastern total | 265,879,880 | *24,393,992 |
| Grand total | $372,602,000 | *$29,537,920 |
| Prince Albert | 402.830 | .......... |

---

*—Decrease.

## *Canadian Failures*

The number of failures in the Dominion, as reported by R. G. Dun & Co. during the week ended October 6, in provinces, as compared with those of previous weeks, and corresponding week of last year, are as follows:—

| | Oct. 6 | Sept. 29 | Sept. 22 | Sept. 15 |
|---|---|---|---|---|
| Ontario | 22 | 26 | 17 | 15 |
| Quebec | 18 | 19 | 27 | 21 |
| Manitoba | 6 | 7 | 8 | 5 |
| Alberta | 0 | 6 | 3 | 7 |
| Saskatchewan | 3 | 6 | 3 | 3 |
| British Columbia | 3 | 2 | 2 | 6 |
| Nova Scotia | 3 | 1 | 4 | 0 |
| New Brunswick | 1 | 1 | 3 | 0 |
| Prince Edward Is. | 0 | 0 | 1 | 0 |
| Newfoundland | 1 | 3 | 2 | 1 |
| Total | 75 | 71 | 70 | 58 |
| 1921 | 60 | 52 | 40 | 41 |

## ONE HUNDRED MILLION CONVERTED

Conversions of 1922 Victory bonds amount to $100,000,000. This is the preliminary figure announced on Tuesday by Hon. J. A. Robb, Acting Minister of Finance. The returns are not yet complete.

Mr. Robb stated that the response to Hon. W. S. Fielding's offer was distinctly satisfactory, and well up to official expectations. Cash subscriptions were not invited, the offer being open only to holders of 1922 bonds. In accounting for the bonds that were not exchanged, Mr. Robb pointed out that financial institutions reported large blocks of 1922's held on short-date investments by institutions whose financing calls for cash on December 1. Naturally the conversion offer would not attract such holders.

Another factor which should be taken into account, Mr. Robb said, is that 1922 bonds carry exemption from Dominion taxes, whereas the income from the new bonds will be subject to the ordinary taxation.

The redemption of the unconverted portion of the issue on December 1 now offers no difficulty, Mr. Robb said.

# Railway Appointments Are Regarded Favorably

### Sir Henry Thornton Is Considered Good Man For the Job—Montreal, Toronto and Ottawa in Race For National Headquarters—Post Office Conference Throws Light On Size of Operations Carried On

(Special to The Monetary Times)

Ottawa, Oct. 11—The announcement of the new Canadian National Railway Board, with Sir Henry Thornton as president, settles one big question, but immediately gives rise to another—where will the headquarters of the system be located? This is likely to produce one of the biggest of guessing contests. The personnel of the Board inclines most people to the view that Toronto has not much chance of securing the head offices. That it will lose much of what it now has remains to be seen. It must be taken into account that the National Railways, after the co-ordinating measures are taken, will be a much larger system than it is now; for it will include both the at present Canadian National and the Grand Trunk.

It is being remarked that the only Toronto member of the Board has also important Montreal interests, so it is not expected that his voice among nine will be a dominating one. Of course, there is only one out-and-out Montrealer, but there are others who might favor that city under certain fact that there are two citizens of the capital on conditions. Ottawa is also in the race, but the the Board should not be considered as indicating what the selection will be. Still it is quite generally thought that the strong rivalry existing between Toronto and Montreal may make it convenient to select Ottawa. But as yet such opinions are mere guess work, though, at the same time, they indicate quite definite probabilities.

#### Appointment Kept Secret

The selection of Sir Henry Thornton was a surprise to practically all the members of the charmed Cabinet circle. This Government can keep State secrets possibly better than any other that Canada has had for some time, and it certainly kept this one well. Thornton's appointment is considered fortunate all around; for in him the Government got what it badly needed, a first class railway operator with an assured reputation. From the standpoint of salary, the appointment worked out satisfactorily, for the $50,000 a year which Thornton is to receive is $45,000 a year less than the combined services of the D. B. Hannah and G. Howard Kelley. It was fortunate also for Sir Henry, who is said to get about $15,000 or $20,000 a year more than he got in England.

It is generally agreed that the new president has a big job ahead of him, the bigger, indeed, because the public will expect so much of him; but he wisely remarked after his appointment that his was no one man's job. The troubles of the Government roads to-day are not due to mismanagement at the present time, but to inclusion within them of several thousand miles of superflous mileage, which cannot produce much traffic until the country along them is either settled or developed. Add to this the fact that when the Government took over both the Canadian Northern and the Grand Trunk it found the road beds and the rolling stock so deficient that tens of millions had to be borrowed at abnormally high rates. Besides, equipment had to be bought at two or three times the price it would have commanded normally.

#### The Postal Conference

The Hon. "Charlie" Murphy's postal officials' conference was one of the best gatherings of its kind held within the Civil Service for some time. The Postmaster General has a reputation for being one of the shrewdest politicians in the Government, and many thought that the time-honored patronage traditions of the Department would be restored. But Mr. Murphy has surprised many people by sweeping with a new broom that seems to regard efficiency as the first qualification to service in Post Office work.

The public knows in a general way that the Post Office Department employs many people and handles a lot of mail; but it has very little idea of the work that it actually does, for it has never been much of an advertiser. However, at the conference some figures were given out that surpised most of those who heard them.

In the first place, there are over 12,000 post offices in operation; 5,300 money order offices, and 12,400 mail routes with 200,000 rural delivery boxes. During the last fiscal year 550,000,000 letters and post cards were carried, in addition to 350,000,000 newspapers, also 50,000,000 parcels and 250,000,000 circulars, etc. Obviously this is a lot of mail.

But the Post Office Department does many other things besides carry mail. Now it handles c.o.d. parcels having a value up to $100, which means a great deal of extra work. But this does not appear formidable to the officials; for with the handling of 50,000,000 parcels within a year, the Department has been doing one of the biggest express businesses in the country.

#### Post Office Revenue

The financial operations of the Department are of a very important character. During the last fiscal year it issued $10,000,000 money orders and 6,000,000 postal notes. The number of orders issued on Great Britain was 520,000; the number issued on the United States 680,000; the number issued by the United States on Canada was 340,000, while the number issued in Britain on this country was 55,000. The money order transactions represented a value of $270,000,000, while the postal note transactions were valued at $25,000,000. Then the postal stamp sales were over $28,000,000.

The surprising feature is that all this work was done at a cost of only $29,000,000 last year, the salaries of the nearly 10,000 employees being only $14,400,000, which is not a high average when the number of high officials and the responsible nature of the work done is taken into account. The Postmaster General's address at the opening of the conference showed that he is a believer in team play, and it looks as though the maximum in point of results would be obtained from the employees. One reason why the Post Office Department gets so much more out of certain of its employees than does the average Government department, is because certain work has to be done within a time limit. That is to say, mails have to be made up for trains, as in the case of a paper, which requires the maximum speed in handling. So it's not a case of leaving until to-morrow what you can't conveniently do to-day.

---

## GOVERNMENT FAVORS BRANCH BANKING

### President Supports Comptroller of Currency, and Subject May Come Before Congress

(Special to The Monetary Times)

New York, October 11 — The action of the American Bankers' Association in passing a resolution denouncing the branch bank as detrimental to the best interests of the country, does not seem likely to seriously interfere with the extension of the national banking system by means of branches. The President during the past week has let it be known that he stands squarely behind the Comptroller of the Currency in his desire to see the national banks given the right to establish branches in those States which permit State banks and trust companies to exercise a similar right. The President and the Administration according to information in local banking circles are preparing to fight the issue through to a finish and seem willing to take the matter before Congress of an early date.

#### Grain Shipments

Testifying before a special Congressional Committee investigating recent fluctuations of grain prices, Julius Barnes, one time head of the United Grain Corporation, and one of the leading American grain brokers, said that virtually no grain had left Buffalo since the first of September. This, he said, was due largely to conditions on the American railways running out of that city. Local grain brokers with connections both in this country and in Canada tell your correspondent that the difficulty the American railways are experiencing in handling freight is seriously curtailing the shipment of American grain. Many of the export houses are for this reason dealing almost entirely in Canadian grain and shipping it from Montreal.

#### Newsprint Situation

While talk is heard in newsprint circles of a possible shortage of paper before the close of the coming winter, well informed manufacturers are inclined to "pooh-pooh" this suggestion as quite unfounded. There is, they tell your correspondent, ample paper for all needs.

American newsprint manufacturers are deriving considerable comfort from reports they have been receiving lately from Europe in regard to changes in the newsprint situation there. For many months back they have been worrying about European competition in this market. First it was German competition that troubled them; then Swedish and finally Finnish. These three countries were able to land paper in New York at prices which forced American manufacturers to sell in many cases below cost of manufacture.

But if the reports received from investigators in Europe are true, this competition from Europe now seems to be definitely a thing of the past. Russia, according to these investigators, is developing a surprising ability to absorb Finnish newsprint, German competition is largely over, thanks to her inability to get pulpwood, and England is buying about all the paper Norway and Finland have to spare after supplying Russia. The menace of cutthroat overseas competition no longer threatens, if all these reports be true.

---

## SPLENDID CROP IN SASKATCHEWAN

### Threshing Fairly Well Completed—Many Farmers Deeply in Debt—Collections a Problem

(Staff Special)

Moose Jaw, October 9.—Ideal weather has held sway throughout Saskatehewan during the past few weeks and splendid progress has been made with threshing operations. Saskatchewan on the whole has a wonderful crop, probably the best in its history. Yields of 40 and 45 bushels to the acre are common in many parts, and when threshing is completed the yield quite often surpasses expectations.

It has been said that this year's crop would be a debt-paying one, and this is particularly so in Saskatchewan. Practically every line of business is making a dead set now on the farmers to try to get in their money, commencing with the banks, mortgage co.'s, implement firms and other lines of business, and the problem is a more vexing one than it has been for a number of years. Many farmers are so deeply in debt that it is doubtful if many of them will have much left when even a portion of their obligations are met. The main reason for Premier Dunning even mentioning the subject of a moratorium in Sask. was more in the way of a warning to those who were putting forth every effort to make collections that they must not be unduly severe on the farmers of the Province. There may have been a tendency on the part of loan companies and others to do this, but this has been caused on account of farmers trying to evade payment. However it is now felt that in the case of good farmers they are not being pushed unduly if they show any tendency at all to meet their obligations.

#### Real Benefit Not Yet Felt

Business in Regina has not yet begun to feel the real benefit of this year's crop. Collections are still slow, but are showing some improvement week by week. Wholesale houses are doing good business and are booking larger orders this fall than for some years past.

In the district surrounding Moose Jaw splendid crops are reported and on every hand a most optimistic feeling prevails.

The outlook for the next year in Sask. should be better than it has been for several years past. All classes of business and financial men are looking forward with interest to the good results that will accrue from the efforts of the Western Canada Colonization Association. They all feel that the big problem in Western Canada is getting vacant lands settled up and under cultivation.

#### Municipal Taxes

In support of the "Pay Your Taxes" campaign now under way in the Province, Hon. C. M. Hamilton, Minister of Municipal Affairs, makes the following statement:

"There will be far more calls upon the proceeds of the 1922 crop in Saskatchewan than can possibly be met, but to my mind there are certain obligations that should have the right of way. From the proceeds of this year's crop I believe that every farmer that is at all in a position to do so should first pay for those things which have entered into the cost of the crop. In this class of liability I think should be included taxes. Our schools, hospitals and other local institutions are almost as great a necessity in the life of the individual and the community as food and clothing."

# New Board for Canadian National Railways

### Sir Henry W. Thornton, General Manager of Great Eastern Railway of England, Appointed President—Other Directors Are Representatives of Different Business Interests and Geographical Divisions

Announcement was made on October 4, by Premier King of the appointment of a complete new board of directors of the Canadian National Railways. Sir Henry W. Thornton is appointed president. The other members of the board, as announced by the Prime Minister, are as follows: John H. Sinclair, K.C., of New Glasgow, N.S., a former member of Parliament; Richard P. Gough, of the Sellers-Gough Fur Company, Toronto; James Stewart, Chairman of the 1919-1920 Wheat Board, and now President of the Maple Leaf Milling Company; Ernest R. Decarie, former President of the Montreal Civic Commission; Frederick G. Dawson, wholesale merchant, of Prince Rupert, B.C.: Tom Moore, President of the Dominion Trades and Labor Congress, representing Labor on the board; Major Graham A. Bell, Deputy Minister of Railways and Canals, as representative of the department, and Gerard G. Ruel, for some years counsel of the Canadian Northern, and then Canadian National Railways, to act as the board's counsel.

It was explained by the Prime Minister that the new board would later appoint as Vice-Presidents in charge of operation and traffic, respectively, a man from the Grand Trunk and one from the Canadian National.

The resignations of the existing board of directors of the Grand Trunk System were accepted by the Government and the new board was appointed to administer the joint system.

Sir Henry Thornton arrived in Ottawa on October 4 and final arrangements for his appointment were then made. He will return almost at once to England to settle up his affairs there, returning to Canada to take over the direction of the National system within about a month. A contract was signed extending over three years, under which he is to be paid $50,000 per annum. Clauses in the contract, it was stated, give protection to both the Government and to the new president and general manager of the railways in the event of either side wishing to terminate the agreement before the end of three years.

#### Reason for Delay

The new chairman and general manager of the road is a railway executive of wide experience. He is a naturalized British subject, was born in the United States, and received a large part of his railway experience on the Pennsylvania Railway System, probably the busiest line in respect to passenger service in the United States. In 1914 he took over the direction of the Great Eastern Railway in England, from which position he resigned by cable.

In announcing that the board had been appointed, the Prime Minister stated that the delay in making the appointments had been due to the inability to arrange for Sir Henry Thornton to come to Canada before now. He had landed at New York and came direct to Ottawa. The Government had been in communication with him in England through Hon. P. C. Larkin, the Canadian High Commissioner, but it was necessary for him to visit Ottawa before final details could be arranged.

The matter of deciding where the headquarters of the system are to be is left to the incoming board. The new board will have to make the annual inspection of the system, together with officials of the road. This will take place before the return of Sir Henry to England, arrangements to this effect having been made by the new president immediately after his appointment.

The former directors of the Grand Trunk System, whose resignations were accepted are Sir Joseph Flavelle, Major G. A. Bell, J. N. Dupuis, E. L. Newcombe and A. J. Mitchell. The resignations of the old Canadian Northern board are automatically accepted, the order in-council creating the Canadian National System having been the first action taken under legislation passed some time ago to provide for creating the joint system.

The objections which had been raised to the Government going outside of Canada to secure an executive head of the National System were answered by the Prime Minister in the course of his statement to the Canadian Press following the appointments. The Government, he said, had been faced with a difficult problem in regard to taking a man from one of the Canadian roads. If a man from the C.N.R. were chosen there would probably be a charge that the National System would continue to be under Mackenzie and Mann influences. On the other hand, if a man from the C.P.R. had been appointed the charge would have been one of C.P.R. domination. These among other reasons had caused the Government to look about for the best man who could be secured outside, and finally the choice had fallen upon the president appointed.

#### The New Manager

The new general manager of the Canadian National System was born at Logansport, Ind., U.S.A., in November, 1871, and graduated from the University of Pennsylvania (Department of Civil Engineering), with the degree of Bachelor of Science in 1894. He obtained employment with the Pennsylvania Railroad Company in December of the same year as draftsman in the chief engineer's office and held successively the positions of assistant engineer of construction on the Cleveland and Marietta Railway, topographer on various surveys, assistant of engineer corps, division engineer and division superintendent. In 1911 he was made general superintendent of the Long Island Railroad, which had been acquired by the Pennsylvania Railroad Company. In this capacity he had much to do with the opening of the Pennsylvania Railroad terminal in New York, and the organization of the electrical train service on the Long Island Railroad.

While employed as assistant in the engineer corps of the Pennsylvania Railroad, Sir Henry was selected by the then General Manager, L. F. Loree, to develop a students' course in transportation, and, under Mr. Loree's instructions, worked in every department of the railway for a sufficient time to become familiar with its operation.

In April, 1914, he was called to England as general manager of the Great Eastern Railway. This railway enjoys the largest passenger traffic of any railway in the world, it is said, there passing through its principal London terminal, Liverpool Street Station, 76,000,000 passengers per annum, which is about one and one-half times the number of passengers using the principal New York stations.

When war broke out in 1914, the Great Eastern Railway, serving the east coast, became one of the most important military lines of communication. Sir Henry Thornton was made a member of the executive committee of general managers, which, under the direction of the Government, controlled and worked all the English railways.

In 1916 Sir Henry became deputy director of inland water transportation, with the rank of colonel in the Royal Engineers. This department handled all of the inland navigation in Northern France, Egypt and Mesopotamia.

Early in 1917, Sir Henry was sent to Paris as assistant director-general of movements of the railways, and in that capacity represented the director-general and the Army Council in negotiations with the French, Italian and American governments relating to transportation. In December, 1917, Sir Henry was made deputy director-general of the movements of railways, with the rank of brigadier-general, and in 1918 was made inspector-general of transportation with the rank of major-general. In the latter capacity he had charge of army transportation on the continent.

Sir Henry was naturalized as a British subject in March, 1919. In May, 1919, he was gazetted a Knight Commander of the Order of the British Empire. Sir Henry Thornton is also a commander of the Legion of Honor of France, an officer of the Order of Leopold of the Belgians and a holder of the Distinguished Service Medal conferred by the American Government.

The new president and general manager of the system is a member of the Institute of Civil Engineers, the Institute of Transportation, the American Society of Mechanical Engineers and various other scientific bodies.

In his new position Sir Henry will preside over a board with an expenditure almost equal to the ordinary expenditure of the Dominion Government. In 1921 the executors in charge of the two railways which are now combined in the National System spent $343,458,420, while the expenditures of the Dominion charged to consolidated revenue in the last fiscal year totalled $348,145,000. The board will administer 22,000 miles of railway, and in this property the public and the Government have invested $1,582,500,000 without considering cash subsidies amounting to $41,000,000, or land grants.

#### Other Members of Board

The majority of the members of the new Canadian National Railway's board are generally well known throughout Canada. They represent the different sections of the Dominion and also the different interests in Canada.

John H. Sinclair, former member of Parliament for Antigonish and Guysboro, N.S., was a prominent Liberal member of the Commons for many years, taking a prominent part in the debates from 1904 up to the end of the last Parliament. Mr. Sinclair was born in Guysboro county, N.S., and has practiced law at New Glasgow for many years. He was mayor of New Glasgow in 1890-91 and for ten years, from 1894, was a member of the Nova Scotia Legislature. In 1904 he came to the Commons and held a seat until the end of the last Parliament. Mr. Sinclair was not a candidate in the last federal election and the seat was carried by Hon. C. F. McIsaac.

Tom Moore, president of the Canadian Trades and Labor Congress, represents labor on the board. In his capacity as head of Canad's labor organization, Mr. Moore has been prominent in Canada and also has represented the Dominion in several overseas gatherings in connection with the International Labor Office. Mr. Moore is now on his way to Geneva to represent Canada at the forthcoming International Labor Office conference. He has been president of the Trades and Labor Congress for five years. Mr. Moore is English by birth, a carpenter by trade and resides in Ottawa.

James Stewart is well known to Canadians generally as one of the leading authorities on grain-marketing in Canada. Mr. Stewart was chairman of the 1919 Canada Wheat Board and is now president of the Maple Leaf Milling Company. When Parliament last session considered the appointment of a wheat board, the evidence of Mr. Stewart was regarded as the most important of that coming before the parliamentary committee in its deliberations. Mr. Stewart will represent the Prairie Provinces on the new board.

Richard P. Gough, of Toronto, who represents Ontario on the managing body, is a member of the firm of Sellers-Gough, which is one of the largest fur-dealing houses in the world.

Frederick G. Dawson, of Prince Rupert, who represents British Columbia on the board, is a wholesale merchant who conducts an extensive business in Prince Rupert.

Ernest R. Decary came very prominently to the front in Montreal when in 1918 he was appointed by the Quebec Government to be chairman of the Administrative Commission to govern the city. He held that position until the commission was abolished in the autumn of 1921, and was its directing spirit throughout that period of time. He was recognized for his decisiveness of action in handling municipal affairs.

Mr. Decary is a notary by profession. He started in pratice in 1900, and formed the firm of Decary, Barlow and Joron, in 1913. Since his retirement from the City Hall he has been actively engaged in financial matters and is now vice-president and director-general of The Title Guarantee and Trust Company of Canada, Montreal.

Graham A. Bell, Deputy Minister of the Department of Railways, and Gerald G. Ruel, general counsel for the system, complete the board so far as it is now named.

---

## ALBERTA HAIL INSURANCE

At the meeting of the Hail Insurance board of Alberta, held recently at Calgary, Alta., the rate of assessment for hail insurance for 1922 was fixed at 5 per cent. The volume of insurance written in 1922 was not quite as great as that of previous years, due to adverse crop conditions and lower grain prices, and doubtless, also, to the higher rate the board found it necessary to set in 1921.

# The Monetary Times

Trade Review and Insurance Chronicle

OF CANADA

The Monetary Times was established in 1867, the year of Confederation. It absorbed in 1869 The Intercolonial Journal of Commerce, of Montreal; in 1870 The Trade Review, of Montreal; and the Toronto Journal of Commerce.

## THE NORTHERN ONTARIO FIRE

In a country as well wooded and as sparsely settled as Canada, the frequent occurrence of bush fires is unavoidable, especially when the forests are open to the public. The number of bush fires every year probably runs into the thousands. Most of them burn out of their own accord or are put out by rain. Those that show a dangerous tendency are put out by fire rangers or settlers. Once in a while a fire gets beyond control, however, and causes widespread destruction.

As is always the case after a prolonged dry spell, several bush fires were burning along the Temiskaming and Northern Ontario Railway at the beginning of the month. In fact the dry weather had been so general in the east that there was an epidemic of fires in different parts of Quebec and New Brunswick as well as Ontario. On Wednesday of last week a high wind arose near Haileybury and swept several of these small fires together into a conflagration. On Thursday the fire was extinguished by the weather as quickly as it had started, but not before an immense amount of damage had been done. This at least appears to have been the course of events as revealed by newspaper despatches.

The point that is evident is that it was only the chance of the weather that had made the Haileybury fire a conflagration. It might just as easily have been any other of the bush fires that may be found in dry weather. This shows the folly of attempting to prosecute the unfortunate party guilty of starting that particular fire, when there are thousands of others equally careless who escape. Our motor laws are designed to punish carelessness or recklessness regardless of whether damage results, and any law aiming to prevent forest fires must take the form of similar regulations. If such regulations strengthened by fairly stiff penalties, may be formed so as to prevent the fires now starting, the losses from forest fires will be greatly reduced.

The fact that the recent fire took place in an agricultural, not a forest area, removes the responsibility from the shoulders of the forestry officials and places it on those responsible for fire prevention work as a whole. There are sections of well wooded country in old Ontario, and in old sections of other provinces, which might have a similar fire. Appealing to morals seems useless, but a law may prove reasonably effective.

## THE RESOLUTION ON BRANCH BANKS

The attitude of the American Bankers' Association cannot be taken as a criticism of the Canadian banking system, but the opponents of the branch banks in that country searched our methods assiduously for weaknesses to support their cause. It is frequently stated on both sides of the line, that each country has the system best suited to it, but it seems remarkable that two countries so similar in other respects should have such fundamental difference in their banking systems. These differences in fundamentals have in recent years been emphasized by the steps taken to bring them nearer together. The United States, by establishing a federal reserve, introduced a new centralizing force, while the Canadian banks, by pursuing a still more aggressive policy in the establishment of branches, have entered more and more into local enterprises.

If the national banks are right in maintaining that branches are necessary to their success, and if the state banks are right in thinking that such branches would put them out of business, then the Canadian system of Central banks with branches is the best. However, there are too many "ifs" in this argument and in Canada our minds should be open to the possibility of supplementing the present organizations by local institutions, retaining the strength and stability which exists under the present system.

## SAVING FOR THE GOVERNMENT

Employees of the Grand Trunk Railway could save it $4,800,000 yearly, says W. D. Robb, vice-president and general manager. The method, however, is neither ingenious nor startling. It was expounded by Mr. Robb in Toronto last week when he addressed the officials of the Motive Power and Car Departments. He said:—

"I would like to suggest to you officers the advisability of inaugurating in each of your departments a campaign to have each employee 'save and make a dollar a day' for the company. This can be accomplished in several different ways—by the more economical use of material, supplies, stationery, etc.; by greater efficiency in the performance of our daily duties, and by endeavoring to secure more business, passenger, freight and express, for the company.

"If we could get every employee to save even $10 per month in the expenses of the company, this would mean approximately $400,000 per month saving, to say nothing of the additional revenue that can be secured by every employee considering himself or herself a soliciting agent on behalf of the company.

"In the operation of a railway, where the amount you can charge for the service is fixed, or limited, by an outside agency, it requires the greatest and most constant effort on the part of everybody connected with the company to keep down the expenses to a point where the outgo will not be greater than the income, and leave sufficient leeway to take care of fixed charges, improvements, etc. I feel that a great deal can be done in this direction by enlisting the support and co-operation of every individual employee, and the results obtained will reflect to their credit in the final analysis."

The trouble is that this is at once interpreted by the employees as extra work—just another scheme to get more out of them for the money. And that is quite right to some extent, as it is quite often easier to do a thing carelessly than efficiently. In fact, the publicly-owned railways cannot buy more in the way of labor or services for their money than can other concerns. Usually a government gets much less.

## A MUNICIPAL BURDEN

The penalties of falling behind in their current accounts is bearing heavily upon some municipalities in the west. Bank interest accumulates rapidly, for short term money is costly. It serves a useful and sometimes necessary purpose in the early stages of capital expediture, or in meeting current revenues during the early months of the year, but when a heavy overdraft is carried over from year to year there is something wrong. Usually this is due to poor tax collections.

The annual report of the Saskatchewan Department of Municipal Affairs for the year ended April 30 shows that rural municipalities in that province paid out on this account a total of $382,167 compared with $270,516 in 1920 and $191,154 in 1919. The figures referred to, it is pointed out, do not include payment of interest on seed grain, relief and debenture loans. "These interest charges," says J. J. Smith, deputy minister, "constitute a heavy annual drain upon the municipalities of the province and emphasize in a striking manner the importance of the prompt payment of taxes by the ratepayer.

"I am pleased to note," continues Mr. Smith, "a determination on the part of councils to pay greater attention to the matter of tax collections, and with average crop returns this year, I have every reason to hope that the financial position of the municipalities of the province will show a marked improvement within the next year."

The report notes that the largest item of expenditure in the average municipality is for roads and bridges, a total of $3,291,577 having been expended by the rural municipalities for this purpose in 1921.

## A NEW MARKET

In the face of a strong high tariff movement in most countries, reports of negotiations for reciprocal trade between Canada and Australia comes as a welcome exception. Hon. J. A. Robb, Canadian minister of trade and commerce, is leaving shortly via Vancouver. Mr. Robb is proceeding to Australia with the full concurrence of the Commonwealth Government, and the fact that he is assured of a cordial welcome inspires confidence that he will be able to conclude an arrangement. Before Mr. Robb's mission was authorized by the Government steps were taken to ascertain that Australia was prepared to go through to a conclusion with the negotiations, and that the approaching general election in Australia would not in any way affect the negotiations. Premier King, on September 25th, cabled to Premier Hughes to learn if the date suggested by the Dominion Government for a conference there on trade would be acceptable, and if the course was clear for the consummation of an agreement. Premier Hughes, in reply, sent a message, stating that conditions there were propitious for the meeting and that Canada's representative would have the opportunity to confer with Australia's Board of Customs and the Minister of Trade and Customs.

It is understood that the Dominion Government has made clear that the proposed arrangement is to be no one-sided affair; that Canada is as anxious to buy from Australia as she is to sell to Australia, and that in such a understanding between the two Dominions lies plain understanding between the two Dominions lies the hope of fruitful negotiations. Australia it

Canadian preferential arrangement, and trade between Canada and Australia has not grown as much as expected. It is believed that, as a result of the proposed arrangement, the currents of trade each way between the two countries will be set flowing freely to their mutual benefit, especially at a time when both are so sorely in need of fresh outlets. There are many products, it is pointed out, in which a profitable interchange of trade may be built up. Certainly any extension of the principle of reciprocal trade, designed, as it is, to develop the foreign commerce of the Dominion, will be welcomed as a progressive movement.

### VERSATILITY OF INSURANCE.

An English insurance company, it appears, advertised recently for an experienced clerk, salary twenty-one shillings a week, and among the replies received was the following, according to a London paper:—

Dear Sir:—I would respectfully apply for the position you offer. I am an expert in insurance in all its branches. In addition, I converse fluently in Gum Arabic, Gorgonzolo, Zola, and Billingsgate. I write shorthand, longhand, left hand and right hand. I can supply my own typewriter if necessary, and I may mention that I typewrite half an hour in ten minutes—the record for Great Britain. I would be willing also to let you have the services, gratis, of my large family of boys, and if agreeable to you, my wife would be pleased to clean your office regularly without extra charge. The cost of postage for your answer to this application can be deducted from my salary. Please note that if you have a back yard, I would make bricks in my spare time.

### WITHDRAWS BRYANT-ISARD GUARANTEE

#### Norris P. Bryant Claims Agreement Was Not Lived Up to By Trustee

Norris P. Bryant, of Bryant Brothers, Limited, has notified J. L. Thorne, trustee in the case of the failure on March 3rd last of the Toronto Stock Exchange house of Bryant Isard & Co., that he regards as no longer binding the agreement under which he, the former general manager of Bryant Isard & Co., took over the business of the failed house and arranged to pay off the creditors of Bryant Isard & Co. in full.

Mr. Bryant explained that he represented the majority of the creditors of the defunct house. He said that the trustee at present holds $120,000 in cash and additional amounts in securities, available for distribution among the creditors. He declared that the payment of a dividend had been arranged a couple of weeks ago, but that there was a hitch and no payment was made, and states that his present move is more or less in the nature of an effort to force the hand of the trustee.

Mr. Bryant claims that the arrangement under which he agreed to take over the business called for payment of 50 per cent. of unsecured claims, part of which was to come from the sale of assets of the failed firm and the remainder to be raised by Bryant himself. Bryant states that he represents creditors of Bryant Isard & Co. to the extent that if a dividend representing amounts now available were declared by the trustee, he, Bryant, would be able to make good the agreed initial payment of 50 per cent. of the unsecured claims.

Bryant and his attorney stated that not only has the trustee failed to declare any dividend, but that he has called for payment of $50,000 as counsel fees and costs of liquidation. Bryant further claims that the trustee has demanded that his house in Montreal be pledged as security for payment of the creditors' claims.

Placing some stress upon the fact that he was not a registered partner of the firm of Bryant, Isard & Co., Bryant stated that he considered the terms of the agreement had not been fulfilled by the trustee and that he, under the circumstances, does not feel bound by the agreement, to which effect he had notified Mr. Thorne at Toronto.

## *Personal*

FRANK J. PENFOLD has resigned from the staff of Nesbitt, Thomson & Co, Limited.

J. L. JOHNSTON, superintendent of the automobile department for the Dominion of Canada for the British America Assurance Co., has in addition to his duties in that position assumed the task of acting as Ontario superintendent of the fire branch. Mr. Johnston assumed his dual duties on October 1st.

FRANK SCOTT, who recently resigned as vice-president and treasurer of the Grand Trunk Railway, has been elected a director of the firm of Dale & Company, Limited, Montreal.

JULES R. TIMMINS is a new partner in the Montreal Stock Exchange firm which becomes Fortier, Beauvais and Timmins.

HARRY B. WILSON, of Dundas, has joined the Hamilton, Ont., stock brokerage firm of Hammond & Co., which will now be known as Wilson, Hammond & Co.

## *Obituary*

HON. J. A. STEWART, former Minister of Railways, died in Montreal, on October 7th. John Alexander Stewart was born in Renfrew, and was educated at the Perth Public School and Collegiate Institute and Osgoode Hall. He held also the degree of L.L.B. from the University of Ottawa. He was called to the Bar in 1895, and was appointed King's Counsel in 1921. The late Mr. Stewart was Mayor of Perth for the years 1900 and 1901 and for 1903 and 1904. He also served as Chairman of the Board of Education. He was president of Henry K. Wampole & Co. Ltd.; the Andrew Jergens Co. Ltd.; Perth Shoe Co., Ltd., and the Perth Improvement, Ltd. He was a director of the Frost & Wood, Ltd.

INVERNESS WILLIAM WATTS, Canadian life superintendent of the Royal Insurance Company, was killed near Portage la Prairie, Manitoba, on October 5th. The late Mr. Watts, whose home was in Montreal, was born in England 47 years ago.

ROBERT A. LYON, of the firm of Lyon & Plummer, members of the Toronto Stock Exchange, died on October 10, at the age of 49. Mr. Lyon was born in Manitoulin Island, his father having been the first member of the Provincial Legislature for the district of Algoma, which he represented for nine years. When he was about 16 years of age, Robert A. Lyon entered the Sault Ste. Marie Branch of the Imperial Bank. He became its manager for several years, and later was inspector of the same bank for Northwestern Ontario. In 1908 he left the banking business and organized the firm of Lyon & Plummer in Toronto.

### REPUBLIC OF HAYTI BONDS

As previously intimated in these columns, the National City Company, which has already marketed in Canada portions of issues of such foreign countries as France, Switzerland, Denmark and Japan, is now offering in this country and the United States $16,000,000 Republic of Hayti 6 per cent. 30 year bonds. Up to the present time Hayti has done all its external financing in France. These are now to be retired, so that the loan issued now will be the sole external obligation of the island. These bonds are issued under the direction of, and in agreement with the United States Government. They are secured by a first lien on customs receipts and internal revenues of Hayti, subject only to an allowance of 5 per cent. of customs for financial administration. The loan is to be used in accordance with the terms of a treaty between the United States and Hayti, wherein that Republic agrees not to increase its public debt except by previous agreement with the President of the United States. The hypothecated revenues are under the control of an officer nominated by the President of the United States, and this control remains in force during the life of the new loan.

The issue, it is announced, has met with a favorable reception, the New York allotment being completely taken up, and the Montreal and Toronto allotments almost completely.

### THE ONTARIO HOLOCAUST

#### From the Montreal "Gazette"

What has been characterized as the worst disaster that has yet overtaken Northern Ontario as the result of one of the most destructive fires in the history of the province and which has culminated in a death toll of fifty souls, with an approximate general loss of $4,000,000, is a staggering catastrophe of such magnitude that it is difficult at first sight to properly estimate its greatness or seriousness. That it is a most appalling calamity is obviously apparent, and raises at once the question how to prevent such happenings in future. The harrowing tales of privations and sufferings of those who have been compulsorily rendered homeless are heart-rending in the extreme and call for the most profound and generous sympathy. Is the reduction of Canada's fire waste a problem or is it merely a question? According to the dictionary, a question only becomes a problem if the answer is exceedingly difficult to discover. A logical conclusion is that the main difficulty in curtailing Canada's fire waste is psychological.

The principle of individual liability for preventable fire is as old as civilization. The Mosaic Code promulgated in the Book of Exodus thus enunciates the broad doctrine: "If fire breaks out and catches in thorns so that the stalks of corn or the standing corn on the field be consumed therewith, he that kindleth the fire shall surely make restitution." The equity of this principle is so obviously reasonable that one finds difficulty in expressing its limited adoption. The true significance of fires caused by negligence is more clearly apparent when we compare them with fires caused by the incendiary. Ninety-four per cent. of the annual fire losses in Canada arises from direct or contributory negligence, whilst only six per cent. is attributable to incendiarism. The Prime Minister of Canada says that "While we cannot reasonably expect that all fires can be prevented, those best informed are of the opinion that a more general recognition by property owners of their responsibilities in the matter will reduce the losses by more than one-half." Some time ago, suggestions were made for air patrols, but in how far the scheme has definitely materialized is not well known; nor yet is it apparent what actual service they will render. Air patrol might render effective aid to the fire rangers if carried out methodically and regularly.

Lists of "donts" have been published again and again to prevent forest fires. It is wanton waste to see millions of feet of valuable timber going up in smoke. Careless campers have been blamed and, doubtless, rightly in many cases. The Dominion Forestry Branch has published rules to help the avoidance of fires which embrace the extinguishing of matches and camp fires by those frequenting the forests and the avoidance of the throwing away of live pipe ashes, cigar and cigarette stumps. There seems to be a mania "to lock the stable door when the horse has been stolen." If Hector and Priam had negotiated a loan from the Assyrians for the rebuilding of Troy when the Greeks first besieged it and had then evacuated the city until the waste was complete, they would have acted no more foolishly than those who refuse to take into consideration the seriousness of and necessity for taking positive preventive measures to avoid similar catastrophes to that which has wrought such havoc in our sister province. A clarion call should be issued for a new moral awakening and a clearer perception of the duties of Canadian citizenship, which certainly demand unified effort towards the minimizing of forest fires.

### TRUSTEES IN BANKRUPTCY

The following have been appointed as authorized trustees under the Bankruptcy Act: Joseph Lavoie, Montreal; Edwin Percy Baker, Vancouver; William Andrew Baker, Fort Frances, Ont.; James Hingston Doyle, Nelson, B.C.

### CONSOLIDATED ASBESTOS

Consolidated Asbestos, Limited, announce that C. J. Stover, J. R. Douglas, Henry Joseph, Mortimer B. Davis, Jr., and Samuel Davis have been added to the board of directors, and that C. J. Stover has been appointed president and managing director in the place of Sir John W. Carson, who has resigned on account of ill-health. Mr. Stover has until now been located in Philadelphia and for many years has been prominently connected with the asbestos industry both in the United States and Canada.

The Certainty of Payment

—is one of the unquestioned advantages of a modern Life Insurance Policy over any other form of protective investment. Life Insurance had its origin in the scientific study of the facts of human mortality. It does not gamble upon the probabilities of life of the individual, but works with certainty upon the laws of established averages.

Uninsured, you daily run the risk of leaving your dependents unprovided for. Insured, that possibility is changed into the certainty of receipt of a definite sum to cover their needs.

Write stating age at nearest birthday, and we will send you rates and particulars of inexpensive policies suited to your requirements.

## CANADIAN PRESIDENT UPHOLDS SYSTEM

### Sir Frederick Williams-Taylor Summarizes the Economic Position of Canada and Part Banks Play

In a bankers' convention section of the New York Evening Post on October 4 there was a statement by Sir Frederick Williams-Taylor, general manager of the Bank of Montreal and president of the Canadian Bankers' Association, regarding Canada's present economic system and its banking system. Regarding the latter, he says:—"No country has a system better adapted to its requirements. It has established our name abroad as that of a solid, stable country, remarkably free from panics and financial crises. It has stood the test of time—through periods of business depression, through the inflation caused by the American Civil War, through the great war and the troublous years of so-called peace—in a word, through the worst of times as well as the best of times. We have had our banking troubles, but the system is not responsible for that. No system can render infallible the men who work it, though a good system like ours can and does reduce to a minimum the unfortunate effects of personal fallibility."

### Progress in Deflation

Dealing with the general position of the country the statement continues:—

"There has been substantial progress made in deflation in Canada since the high record period reached at the end of the war. At the end of November, 1918, the Dominion note issue amounted to $337,000,000, while bank note issues stood at $235,000,000. At the end of July, 1922, the former stood at $231,000,000, while the latter had lessened to $161,000,000, a total decrease of over 31 per cent. At the end of November, 1918, the gold and subsidiary coin holdings of the banks and the gold holdings of the Government against Dominion note issues (excepting Dominion notes in central gold reserves, against which bank notes are issued) were 40 per cent. of the total of the two issues. A like comparison for the end of July, 1922, shows gold and subsidiary coin holdings of 49 per cent. of the total note currency, a substantial improvement.

"At the end of October, 1920, the total assets of the banks reached their maximum, $3,155,000,000. In common with banking in other countries, there has been a gradual liquidation until at the end of July, 1922, the total assets stood at $2,607,000,000.

"Deposits in Canadian banks, which at the end of October, 1920, stood at $2,298,000,000, have been wonderfully well maintained, in view of the process of liquidation, standing at the end of July last at $2,015,000,000.

### Bank's Liquid Position

"The banks, as a whole, are in a comfortable position, so far as liquid resources are concerned. What are known among Canadian bankers as "ouick assets" were on July 31 last slightly over 50 per cent. of the liabilities to the public. There had been a gradual improvement during the preceding months. The result is, as usual, the Canadian banks find themselves well able to finance the year's crop.

On August 30, 1922, the Canadian dollar reached parity with the American dollar, for the first time in almost four years. This fact better indicates Canada's economic position than pages of dissertation on the resources, industries, and productivity of the country.

"The export of the 1917 surplus crop and large expenditures in Canada of outside money during the period of crop export for food supplies and war materials turned the exchange in Canada's favor, and in the September-November part of that year New York funds in Montreal went to a small discount.

### Trade and Exchange

"The large volume of imports during the last year of the war and subsequently, purchased at inflated prices during a period of great commercial activity and expansion, reversed this movement, until by a steady climb the premium in Canada on the American dollar in December, 1920, reached 19 per cent. From that climax there has been a gradual recession. Prices for imported commodities began to fall, buying gradually lessened, while exports relatively increased. New loans, too, in the United States and money sent into Canada for investment have been a factor, with the beneficent result that Canada's dollar is par in New York, the first national currency of all the belligerent countries to attain that eminence since

"The following tabulation, from official sources, substantiates the foregoing statements with regard to foreign trade:

Twelve months ended July 31 (figures represent millions of dollars):

| | 1920 | 1921 | 1922 |
|---|---|---|---|
| Exports.. .. .. .. .. .. | 1,264 | 1,079 | 781 |
| Imports.. .. .. .. .. .. | 1,253 | 1,020 | 730 |
| Excess of exports over imports .. .. | 11 | 59 | 51 |

### Revenue and Debt

"The Minister of Finance, by increasing the sales tax upon manufactured goods and goods sold by wholesale and by increase in the stamp duties and other taxes, is endeavoring to make income balance outgo, though, when he delivered his Budget speech in the latter part of May last, he was not hopeful that this would be accomplished during the current year. Already, however, there are indications that, with improved trade and the yields of new taxation, the outcome will be better than the Minister anticipated, for at the end of August the net debt, as compared with March 31, has been decreased by $39,000,000. The net debt at August 31 stood at $2,388,000,000.

"Much has been said with regard to the effect of the tariff, which has just received the assent of President Harding, upon Canadian farm products. The measure obviously was not designed to favor the Canadian farmer, and it will no doubt adversely affect his interests. But the world market price for wheat is, after all, fixed in Liverpool, and Canadian wheat will meet wheat from the United States in that market upon even terms, with whatever added advantages its superior quality in some respects possesses. Despite the high tax, a portion of the surplus wheat will find its way across the border to the bins of Minneapolis millers, who require Canadian No. 1 northern for mixing purposes in order that their product may hold its place in domestic and foreign markets. We leave it to economic casuists to say who will be the harder hit by the wheat duty, the consumer in the United States or the producer in Canada."

## CANADIAN ADDRESSED CONVENTION

In a brief speech at the American Bankers' Association Convention, Sir Frederick Williams Taylor, President of the Canadian Bankers' Association, said:—

"Whether or not the branch banking system should or should not be adopted by the United States is not for me to say. I have not been asked for my opinion and therefore any suggestion from me on the subject would be in bad taste. It seems a pity that Mr. Frame has not exercised equal restraint. For him to gratuitously condemn the Canadian branch banking system and allege disadvantages which Canada has suffered accordingly can be described in one word, a word used only in diplomacy, a word which the Canadian press might properly print in capital letters, ABRACADABRA. In other words, Mr. Frame's comments are based on wrong premises and incorrect conclusions.

"Taking the northwest of Canada as an example, here we have an area, let us say of 800 miles in width and two to four hundred miles north and south, producing the best wheat on earth. The population is two million. There are nearly 1,300 branches of powerful Canadian banks, not merely willing, but in eager competition to lend money to any farmer, merchant, or manufacturer deserving of credit, on a proper banking basis. Furthermore, the total loans of all the banks largely exceed the deposits in our western Provinces. There is no agricultural district in the wide world enjoying better banking facilities than in these our three Provinces of Alberta, Saskatchewan and Manitoba. No alternative form of banking is practicable. It is inconceivable that any system could be devised that would afford anything approaching similar banking facilities."

## TAX ON RACING

Tax returns from the Fall meet of the Ontario Jockey Club, as announced by the provincial treasury department, are quite substantial. The amount wagered at the meet was $3,611,661 and the tax was $180,583.

Imposing as these returns are, they yet show a decided slump from the corresponding totals for the Spring meet held this year. At that event the total amount of the wagers reached the sum of $4,365,802 and the Government's

## RESOLUTION ON BRANCH BANKING

### Seventeen Central Banks in Canada "Skim The Cream" Says Andrew J. Frame

The following is the text of the resolution passed at the annual convention of the American Bankers' Association dealing with branch banking:—

"Resolved, By the American Bankers' Association that we view with alarm the establishment of branch banking in the United States, and the attempt to permit and legalize branch banking; that we hereby express our disapproval of and opposition to branch banking in any form by state or national banks in our nation.

"Resolved, That we regard branch banking or the establishment of additional offices by banks as detrimental to the best interests of the people of the United States. Branch banking is contrary to public policy, violates the basic principles of our government, and concentrates the credit of the nation and the power of money in the hands of a few."

### A Critic's Views

Andrew J. Frame, chairman of the board, Waukesha National Bank, Waukesha, Wis., launched a bitter attack against branch banking in the United States in an open discussion, before the convention of the American Bankers Association. Mr. Frame has long been an opponent to branch banking under the Canadian System. His remarks, in part, follow:

"To our mind the paramount question before the American people today seems to be, does the doom of the 30,000 independent banks of the U. S. impend? The proofs seem conclusive that these banks have done more to upbuild this powerful nation than all the cream skimming monopolistic banks have done for other nations. If so, this nation's greatest progress is at stake.

"In Wisconsin as one of the chief sinners, I was chairman of a banking committee that drew the statute which, thanks to our splendid bank commissioners administration of the law, has resulted in but three small failures in nineteen years wherein a depositor has lost a dollar of his capital! I have also seen old world banking recede from some independent banking freedom, to monopolistic banking, colossal failures and appalling losses to depositors, which should be object lessons to warn our statesmen to pause before handing over our destinies to the tender mercies of any autocratic banking power. May we ask, has not autocracy an oppression wrecked the equilibrium of the whole world? We might concede some small advantages may accrue to a favored few under branch banking but in the language of Lincoln the greatest good to the greatest number would be practically eliminated. There are some natural monopolies. Surely branch banking is not one of them.

## DOMINION GOVERNMENT SAVINGS BANKS

According to the August statement of the Dominion Government Savings Banks, both deposits and withdrawals have declined from the previous month. Deposits are lower from $99,365 to $87,432, and withdrawals have declined from $184,821 to $158,127.

The following is a comparison of balances as at the end of July and August:—

| | July 31 | August 31 |
|---|---|---|
| Victoria .... .... .................. | $1,048,431 | $1,044,276 |
| Charlottetown .... .... ...... | 1,703,881 | 1,681,178 |
| St. John ... .... ................... | 4,198,931 | 4,175,843 |
| Barrington .... .... ............ | 61,303 | 61,305 |
| Halifax .... .... ................... | 2,223,209 | 2,202,828 |
| Kentville .... .... ................ | 222,843 | 222,646 |
| Sherbrooke .... .... .............. | 54,624 | 54,451 |
| | $9,513,224 | $9,442,530 |

## NEW BROKERAGE PARTNER

Announcement is made that Jules R. Timmins has entered into partnership in the firm of Fortier, Beauvais & Co., members of the Montreal Stock Exchange. Mr. Timmins is a son of L. Henry Timmins, of Hollinger Consolidated Gold Mines fame, and has in the past been associated with the management of that property as a member of the board, being the third member of the Timmins family to be connected

# Your Business Abroad

## OFFICIALS APPROVE APPOINTMENT

### Heads of Pennsylvania Railroad and of Railway Executives Pay Tribute to Sir Henry Thornton

The Pennsylvania Railroad Company and the United States Association of Railroad Executives have congratulated the Dominion Government upon the appointment of Sir Henry W. Thornton as president and chairman of the management board of the Canadian Government Railways. The prime minister has received the following from the Pennsylvania Railroad:—

"Sir Henry W. Thornton, whose appointment as president and chairman of the management board of the Canadian Government railways was announced this morning, received his training on the Pennsylvania Railroad System. In view of this fact, Samuel Rea, president of the Pennsylvania Railroad, has received many inquiries for an expression of views on Sir Henry W. Thornton's new responsibilities.

"The Government and people of Canada are to be congratulated upon the appointment of Sir Henry W. Thornton as head of the Canadian National Railways System. I believe that no better selection could have been made for that important office. It is a distinct experiment upon which Canada has embarked in an effort to make a Government railroad successful. If it can be accomplished under any auspices, I believe it can under the leadership of Sir Henry W. Thornton. He has had the great advantage of having been trained in the United States, whose railroads in operation and management are similar to those of Canada. In addition, he has had years of experience during an extraordinary period, on one of England's important railway systems, the Great Eastern. He also had an important part in supervising railway operations during the war. Sir Henry W. Thornton is now a distinguished British subject, and will, I am sure, meet with a warm welcome in Canada. American railroad executives will, I feel sure, welcome the appointment because they know that he brings to his great task that full knowledge and experience of the transportation situation that will be mutually advantageous to both countries."

T. Dewitt Cuyler, chairman of the Association of Railway Executives, has forwarded the following message to the prime minister:—

"May I congratulate you on the appointment of Sir Henry Thornton as head of the Canadian National Railroad. I have known him for many years, and he is admirably equipped for the post."

## GRAND TRUNK APPOINTMENTS

In official circulars issued on October 10, and approved by W. D. Robb, vice-president and general manager of the Grand Trunk, the following appointments are announced:—

D. E. Galloway, to be assistant vice-president, G.T.R. System.

C. C. Bowker, to be operating manager (and assume the duties heretofore performed by the vice-president in charge of operation) on lines east of the Detroit and St. Clair Rivers.

C. Manning, to be assistant operating manager, lines east of the Detroit and St. Clair Rivers.

D. E. Galloway, who has been promoted to be assistant vice-president was born in 1882, and entered the service of the Grand Trunk Railway at Hamilton on February 1, 1901. The late Charles M. Hays appointed Mr. Galloway to be his secretary in November, 1904. Mr. Galloway was thus placed in close touch with the affairs of the Grand Trunk System and its subsidiary companies during the railway's most striking period of development. After occupying the position of secretary for seven years, Mr. Galloway was appointed by Mr. Hays in October, 1911, to be assistant to the president. This office Mr. Galloway has filled under two succeeding presidents, E. J. Chamberlin and Howard G. Kelley.

Charles Manning began his railroad career with the Great Western Railway at Bristol, England. In 1883 he entered the office of the Mechanical Superintendent of the Grand Trunk at Montreal.

C. G. Bowker, who for several years held the position in Toronto of general superintendent of the Grand Trunk, will be succeeded in the Toronto office by R. S. Fish, who has been general superintendent at Montreal.

The position vacated by Mr. Fish in Montreal will be filled by the appointment of W. R. Davidson, of London.

## *Bank Branch Notes*

James Kinear, has been appointed manager of the new branch of the Bank of Montreal, recently opened at the Chateau Frontenac, Quebec.

The Albert Street Branch, Stratford, of the Bank of Montreal, formerly the Merchants Bank of Canada, has been absorbed into the new main offices of the bank, Downie street, Stratford.

Transfers among Home Bank managers are as follows:—

J. T. Belcher, who has been manager of the West Toronto branch since 1909, has been granted leave of absence, and H. S. Lancefield, formerly manager at the Yonge and Charles Street Branch will take charge at West Toronto during Mr. Belcher's absence.

H. Denneny has been appointed manager of the branch at St. Clair and Glenholme Avenues.

N. H. Layton, who was formerly in charge of the St. Clair branch, comes to the Broadview and Dundas Branch, and J. M. De la Haye, formerly manager of the Yonge and Charles Streets Branch.

## NEW TRUST COMPANY FORMED

The organization of the St. John and Quebec Railway Trust Company was formally completed at the final session of the New Brunswick Government meeting on September 19, when Premier Foster was named as president, Hon. J. E. Michaud as secretary, and Attorney-General J. P. Byrne as treasurer of the board of directors.
